Web Design for Libraries Charles P. Rubenstein, 2014-08-28

Having a clear, attractive, and easy-to-navigate website that allows users to quickly find what they want is essential for any organization—including a library. This workbook makes website creation easy—no HTML required. This book teaches all of the essentials for designing and creating a simple, professional-looking website for any library. By using cut-and-paste templates from familiar software programs, readers can create complex websites in short order—without learning confusing HTML coding. Three final chapters cover using style sheets, address the potential benefits of HTML5, and overview content management system based websites. By using this guidebook as a reference, even those without previous knowledge about web design will possess enough basic information to create a great web page—and, with a little practice, prepare a full library website.

International Monetary Fund Annual Report 2012 International Monetary Fund, 2012-10-04 The IMF's 2012 Annual Report chronicles the response of the Fund's Executive Board and staff to the global financial crisis and other events during financial year 2012, which covers the period from May 1, 2011, through April 30, 2012. The print version of the Report is available in eight languages (Arabic, Chinese, English, French, German, Japanese, Russian, and Spanish), along with a CD-ROM (available in English only) that includes the Report text and ancillary materials, including the Fund's Financial Statements for FY2012.

Culture, Power, and Security Mary Kathryn Barbier, Richard V. Damms, 2012-11-15 *Culture, Power, and Security* provides a timely collection of essays by a diverse group of historians grappling with the

notion of “security” in different temporal and geographical contexts. The authors, ranging from senior scholars – including an award-winning military historian – to relative newcomers, examine a variety of new topics or ask new questions of older ones in the areas of religious, political, intelligence, military and foreign relations history. Drawing upon new approaches or archival sources, each author offers fresh perspectives and insight into the nature of national or international security, broadly conceived. This unique collection of essays, engagingly written and reflecting state-of-the-art scholarship, will be of value both to general readers and students of military history, diplomatic history and national and international security studies.

Collusion Nomi Prins, 2018-05-01 In this searing exposé former Wall Street insider Nomi Prins shows how the 2007-2008 financial crisis turbo-boostered the influence of central bankers and triggered a massive shift in the world order. Central banks and international institutions like the IMF have overstepped their traditional mandates by directing the flow of epic sums of fabricated money without any checks or balances. Meanwhile, the open door between private and central banking has ensured endless opportunities for market manipulation and asset bubbles -- with government support. Through on-the-ground reporting, Prins reveals how five regions and their central banks reshaped economics and geopolitics. She discloses how Mexico navigated its relationship with the US while striving for independence and how Brazil led the BRICS countries to challenge the US dollar's hegemony. She explains how China's retaliation against the Fed's supremacy is aiding its ongoing ascent as a global superpower and how Japan is negotiating the power shift from the West to the East. And she illustrates how the European response to

the financial crisis fueled instability that manifests itself in everything from rising populism to the shocking Brexit vote. Packed with tantalizing details about the elite players orchestrating the world economy -- from Janet Yellen and Mario Draghi to Ben Bernanke and Christine Lagarde -- Collusion takes the reader inside the most discreet conversations at exclusive retreats like Jackson Hole and Davos. A work of meticulous reporting and bracing analysis, Collusion will change the way we understand the new world of international finance.

Staging Chinese Revolution Xiaomei Chen, 2016-11-08 Staging Chinese Revolution surveys fifty years of theatrical propaganda performances in China, revealing a dynamic, commercial capacity in works often dismissed as artifacts of censorship. Spanning the 1960s through the 2010s, Xiaomei Chen reads films, plays, operas, and television shows from an interdisciplinary and comparative perspective, demonstrating how, in a socialist state with capitalist characteristics, propaganda performance turns biographies, memoirs, and war stories into mainstream ideological commodities, legitimizing the state and its right to rule. Analyzing propaganda performance also brings contradictions and inconsistencies to light that throw common understandings about propaganda's purpose into question. Chen focuses on revisionist histories that stage the lives of the founding fathers of the Communist Party, such as Chen Duxiu, Mao Zedong, and Deng Xiaoping, and the engaging mix of elite and ordinary characters that animate official propaganda in the private and public sphere. Taking the form of personal memories and representing star and youth culture and cyberspace, contemporary Chinese propaganda appeals through multiple perspectives, complicating relations among self, subject, agent, state building, and national identity. Chen treats

Chinese performance as an extended form of political theater confronting critical issues of commemoration, nostalgia, state rituals, and contested history. It is through these reenactments that three generations of revolutionary leaders loom in extraordinary ways over Chinese politics and culture.

ASEAN International Law Eric Yong Joong Lee, 2021-10-13 This book consists of updated and refreshed papers written by international law scholars and practitioners from the ASEAN region and published by the Journal of East Asia and International Law, comprehensively covering almost all contemporary international legal issues related to ASEAN. Legal analysis of the ASEAN integration as one community with one vision in this book provides readers with a better understanding of the current social climate and future developments of ASEAN. Each section within the book covers a highly topical issue on ASEAN cooperation and dispute resolution from an international law perspective. ASEAN is one of the biggest economic communities in the world and the ASEAN+3 covers nearly half of global GDP. Given the region's global impact, this book is of interest to Asia watchers, academics and policymakers alike.

Statistics In the Pharmaceutical Industry C. Ralph Buncher, Jia-Yeong Tsay, 2019-03-07 The growth of the pharmaceutical industry over the past decade is astounding, but the impact of this growth on statistics is somewhat confusing. While software has made analysis easier and more efficient, regulatory bodies now demand deeper and more complex analyses, and pharmacogenetic/genomic studies serve up an entirely new set of challenges. For more than two decades, *Statistics in the Pharmaceutical Industry* has been the definitive guide to sorting through the challenges in the industry, and this Third Edition continues that tradition. Updated and expanded to reflect the

most recent trends and developments in the field, *Statistics in the Pharmaceutical Industry*, Third Edition presents chapters written by experts from both regulatory agencies and pharmaceutical companies who discuss everything from experimental design to post-marketing studies. This approach sheds light on what regulators consider acceptable methodologies and what methods have proven successful for industrial statisticians. Both new and revised chapters reflect the increasingly global nature of the industry as represented by authors from Japan and Europe, the increasing trend toward non-inferiority/equivalence testing, adaptive design in clinical trials, global harmonization of regulatory standards, and multiple comparison studies. The book also examines the latest considerations in anti-cancer studies. *Statistics in the Pharmaceutical Industry*, Third Edition demystifies the approval process by combining regulatory and industrial points of view, making it a must-read for anyone performing statistical analysis at any point in the drug approval process.

Hatred at Home Andrew Welsh-Huggins, 2011-08-22 One day in 2002, three friends—a Somali immigrant, a Pakistan-born U.S. citizen, and a hometown African American—met in a Columbus, Ohio coffee shop and vented over civilian casualties in the war in Afghanistan. Their conversation triggered an investigation that would become one of the most unusual and far-reaching government probes into terrorism since the 9/11 attacks. Over several years, prosecutors charged each man with unrelated terrorist activities in cases that embodied the Bush administration's approach to fighting terrorism at home. Government lawyers spoke of catastrophes averted; defense attorneys countered that none of the three had done anything but talk. The stories of these homegrown terrorists illustrate the paradox

the government faces after September 11: how to fairly wage a war against alleged enemies living in our midst. Hatred at Home is a true crime drama that will spark debate from all political corners about safety, civil liberties, free speech, and the government's war at home.

The Heart of the City Alexander Garvin, 2019-05-07
Downtowns are more than economic engines: they are repositories of knowledge and culture and generators of new ideas, technology, and ventures. They are the heart of the city that drives its future. If we are to have healthy downtowns, we need to understand what downtown is all about; how and why some American downtowns never stopped thriving (such as San Jose and Houston), some have been in decline for half a century (including Detroit and St. Louis), and still others are resurging after temporary decline (many, including Lower Manhattan and Los Angeles). The downtowns that are prospering are those that more easily adapt to changing needs and lifestyles. In The

Heart of the City, distinguished urban planner Alexander Garvin shares lessons on how to plan for a mix of housing, businesses, and attractions; enhance the public realm; improve mobility; and successfully manage downtown services. Garvin opens the book with diagnoses of downtowns across the United States, including the people, businesses, institutions, and public agencies implementing changes. In a review of prescriptions and treatments for any downtown, Garvin shares brief accounts--of both successes and failures--of what individuals with very different objectives have done to change their downtowns. The final chapters look at what is possible for downtowns in the future, closing with suggested national, state, and local legislation to create standard downtown business improvement districts to better manage downtowns. This book will help public officials, civic organizations, downtown business property owners, and people who care about cities learn from successful recent actions in downtowns across the country, and expand opportunities facing their downtown. Garvin provides recommendations for continuing actions to help any downtown thrive, ensuring a prosperous and thrilling future for the 21st-century American city.

ASEAN Environmental Law, Policy and Governance Kheng Lian Koh, 2009 ASEAN Environmental Law, Policy and Governance: Selected Documents, in two volumes, contains a judicious compilation of relevant ASEAN environmental instruments. Medicine of Australian Mammals Larry Vogel, Rupert Woods, 2008-08-18 In *Medicine of Australian Mammals*, more than 30 experts present the most current information available on the medical management of all taxa of Australian native mammals. This comprehensive text is divided into two parts. The first includes chapters on general topics relevant to the medical management of captive and free-ranging Australian native mammals such as: veterinary considerations for the rescue, treatment, rehabilitation and release of wildlife; veterinary aspects of hand-rearing orphaned marsupials; marine mammal strandings and the role of the veterinarian; and wildlife health investigation and necropsy of Australian mammals. The second part covers the medicine of specific taxa of Australian native mammals. Detailed information on taxonomy, distribution, biology, anatomy, physiology, reproduction, husbandry, nutrition, physical and chemical restraint, clinical pathology, hand-rearing, diseases, zoonoses, therapeutics, reproductive management and surgery is included. This practical, one-source reference is complemented by detailed photographs and illustrations, as well as tables listing reproductive and physiological data, diets, haematology and biochemistry values, and drug formularies. Appendices include a checklist of the mammals of Australia and its territories and a guide to the identification of common parasites of Australian mammals. *Medicine of Australian Mammals* is clinically oriented and is a must-have for veterinary clinicians, no matter how experienced. The book

will also be of use to veterinary students, researchers, biologists, zoologists, wildlife carers and other wildlife professionals.

The Origins of Modern Financial Crime Sarah Wilson, 2014-06-05

The recent global financial crisis has been characterised as a turning point in the way we respond to financial crime. Focusing on this change and ‘crime in the commercial sphere’, this text considers the legal and economic dimensions of financial crime and its significance in societal consciousness in twenty-first century Britain. Considering how strongly criminal enforcement specifically features in identifying the post-crisis years as a ‘turning point’, it argues that nineteenth-century encounters with financial crime were transformative for contemporary British societal perceptions of ‘crime’ and its perpetrators, and have lasting resonance for legal responses and societal reactions today. The analysis in this text focuses primarily on how Victorian society perceived and responded to crime and its perpetrators, with its reactions to financial crime specifically couched within this. It is proposed that examining how financial misconduct became recognised as crime during Victorian times makes this an important contribution to nineteenth-century history. Beyond this, the analysis underlines that a historical perspective is essential for comprehending current issues raised by the ‘fight’ against financial crime, represented and analysed in law and criminology as matters of enormous intellectual and practical significance, even helping to illuminate the benefits and potential pitfalls which can be encountered in current moves for extending the reach of criminal liability for financial misconduct. Sarah Wilson’s text on this highly topical issue will be essential reading for criminologists, legal scholars and historians alike. It will also be of great interest to the general reader. The *Origins of Modern Financial Crime* was short-listed for the

Wadsworth Prize 2015.

Abiotic Disorders of Landscape Plants Laurence Raleigh

Costello,2003 This manual contains a wealth of information to help you diagnose abiotic disorders in landscape plants – disorders caused by environmental, physiological or other nonbiological factors. You'll learn how to diagnose injury symptoms from over 20 different abiotic agents including water deficit, nutrient deficiencies, salinity, pH, sunburn, air pollution, herbicide and other chemical phytotoxicities, mechanical injuries, lightning, wind, and hail. You'll also learn how to develop a step-by-step diagnostic strategy. Included are strategies, techniques, and tools you can use in diagnosing plant problems, common injury symptoms and their abiotic causes, and plant traits that can resemble abiotic disorders. Illustrated with 319 color photographs and 38 tables, this book is a must-have for the library of every landscape professional.
