Peasant Intellectuals Steven M. Feierman, 1990-11-14 Scholars who study peasant society now realize that peasants are not passive, but quite capable of acting in their own interests. But, do coherent political ideas emerge within peasant society or do peasants act in a world where elites define political issues? *Peasant Intellectuals* is based on ethnographic research begun in 1966 and includes interviews with hundreds of people from all levels of Tanzanian society. Steven Feierman provides the history of the struggles to define the most basic issues of public political discourse in the Shambaa-speaking region of Tanzania. Feierman also shows that peasant society contains a rich body of alternative sources of political language from which future debates will be shaped.

Revisiting the Law and Governance of Trafficking, Forced Labor and Modern Slavery Prabha Kotiswaran, 2017-05-25 In the decades following the globalization of the world economy, trafficking, forced labor and modern slavery have emerged as significant global problems. States negotiated the Palermo Protocol in 2000 under which they agreed to criminalize trafficking, primarily understood as an issue of serious organized crime. Sixteen years later, leading academics, activists and policy makers from international organizations come together in this edited volume and adopt an interdisciplinary, multi-stakeholder approach to revisit trafficking through the lens of labor migration and extreme exploitation and, in the process, rethink the law and governance of trafficking. This volume considers many key factors, including the evolving international law on trafficking, the relationship

between trafficking, slavery, indenture and domestic migration law and policy as well as newly emergent techniques of governance, including indicators, all with a view to furthering prospects for lasting economic justice in a globalized world.

Trade and Conflict Samuel MacIsaac,Buck Duclos,2022-02-23 This book aims to reframe the broader debate on the recent globalization backlash and its implications for middle-powers such as Canada. Protectionists have been accused of unraveling the multilateralist world order. The United States pulling out of the Trans-Pacific Partnership Agreement, the renegotiation of the North

American Free Trade Agreement, and a series of tariffs imposed by both the United States and China threaten global economic integration. Fierce protectionist rhetoric risks gridlocking a fragile trade system that faces rising discontent, especially in light of the recent globalization backlash. American geopolitical hostilities are also influencing trade policies, notably punitive tariff and trade sanctions. Meanwhile, these fears are not limited to trade. The ongoing challenge to American hegemony and rising globalization backlash are dangerous signals of economic unpredictability that could perilously escalate towards outright conflict. This edited volume, then, tackles the trends of rising economic nationalism, unilateralism and protectionism to shed light on these vital foreign policy issues. The chapters in this book were originally published as a special issue of the Canadian Foreign Policy Journal.
