**The Dilemmas of Statebuilding** Roland Paris,Timothy D.

Sisk,2009-01-13 This book explores the contradictions that emerge in international statebuilding efforts in war-torn societies. Since the end of the Cold War, more than 20 major peace operations have been deployed to countries emerging from internal conflicts. This book argues that international efforts to construct effective, legitimate governmental structures in these countries are necessary but fraught with contradictions and vexing dilemmas.. Drawing on the latest scholarly research on postwar peace operations, the volume: addresses cutting-edge issues of statebuilding including coordination, local ownership, security, elections, constitution making, and delivery of development aid features contributions by leading and up-and-coming scholars provides empirical case studies including Afghanistan, Cambodia, Croatia, Kosovo, Liberia, Sierra Leone,

South Africa, and others presents policy-relevant findings of use to students and policymakers alike. *The Dilemmas of Statebuilding* will be vital reading for students and scholars of international relations and political science. Bringing new insights to security studies, international development, and peace and conflict research, it will also interest a range of policy makers.

**The Political Economy of Reforms and the Remaking of the Proletarian Class in China, 1980s-2010s** Shan Shanne Huang, 2023-01-19 This book comprehensively investigates the position of China's working class between the 1980s and 2010s and considers the consequences of economic reforms in historical perspective. It argues the case that, far from the illusion during the Maoist period that a new society had been established where the working classes held greater political and economic autonomy, economic reforms in the post-Mao era have led to the return of traditional Marxist proletariats in China. The book demonstrates how the reforms of Deng Xiaoping have led to increased economic efficiency at the expense of economic equality through an extensive case study of an SOE (state-owned enterprise) in Sichuan Province as well as wider discussions of the emergence of state capitalism on both a micro and macroeconomic level. The book also discusses workers' protests during these periods of economic reform to reflect the reformation of class consciousness in post-Mao China, drawing on Marx's concept of a transition from a 'class-in-itself' to a 'class-for-itself'. It will be valuable reading for students and scholars of Chinese economic and social history, as well as political economy, sociology, and politics.

*Strategies for Peace* Volker Rittberger, Martina Fischer, 2008-07-23 How can sustainable peace be achieved? The

book identifies potential supranational, state and non-state actors involved in peacebuilding processes. Further - more, it develops strategies to address the problems and dilemmas of international peacebuilding. An important contribution to a highly topical debate. Hopes for a less conflict-prone world after the end of the Cold War were bitterly disappointed. Instead, the international community is faced with protracted wars and violent conflicts today. In addition, social, economic and cultural insecurities as well as fragile statehood challenge the post-Westphalian environment. As a result, scholars and policy-makers alike are trying to develop viable strategies for sustainable peace. The book contributes to this debate, as it illustrates current research results on the topic and addresses the complex problems and dilemmas that various international peace - building actors are confronted with.

**Understanding Non-State Actors** Eran Zohar, 2023-10-23  
Understanding Non-State Actors aims to reduce the scarcity of academic literature on armed non-state actors (NSAs) that have always been a part of world politics and wars. This monograph offers, possibly for the first time, a systematic historical review as well as a substantive theory of NSAs and their arming efforts. From the Jewish rebellions against Rome to the war between the Ukrainian separatists and the Ukrainian government, NSAs' weapons acquisition has been vital for the build-up of their force, enabling both the employment of that force and its sustainability. While weapons are not necessarily the most important factor in military build-up, NSAs need weapons to fight, and revolts usually erupt after the organizers have acquired a certain number of weapons. Conversely, many revolts lose momentum and operations are not carried out, or turn ineffective, due to shortages of arms and ammunition. A major theme of this

monograph is that in spite of dramatic political and technological changes, armed NSAs in different periods have employed similar methods to acquire weapons. Self-production, looting and stealing, external support, and the arms trade were always the major ways for NSAs to acquire weapons, though the importance of each method and the type of arms has changed remarkably over time. Understanding Non-State Actors discusses the factors – political, social, cultural, technological, and organizational – that have both facilitated and constrained the ability of NSAs to acquire arms. Especially, lecturers and students of Military, Terrorism, Conflict studies, War and peace studies will benefit from this study.

Palgrave Advances in Peacebuilding O. Richmond, 2010-01-20  
The quality of the peace arrived at via liberal peacebuilding approaches has been poor. The related statebuilding praxis has generally been unable to respond to its critics. What is at stake is a recognition of peacebuilding's everyday political, social, economic, and cultural dynamics. This indicates the emergence of a post-liberal form of peace.

*Iraq, Judging Dujail* Nihal Bhuta, 2006  
The Iraqi High Tribunal (HT) has the daunting task of bringing to justice those responsible for grave human rights violations committed in Iraq under Ba'thist government. But at the same time, the court is a newly created institution in a recently-reconstituted legal system, in which lawyers and judges were isolated from developments in international criminal law and had no experience in investigating and trying complex international crimes. The capacity of the IHT to fairly and effectively prosecute international crimes has been questioned since its creation under the U.S.-led occupation.

**Long Island Sound** James S. Latimer, Mark A. Tedesco, R. Lawrence Swanson, Charles Yarish, Paul E. Stacey, Corey Garza, 2013-11-22 The U.S. Ocean Commission Report identified the need for regional ecosystem assessments to support coastal and ocean management. These assessments must provide greater understanding of physical and biological dynamics than assessments at global and national scales can provide but transcend state and local interests. This need and timeliness is apparent for Long Island Sound, where a multi-state regional restoration program is underway for America's most urbanized estuary. Synthesis of the Long Island Sound ecosystem is needed to integrate knowledge across disciplines and provide insight into understanding and managing pressing issues, such as non-point sources of pollution, coastal development, global climatic change, and invasive species. Currently, there is a need for a comprehensive volume that summarizes the ecological and environmental dynamics and status of Long Island Sound and its myriad ecosystems. It has been 30 years since a comprehensive summary of Long Island Sound was prepared and 50 years since the pioneering work of Gordon Riley. Major advances in estuarine science are providing new insights into these systems, and yet, the condition of many estuaries is in decline in the face of continuing coastal development. There is an opportunity to lay a foundation for integrative coastal observing systems that truly

provide the foundation for improved decision-making. This book will provide a key reference of our scientific understanding for work performed over the past three decades and guide future research and monitoring in a dynamic urbanized estuary.

*The Adventures of Ulysses* Bernard Evslin, 2023-04-13 The legendary adventures of the Greek king's epic journey come to life in a modern retelling of The Odyssey that's "an unmitigated delight" (School Library Journal). In their ten-year siege of Troy, the Greeks claim victory thanks to the cunning wit of Ulysses, King of Ithaca, who devised the infamous Trojan Horse. Now, with the epic war finally finished, Ulysses sets sail for home—but his journey will be long and arduous. Having angered Poseidon, god of the sea, Ulysses and his men are thrown off course by a raging storm and forced to wander the perilous world for another ten years. On his epic trek, Ulysses must match wits and strength with man-eating Sirens, a towering Cyclops, the witch-goddess Circe, and a slew of other deadly foes. Meanwhile, in Ithaca, his wife, Penelope, and son, Telemachus, contend with a rowdy mob of suitors who have taken over their home in an attempt to usurp the absent ruler's place.

*New Perspectives in Partial Least Squares and Related Methods* Herve Abdi, Wynne W. Chin, Vincenzo Esposito Vinzi, Giorgio Russolillo, Laura Trinchera, 2013-10-17 New Perspectives in Partial Least Squares and Related Methods shares original, peer-reviewed research from presentations during the 2012 partial least squares methods meeting (PLS 2012). This was the 7th meeting in the series of PLS conferences and the first to take place in the USA. PLS is an abbreviation for Partial Least Squares and is also sometimes expanded as projection to latent structures. This is an approach for modeling relations between data matrices of different types of variables measured on the same set of objects. The twenty-two papers in this volume, which

include three invited contributions from our keynote speakers, provide a comprehensive overview of the current state of the most advanced research related to PLS and related methods. Prominent scientists from around the world took part in PLS 2012 and their contributions covered the multiple dimensions of the partial least squares-based methods. These exciting theoretical developments ranged from partial least squares regression and correlation, component based path modeling to regularized regression and subspace visualization. In following the tradition of the six previous PLS meetings, these contributions also included a large variety of PLS approaches such as PLS metamodels, variable selection, sparse PLS regression, distance based PLS, significance vs. reliability, and non-linear PLS. Finally, these contributions applied PLS methods to data originating from the traditional econometric/economic data to genomics data, brain images, information systems, epidemiology, and chemical spectroscopy. Such a broad and comprehensive volume will also encourage new uses of PLS models in work by researchers and students in many fields.

*Sedation and Analgesia for Diagnostic and Therapeutic Procedures* Shobha Malviya, 2003-01-06 Physicians, nurses, and safety experts comprehensively review sedation and analgesia to provide a completely new reference guide to safe sedation practices consistent with existing guidelines. Starting with an integrated review of the basic physiology and neurobiology of the sedated state, the authors proceed through clinical guidelines and practices, and conclude with an examination of quality-outcome measures and processes. They also review current mandates for safe sedation practices and address the key clinical issues of pharmacology, monitoring, and recovery. Special tables and figures throughout the book summarize protocols, regulatory requirements, recommended dosages, monitoring requirements, and quality assurance tools.

Empowerment and Poverty Reduction Deepa Narayan-

Parker,2002-01-01 This publication offers a framework for the empowerment of people living in poverty throughout the world that concentrates on increasing people's freedom of choice and action to shape their own lives. Based on analysis of practical experiences, the book identifies four key elements to support empowerment: information, inclusion and participation, improved accountability and local organisational capacity. This framework is then applied to five areas of action to improve development effectiveness: provision of basic services, improved local governance, improved national governance, pro-poor market development, and access to justice and legal aid. It also offers twenty 'tools and practices' which concentrate on a wide-range of topics to support the empowerment of the poor.
