Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Motion Correction in MR Andre van der Kouwe,Jalal B. Andre,2022-10-28 Motion Correction in MR: Correction of Position, Motion, and Dynamic Changes, Volume Eight provides a comprehensive survey of the state-of-the-art in motion detection and correction in magnetic resonance imaging and magnetic resonance spectroscopy. The book describes the problem of correctly and consistently identifying and positioning the organ of interest and tracking it throughout the scan. The basic principles of how image artefacts arise because of position changes during scanning are described, along with retrospective and prospective techniques for eliminating these artefacts, including classical approaches and methods using machine learning. Internal navigator-based approaches as well as external systems for estimating motion are also presented, along with practical applications in each organ system and each MR modality covered. This book provides a technical basis for physicists and engineers to develop motion correction methods, giving guidance to technologists and radiologists for incorporating these methods in patient examinations. Provides approaches for correcting scans prospectively and retrospectively Shows how motion and secondary effects such as field changes manifest in MR scans as artifacts and subtle biases in quantitative research Gives methods for measuring motion and associated field changes, quantifying motion and judging the accuracy of the motion and field estimates

Managing Global Legal Systems Gary W. Florkowski,2006-09-27 Presenting a framework for understanding the corporate strategy-public policy interface as it relates to human capital management, this unique text treats legal systems as factors that must be actively managed in the firm's larger pursuit of international competitive advantage. It provides readers with the most comprehensive description to date of the role that transnational, regional and national institutions play in the evolution of domestic employment regulation and international labour standards, and discusses the opportunities that employers have to influence their form and application. High-profile news events from around the world are utilized to illustrate key concepts, offering unique insights into the regulatory environment that MNEs face when managing an international work force. Taking an applied approach to the subject of labour-market regulation on six continents, this book is a valuable reference for students and practitioners alike in the fields of HRM, business management and law.

Regional Leadership in the Global System Daniel Flesmes,2016-04-08 We assume that the ideas, interests and strategies of regional powers

are highly significant variables, with the power to influence foreign policy. Yet while comparative research projects involving OECD-countries are fairly common, comparative research integrating developing regions is still rare, despite the fact that these countries are among the key actors of the twenty-first century. This collection emphasizes the role of regional powers in intra-regional, interregional and global contexts, analyzing the rise of regional powers from a comparative perspective. In so doing, the book explains how these powers have power to shape regional and global politics.

The Law of Wreck Nicholas Gaskell, Craig Forrest, 2019-11-05 This book covers wreck law as an integrated whole, going beyond the question of removal to include issues such as the ownership of wreck and how the law deals with the many commercial law problems arising after ships have been wrecked during the maritime commercial adventure. The book offers authoritative guidance on the genesis and meaning of the Nairobi Wreck Removal Convention 2007, and the interpretation of its often-complex provisions as they apply both to States trying to use its powers and to shipowners and liability insurers faced by its obligations. The authors explain the increasingly complex inter-relationship between linked areas of maritime law, including salvage, intervention and the overlapping international regimes which deal with pollution from oil, bunkers or hazardous and noxious substances. The book examines how a salvage operation transitions to wreck removal and links the liability provisions with the standard form international commercial contracts actually used by the industry to remove wrecks, eg BIMCO's Wreckstage 2010, Wreckhire 2010 and Wreckfixed 2010. It also covers the complex requirements concerning the disposal of wrecks, including the latest recycling regulations applicable in 2019. The Law of Wreck will be of value to shipping industry professionals, insurers and legal practitioners, as well as academics and students of maritime law.

On the Verge of History Izabella Agardi, 2022-04-19 Rural women have not had a formative role in the public histories of Central Eastern Europe. Izabella Agárdi aims to correct that by concentrating on their life stories and their connections to general histories. She investigates how Hungarian-speaking, ordinary women in rural contexts born in the 1920s and 1930s remember and talk about the twentieth century they have experienced, and how, through their stories, they articulate historical change and construct themselves as historical subjects. In her analysis, Izabella Agárdi traces the interactions between micro- and macro- narratives as well as the specific tools women of this generation appropriate to talk about personal memories of their often traumatic past. From these stories, a particular mnemonic community emerges, one that speaks from a highly precarious position 'on the verge of history'. It is up to future generations whether these women's experiences will be remembered or forgotten.
