*Rowdy* Christopher Madsen, 2015-08-15 When Christopher Madsen made the snap decision-perhaps a rash decision-to buy and renovate the famous 1916 racing yacht for which this story is named, he could scarcely have imagined the consequences that were to follow. During the renovation Madsen's investigation of the original owner, New York senator Holland Sackett Duell, uncovered a remarkable true life 1920s adventure and love story; one which fully brings to life the era and flair of Gatsby and Hemmingway yet, by contrast, *Rowdy* is completely true, historically significant and meticulously documented in support of the authenticity. The reader first walks in Duell's footsteps as he departs New York in 1918 to participate in the Great War (the most detailed accounting ever written on New York's 306th Field Artillery, 77th Division). Highly decorated upon return, the adventure continues as Duell is immersed in politics at the highest level, the birth of Hollywood, sailing competitions with some of the richest men in America, fortunes and mansions and love affairs as well as scandalous affairs. A newly unearthed gem in American history, *Rowdy* will enjoyably transport the reader back in time to the Golden Age of Yachting-AND EVER SO MUCH MORE! A multi-award winning story and a beautiful coffee table book; 8 1/2 X 11 hardcover with the look of worn, vintage leather, gold leaf stamping, rounded spine woven burgundy book mark. **Telecom Tensions** Mike Zajko, 2021-05-15 Today's internet service providers mediate communication, control data flow, and influence everyday online interactions. In other words, they have become ideal agents of public policy and instruments of governance. In *Telecom Tensions* Mike Zajko considers the tensions inherent to this role – between private profits and the public good, competition and cooperation, neutrality and discrimination, surveillance and security – and asks what consequences arise from them. Many understand the internet as a technology that cuts out traditional gatekeepers, but as the importance of internet access has grown, the intermediaries connecting us to it have come to play an increasingly vital role in our lives. Zajko shows how the individuals and organizations that keep these networks running must satisfy a growing number of public policy objectives and contradictory expectations. Analyzing conflicts in Canadian policy since the commercialization of the internet in the 1990s, this book unearths the roots of contemporary debates by foregrounding the central role of internet service providers. From downtown data centres to publicly funded rural networks, *Telecom Tensions* explores the material infrastructure, power relations, and political aspirations at play. Theoretically informed but grounded in the material realities of people and places, *Telecom Tensions* is a fresh look at the political economy of telecommunications in Canada, updating conversations about liberalization and public access with contemporary debates over privacy, copyright, network neutrality, and cyber security.

Gas Turbine Powerhouse Dietrich Eckardt, 2013-12-20 This book tells the story of the power generation gas turbine

from the perspective of one of the leading companies in the field over a period of nearly 100 years, written by an engineer. Especially in times of imminent global economic crises it appears to be worthwhile to reflect on real economic values based on engineering ingenuity and enduring management of technological leadership. Though the book is primarily designed as a technical history of the BBC/ABB/Alstom power generation gas turbines, its scope is sufficiently broad to cover general development trends, including parallel competitor activities. A special benefit is the historical breakdown to the gas turbine component level, so that the book actually outlines the development of axial compressors from early beginnings, the progress in combustion technology towards extraordinary low emission values and that of axial turbines with special emphasis on early turbine cooling innovations. The sheer length of certain engineering developments over several decades allows interesting historic observations and deductions on inherent business mechanisms, the effects of technology preparations and organisational consequences. A look into the mirror of the past provides revelations on the impact of far-reaching business decisions.

**The Quotable Augustine: Distinctively Catholic Elements in His Theology** Dave Armstrong, 2012-09-01 Protestants (especially Reformed Protestants, or Calvinists) often assert that St. Augustine's views were closer to theirs than to the present-day Catholic Church. My aim is to systematically document St. Augustine's advocacy of positions that historic Protestantism has expressly rejected, and (conversely) detail his opposition to some doctrines or beliefs that it has (generally speaking) espoused. Quotations are drawn from 44 separate works of St. Augustine, arranged under 157 topics, and also arranged chronologically within topics, insofar as that can be determined. This helps to clarify any development in Augustine's views. Editorial input is kept to an absolute minimum: confined to an occasional bracketed clarification (usually a contextual matter or reference) or briefly stated fact considered to be indispensable in understanding some aspect of the quotation. I'm delighted to pass

along to readers a capsulized version of St. Augustine's wonderful and eloquent theological writing.

**Introduction to Health and Safety at Work** Phil Hughes, Ed Ferrett, 2011 This edition has been produced in order to update the health and safety legislation, with particular regard to changes relating to fire, construction (CDM), asbestos, vibration, noise, hazardous waste and the environment.

**International Law as Social Construct** Carlo Focarelli, 2012-05-24 The book distils and articulates international law as a social construct. It does so by analysing its social foundations, essence, and roots in practical and socially workable (as opposed to 'pure') reason. In addition to well-known doctrines of jurisprudence and international law, it draws upon psycho-analytic insights into the origins and nature of law, as well as philosophical social constructivism. The work suggests that seeing law as a social construct is crucial to our understanding of international law and to the struggle to create better working rules. The book re-conceptualizes both past and new doctrines of international law as 'constructs', namely, as strategies of concomitantly de-mythologizing and re-mythologizing international law. Key areas of international law, including subjects, sources, hierarchy, values, and remedies, are shown to be part of this process. The social impact on international law of transnational actors and stakeholders, normative fragmentation, global justice, legitimacy of both rules and players, dynamics and hierarchization of norms, compliance and implementation in municipal law is also extensively investigated. Five basic values of the international community, namely security, humanity, wealth, environment, and knowledge, are explored by stressing their inter- and intra-tensions. Finally, the analysis is extended to the role that international courts play in the prosecution of heads of state and other transnational players who violate international law.

**Heaven's Splendor** Fatula, Sr. Mary Ann, 2019-03-27 Heaven's Splendor According to the Saints Heaven: it's everything we're made for, the answer to our inmost longings, our true Home whose depths of joy we can only imagine. And who can tell us more about this blessed realm than the saints? – the souls closest to God while here on earth who now dwell beside His royal throne. What they say about Heaven has the fragrant anointing of the Holy Spirit who authored the Scriptures and from whom they draw their wisdom. Open these pages, then, and enter the Celestial Kingdom. Ponder all the rapturous beauty that the saints describe. Bask in the consoling warmth of their tender love for us, and grow ever stronger in the desire to share in their heavenly delight. Here you'll come to know the very heart of Heaven: our sharing in the ecstatic love and life of the Trinity. You'll taste the joy of the saints triumphant, ponder the mysteries of our glorious resurrection, and come to understand death as the beautiful gateway to Heaven that it is. Best of all, you'll learn how to begin to live in Heaven even now—by adoring the Blessed Trinity dwelling in your soul, by receiving the precious Body and Blood of the Lord in the Eucharist, and by growing in the heavenly virtue of charity. The wisdom of the saints in these sublimely beautiful pages will quench your fear of death and awaken in you a blessed hunger to join your departed loved ones and to delight with them in the Three Divine Persons who are the very heart of Heaven's splendor.

**Terrorism: Threat Assessment, countermeasures and Policy ,**

Right from Wrong Mark Alan Smith, 2022-11-15 Where does morality come from? Apologists—people who offer a formal defense of their religion—point to God as the answer. By inspiring scriptures that people can read, study, and teach, God supposedly gave humanity a guidebook for how to live. Award-winning scholar of religion and politics Mark Alan Smith shows the errors in this chain of assumptions. Apologists find themselves forced to accept a book that condemns same-sex love and authorizes slavery, genocide, capital punishment for minor offenses, and many other practices widely recognized today as immoral. Apologists try to protect their worldview by ignoring the offending passages, constructing strained reinterpretations, rationalizing the indefensible, or appealing to God's mysterious ways. Is there a non-religious method for discovering the elements of an objective morality? Yes, Smith argues—the worldview of humanism. Humanists apply reason, logic, and evidence to all subjects. Smith's humanist approach to morality relies on discussion and debate among diverse participants as the best means to attain a moral code stripped of the biases of each individual, group, and society. The result is a hopeful portrait of how to build on the moral progress humans have achieved since the writing of religious scriptures

**The Best Weapon for Peace** Erica Moretti, 2021-08-10 The Italian educator and physician Maria Montessori is best known for the teaching method that bears her name, but historian Erica Moretti reframes Montessori's work, showing that pacifism was the foundation of her pioneering efforts in psychiatry and pedagogy.

Understanding Multiple Chemical Sensitivity Els Valkenburg, 2010-01-13 This personal view of multiple chemical sensitivity and environmental illness is supported by research. In a question-and-answer format, the effects of exposure to perfume, smoke, air fresheners, cleaning products, exhaust, and other air contaminants are examined and linked to symptoms such as headaches, allergies, asthma, and fatigue. The book contains additional testimony and reports from 37 sufferers, as well as listings of resources and related scientific articles.

**Religion without Violence** Peter Ochs, 2019-11-18 In 1992, Peter Ochs and a few Christian and Muslim colleagues began to gather small groups, in and outside the classroom, to practice close and attentive reading of the sacred Scriptures of the Jewish, Muslim, and Christian traditions. The hope was that members of different religions could hear one another through the patient, respectful reading of each other's Scripture. Hearing each other, participants might enter into interreligious relationships that might point a way to the peaceful engagement of religions—especially those who, after September 11, 2001, too often found themselves at each other's throats. It was a hope for religion without violence. Nearly thirty years later, this practice of study-across-difference has seeded an international movement, now named Scriptural Reasoning. The movement nurtures cooperative study among students, scholars, and congregants devoted to distinctly different religious and value traditions. In *Religion without Violence*, Ochs reflects on the practical and philosophic lessons he has learned from hosting hundreds of Scriptural Reasoning engagements. He introduces the “scriptural pragmatism” of Scriptural Reasoning.” He painstakingly recounts instances of successful scriptural reasoning and warns where and how it might fail. He provides guidance on how to introduce and facilitate Scriptural Reasoning in the classroom. He shows how reading out of the “hearth” of a faith can contribute to peace building across religions. And, drawing on the resources of

rabbinic tradition, Augustine, and Charles Peirce, he moves beyond practice to reflect on the implications of Scriptural Reasoning for discerning what kinds of “reasoning” best address and help repair societal crises like religion-related violent conflict.

Cocaine Trafficking in Latin America Sayaka Fukumi, 2016-05-23 The post-Cold War world has seen the emergence of new kinds of security threats. Whilst traditionally security threats were perceived of in terms of military threats against a state, non-traditional security threats are those that pose a threat to various internal competencies of the state and its identity both home and abroad. The European Union and the United States have identified Latin American cocaine trafficking as a security threat, but their policy responses to it have differed. This book examines the ways in which the EU and the US have conceptualized this threat. Furthermore, it explores the impact of cocaine trafficking on four state functions - economic, political, public order and diplomatic - in order to explain why it has become 'securitized'. Appealing to a variety of university courses, this book is especially relevant to security studies and European and US policy analysis, as well as criminology and sociology.

*The Corrupter of Boys* Dyan Elliott, 2020-11-27 In the fourth century, clerics began to distinguish themselves from members of the laity by virtue of their augmented claims to holiness. Because clerical celibacy was key to this distinction, religious authorities of all stripes—patristic authors, popes, theologians, canonists, monastic founders, and commentators—became progressively sensitive to sexual scandals that involved the clergy and developed sophisticated tactics for concealing or dispelling embarrassing lapses. According to Dyan Elliott, the fear of scandal dictated certain lines of action and inaction, the consequences of which are painfully apparent today. In *The Corrupter of Boys*, she demonstrates how, in conjunction with the requirement of clerical celibacy, scandal-averse policies at every conceivable level of the ecclesiastical hierarchy have enabled the widespread sexual abuse of boys and male adolescents within the Church. Elliott examines more than a millennium's worth of doctrine and practice to uncover the origins of a culture of secrecy and concealment of sin. She charts the continuities and changes, from late antiquity into the high Middle Ages, in the use of boys as sexual objects before focusing on four specific milieus in which boys and adolescents would have been especially at risk in the high and later Middle Ages: the monastery, the choir, the schools, and the episcopal court. *The Corrupter of Boys* is a work of stunning breadth and discomfiting resonance, as Elliott concludes that the same clerical prerogatives and privileges that were formulated in late antiquity and the medieval era—and the same strategies to cover up the abuses they enable—remain very much in place.

China, Arms Control, and Non-Proliferation Wendy Frieman, 2014-04-08 China, Arms Control, and Non-Proliferation is an empirically and conceptually path-breaking book that documents China's participation in international arms control and non-proliferation regimes from 1985 to 2001. The book focuses on the distinction between US expectations of Chinese compliance, which China has not always met, and international standards, against which Chinese performance is acceptable. This will be the standard staple work dealing with China and international arms control and will be invaluable to those dealing with Chinese security studies, foreign policy, international relations and arms control and disarmament.

Drinking Water Distribution Systems National Research Council, Division on Earth and Life Studies, Water Science and Technology Board, Committee on Public Water Supply Distribution Systems: Assessing and Reducing Risks, 2007-01-22 Protecting and maintaining water distributions systems is crucial to ensuring high quality drinking water. Distribution systems-consisting of pipes, pumps, valves, storage tanks, reservoirs, meters, fittings, and other hydraulic appurtenances-carry drinking water from a centralized treatment plant or well supplies to consumers' taps. Spanning almost 1 million miles in the United States, distribution systems represent the vast majority of physical infrastructure for water supplies, and thus constitute the primary management challenge from both an operational and public health standpoint. Recent data on waterborne disease outbreaks suggest that distribution systems remain a source of contamination that has yet to be fully addressed. This report evaluates approaches for risk characterization and recent data, and it identifies a variety of strategies that could be considered to reduce the risks posed by water-quality deteriorating events in distribution systems. Particular attention is given to backflow events via cross connections, the potential for contamination of the distribution system during construction and repair activities, maintenance of storage facilities, and the role of premise plumbing in public health risk. The report also identifies advances in detection, monitoring and modeling, analytical methods, and research and development opportunities that will enable the water supply industry to further reduce risks associated with drinking water distribution systems.
