Fostering Rapid Advances in Health Care Institute of Medicine, Board on Health Care Services, Committee on Rapid Advance Demonstration Projects: Health Care Finance and Delivery Systems, 2002-12-19 In response to a request from the Secretary of the Department of Health and Human Services, the Institute of Medicine convened a committee to identify possible demonstration projects that might be implemented in 2003, with the hope of yielding models for broader health system reform within a few years. The committee is recommending a substantial portfolio of demonstration projects, including chronic care and primary care demonstrations, information and communications technology infrastructure demonstrations, health insurance coverage demonstrations, and liability demonstrations. As a set, the demonstrations address key aspects of the health care delivery system and the financing and legal environment in which health care is provided. The launching of a carefully crafted set of demonstrations is viewed as a way to initiate a building block approach to health system change.

Sold Out Alex Molnar, Faith Boninger, 2015-08-07 If you strip away the rosy language of “school-business partnership,” “win-win

situation,” “giving back to the community,” and the like, what you see when you look at corporate marketing activities in the schools is example after example of the exploitation of children for financial gain. Over the long run the financial benefit marketing in schools delivers to corporations rests on the ability of advertising to “brand” students and thereby help insure that they will be customers for life. This process of “branding” involves inculcating the value of consumption as the primary mechanism for achieving happiness, demonstrating success, and finding fulfillment. Along the way, “branding” children – just like branding cattle – inflicts pain. Yet school districts, desperate for funding sources, often eagerly welcome marketers and seem not to recognize the threats that marketing brings to children’s well-being and to the integrity of the education they receive. Given that all ads in school pose some threat to children, it is past time for considering whether marketing activities belong in school. Schools should be ad-free zones.

Unplanned Abby Johnson, 2011-01-11 When Abby Johnson, director of a Planned Parenthood clinic in Texas, walked across the road in October 2009 to join the Coalition for Life, she made national headlines. In **Unplanned**, she tells her story from both sides of the abortion clinic property line.

SQL Tuning Dan Tow, 2003-11-19 A poorly performing database application not only costs users time, but also has an impact on other applications running on the same computer or the same network. SQL Tuning provides an essential next step for SQL developers and database administrators who want to extend their SQL tuning expertise and get the most from their database applications. There are two basic issues to focus on when tuning SQL: how to find and interpret the execution plan of an SQL statement and how to change SQL to get a specific alternate execution plan. SQL Tuning provides answers to these questions and addresses a third issue that's even more important: how to find the optimal execution plan for the query to use. Author Dan Tow outlines a timesaving method he's developed for finding the optimum execution plan--rapidly and systematically--regardless of the complexity of the SQL or the database platform being used. You'll learn how to understand and control SQL execution plans and how to diagram SQL queries to deduce the best execution plan for a query. Key chapters in the book include exercises to reinforce the concepts you've learned. SQL Tuning concludes by addressing special concerns and unique solutions to unsolvable problems. Whether you are a programmer who develops SQL-

based applications or a database administrator or other who troubleshoots poorly tuned applications, SQL Tuning will arm you with a reliable and deterministic method for tuning your SQL queries to gain optimal performance.

State, Market and Life Chances in Contemporary Rural Chinese Society Nabo Chen,2015-09-14 This study focuses on the effects of market reform on the life chances of rural people in China. Based on comparative ethnographical evidence from three townships of rural Guangdong province, this book provides a more recent and detailed story about the social inequality in rural China, a further explanation for the institutional analysis on the social stratification of China, a new typology of the developmental results and the changing roles of political elite of rural china.

Sin planificar Abby Johnson,Cindy Lambert,2013-06-17 Se publica en español el conmovedor testimonio de Abby Johnson, ex

directora de una clínica abortista de Planned Parenthood en Texas (Estados Unidos) que cambió de lado y se unió a un grupo de defensa de la vida. Ediciones Palabra Editorial publica en español Sin planificar. El conmovedor testimonio de la ex directora de una clínica abortiva en su viaje hacia la vida, libro que ha supuesto una auténtica revelación en Estados Unidos. En un lanzamiento sin precedentes, tres de las más importantes editoriales norteamericanas publicaron a la vez la historia de Abby, para el público católico, evangélico y cristiano, convirtiéndose rápidamente en uno de los títulos más vendidos. En él se cuenta la historia de Abby, desde que entró a trabajar en 2005 para Planned Parenthood la principal red de centros abortistas de Estados Unidos, con más de 320.000 abortos anuales. En esta organización fue escalando puestos: becaria, relaciones públicas, directora de servicios para la comunidad... Fue premiada como Empleada del Año y más adelante promovida a directora de uno de los centros clínicos en Bryan, Texas, donde debía encargarse tanto de la planificación familiar como de la coordinación del programa de abortos. Hace apenas dos años, su vida dio un giro de 180 grados, dejó la clínica y cambio de bando para hacerse militante pro vida. ¿Qué había ocurrido allí dentro para una

decisión tan drástica? Desde esa fecha, Abby recorre el país impartiendo conferencias y charlas en todo tipo de instituciones de Estados Unidos compartiendo su viaje hacia la vida, un testimonio de gran valor para arrojar luz en el debate actual sobre el derecho a la vida y la ayuda a mujeres embarazadas con problemas. Abby ofrece un punto de vista único al haber estado en los dos lados de la batalla en torno al aborto, iluminando de un modo particular la controversia que rodea a este tema. A la vez, es una historia personal llena de dramatismo y de encuentros entre la vida y la muerte.

Health Insurance is a Family Matter Institute of Medicine,Board on Health Care Services,Committee on the Consequences of Uninsurance,2002-09-18 Health Insurance is a Family Matter is the third of a series of six reports on the problems of uninsurance in the United States and addresses the impact on the family of not

having health insurance. The book demonstrates that having one or more uninsured members in a family can have adverse consequences for everyone in the household and that the financial, physical, and emotional well-being of all members of a family may be adversely affected if any family member lacks coverage. It concludes with the finding that uninsured children have worse access to and use fewer health care services than children with insurance, including important preventive services that can have beneficial long-term effects.

Siege on the Belle James Reasoner, 1999 In this all-new adventure--based on the smash-hit TV series--a gambler and pretty hostess are found dead. Walker, Trivette, C.D., and a lovely deputy must take on a daring undercover assignment on board an illegal gambling ship called The Lone Star Belle.

Gene Drives on the Horizon National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, Committee on Gene Drive Research in Non-Human Organisms: Recommendations for Responsible Conduct, 2016-08-28 Research on gene drive systems is rapidly advancing. Many proposed applications of gene drive research aim to solve environmental and public health challenges,

including the reduction of poverty and the burden of vector-borne diseases, such as malaria and dengue, which disproportionately impact low and middle income countries. However, due to their intrinsic qualities of rapid spread and irreversibility, gene drive systems raise many questions with respect to their safety relative to public and environmental health. Because gene drive systems are designed to alter the environments we share in ways that will be hard to anticipate and impossible to completely roll back, questions about the ethics surrounding use of this research are complex and will require very careful exploration. Gene Drives on the Horizon outlines the state of knowledge relative to the science, ethics, public engagement, and risk assessment as they pertain to research directions of gene drive systems and governance of the research process. This report offers principles for responsible practices of gene drive research and related applications for use by investigators, their institutions, the research funders, and regulators.

The Great War and America Nancy Gentile Ford, 2008-02-28

The First World War marked a key turning point in America's involvement on the global stage. Isolationism fell, and America joined the ranks of the Great Powers. Civil-Military relations faced

new challenges as a result. Ford examines the multitude of changes that stemmed from America's first major overseas coalition war, including the new selective service process; mass mobilization of public opinion; training diverse soldiers; civil liberties, anti-war sentiment and conscientious objectors; segregation and warfare; Americans under British or French command. Post war issues of significance, such as the Red Scare and retraining during demobilization are also covered. Both the federal government and the military were expanding rapidly both in terms of size and in terms of power during this time. The new group of citizen-soldiers, diverse in terms of class, religion, ethnicity, regional identity, education, and ideology, would provide training challenges. New government-military-business relationships would experience failures and successes. Delicate relationships with allies would translate into diplomatic considerations and battlefield command concerns.

Hell's Half Acre James Reasoner, 1999 First time in print--a new action-packed novel based on the popular CBS TV show starring Chuck Norris. A gang of bank robbers is terrorizing Dallas. They've kidnapped the family of a rich and powerful banker and it's up to Walker and Trivette to track down this murderous gang

before they turn the whole city into a shooting gallery.

History and Neorealism Ernest R. May,Richard

Rosecrance,Zara Steiner,2010-09-09 Neorealists argue that all states aim to acquire power and that state cooperation can therefore only be temporary, based on a common opposition to a third country. This view condemns the world to endless conflict for the indefinite future. Based upon careful attention to actual historical outcomes, this book contends that, while some countries and leaders have demonstrated excessive power drives, others have essentially underplayed their power and sought less position and influence than their comparative strength might have justified. Featuring case studies from across the globe, *History and Neorealism* examines how states have actually acted. The authors conclude that leadership, domestic politics, and the domain (of gain or loss) in which they reside play an important role along with international factors in raising the possibility of a world in which conflict does not remain constant and, though not eliminated, can be progressively reduced.
