Richard A. DeLorenzo, Wendy Battino

Delivering on the Promise Richard A. DeLorenzo, Wendy

Battino, 2010-02-01 This book shares the compelling story of how a team of visionary educators turned the traditional education system inside out and created a dramatically different approach to schooling that would serve every child. The result is the Re-Inventing Schools Coalition (RISC) Approach to Schooling, a new paradigm in education that can be replicated anywhere, by anyone, for any student, under any set of circumstances.

Russia, the Asymmetric Threat to the United States John

Wood, 2009-06-22 Exploring themes critical to understanding the current world order, this book lays bare the reality of the new Russia that emerged under Vladimir Putin. Russia holds the world's largest natural gas reserves, the second largest coal and uranium reserves, and the eighth largest oil reserves. Europe is dependent on Russia for 25 percent of its oil and gas. Russia is also positioning itself to play a similar role with respect to China. The key to this strategy is a network of new oil and natural gas pipelines that Russia is in the process of constructing, which will by-pass the problematic Ukraine, Georgia, Poland and the Baltic States in the West, and lock-in the enormous potential of China in

the East. Further, as the Western economies including the USA begin themselves to recover, their growing energy dependence will come back into the forefront, and therefore the need to ensure that Russia does not fail in its opening up of new energy resources in the Arctic and Eastern Siberia. Russia is no longer a superpower, in the Cold War sense of the word, because its military is significantly weaker, and as such is incapable of conducting a regional let alone global war against either the United States or NATO. It is precisely because of its military weakness that Putin has been forced to adopt an asymmetric approach. Thus, the pipeline spigot and the proliferation of missiles and aircraft have become Russia's weapons of choice, along with an ever growing reliance on its strategic nuclear forces to provide it with the necessary deterrent to foreign aggression. In addition, Putin and Medvedev have no interest in an arms race with the United States, it is too costly and detracts from their priority, which is economic reform. From Putin's perspective, America is in the process of imposing absolute security or as Joint Vision 2020 put it: full spectrum dominance over the world. As the sole remaining superpower, the United States enjoys a massive strategic imbalance in its favor, which it has used first to contain, but now

with the intent to control the world. How? NATO expansion lays the groundwork for a U.S. global missile defense system to contain perceived adversaries, such as Russia, which in turn secures the dominance of America through its Prompt Global Strike (PGS) capability – the ability to strike anywhere on the planet with impunity within 90 minutes of the order being given by The President. Thus, PGS will be to the 21st Century, what British Gun Boat Diplomacy was to the 19th Century. In such a context, Russia is forced to respond asymmetrically.

Concepts of Athletic Training Ronald P. Pfeiffer, Brent C. Mangus, 2005

Globalization and Latin American Cinema Sophia A. McClennen, 2018-05-25 Studying the case of Latin American cinema, this book analyzes one of the most public - and most exportable- forms of postcolonial national culture to argue that millennial era globalization demands entirely new frameworks for thinking about the relationship between politics, culture, and

economic policies. Concerns that globalization would bring the downfall of national culture were common in the 1990s as economies across the globe began implementing neoliberal, free market policies and abolishing state protections for culture industries. Simultaneously, new technologies and the increased mobility of people and information caused others to see globalization as an era of heightened connectivity and progressive contact. Twenty-five years later, we are now able to examine the actual impact of globalization on local and regional cultures, especially those of postcolonial societies. Tracing the full life-cycle of films and studying blockbusters like *City of God*, *Motorcycle Diaries*, and *Children of Men* this book argues that neoliberal globalization has created a highly ambivalent space for cultural expression, one willing to market against itself as long as the stories sell. The result is an innovative and ground-breaking text suited to scholars interested in globalization studies, Latin-American studies and film studies.

Reimagining Greek Tragedy on the American Stage Helene P. Foley, 2014-06-26 This book explores the emergence of Greek tragedy on the American stage from the nineteenth century to the present. Despite the gap separating the world of classical Greece

from our own, Greek tragedy has provided a fertile source for some of the most innovative American theater. Helene P. Foley shows how plays like *Oedipus Rex* and *Medea* have resonated deeply with contemporary concerns and controversies—over war, slavery, race, the status of women, religion, identity, and immigration. Although Greek tragedy was often initially embraced for its melodramatic possibilities, by the twentieth century it became a vehicle not only for major developments in the history of American theater and dance but also for exploring critical tensions in American cultural and political life. Drawing on a wide range of sources—archival, video, interviews, and reviews—*Reimagining Greek Tragedy on the American Stage* provides the most comprehensive treatment of the subject available.

Healing as Vocation Kayhan Parsi, Myles N. Sheehan, 2006

This collection of essays provides educators in medicine and the health sciences an illuminating and challenging introduction to professionalism. The book takes a practical approach toward this topic, looking at what professionalism means, for the individual physician's relationship to his or her patients, the medical profession as a whole, and to society at large. The essays are written by leading scholars and thinkers in the area of

professionalism in medicine. Although the intended audience is primarily physicians, medical students and residents, the book is a suitable primer for pre-professional health care students as well.

South African Foreign Policy David R Black, David Hornsby, 2018-04-19 This book considers the identity, direction, and intentions embodied in post-apartheid South African Foreign Policy. It aims to deepen the understanding of this evolving post-apartheid foreign policy through an exploration of the nature and trajectory of key bilateral relationships from both the global 'South' (Brazil, China, Iran, the AU) and 'North' (Japan and the UK). This window on the country's international relations enriches understanding of the normative and structural factors that influence not only South African foreign policy, but those of what Jordaan (2003) calls emerging middle powers as they seek to position themselves as influential actors in international affairs. By sketching the contours of key South African relationships the contributors offer illuminating

insights into the cross-pressures shaping South African foreign policy. In addition, they also add depth to the emerging middle power concept by exploring four areas where the tendencies and tensions of emerging middle power foreign policies are apparent: regionalism, multilateralism, reform of global governance, and approach to moral leadership. This book was previously published as a special issue of *Commonwealth and Comparative Politics*.

China in Africa Chris Alden, 2010-08-17 Nowhere in the world is China's rapid rise to power more evident than in Africa. From multi-billion dollar investments in oil and minerals to the influx of thousands of merchants, labourers and cheap consumer goods, China's economic and political reach is redefining Africa's traditional ties with the international community. This book investigates the emerging relationship between China and Africa to determine whether this engagement will be that of a development partner, economic competitor or new hegemon. Alden argues that in order to understand Chinese involvement on the continent, we need to recognize the range of economic, diplomatic and security rationales behind Beijing's Africa policy as well as the response of African elites to China's entreaties. Only then can the new

challenges and opportunities for Africa and the West be accurately assessed.

The Balance of Power Between Russia and NATO in the Arctic and High North Sidharth Kausha,James Byrne,Joseph Byrne,Giangiuseppe Pilli,Gary Somerville,2022-06-21 The resurgence of Russian power in the Arctic and High North will be a key consideration for NATO planners. The Alliance's northern flank represents both a potential vulnerability due to its relative isolation and an area in which NATO enjoys options for horizontal escalation in a conflict. Moreover, as the effects of climate change create opportunities for both navigation and resource extraction, peacetime control over the Northern Sea Route (NSR) and a contest to establish effective administrative control in this area are likely. Disagreements regarding the degree of Russia's jurisdiction over the NSR could, for example, simmer into a form of sub-threshold competition. The purpose of this Whitehall Paper will be to examine the balance of power between NATO and Russia in this critical region in order to establish the level of ambition that the capabilities being developed by Russia can support.

The Kiss of Judice: The Constitution Betrayed Judge Douglass
H. Bartley, 2011-01-05 This work is the first of a multi-volume
treatise. In addition to a Prologue, this volume covers the
Constitution's Natural Rights Pedigree, its Preamble, and the (very-
limited) Federal Legislative Powers and Federal Executive Powers
it grants. The volume is styled, *The Kiss of Judice: The
Constitution Betrayed—A Coroner's Inquest and Report*. “Judice”,
Latin, a pun, means “pertaining to judges”; thus denoting the
judicial, Judas-like betrayal of the Constitution. “Coroner's Inquest”
denotes that the work is a study into the death of the Constitution.
Your author is the Coroner. He proceeds in the Inquest with the aid
of his Coroner's Jury: Jefferson, Madison, Hamilton, Story, Locke,
and Blackstone. The work, at least in this volume, is a dialogue
between the Coroner and his jury on the various parts of the
Constitution covered. The jury members answer the Coroner's

questions, for the most part in their own words, drawn from a variety of their written works. Occasionally the Coroner puts words in their mouths; those “inventions” are shown in brackets in the jurors’ answers. The work is novel, because, to the author’s knowledge, it is the only “Constitutional Law” textbook that collects the wisdom of the framers as the Constitution’s only authoritative sources; it does not, as most Constitutional Law texts do, emphasize court cases as constitutional authority, for more often than not, the courts have only warped the Constitution. In a broader sense, though, the work is not novel, for it’s only an arrangement of the work already done by the jurors. The author is pleased to say that the work, by and large, is not original thought. Its beauty is that it only revives long-forgotten constitutional “discoveries” as set in the words of the main jurors and some others within “interviewed”. Note to purchasers: For updates to the manuscript, check Pastoral Republican @ <http://douglassbartley.wordpress.com/>.

Urbanisation and Inequalities in a Post-Malthusian Context
Sylvia Szabo, 2015-12-15 The book examines contemporary urban challenges and opportunities within the context of the traditional Malthusian theory. The book reorients the classic Malthusian debate on population and food by focusing on global urbanisation and its consequences for peoples' access to basic means of subsistence. Case studies from both developing and developed countries provide a comprehensive overview of the issues related to availability of food and water in an urban context. The book suggests that the concern for human survival is still relevant and

can be exacerbated by rapid urbanisation, and that the negative impacts of urban processes require an increased attention of the international community as we enter the new Sustainable Development Goals era.

The International Politics of the Persian Gulf Arshin Adib-Moghaddam, 2006-09-27 Adib-Moghaddam examines the causes and consequences of conflict in one of the most important regions of the world. Bridging the gap between critical theories of international relations and the empirical study of the Gulf area, this book expands on the many ideologies, cultural inventions and ideational constructs that have affected relations in the past three decades. Key issues explored include: the rise and fall of Arab and Persian nationalism the international repercussions of the Islamic revolution in Iran the events surrounding the three Gulf Wars the 'mindset' of terrorist networks such as al-Qaeda why US neo-conservatism is threatening regional order. Provocatively written, persuasively researched and conclusively argued, *The International Politics of the Persian Gulf* presents the first comprehensive analysis of international relations in the Gulf from an explicitly multidisciplinary perspective.
