Parliaments and Human Rights Murray Hunt, Hayley J Hooper, Paul Yowell, 2015-04-30 In many countries today there is a growing and genuinely-held concern that the institutional arrangements for the protection of human rights suffer from a 'democratic deficit'. Yet at the same time there appears to be a new consensus that human rights require legal protection and that all branches of the state have a shared responsibility for upholding and realising those legally protected rights. This volume of essays tries to understand this paradox by considering how parliaments have sought to discharge their responsibility to protect human rights. Contributors seek to take stock of the extent to which national and sub-national parliaments have developed legislative review for human rights compatibility, and the effect of international initiatives to increase the role of parliaments in relation to human rights. They also consider the relationship between legislative review and judicial review for human rights compatibility, and whether courts could do more to incentivise better democratic deliberation about human rights. Enhancing the role of parliaments in the protection and realisation of human rights emerges as an idea whose time has come, but the volume makes clear that there is a great deal more to do in all parliaments to develop the institutional structures, processes and mechanisms necessary to put human rights at the centre of their function of making law and holding the government to account. The sense of democratic deficit is unlikely to dissipate unless parliaments empower themselves by exercising the considerable powers and responsibilities they already have to interpret and apply human rights law, and courts in turn pay closer attention to that reasoned consideration. 'I believe that this book will be of enormous value to all of those interested in human rights, in modern legislatures, and the relationship between the two. As this is absolutely fundamental to the character and credibility of democracy, academic insight of this sort is especially welcome. This is an area where I expect there to be an ever expanding community of interest.' From the Foreword by the Rt Hon John Bercow MP, Speaker of the House of Commons

The Pilot-Judgment Procedure of the European Court of Human Rights Dominik Haider, 2013-03-28 In *The Pilot-Judgment Procedure of the European Court of Human Rights* Dominik Haider examines if this recent approach to tackle structural human rights deficiencies in member states is reconcilable with the European Convention on Human Rights.

Democratisation, Governance and Regionalism in East and Southeast Asia Ian Marsh, 2006-09-27 This new collection of essays compares the development of central institutions of governance in the emerging democracies of East and South East Asia. Seven key countries are covered: Taiwan, Korea, Thailand, Singapore, Malaysia, Indonesia and the Philippines. Save for Singapore and Malaysia, all have democratized over the past decade. Because of its constitutive implications for citizen identities, democratization is arguably of even greater potential significance than the economic take-off that preceded it. But there are distinctive features that give the experience of these seven states especial relevance. First, unlike analogous western patterns, democratic transitions in Asia have been top-down in character. Second, the implementation of basic democratic forms was highly compressed in time. Third there were (and are), in most countries, no major ideological or programmatic cleavages. Thus the bases around which contending political forces might organize are not immediately clear. This may affect the outlook for partisanship and mobilization. There has been no synoptic, comparative study of these developments on a region-wide scale. This book fills the gap extremely well.

The Locations of Composition Christopher J. Keller, Christian R. Weissner, 2007-07-05 The Locations of Composition examines how spaces, places, and locations define, problematize, and shape composition studies. From a wide variety of perspectives, including critical theory, rhetoric, cultural geography, genre theory, postcolonial studies, and media studies, the contributors explore the disciplinary boundaries and authority of composition studies, how teachers of writing can engage students in more place-centered pedagogies, and how compositionists can sort through the often hidden and intricate relationships between and among composition's places. The book reveals the complex ways that places are central to the field's history, identity, and ability to move and change.

Behind Closed Doors Joanne Stanton, Christine O'Donnell, 2017-09-26 Behind Closed Doors tells the story of two mothers who began investigating serious health issues in their own son and daughter—and ended up writing an expose about the declining health of an entire generation of American children. In their relentless attempts to improve the health of their own children, they uncovered harmful trends in our food, pharmaceuticals, and environment, all stemming from weak laws and conflicts of interest. What they discovered shocked and ultimately empowered them to get actively involved in questioning and reforming these harmful, out-of-balance practices, and to inspire other moms to do the same. Behind Closed Doors not only offers scientifically verified evidence of how declining industry practices are harming our kids, but showcases solutions like environmental medicine and other integrative health practices, shares personal success stories, and provides tools and solutions parents can immediately implement—equipping and inspiring us all to stand together for change.

Comparative Regionalism Fred H. Lawson, 2017-03-02 Regionalism has regained momentum in the post-Cold War era. New economic groupings continue to spring up across the globe, while older regional organizations have strengthened their institutional bases and broadened their scope. Explaining the reinvigoration of regionalism requires comparative analyses that not only highlight the commonalities that characterize various regional experiments but also account for the differential outcomes and divergent trajectories such projects exhibit. This collection of seminal articles on regionalism advances theoretical concepts that can stimulate useful comparisons, along with scholarly surveys of important instances of regionalism in the contemporary world. Besides classic

studies of the European Union, the volume includes authoritative overviews and case studies of regionalist projects in East Asia, Sub-Saharan Africa, Latin America, the Middle East and Central Eurasia. An introductory essay situates these articles in the context of the five decade-long research program on regional integration theory.

The Wars on Terrorism and Iraq Margaret Crahan, John Goering, Thomas G. Weiss, 2004-07-31 'If I had the power to do so, I would make this book compulsory reading for all who exercise political power in our world today! Instead, I will keep my fingers crossed that it will be read by as many members of Congress and of the current US administration as possible, and by a wide cross-section of policy analysts, diplomats, academics and human rights defenders.' - Mary Robinson, Former UN High Commissioner for Human Rights Wars on Terrorism and Iraq provides a timely and critical analysis of the impact of the wars on terrorism and Iraq on human rights particularly internationally, as well as related tensions between unilateralism and multilateralism in US foreign policy. The distinguished contributors examine the consequences for international relations and world order of the traditional standard bearer for human rights and democracy (the United States) appearing not to be championing the rule of law and negotiated conflict resolution. The authors also suggest effective policies to promote greater fulfilment of human rights in order to achieve peaceful accord within nations, and stability internationally.

Tracing Your Canal Ancestors Sue Wilkes, 2011-12-13 Britain's industrial revolution depended on canals for the cheap movement of materials and goods until the coming of the railways. That is why Sue Wilkes's well researched and highly readable handbook on the subject is so valuable. She concentrates on the people who lived and worked on the waterways the canal boatmen, their families and their way of life - and those who depended on the canal trade for a living the lock-keepers, toll collectors, and canal company clerks. She provides a thorough, practical guide to the sources the archives, books, websites, societies available for researchers if they are studying our inland

Evidence for Psi Damien Broderick, Ben Goertzel, 2014-11-19 "Psi" is the term used by researchers for a variety of demonstrable but elusive psychic phenomena. This collection of essays provides a detailed survey of the evidence for psi at the level of scientific examination. Key features of apparent psi phenomena are reviewed, including precognition and remote perception (knowledge of future or distant events that cannot be inferred from present information), presentiment (physiological responses to stimuli that have not yet occurred), the effects of human emotions on globally dispersed machines, the possible impact of local sidereal time on psi performance, and the familiar feeling of knowing who is calling on the phone. Special attention is given to those phenomena that make it difficult for scientists to get a clear understanding of psi. The body of psi research, while complex and frustrating, is shown to contain sufficiently compelling positive evidence to convince

the rational open-minded observer that psi is real, and that one or more physical processes probably underlie observed psi phenomena.
