Capitalism's Achilles Heel Raymond W. Baker, 2005-08-05 For over forty years in more than sixty countries, Raymond Baker has witnessed the free-market system operating illicitly and corruptly, with devastating consequences. In *Capitalism's Achilles Heel*, Baker takes readers on a fascinating journey through the global free-market system and reveals how dirty money, poverty, and inequality are inextricably intertwined. Readers will discover how small illicit transactions lead to massive illegalities and how staggering global income disparities are worsened by the illegalities that permeate international capitalism. Drawing on his experiences, Baker shows how Western banks and businesses use secret transactions and ignore laws while handling some \$1 trillion in illicit proceeds each year. He also illustrates how businesspeople, criminals, and kleptocrats perfect the same techniques to shift funds and how these tactics negatively affect individuals, institutions, and countries.

**Nano-Oncologicals** Maria José Alonso, Marcos Garcia-Fuentes, 2014-10-15 This authoritative volume focuses on emerging technologies in cancer nano medicine, characterized by their multi-functionality and potential to address simultaneously diverse issues of clinical relevance in the treatment of cancer. The book consists of sixteen chapters divided into six sections: 1) Biological Barriers in Cancer; 2) Tumor Targeting; 3) Targeting the Immune System; 4) Gene Therapy; 5) Nano theranostics and 6) Translational Aspects of Nano-Oncologicals. The volume starts with an introduction describing the biological barriers associated

with cancer therapy and highlighting ways to overcome such barriers through the use of nanotechnology. This is followed by an analysis of the two major targeting strategies currently under investigation in cancer therapy: namely, the targeting of cancer cells and the targeting of the immune system. In the first case, the book presents liposomal and polymer-based therapies, including photodynamic approaches. In the second case, it analyzes in detail the possibility of either improving the efficiency of the immune system toward preventing cancer progression (cancer immunomodulation) or generating responses against specific cancer antigens (cancer vaccines). Beyond these targeting options, *Nano-Oncologicals: New Targeting and Delivery Approaches* presents the most recent technological advances in the area of nucleic acid-based therapies, along with those in the area of theranostics, where the design of multifunctional nano carriers becomes vital. Following the study of the most promising nanotechnologies around the development of nano-oncologicals, the book ends with an overview of regulatory and toxicological issues, which are critical in their translational pathway, and the presentation of a nucleic acid-based therapy case-study. This book is an important resource for scientists interested in the design and development of anticancer nanotechnologies and also to those aiming to push their technology through clinical development.

### **Vitamins and Minerals Biofortification of Edible Plants**

Nouredine Benkeblia, 2020-03-23 A Detailed Reference on How Modern Biotechnology is using the Biofortification of Crops to Improve the Vitamin and Mineral Content of Edible Plants In this reference, *Vitamins and Minerals Bio-Fortification of Edible Plants*, authors cover new territory on phytonutrients, focusing on the enhancement and modification of edible crops. This book presents techniques and research findings from modern biotechnology to educate readers on the newest tools and research in the field. Readers will learn how groundbreaking

scientific advances have contributed to the nutritional content of edible plants and crops for animals and humans. Inside, readers will find comprehensive information on new concepts of biofortification, including but not limited to: ● Modern biotechnology and its uses for improving the vitamin and mineral content of edible plants ● Potential minerals and vitamins that can be targeted and implemented in agriculture ● Ways of enhancing the nutritional contents of edible plants to address nutritional deficiencies and improve livestock ● Methods of identifying plants that can be used to heal or prevent disease and illness While many books cover the phytonutrients of crops, this reference book reports on methodologies, techniques, and environmental changes used to enhance and improve agricultural products. It is one of the first to provide information on using modern biotechnologies to modify crops with the goal of creating health benefits.

Sacred Heart Devotion Franziska Metzger, Stefan Tertünte, 2020-12-14 In an innovative, pluri-disciplinary approach this volume focuses on how memory in Sacred Heart devotion is created, promulgated and transformed. The volume with contributions by historians, theologians, religious scientists and art historians links the dimension of memory to that of iconography, language, body and ritual practices and sheds light on adaptations, transfers, contestations and variations in a perspective of *longue durée* from the late Middle Ages to the present. The first part of the volume develops central axes of analysis, which are specifically investigated in the two following parts. The contributions of part two intertwine perspectives of cultural, social and art history focusing on the multi-layered creation, public presence and political usage, diversity and variations of Sacred Heart iconography and devotion in a long-term perspective. In-depth analyses centre on late medieval northern Italy, early modern France and 18th-century Switzerland (Eidgenossenschaft), on France from the 1950s to the

1980s, and on Indonesia in the 20th and 21st centuries. In a dynamic way, the third part combines systematic theological, philosophical and didactic reflexions on the Sacred Heart with a focus on imagination, embodiment, spirituality and memory.

**School Choice in China** Wu Xiaoxin, 2013-10-15 School Choice in China explores the major characteristics of schooling options in China, highlighting how largely middle-class parents exploit their cultural, economic and social capital for their children's admission into choice schools. It highlights how payments such as choice fees, donations, prize-winning certificates and awards, as well as the use of *guanxi*, result in Chinese school choice as a parent-driven, bottom-up movement. The author also explores how schools and local governments cash in on the school choice fever in order to obtain significant economic returns, leading to policies that accommodate the needs of mostly middle-class families. He argues that although this system seems to create winners among the parties involved, it exacerbates the educational inequality that already exists in Chinese society. Chapters include: Positional competition for cultural capital Exploitation of social capital Economics of school choice Class reproduction through parental choice This book is not simply a detailed analysis of Chinese school choice practices, but also a study of the competitive middle class search for advantage for their children. As such it will be beneficial to undergraduates, postgraduates, education professionals, policy makers, and anyone with an interest in education, sociology, social policy, and the rise and future of China.

**The Logic of Life** Tim Harford, 2009-02-10 Life sometimes seems illogical. Individuals do strange things: take drugs, have unprotected sex, mug each other. Love seems irrational, and so does divorce. On a larger scale, life seems no fairer or easier to fathom: Why do some neighborhoods thrive and others become ghettos? Why is racism so persistent? Why is your idiot boss paid a fortune for sitting behind a mahogany altar? Thorny

questions—and you might be surprised to hear the answers coming from an economist. But award-winning journalist Tim Harford likes to spring surprises. In this deftly reasoned book, he argues that life is logical after all. Under the surface of everyday insanity, hidden incentives are at work, and Harford shows these incentives emerging in the most unlikely places.

**Marginal Bodies, Trans Utopias** Caterina Nirta, 2017-08-31  
Although over the last two decades there has been a proliferation of gender studies, transgender has largely remained institutionalised as an ‘umbrella term’ that encapsulates all forms of gender understandings differing from what are thought to be gender norms. In both theoretical and medical literature, trans identity has been framed within a paradigm of awkwardness or discomfort, self-dislike or dysfunctional mental health. *Marginal Bodies, Trans Utopias* is a multidisciplinary book that draws primarily from Deleuze and post-structuralism in order to reformulate the concept of utopia and ground it in the materiality of the present. Through a radically new conceptualisation of the time and space of utopia, it analyses empirical findings from trans video diaries on the Internet belonging to transgender individuals. In doing so, this volume offers new insights into the everyday challenges faced by these subjectivities, with case studies focusing on: the legal/social impact of the UK’s Gender Recognition Act 2004, boundaries of public and private as evidenced within public toilets, and the narrative of the ‘wrong body’. Contextualising and applying Deleuzian concepts such as ‘difference’ and ‘marginal’ to the context of the research, Nirta helps the reader to understand trans as ‘unity’ rather than as a ‘mind-body mismatch’. Contributing to the reading and understanding of trans lived experience, this book shall be of interest to postgraduates and postdoctoral researchers interested in fields such as Transgender Studies, Critical Studies, Sociology of Gender and Philosophy of Time.

**Recent Advances in Sustainable Process Design and**

**Optimization** Dominic C. Y. Foo, Mahmoud M. El-Halwagi, Raymond R. Tan, 2012 This book is a compilation of the various recently developed techniques emphasizing better chemical processes and products, with state-of-the-art contributions by world-renowned leaders in process design and optimization. **Schizoanalysis and Ecosophy** Constantin V. Boundas, 2017-12-14 This volume presents the concepts of schizoanalysis and ecosophy as Felix Guattari and Gilles Deleuze understood them, in interviews and analyses by their contemporaries and followers. This accessible yet authoritative introduction is written by distinguished specialists, combining testimonies from some of Guattari's colleagues at the La Borde psychiatric clinic where he practiced, with expository essays on his main ideas, schizoanalysis and ecosophy, as well as his relations with Lacan. The last section of the book deals with the subsequent creative application of those ideas by his

philosophical and psychoanalytic followers situated within the contemporary moment. This collection also provides the crucial historical context of France at the time Guattari was developing his concepts, including the role of the Maoists and the significance of the political situation in Algeria.

### **Supporting K-12 English Language Learners in Science**

Cory Buxton, Martha Alleksaht-Snider, 2016-11-18 The contribution of this book is to synthesize important common themes and highlight the unique features, findings, and lessons learned from three systematic, ongoing research and professional learning projects for supporting English learners in science. Each project, based in a different region of the U.S. and focused on different age ranges and target populations, actively grapples with the linguistic implications of the three-dimensional learning required by the Framework for K-12 Science Education and the Next Generation Science Standards. Each chapter provides research-based recommendations for improving the teaching of science to English learners. Offering insights into teacher professional learning as well as strategies for measuring and monitoring how well English learners are learning science and language, this book tells a compelling and inclusive story of the challenges and the opportunities of teaching science to English learners.

*The Spectacle of Death* Kristin Boudreau, 2006-04-04 In 1787, Benjamin Rush cautioned that public punishments were dangerous to the social and legal authority of the new nation. For Rush, irrepressible human sentiments all but guaranteed that public punishments would turn spectators against the institutions responsible for the punishments. Although public executions of criminals ended early in the 19th century, debate over the morality of capital punishment has continued to this day. In this unique and fascinating glimpse into public reactions to prominent executions, from colonial times to the 1990s, Kristin Boudreau focuses on the central role of populist, often ephemeral literary

forms in shaping attitudes toward capital punishment. Surveying popular poems, ballads, plays, and novels, she shows that, at key times of social unrest in American history, many Americans have felt excluded by the political and legal processes, and have turned instead to inexpensive literary forms of expression in an attempt to change the course of history. Among the significant capital cases that the author discusses are: the Haymarket anarchist trial of 1886; the lynching of Leo Frank in 1914; the murder of Emmett Till in 1955 and its effects on the Civil Rights movement; Norman Mailer's treatment of the Gary Gilmore case in the 1979 novel, *The Executioner's Song*; and the 1998 execution of Karla Faye Tucker, a convicted murderer who became a born-again Christian on death row. In the concluding chapter, Boudreau examines contemporary writers, musicians, actors, and other artists who are using their artistic media to influence official policies of states that permit capital punishment. By examining these neglected texts, Boudreau brings to light a compelling story about ordinary Americans fighting an entrenched legal system at times of great national crisis.

*Израиль и США* Татьяна Карасова, 2016-12-23 Монография посвящена непростой истории становления американо-израильского сотрудничества с момента возникновения Государства Израиль в 1948 г. до 2014 г. Автор рассматривает, как в годы холодной войны израильские лидеры боролись за признание Израиля партнером США, активизируя свою роль проводника американских интересов на Ближнем Востоке. В книге показано, как в конце 1990-х годов развитие израильско-американских отношений приобрело характер стратегического партнерства и Израиль стал наиболее привилегированным внеблоковым союзником США. Этот статус сохраняется за ним по сей день, так как стратегические отношения США с Израилем носят

геополитический и идеологический характер. Автор дает оценку событиям периода с конца 1990-х годов до 2014 года — этапа дальнейшего развития двусторонних отношений после окончания холодной войны. Книга рекомендована специалистам в области международных отношений, студентам и аспирантам, занимающимся проблемами Ближнего Востока, а также широкому кругу читателей.
