Institute of Medicine,Committee on Enhancing Federal Healthcare Quality Programs

*Leadership by Example* Institute of Medicine, Committee on Enhancing Federal Healthcare Quality Programs, 2003-05-21 The federal government operates six major health care programs that serve nearly 100 million Americans. Collectively, these programs significantly influence how health care is provided by the private sector. *Leadership by Example* explores how the federal government can leverage its unique position as regulator, purchaser, provider, and research sponsor to improve care - not only in these six programs but also throughout the nation's health care system. The book describes the federal programs and the populations they serve: Medicare (elderly), Medicaid (low income), SCHIP (children), VHA (veterans), TRICARE (individuals in the military and their dependents), and IHS (native Americans). It then examines the steps each program takes to assure and improve safety and quality of care. The Institute of Medicine proposes a national quality enhancement strategy focused on performance measurement of clinical quality and patient perceptions of care. The discussion on which this book focuses includes recommendations for developing and pilot-testing performance measures, creating an information infrastructure for comparing performance and disseminating results, and more. *Leadership by Example* also includes a proposed research agenda to support quality enhancement. The third in the series of books from the Quality of Health Care in America project, this well-targeted volume will be important to all readers of *To Err Is Human* and *Crossing the Quality Chasm* - as well as new readers interested in the federal government's role in health care.

**Supervision in the Hospitality Industry** John R. Walker, Jack E. Miller, 2015-12-29 *Supervision in the Hospitality Industry*, 8th Edition focuses on the different roles of employees from beginning leaders, newly promoted supervisor, or anyone planning a career in the hospitality field. A market leader, this text is widely used by thousands of students training for a career in the hospitality industry and current hospitality supervisors alike. Supervision is unique in that it does not solely rely on the supervisor's point of view; instead, it considers the viewpoints of all levels of associates to create an informed picture of management and supervision in the hospitality industry.

*Matchmakers* David S. Evans, Richard Schmalensee, 2016-05-03 Many of the most dynamic public companies, from Alibaba to Facebook to Visa, and the most valuable start-ups, such as Airbnb and Uber, are matchmakers that connect one group of customers with another group of customers. Economists call matchmakers multisided platforms because they provide physical or virtual platforms for multiple groups to get together. Dating sites connect people with potential matches, for example, and ride-sharing apps do the same for drivers and riders. Although matchmakers have been around for millennia, they're becoming more and more popular—and profitable—due to dramatic advances in technology, and a lot of companies that have managed to crack the code of this business model have become today's power brokers. Don't let the flashy successes fool you, though. Starting a matchmaker is one of the toughest business challenges, and almost everyone who tries to build one, fails. In *Matchmakers*, David Evans and Richard Schmalensee, two economists who were among the first to analyze multisided platforms and discover their principles, and who've consulted for some of the most successful platform businesses in the world, explain how matchmakers work best in practice, why they do what they do, and how entrepreneurs can improve their chances for success. Whether you're an entrepreneur, an investor, a consumer, or an executive, your future will involve more and more multisided platforms, and *Matchmakers*—rich with stories from platform winners and losers—is the one book you'll need in order to navigate this appealing but confusing world.

**Achieving the Paris Climate Agreement Goals** Sven Teske,2019-02-01 This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.
