**NATO's Gamble** Dag Henriksen,2013-11-15 Selected for the 2008 Royal Air Force Reading List In this revealing work, Dag Henriksen discloses the origins and content of NATO's strategic and conceptual thinking on how the use of force was to succeed politically in altering the behavior of the Federal Republic of Yugoslavia (FRY). The air campaign, known as Operation Allied Force, was the first war against any sovereign nation in the history of NATO and the first major combat operation conducted for humanitarian purposes against a state committing atrocities within its own borders. This book examines the key political, diplomatic, and military processes that shaped NATO and U.S. management of the Kosovo crisis and shows how air power became the main instrument in their strategy to coerce the FRY to accede to NATO's demands. The book further shows that the military leaders set to execute the campaign had no clear strategic guidance on what the operation was to achieve and that the level of uncertainty was so high that the officers selecting the bombing targets watched NATO's military spokesman on CNN for guidance in choosing their targets. Henriksen argues that structures preceding the Kosovo crisis shaped the management to a much greater degree than events taking place in Kosovo and that the air power community's largely institutionalized focus on high-intensity conflicts, like the 1991 Gulf War, hampered them from developing strategies to fit the political complexities of crises. Because fighting and wars in the lower end of the intensity spectrum are likely to surface again, study of the Kosovo crisis offers lessons for future international conflicts in which the combination of force and diplomacy will play a very significant role.

**Security Sector Reform: A Case Study Approach to Transition and Capacity Building** Sarah Meharg,Aleisha Arnusch,Susan Merrill,2012-08-04 The authors explore the definition of Security sector reform (SSR) as it has emerged in the international community. The makeup of the security sector is examined, principles are identified for implementing SSR, and outcomes SSR is intended to produce are specified. Supporting case studies assess specific SSR programs. The authors conclude that those conducting SSR programs must understand and continually revisit the policy goals of SSR programs so as to develop concepts that support a transitional process that moves forward over time. State actors must acknowledge and often accommodate nonstate security actors more effectively in SSR planning and implementation, while recognizing both the advantages and the risks of collaborating with such actors. The authors also note the need for more flexible and better integrated funding processes. (Originally published by the Strategic Studies Institute.)

**Citizenship in a Connected Canada** Elizabeth Dubois,Florian Martin-Bariteau,2020-11-10 This interdisciplinary edited collection brings together scholars, activists, and policy makers to build consensus around what a connected society means for Canada. Part I examines the current landscape of digital civic participation and highlights some of the missing voices required to ensure an inclusive digital society. Part II explores the relationship between citizens and their political and democratic institutions, from government service delivery to academic and citizen engagement in policy making. Part III addresses key legal frameworks that need to be discussed and redesigned to allow for the building and strengthening of an inclusive society and democratic institutions. This is a foundational resource for policy makers, students, and researchers interested in understanding citizenship in a digital context in Canada. Published in English.

**Class Size** Peter Blatchford,Kam Wing Chan,Maurice Galton,Kwok Chan Lai,John Chi-Kin Lee,2016-04-28 Much debate, research and commentary about class sizes in schools is limited because of an exclusive concern with class size and pupil academic attainment, and a neglect of classroom processes, which might help explain class size effects (or lack of them). Very little is known about the central question: how can teachers make the most of class size changes? Much of the commentary on class size effects has focused on Western and English-speaking countries but there are promising developments elsewhere, particularly the 'Small Class Teaching' initiatives in East Asia in the past decade, which have brought new knowledge and practical wisdom to the class size debate. This book seeks to move toward a clearer view of what we know and do not know about class size effects, and to identify future steps in terms of policy and research. There is a huge and exciting potential for international collaboration on knowledge concerning class size effects which can help with research-informed policy. The book aims to draw out Eastern and Western international contexts which underpin any understanding of the role of class size in school learning. The book has chapters by an international team of experts on class size effects, including Maurice Galton and John Hattie. Chapters are organised into four main sections: Socio-cultural and political contexts to the class size debate in the East and West; Research evidence on class size; Class size and classroom processes likely to be related to class size changes; Professional development for small class teaching in East Asia.

**Democratising Indonesia** Mikaela Nyman,2006 The fall from power of Indonesia's President Suharto in 1998 has drawn much media and academic attention but the focus has been on the elite perspective, the role of the regime and military; little has been published on civil society, let alone gender issues. This study, which covers the period from Suharto's fall up until the latest democratic elections in 2004, analyses the role of civil society in Indonesia's transition towards democracy. Here, the author argues that social movements are civil society's primary catalysts for change.--BOOK JACKET.

**Invoking Humanity** Danilo Zolo,2002-08-27 \* Powerful, passionate and highly topical critique of humanitarian intervention\* International political theorist with eight top-selling booksWhoever invokes humanity wants to cheat.In this first time translation in English, Danilo Zolo considers Carl Schmitt's maxim in the context of the humanitarian war waged against the Federal Republic of Yugoslavia in the Spring of 1999 by 19 NATO countries. This erudite and disturbing book is a political, legal and philosophical reflection on an extraordinary display of Western Power and its present and future impact on the global system of international relations.Zolo's account of the war is located within the context of the irresistible drive of globalization which he argues brings economic, financial and military, ecological and ethnic-religious turbulence in its wake. Not only the future of the Balkan region, he suggests, is at stake here, but the fate of international law, the future role of the United Nations and the political destiny of Europe.

*Hugo Chávez* Nikolas Kozloff,2015-12-01 Audacious, provocative, and bombastic, few world politicians are as colorful as Hugo Chávez, now making international news for his plans to nationalize U.S. owned businesses and his bold opposition to Washington's economic and trade policies. As Venezuela gains importance as the fifth largest oil exporter in the world, this firebrand leader is quickly moving to the public spotlight by uniting much of South America against the Bush administration and wielding oil as a geopolitical weapon. To create this rich and objective portrait, Nikolas Kozloff--one of the few American journalists who has spent years in the Andean region--has profiled Chávez's top advisors, leaders of his movement, and other key figures in both Venezuela and the U.S. The result is a timely, exhaustive analysis of Chávez as a political leader, and a nuanced examination of the president moving to the center of the global stage. Includes a new afterword by the author, with insights into Chávez's reelection in relation to wider hemispheric politics.
