Wrongful Convictions in China Na Jiang, 2016-08-08 The primary focus of this comparative and empirical work is to address wrongful convictions between China and common-law countries in order to promote a better understanding of wrongful convictions in China's practice with the help of comparative analyses, verifiable and empirical data and case studies. It examines the scope of wrongful convictions and offers new insights into the worldwide movement to prevent them, assesses how far it has progressed and what reforms are most needed. The book suggests that adversarial and inquisitorial systems alike could benefit from this research and learn valuable lessons from one another on how to effectively reduce the risk of wrongful convictions.

**Social Disciplining and Civilising Processes in China** Thomas Heberer, 2023-08-11 This book argues that a major part of the Chinese government's road map, formulated in 2017, to modernise China comprehensively by 2049 is the process of social disciplining. It contends that the Chinese state sees that modernisation and modernity encompass not only economic and political-administrative change but are also related to the organisation of society in general and the disciplining of this society and its individuals to create people with "modernised" minds and behaviour; and that, moreover, the Chinese state is aspiring to a modernity with "Chinese characteristics". The question of modernising by disciplining was extensively dealt with in the twentieth century by leading Western social scientists including Max Weber, Norbert Elias and Michel Foucault, who argued that disciplining, extending from external coercion towards the internalisation of restraints, is indispensable for achieving social order and thereby for "civilisation" -but defined from a European perspective, in relation to developments in Europe. This book therefore not only discusses the Chinese experience of social disciplining, but also, by looking at a non-Western society, identifies universal tendencies of societal change and social disciplining and separates them from particular occurrences.

International Legal Dimension of Terrorism Pablo Antonio Fernández-Sánchez, 2008-12-23 More than ever before International Humanitarian Law needs to find new solutions to new types of conflicts. The current state of the fight against terrorism is without doubt one of the new problems facing international society and one of the concerns of International Humanitarian Law. This volume offers reflections on the international legal theory of terrorism, international responsibility, the obligation to prevent terrorist acts, terrorism in armed conflicts, the responses to terrorism by regional international organizations and the legal limits to the fight against terrorism. The contributors consist of academics (and politicians) from Morocco, Algeria, Egypt, Tunisia, Lebanon and Israel, as well as from Spain, Italy, France, the United Kingdom, Switzerland and a representative for the Organisation of American States. The book thus contains a wide, multidisciplinary debate, with an emphasis on a Mediterranean perspective. In addition to examining all aspects of international terrorism, the objective of the symposium which gave rise to these essays was to establish some guidelines, in the form of a Declaration, to serve

as the basis for the UN's High Level Group for the Alliance of Civilisations on the subject of international terrorism. This overall objective was achieved with the adoption of the Huelva Declaration for an Alliance of Civilisations against Terrorism, the text of which is included at the end of this book.

Terrorism and Human Rights Magnus Ranstorp, Paul Wilkinson, 2013-09-13 This book reinforces our knowledge and understanding of the problems involved in balancing human rights protection and security concerns, considering how these human rights issues have been raised by the various international debates and policy issues which have been created by the continuing global war on terrorism. In the shadow of 9/11 the threat of terrorism is an ever increasing global preoccupation. Terrorism and Human Rights discusses the effects of the legal and social aspects of terrorism by examining the relation between security issues and human rights from the angle of international organizations, political bodies and different countries. Some of the examples covered and which are examined in light of their approach and reaction to terrorism include the European Union, the UN, Russia and the United States. Previously published as a special issue of Terrorism and Political Violence, this volume will be useful for all students of security, politics and terrorism studies, but also for policy makers, legislators, and law enforcers.

**The Skull Beneath The Skin** Mark Huband, 2019-05-20 In *The Skull Beneath the Skin: Africa After the Cold War* award-winning journalist Mark Huband argues that foreign involvement in Africa has been the single most destructive element in the continent's history. He argues that the catastrophes that have erupted since the end of the Cold War are a legacy of that long foreign involvement, and that stab

*Legal Instruments in the Fight Against International Terrorism* Cyrille J.C.F. Fijnaut, Jan Wouters, Frederik Naert, 2004-06-01 This book finds its origins in a transatlantic colloquium held in the European Parliament in Brussels in May 2002. After an introductory overview of the US and European responses to 9/11 it addresses the main legal aspects of the fight against international terrorism, namely police and judicial cooperation (including mutual legal assistance, extradition and the role of entities like Europol and Eurojust), financial initiatives (e.g. by the UN Security Council, the FATF and the EU), human rights and rule of law issues (such as trial by military commissions, detention of alleged unlawful combatants and others, state of emergency derogations, due process, the death penalty and privacy) and international law aspects (inter alia self-defence, the application of international humanitarian law, prisoner of war status, the role of the UN, in particular the Security Council, sanctions and the negotiations on a comprehensive convention on combating terrorism). Each topic is considered from a US and from a European perspective.

Forms of Empire Nathan K. Hensley, 2016 Nathan K. Hensley shows how the modern state's anguished relationship to violence pushed literary writers of the Victorian era to expand the capacities of literary form. He explores the works of some of the era's most astute thinkers, including George Eliot, Charles Dickens, and Robert Louis Stevenson.

**The Handbook of Experimental Economics, Volume 2** John H. Kagel, Alvin E. Roth, 2016-10-04 An indispensable survey of new developments and results in experimental economics When *The Handbook of Experimental Economics* first came out in 1995, the notion of economists conducting lab experiments to generate data was relatively new. Since then, the field has exploded. This second volume of the Handbook covers some of the most exciting new growth areas in experimental economics, presents the latest results and experimental methods, and identifies promising new directions for future research. Featuring contributions by leading practitioners, the Handbook describes

experiments in macroeconomics, charitable giving, neuroeconomics, other-regarding preferences, market design, political economy, subject population effects, gender effects, auctions, and learning and the economics of small decisions. Contributors focus on key developments and report on experiments, highlighting the dialogue between experimenters and theorists. While most of the experiments consist of laboratory studies, the book also includes several chapters that report extensively on field experiments related to the subject area studied. Covers exciting new growth areas in experimental economics Features contributions by leading experts Describes experiments in macroeconomics, charitable giving, neuroeconomics, market design, political economy, gender effects, auctions, and more Highlights the dialogue by experimenters with theorists and each other Includes several chapters covering field experiments related to the subject area studied

Henry's Clinical Diagnosis and Management by Laboratory Methods: First South Asia Edition e-Book Richard A. McPherson, 2016-08-31 To interpret the laboratory results. To distinguish the normal from the abnormal and to understand the merits and demerits of the assays under study. The book attempts to train a laboratory medicine student to achieve sound knowledge of analytical methods and quality control practices, to interpret the laboratory results, to distinguish the normal from the abnormal and to understand the merits and demerits of the assays under study.

*Food Safety in China* Joseph Jwu-Shan Jen, Junshi Chen, 2017-03-14 From contaminated infant formula to a spate of all-too familiar headlines in recent years, food safety has emerged as one of the harsher realities behind China's economic miracle. Tainted beef, horse meat and dioxin outbreaks in the western world have also put food safety in the global spotlight. *Food Safety in China: Science, Technology, Management and Regulation* presents a comprehensive overview of the history and current state of food safety in China, along with emerging regulatory trends and the likely future needs of the country. Although the focus is on China, global perspectives are presented in the chapters and 33 of the 99 authors are from outside of China. Timely and illuminating, this book offers invaluable insights into our understanding of a critical link in the increasingly globalized complex food supply chain of today's world.

Practical Food Safety Rajeev Bhat, Vicente M. Gomez-Lopez, 2014-03-31 The past few years have witnessed an upsurge in incidences relating to food safety issues, which are all attributed to different factors. Today, with the increase in knowledge and available databases on food safety issues, the world is witnessing tremendous efforts towards the development of new, economical and environmentally-friendly techniques for maintaining the quality of perishable foods and agro-based commodities. The intensification of food safety concerns reflects a major global awareness of foods in world trade. Several recommendations have been put forward by various world governing bodies and committees to solve food safety issues, which are all mainly targeted at benefiting consumers. In addition, economic losses and instability to a particular nation or region caused by food safety issues can be huge. Various 'non-dependent' risk factors can be involved with regard to food safety in a wide range of food commodities such as fresh fruits, vegetables, seafood, poultry, meat and meat products. Additionally, food safety issues involves a wide array of issues including processed foods, packaging, post-harvest preservation, microbial growth and spoilage, food poisoning, handling at the manufacturing units, food additives, presence of banned chemicals and drugs, and more. Rapid change in climatic conditions is also playing a pivotal role with regard to food safety issues, and increasing the anxiety about our ability to feed the world safely. *Practical Food Safety: Contemporary Issues and Future Directions* takes a multi-faceted approach to the subject of food safety, covering various aspects

ranging from microbiological to chemical issues, and from basic knowledge to future perspectives. This is a book exclusively designed to simultaneously encourage consideration of the present knowledge and future possibilities of food safety. This book also covers the classic topics required for all books on food safety, and encompasses the most recent updates in the field. Leading researchers have addressed new issues and have put forth novel research findings that will affect the world in the future, and suggesting how these should be faced. This book will be useful for researchers engaged in the field of food science and food safety, food industry personnel engaged in safety aspects, and governmental and non-governmental agencies involved in establishing guidelines towards establishing safety measures for food and agricultural commodities.

**Directory of Research Grants 2008** Schoolhouse Partners LLC, 2008-05 Volume 2 of 2 - With more than 5,100 listings of grants programs from 1,880 sponsors, the Directory of Research Grants is a comprehensive directory of grants available to researchers in every field of study. The directory has a broad focus, featuring grants for basic research, equipment acquisition, building construction/renovation, fellowships, and 23 other program types. Government grants include CFDA, NSF and NIH program numbers. Each record includes grant title, description, requirements, amount, application deadline, contact information (phone, fax and email), web address, sponsor name and address, and samples of awarded grants (when available). Printed in two volumes, each with extensive indexes - subject, program type and geographic to help you to identify the right program quickly.

**Bridging the Communication Gap in Science and Technology** Pallava Bagla, V. V. Binoy, 2017-02-17 This first-of-a-kind volume provides a snapshot of existing science communication policy and practice in India across different S&T sectors, and offers solutions to building effective communication. It provides an understanding on how to avoid societal clashes in situations when science meets the public in these sectors. The editors and contributors argue that effective S&T communication leads not only to a more informed public but also benefits research itself, and in a changing society like India this is a crucial element related to good governance and policy making. In this volume, experienced masters of the craft provide practical solutions to making S&T communication more effective in a vast democracy like India, which has complex issues related to literacy levels, diverse languages, varying political will, reach, and resources. Through discussions on cases of creating information modules for the public on the Internet, television and radio, social media, as well as traditional ways of outreach like people's science movements, holding popular science events, and fairs, the volume provides highly valuable directions on how developing countries with low resources and complex populations can communicate S&T research to the public and bridge communication gaps. This volume will interest researchers from science, social science, mass communication and public relations departments, journalists, as well as practitioners and policy makers from government and non-government institutions involved in S&T policy, practice and communication and people who want to understand the complex S&T landscape of India.

**Transnational Terrorism and State Accountability** Vincent-Joël Proulx, 2012-11-05 Every State has an obligation to prevent terrorist attacks emanating from its territory. This proposition stems from various multilateral agreements and UN Security Council resolutions. This study exhaustively addresses the scope of this obligation of prevention and the legal consequences flowing from its violation, so as to provide greater clarity on governments' counterterrorism duties and to enhance State accountability for preventable wrongs. It defines the contents and contours of the obligation while placing critical emphasis on the mechanics of State responsibility. Whether obscured by new technologies like the Internet, the sophisticated cellular structure of some terrorist organisations or convoluted political realities, the level of governmental involvement in terrorist activities is

no longer readily discernible in every instance. Furthermore, the prospect of governments waging surrogate warfare through proxies also poses intractable challenges to the mechanism of attribution in the context of State responsibility. This monograph sets out the shortcomings of the extant scheme of State responsibility while identifying a paradigm shift towards more indirect modes of accountability under international law, a trend corroborated by recent State and institutional practice. Drawing on varied legal and theoretical influences, the study devises and prescriptively argues for the implementation of a strict liability-inspired model grounded in the logic of indirect responsibility with a view to enhancing State compliance with counterterrorism obligations. This shifts the policy focus squarely to prevention, while promoting multilateralism and transnational cooperation. Ultimately, the legal and policy sensibilities underlying the book converge into a new theory of prevention in counterterrorism contexts. From the Foreword by Judge Bruno Simma, International Court of Justice Even if one might disagree with the bases on which the author constructs his argument, the execution of the argument is solid and thorough. The coverage of the major policy arguments and the available legal source materials is equally impressive. Moreover, the author's positions are genuinely progressive and present a fairly innovative solution, in the form of a strict liability mechanism...It behoves all scholars and practitioners of international law with an interest in combating international terrorism to consider the proposals outlined in this book. Transnational Terrorism and State Accountability by Vincent-Joël Proulx has been awarded the 2014 Myres McDougal Prize for best book in Law, Science, and Policy from the Society of Policy Scientists.

**Essential Oil Safety** Robert Tisserand, Rodney Young, 2013-12-02 The second edition of this book is virtually a new book. It is the only comprehensive text on the safety of essential oils and the first review of essential oil/drug interactions and provides detailed essential oil constituent data not found in any other text. Much of the existing text has been re-written, and 80% of the text is completely new. There are 400 comprehensive essential oil profiles and almost 4000 references. There are new chapters on the respiratory system, the cardiovascular system, the urinary system, the digestive system and the nervous system. For each essential oil there is a full breakdown of constituents, and a clear categorization of hazards and risks, with recommended maximum doses and concentrations. There are also 206 Constituent Profiles. There is considerable discussion of carcinogens, the human relevance of some of the animal data, the validity of treating an essential oil as if it was a single chemical, and the arbitrary nature of uncertainty factors. There is a critique of current regulations. The only comprehensive text on the safety of essential oils The first review of essential oil/drug interactions Detailed essential oil constituent data not found in any other text Essential oil safety guidelines 400 essential oil profiles Five new chapters 305 new essential oil profiles, including Cedarwood, Clary sage, Lavender, Rose, Sandalwood, Tea tree 79 new constituent profiles Five new chapters: the respiratory system, the cardiovascular system, the urinary system, the digestive system, the nervous system. How to Think about Information Dan Schiller, 2024-04-22 It is common wisdom that the U.S. economy has adapted to losses in its manufacturing base because of the booming information sector, with high-paying jobs for everything from wireless networks to video games. We are told we live in the Information Age, in which communications networks and media and information services drive the larger economy. While the Information Age may have looked sunny in the beginning, as it has developed it looks increasingly ominous: its economy and benefits grow more and more centralized--and in the United States, it has become less and less subject to democratic oversight. Corporations around the world have identified the value of information and are now seeking to control its production, transmission, and consumption. In How to Think about Information, Dan Schiller explores the ways

information has been increasingly commodified as a result and how it both resembles and differs from other commodities. Through a linked series of theoretical, historical, and contemporary studies, Schiller reveals this commodification as both dynamic and expansionary, but also deeply conflicted and uncertain. He examines the transformative political and economic changes occurring throughout the informational realm and analyzes key dimensions of the process, including the buildup of new technological platforms, the growth of a transnationalizing culture industry, and the role played by China as it reinserts itself into an informationalized capitalism.
