Common and Uncommon Quotes: A Theory and History of Epigraphs Jared A. Griffin, 2023-03-07 'Common and Uncommon Quotes: A Theory and History of Epigraphs' is a prolegomenon to the study of epigraphic paratextuality. Building on the work of Gerard Genette's paratextual studies, this volume contextualizes and traces the practice of epigraphy in Anglophone literary history, from the fifteenth to the early twentieth century. This study explores how epigraphs are used by author-functions as a hermeneutic for their text and to establish ethos with their audience, and how that paratextual relationship changed as publishing opportunities and literacy rates grew over four centuries. The first broad-reaching study of this kind, 'Common and Uncommon Quotes' seeks to understand how epigraphs work: through their privilege on the page, their appeal to conjured ideas of the past, and their calls to citizenship.

Mystery of the Dyatlov group death Евгений Буюнов, E. Buyanov, B. Slobtsov, 2017-09-05 The earlier version of this book published on the Internet literature sites in January 2009 was called «The mystery of Dyatlov's accident». In August 2011 a «paper version» of the book, improved and revised, was issued in an edition of 3000 copies, with financial help of Nikolai Antonovich Rundkvist and his publishing house, Eltsin URFU (former USTU, UPI) and a fund «In memory of Dyatlov's group» with active participation of an academician P. I. Bartolomey. We thank everyone for contribution to our book. According to a proposal of Bartolomey we changed a title of the book to «The mystery of Dyatlov's group death» and its size was considerably cut by way of removal of some appendices (they can be found in the earlier edition). We also added several articles of other authors in order to «introduce different opinions» that existed before our book. This book edition – more full and correct – was created on the basis of new investigation facts and as a result of constant revision of the book during last years. The huge «inertia» of the investigation of Dyatlov's group Tragedy let us to receive new proofs and data of its events and facts but we also reached a higher level of understanding of crucial reasons of accidents increase in tourism and mountaineering during solar activity peaks, and explored connection of this factor with other natural phenomena.

Bending Genre Margot Singer, Nicole Walker, 2022-12-15 Ever since the term creative nonfiction first came into widespread use, memoirists and journalists, essayists and fiction writers have faced off over where the border between fact and fiction lies. An early and influential book on questions of form in creative nonfiction, Bending Genre asks not where the boundaries between the genres should be drawn, but what happens when you push the line. The expanded second edition doubles the first edition with 23 new essays that broaden the exploration of hybridity, structure, unconventionality, and resistance in creative nonfiction, pushing the conversation forward in diverse and exciting ways. Written for writers and students of creative writing, this collection brings together perspectives from leading writers of creative nonfiction, including Michael Martone, Brenda Miller, Ander Monson, David Shields, Kazim Ali--and in the new edition--Catina Bacote, Ira Sukrungruang, Ingrid Horrocks, Elena Passarello, and Aviya Kushner. Each writer's innovative essay probes our notions of genre and investigates how creative nonfiction is shaped, modeling the forms of writing being discussed. Like creative nonfiction itself, Bending Genre is an exciting hybrid that breaks new ground. Features in the second edition: -Updated introduction to the new edition -Expanded sections on Hybrids, Structures, and Unconventions -A new section on Resistances -50 essays in all

Instrument and Automation Engineers' Handbook Bela G. Liptak, Kriszta Venczel, 2022-08-31 The Instrument and Automation Engineers' Handbook (IAEH) is the Number 1 process automation handbook in the world. The two volumes in this greatly expanded Fifth Edition deal with measurement devices and analyzers. Volume one, Measurement and Safety, covers safety sensors and the detectors of physical properties, while volume two, Analysis and Analysis, describes the measurement of such analytical properties as composition. Complete with 245 alphabetized chapters and a thorough index for quick access to specific information, the IAEH, Fifth Edition is a must-have reference for instrument and automation engineers working in the chemical, oil/gas, pharmaceutical, pollution, energy, plastics, paper, wastewater, food, etc. industries.

Blindsight Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, Blindsight Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without

Analysis of Government Guarantees and the Functioning of Asset-Backed Securities Markets Diana Hancock, 2011-04 Focuses on a specific market failure that is associated with asset-backed securitization and proposes a tailored gov't. remedy. The additional liquidity provided by securitization may (or may not) lower primary loan rates. If guarantee-sensitive investors doubt the credit quality of asset-backed bonds, large risk premiums can develop. If a financial crisis ensues, securitization can disappear from the market entirely, leaving banks that originate the highest quality loans as the only source of credit. This abrupt increase in lending standards can tighten credit, exacerbate asset price declines, and impinge on econ. growth. An institutional structure for stemming 'runs' could be deployed to insure pre-specified asset-backed instruments. Illus. This is a print on demand pub.

Measurement and Safety Béla G. Lipták, Kriszta Venczel, 2016-11-25 The Instrument and Automation Engineers' Handbook (IAEH) is the #1 process automation handbook in the world. Volume one of the Fifth Edition, Measurement and Safety, covers safety sensors and the detectors of physical properties. Measurement and Safety is an invaluable resource that: Describes the detectors used in the measurement of process variables Offers application- and method-specific guidance for choosing the best measurement device Provides tables of detector capabilities and other practical information at a glance Contains detailed descriptions of domestic and overseas products, their features, capabilities, and suppliers, including suppliers' web addresses Complete with 163 alphabetized chapters and a thorough index for quick access to specific information, Measurement and Safety is a must-have reference for instrument and automation engineers working in the chemical, oil/gas, pharmaceutical, pollution, energy, plastics, paper, wastewater, food, etc. industries. About the eBook The most important new feature of the IAEH, Fifth Edition is its availability as an eBook. The eBook provides the same content as the print edition, with the addition of thousands of web addresses so that readers can reach suppliers or reference books and articles on the hundreds of topics covered in the handbook. This feature includes a complete bidders' list that allows readers to issue their specifications for competitive bids from any or all potential product suppliers.

Debasing Political Rhetoric Ofer Feldman, 2023-04-26 This book is a companion to Political Debasement: Incivility, Contempt, and Humiliation in Parliamentary and Public Discourse. It brings together interdisciplinary contributions to provide a comprehensive and detailed exploration of the nature, function, and effect of debasement language used by selected political leaders in Western and non-Western countries. Among them are Donald Trump (in the USA), Recep Tayyip Erdoğan (Turkey), Rodrigo Roa Duterte (Philippines), Jair Bolsonaro (Brazil), Abe Shinzō (Japan), Pauline Hanson (Australia), Kyriakos Mitsotakis (Greece), Geert Wilders (the Netherlands), Beppe Grillo (Italy), and Santiago Abascal (Spain). Chapters focus specifically on the language of these leaders while examining debasement discourse from narrow and broad perspectives. The former includes the use of crude or abusive language (e.g., curses, obscenity, and swearing) to demean, humiliate, mock, insult, or belittle, based on the actual or perceived object or entity (e.g., race, religion, national, gender identity, or sexual orientation); the latter includes the use of devious or indirect irony, sarcasm, cynicism, ridicule, subtlety, and understatement to degrade and discredit other individuals or groups. The book represents the collective wisdom of scholars and researchers, experts in fields such as communication, political science, international relations, and social and political psychology. Cumulatively, the authors develop a global analysis of debasement discourse in societies from West to East and offer a cutting-edge approach to expand a framework assessing the role and effect of such rhetoric in contemporary politics.

VIRTUOSOS OF FAITH Gert Melville, James D. Mixson, 2020 For over a thousand years, monks, nuns, canons, friars, and others under religious vows stood at the pinnacle of Western European society. For their ascetic sacrifices, their learning, piety, and expertise, they were accorded positions of power and influence, and a wide range of legal, financial and social privileges. As such they present an important opportunity to consider the nature and dynamics of an elite in medieval culture. Using medieval religious life as their interpretive lens, the essays of this volume seek to uncover the essential markers of elite status. They explore how those under vows claimed and manifested elite status in complex spiritual, temporal, and social combinations. They explore the workings of elite status from day to day, across region and locale - who earned recognition and how, whether through specific achievements or the deployment of specific capacities; who recognized, conferred, or helped maintain elite status, how and why; how elite status could be redefined, contested or rejected. The essays also seek to understand how medieval European religious elites compared to those found in other cultures and settings, from Syria and South Asia to the early modern transatlantic world.

Imagining Ireland Abroad, 1904-1945 Lili Zách, 2021-07-29 Offering a unique account of identity formation in Ireland and Central Europe, this book explores and contextualises transfers and comparisons between Ireland and the successor states of the Austro-Hungarian Empire. It reveals how Irish perceptions of borders and identities changed after the (re)birth of the small states of Austria, Hungary and Czechoslovakia and the creation of the Irish Free State. Adopting a transnational approach, the book documents the outward-looking attitude of Irish nationalists and provides original insights into the significance of personal encounters that transcended the borders of nation-states. Drawing on a wide range of official records, private papers, contemporary press accounts and journal articles, *Imagining Ireland Abroad, 1904-1945* bridges the gap between historiographies of the East and West by opening up a new perspective on Irish national identity.

Comparative Juvenile criminal justice Alexandre Chitov, The book deals with three interconnected themes. The first is the description of main features of juvenile criminal justice in such diverse countries as Thailand, China, Germany, France, and England. The second is the argument that education is the essential principle of any juvenile delinquency justice system, and that the most important part of education must be moral instruction of young offenders. The third theme of the book is that world religions are indispensable for carrying out successful educational programs directed towards the formation of good conscience among young people. Three religious traditions are explored: Buddhism, Confucianism, and Christianity. The presentation of the educational potential of the world religions draws upon the experience of the author as a volunteer teacher in a Thai juvenile correction institution.

The Routledge History of Medieval Magic Sophie Page, Catherine Rider, 2019-01-15 The Routledge History of Medieval Magic brings together the work of scholars from across Europe and North America to provide extensive insights into recent developments in the study of medieval magic between c.1100 and c.1500. This book covers a wide range of topics, including the magical texts which circulated in medieval Europe, the attitudes of intellectuals and churchmen to magic, the ways in which magic intersected with other aspects of medieval culture, and the early witch trials of the fifteenth century. In doing so, it offers the reader a detailed look at the impact that magic had within medieval society, such as its relationship to gender roles, natural philosophy, and courtly culture. This is furthered by the book's interdisciplinary approach, containing chapters dedicated to archaeology, literature, music, and visual culture, as well as texts and manuscripts. The Routledge History of Medieval Magic also outlines how research on this subject could develop in the future, highlighting under-explored subjects, unpublished sources, and new approaches to the topic. It is the ideal book for both established scholars and students of medieval magic.

Перевал. Тайна гибели группы Дятлова Евгений Буянов, Борис Слобцов, 2014-08-22 История гибели 9 туристов у подножия Горы Мертвецов, где, по преданию, нашли свой последний приют 9 шаманов, окутана тайнами и мистикой. Уже более полувека идут споры о причинах той трагедии: аномальные явления природы или техногенные факторы? Участники группы Дятлова - жертвы «стихийной силы, преодолеть которую... были не в состоянии», как говорилось в постановлении о прекращении дела, или умышленного преступления? Что за «огненные шары» видели в небе в ту ночь местные жители? Чем объясняется тот факт, что тела трех погибших, родившихся 11, 12, 13 января, обнаружили лежащими друг за другом в том же порядке? Что заставило их ночью в ужасе разрезать палатку и бежать с места стоянки, не оглядываясь? Чем объясняются их многочисленные травмы, увечья и следы радиоактивного заражения? Есть ли в этой истории какие-то «закрытые» властями страницы с целью предотвращения «утечки информации»? Авторы этой книги провели свое расследование, причем не будет преувеличением сказать, что началось оно «по свежим следам», ведь именно поисковая группа Бориса Слобцова нашла палатку группы Дятлова и первых погибших. Взаимодействуя с другими поисковиками, анализируя весь, в том числе и малодоступный материал, отделяя ложные факты от истинных, авторы предлагают наиболее убедительную на сегодняшний день версию развернувшейся у
