ASEAN as an Actor in International Fora Paruedee

Nguitragoon, Jürgen Rűland, 2015-04-16 ASEAN as an Actor in International Fora addresses a blind spot in ASEAN research and in comparative regionalism studies by assessing why, how, when and to what extent ASEAN member governments achieve a collective presence in global fora. Written for academic researchers and practitioners working in areas such as international relations, political science and international law, it examines ASEAN's negotiating behavior with a novel four-point cohesion typology. The authors argue that ASEAN's 'cognitive prior' and its repository of cooperation norms have affected ASEAN's negotiation capacities, formats, strategies and cohesion in international fora. Using two case studies - one on ASEAN's cohesion in the WTO agricultural negotiations and one on UN negotiations on forced labor in Myanmar - they examine ASEAN's collective actions at different stages of negotiation, in different issue areas and in different negotiating fora. The book concludes by providing recommendations for strengthening ASEAN's international negotiation capacities.

Heritage Politics in China Yujie Zhu, Christina

Maags, 2020-01-02 *Heritage Politics in China: The Power of the Past* studies the impact of heritage policies and discourses on the Chinese state and Chinese society. It sheds light on the way Chinese heritage policies have transformed the narratives and cultural practices of the past to serve the interests of the present. As well as reinforcing a collective social identity, heritage in China has served as an instrument of governance and regulation

at home and a tool to generate soft power abroad. Drawing on a critical analysis of heritage policies and laws, empirical case studies and interviews with policymakers, practitioners, and local communities, the authors offer a comprehensive perspective on the role that cultural heritage plays in Chinese politics and policy. They argue that heritage-making appropriates international, national, and local values, thereby transforming it into a public good suitable for commercial exploitation. By framing heritage as a site of cooperation, contestation, and negotiation, this book contributes to our understanding of the complex nature of heritage in the rapidly shifting landscape of contemporary China. *Heritage Politics in China: The Power of the Past* is essential reading for academics, researchers and students in the fields of heritage studies, cultural studies, Asian studies, anthropology, tourism and politics.

Bringing Up Béb  Pamela Druckerman, 2012-02-07 The secret behind France's astonishingly well-behaved children. When American journalist Pamela Druckerman has a baby in Paris, she doesn't aspire to become a French parent. French parenting isn't a known thing, like French fashion or French cheese. Even French parents themselves insist they aren't doing anything special. Yet, the French children Druckerman knows sleep through the night at two or three months old while those of her American friends take a year or more. French kids eat well-rounded meals that are more likely to include braised leeks than chicken nuggets. And while her American friends spend their visits resolving spats between their kids, her French friends sip coffee while the kids play. Motherhood itself is a whole different experience in France. There's no role model, as there is in America, for the harried new mom with no life of her own. French mothers assume that even good parents aren't at the constant service of their children and that there's no need to feel guilty about this. They have an easy, calm authority with their kids that Druckerman can only envy. Of course, French parenting wouldn't

be worth talking about if it produced robotic, joyless children. In fact, French kids are just as boisterous, curious, and creative as Americans. They're just far better behaved and more in command of themselves. While some American toddlers are getting Mandarin tutors and preliteracy training, French kids are- by design-toddling around and discovering the world at their own pace. With a notebook stashed in her diaper bag, Druckerman-a former reporter for The Wall Street Journal-sets out to learn the secrets to raising a society of good little sleepers, gourmet eaters, and reasonably relaxed parents. She discovers that French parents are extremely strict about some things and strikingly permissive about others. And she realizes that to be a different kind of parent, you don't just need a different parenting philosophy. You need a very different view of what a child actually is. While finding her own firm non, Druckerman discovers that children-including her own-are capable of feats she'd never imagined.

Strengthening Forensic Science in the United States

National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people

serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
