Integrated Approach to Web Performance Testing: A

Practitioner's Guide Subraya, B.M.,2006-01-31 This book provides an integrated approach and guidelines to performance testing of Web based systems--Provided by publisher.

Imagined Empires Zeinab Abul-Magd,2013-07-12 Through a microhistory of a small province in Upper Egypt, this book investigates the history of five world empires that assumed hegemony in Qina province over the last five centuries. Imagined Empires charts modes of subaltern rebellion against the destructive policies of colonial intruders and collaborating local elites in the south of Egypt. Abul-Magd vividly narrates stories of sabotage, banditry, flight, and massive uprisings of peasants and laborers, to challenge myths of imperial competence. The book depicts forms of subaltern discontent against 'imagined empires' that failed in achieving their professed goals and brought about environmental crises to Qina province. As the book deconstructs myths about early modern and modern world hegemony, it reveals that imperial modernity and its market economy altered existing systems of landownership, irrigation, and trade—leading to such destructive occurrences as the plague and cholera epidemics. The book also deconstructs myths in Egyptian historiography, highlighting the problems of a Cairo-centered idea of the Egyptian nation-state. The book covers the Ottoman, French, Muhammad Ali's, and the British informal and formal empires. It alludes to the U.S. and its failed market economy in Upper Egypt, which partially resulted in Qina's participation in the 2011 revolution. Imagined Empires is a timely addition to Middle Eastern and world history.

Intensional D. A. Horton,2019-10-22 When it comes to the ethnic divisions in our world, we speak often of seeking racial reconciliation. But at no point have all the different ethnicities on Earth been reconciled. Animosity, distrust, and hostility among people from various ethnicities have always existed in American

history. Even in the church, we have often built walls--ethnic segregation, classism, sexism, and theological tribes--to divide God's people from each other. But it shouldn't be this way. God's people are the only people on earth who have experienced true reconciliation. Who better to enter into the ethnic tensions of our day with the hope of Jesus? In *Intensional*, pastor D. A. Horton steps into the tension to offer vision and practical guidance for Christians longing to embrace our Kingdom ethnicity, combating the hatred in our culture with the hope of Jesus Christ.

Italy International Monetary Fund, 2012-07-10 This 2012 Article IV Consultation focuses on Italy's economy, which is expected to continue contracting through the year owing to tight financial conditions, global slowdown, and the needed fiscal consolidation. The government has embarked on wide-ranging structural reforms to boost productivity and potential growth. Executive Directors have commended the Italian authorities for launching an ambitious policy agenda to secure fiscal sustainability and promote growth. Directors have also acknowledged the important steps taken toward deregulating the service sector and making the labor market more flexible and inclusive.

Civil Rights & Liberties in the 21st Century John C Domino, 2017-10-03 This up-to-date analysis of the Supreme Court's landmark rulings on civil rights and liberties is a discussion of the facts, legal issues, and constitutional questions surrounding those rulings. Domino's text serves as either a core text in courses on civil liberties and civil rights, or as a supplementary text in courses on constitutional law and the judiciary. The book is written

in the belief that the key to understanding constitutional law is not having the right answers but asking the right questions. It encourages students to be critical thinkers and provides a historical context so students can better understand competing social, legal, and political interests affecting the Supreme Court's decisions today. The text also includes numerous short excerpts from some of the more influential, eloquent, and controversial Supreme Court opinions to illustrate the handiwork of the powerful legal minds who have helped to shape our society. It reminds us that the Court is not an abstract legal mechanism, but rather a group of human beings with divergent opinions.

Lawyers and Mediators Mavis Maclean, John

Eekelaar, 2016-02-25 Do lawyers make matters worse, or do they provide information, advice and support which can help to prevent disputes arising or manage them when they do? Do mediators enable parties to communicate and reach agreements tailor-made to their needs? Or working outside the legal framework, do they find it difficult to protect weaker parties and access expert advice? What happens when lawyers become mediators? This book will describe the structure of service provision and the day-to-day work of lawyers, mediators, and lawyer mediators, drawing on empirical work carried out between 2013 and 2015 immediately after the recent changes to the management of divorce and separation within the family justice system. The reduction in legal aided help in 2013 and the failure of mediation to fill the gap in 2014-15 have given rise to a difficult debate. This book aims to provide an account of some of the practical effects of these policies through a description of the daily work of practitioners in the sector. It raises the question of whether we need to choose between traditional legal services and the new processes of private ordering or whether intermediate positions might be possible.

Dryland East Asia: Land Dynamics amid Social and Climate Change Jiquan Chen, Shiqiang Wan, Geoffrey Henebry, Jiaguo Qi, Garik Gutman, Ge Sun, Martin Kappas, 2013-10-29 Drylands in

East Asia (DEA) are home to more than one billion people with an environment vulnerable to natural and anthropogenic changes. One of the critical needs in the region is to fully understand how dryland ecosystems respond to the changing climate and human activities in order to develop strategies to cope with continued climate change. This book provides state-of-the-art knowledge and information on drylands ecosystem dynamics, changing climate, society, and land use in the region. In addition to the synthesis of the existing research and knowledge of DEA, the book provides a role model for regional ecological assessment. With a wide spectrum of contributions from experts around the globe, the book should be of interest to researchers and students both internationally and in East Asia. Lessons learned from this synthesis effort in DEA should be useful for developing climate adaptation strategies for other similar regions around the globe.

Gods of War James Lacey, Williamson Murray, 2021-05-18
Hannibal vs. Scipio. Grant vs. Lee. Rommel vs. Patton. The greatest battles, commanders, and rivalries of all time come to life in this engrossing guide to the geniuses of military history. "A compelling study of military leadership."—James M. McPherson, Pulitzer Prize-winning author of *Battle Cry of Freedom* Any meeting of genius may create sparks, but when military geniuses meet, their confrontations play out upon a vast panorama of states or civilizations at war, wielding the full destructive power of a mighty nation's armies. *Gods of War* is the first single-volume, in-depth examination of the most celebrated military rivalries of all time, and of the rare, world-changing battles in which these great commanders in history matched themselves against true equals. From Caesar and Pompey deciding the fate of the Roman Republic, to Grant and Lee battling for a year during the American Civil War, to Rommel and Montgomery and Patton meeting in battle after battle as Hitler strove for European domination, these match-ups and their corresponding strategies are among the most memorable in history. A thrilling look into both the generals' lives

and their hardest-fought battles, *Gods of War* is also a thought-provoking analysis of the qualities that make a strong commander and a deep exploration of the historical context in which the contestants were required to wage war, all told with rousing narrative flair. And in a time when technology has made the potential costs of war even greater, it is a masterful look at how military strategy has evolved and what it will take for leaders to guide their nations to peace in the future.

Consumer Debt and Social Exclusion in Europe Hans-W. Micklitz, Irina Domurath, 2016-03-09 This book analyses the dichotomy between the goal of social inclusion and the effect of social exclusion through over-indebtedness since 2008 in Europe. Filling a vital gap in the current literature on the effects of the financial and economic crisis, this volume puts into context academic discussion with the real-life dimension of over-indebtedness. Reports from six European countries provide socio-economic and legal information on over-indebtedness as well as the regulatory and judicial responses to the problems entailed by over-indebtedness. They form the empirical background for five analyses of different aspects of the inclusion-exclusion dichotomy. It becomes clear that in the context of credit expansion, individual over-indebtedness has turned into a social issue, which the current design of the consumer credit and mortgage system in Europe has helped to produce while disregarding the consequential danger of social exclusion.

Meltdown Thomas E. Woods, Jr., 2009-02-09 With a foreword from Ron Paul, *Meltdown* is the free-market answer to the Fed-created economic crisis. As the new Obama administration inevitably calls for more regulations, Woods argues that the only way to rebuild our economy is by returning to the fundamentals of capitalism and letting the free market work.

Landscapes of Realism Dirk Göttsche, Rosa Mucignat, Robert Weninger, 2021-04-15 Few literary phenomena are as elusive and yet as persistent as realism. While it responds to the perennial

impulse to use literature to reflect on experience, it also designates a specific set of literary and artistic practices that emerged in response to Western modernity. Landscapes of Realism is a two-volume collaborative interdisciplinary exploration of this vast territory, bringing together leading-edge new criticism on the realist paradigms that were first articulated in nineteenth-century Europe but have since gone on globally to transform the literary landscape. Tracing the manifold ways in which these paradigms are developed, discussed and contested across time, space, cultures and media, this first volume tackles in its five core essays and twenty-five case studies such questions as why realism emerged when it did, why and how it developed such a transformative dynamic across languages, to what extent realist poetics remain central to art and popular culture after 1900, and how generally to reassess realism from a twenty-first-century comparative perspective.

Science and the politics of openness Brigitte Nerlich, Sarah Hartley, Sujatha Raman, Alexander Smith, 2018-02-07 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. The phrase 'here be monsters' or 'here be dragons' is commonly believed to have been used on ancient maps to indicate unexplored territories which might hide unknown beasts. This book maps and explores places between science and politics that have been left unexplored, sometimes hiding in plain sight - in an era when increased emphasis was put on 'openness'. The book is rooted in a programme of research funded by the Leverhulme Trust entitled: 'Making Science Public: Challenges and opportunities, which runs from 2014 to 2017. One focus of our research was to critically question the assumption that making science more open and public could solve various issues around scientific credibility, trust, and legitimacy. Chapters in this book explore the risks and benefits of this perspective with relation to transparency, responsibility, experts and faith.
