**Society and Genetic Information** Judit S ndor,2003-01-01 The genetic era has given rise to significant legal dilemmas: who may own genetic data, when can a genetic test be performed on children, how can genetic-based discrimination be avoided, or to what extent and in what ways can genetic data be protected? The book addresses the social, ethical, and legal implications of collecting, storing, analyzing, and commercializing genetic information. Prominent biologists, medical doctors, lawyers, anthropologists, philosophers, sociologists, and theologians from different countries provide their views on the complex biological and social impacts of the imminent proliferation of genetic information. The authors explore the various uses and applications of genetic information, and discuss the current dilemmas of making laws in the field of genetics. Different models of national genome projects and biobanks, as well as the related international legal documents and national laws are also discussed. Various genome projects and biobanks are analyzed in detail.

**On Faith, Works, Eternity and the Creatures We Are** André Barbera,2020-01-23 In this volume André Barbera considers the question of faith, how an individual may act faithfully, and what good (if any) is faithful action. Drawing on the letters of the Apostle Paul and the work of philosophical thinkers such as Søren Kierkegaard, Barbera explores numerous aspects of faithful living, from religion, original sin, and tests of faith, to the power of prayer, and even the concept of atheism. In particular, Barbera formulates a postulate drawn from Augustine's Confessions: God is not bound by time. The person of faith, however, is enslaved by time. Augustine's expression “faith seeking understanding” stakes the claim,” but the mode of faith and the end of faith are inherently contradictory. The faithful person waits in pursuit, choking. Works, the anxiety of faith, ensue. Barbera concludes that the person of faith engages in endless trial, struggle, and contradiction, but in so doing attempts to produce a meaningful life.

**Ethical Eye** Jean-François Mattei,Council of Europe,2001-01-01 Scientific and technological developments are rapidly transforming the world in which we live. With progress and change, however, the human race is faced with new dilemmas. Hidden behind the jargon, to what extent are we aware of the impact these advances are having on our lives? Starting with the human genome, the new Ethical eye series looks at the crucial issues behind some of these key developments. In this volume, ten international experts look at the topic from different angles, providing factual information about what the human genome is, how genomic research is affecting industry, how it is being used to improve medicine, the ethical implications of this research, what this research tells us about about our origins and our relations to animals, and whether the genome should be protected against commercial use.

**Understanding the Gift of Salvation** Irpeel Ebenezer,2012-02 What exactly did Jesus Christ save us from other than hell fire? That was the question a somewhat frustrated friend asked while going through a difficult period in his life. Many Christians have asked similar questions or wondered why the Christian life in reality is so different from what is usually professed. This book is a true seeker's manual on the Gift of Salvation. It is for those who are not satisfied with only doctrines and creeds handed down by parents or pastors. It is for those willing to build on what they've learnt, dig deeper and find out the fullness of what God in His mercy gave to mankind in Jesus Christ. It not a book to rush or breeze through, like the Berean Christians, readers are encouraged to carefully study the Scripture references and dig out the truth for themselves. The promise of God is: You will seek Me and find Me, when you seek Me with all your heart.

**Domestic Violence and International Law** Bonita Meyersfeld,2010-03-23 Domestic Violence and International Law argues that certain forms of domestic violence are a violation of international human rights law. The argument is based on the international law principle that, where a state fails to protect a vulnerable group of people from harm, whether perpetrated by the state or private actors, it has breached its obligations to protect against human rights violation. This book provides a comprehensive legal analysis for why a state should be accountable in international law for allowing women to suffer extreme forms of domestic violence and how this can help individual victims. It is irrelevant that the violence is perpetrated by individuals and not state actors such as soldiers or the police. The state's breach of its responsibility is in its failure to act effectively in domestic violence cases; and in its silent endorsement of the violence, it becomes complicit. The book seeks to reformulate academic and political debate on domestic violence and the responsibility of states under international law. It is based on empirical data combined with an honest assessment of whether or not domestic violence is recognised by the international community as a human rights violation. 'Domestic Violence in International Law [...] provides an original, provocative, and much needed legal framework for the coherent development of a norm against domestic violence in international human rights law...Dr. Meyersfeld has developed a thoroughgoing analysis that asks and answers the most difficult questions often neglected by academics, lawyers and activists who dismiss the possibility that systemic violence against women could violate international law...Most fundamentally, this book is memorable for the hope and optimism it expresses about the transformative possibilities of international law. For without compromising such intensely human values as privacy, autonomy and cultural identity, Dr. Meyersfeld moves her reader with an abiding conviction: that international law, fueled with the power of transnational actors, can propel public actors to protect abused and vulnerable people in their most private worlds.' From the Foreword by Harold Koh, The Legal Adviser, United States Department of State (2009-).

**Genetics as Social Practice** Barbara Prainsack,Silke Schicktanz,Gabriele Werner-Felmayer,2016-04-22 Recent debate about the ethical and regulatory dimensions of developments in genetics has sidelined societal and cultural aspects, which arguably are indispensable for a nuanced understanding of the complexities of the topic. Regulatory and ethical debates benefit from taking seriously this ‘third dimension’ of culture, which often determines the configurations and limits of the space within which scientific, ethical and legal debate can take place. To fill this gap, this volume brings together contributions exploring the mutual relationships between genetics, markets, societies and identities in genetics and genomics. It draws upon the recent transdisciplinary debate on how socio-cultural factors influence understandings of ‘genetics2.0’ and shows how individual and collective identities are challenged or reinforced by cultural meanings and practices of genetics. This book will become a standard reference for everyone seeking to make sense of the controversies and shifts in the field of genetics in the second decade of the twenty-first century.

**An Ocean Vast of Blessing** Steven D. Cone,2014-07-09 Humans are made in the image of God, and authentically coming to be human means to become like him. This work pursues a robust and renewed theology of grace in conversation with the patristic traditions of Irenaeus, the Cappadocian Fathers, and Augustine, the medieval theology of Maximus and Aquinas, and such modern interlocutors as Søren Kierkegaard, Bernard Lonergan, John Milbank, and John Behr. It thereby regrounds our interpretation of Scripture in the wide tradition of the church. By doing so, it argues that Christ's incarnation, crucifixion, and resurrection form the only possible point of reference by which we can understand the universe, as God creates it and works in it to bring us into union with himself.

**Random Walks in Fixed Income and Foreign Exchange** Jessica James,Michael Leister,Christoph Rieger,2021-06-08 The fixed income and foreign exchange (FX) markets have never been as challenging to operate in as they are today. The post-crash combination of reduced liquidity, higher operating costs, low interest rates, flat yield curves and increased regulation means that market makers and investors alike need to work harder to generate value and remain in full understanding of the markets. Random Walks in Fixed Income and Foreign Exchange brings together the best of detailed and original practitioner-orientated market research on many specialist areas of the bond and FX markets. Written by the highly regarded FX and bonds research desk at Commerzbank, the book offers varied and in-depth insight into specific topics of vital importance to dealers and investors, including the cross-currency basis and hedging, the yield curve, and overseas issuance conversion factors which will give investors a genuine edge in generating value. Written in accessible text, it is a must-read for all those interested in bonds and FX.

**Egypt's Identities in Conflict** Girgis Naiem,2018-01-25 Egypt's lack of a common national identity is the basis for much of its internal conflict--Coptic Christians have been particularly affected. Once major contributors to Christian civilization, their influence ended with the fifth century Council of Chalcedon and they endured persecution. With the seventh century Arabization of Egypt, Copts were given dhimma or

protected persons status. The 1919 Revolution granted them greater political participation, but the 1952 Revolution ended liberal democracy and established a military regime that championed Arab identity. Secular Egyptians rebelled against the Mubarak regime in 2011, yet his successor was the Muslim Brotherhood's Mohamed Morsi, Egypt's first Islamist president. In yet another revolution over national identity, secular factions ousted Morsi in 2013 while in the chaos that followed, the Copts suffered the brunt of violence.

**The Judicial System and Reform in Post-Mao China** Yuwen Li,2016-03-03 This comprehensive study examines the development and changing characteristics of the judicial system and reform process over the past three decades in China. As the role of courts in society has increased so too has the amount of public complaints about the judiciary. At the same time, political control over the judiciary has retained its tight-grip. The shortcomings of the contemporary system, such as institutional deficiencies, shocking cases of injustice and cases of serious judicial corruption, are deemed quite appalling by an international audience. Using a combination of traditional modes of legal analysis, case studies, and empirical research, this study reflects upon the complex progress that China has made, and continues to make, towards the modernisation of its judicial system. Li offers a better understanding on how the judicial system has transformed and what challenges lay ahead for further enhancement. This book is unique in providing both the breadth of coverage and yet the substantive details of the most fundamental as well as controversial subjects concerning the operation of the courts in China.

Redeeming the Broken Body Gabriel A. Santos,2009-01-01 This book examines how repertoires of speech and action that are often considered to be mutually exclusive--those of church and state--clash or unite during the postdisaster period as local communities and cities struggle to establish a stable collective identity. Based on an analysis of forty in-depth interviews with disaster-response participants and over 325 print-media sources, this study explores, first, the extent to which ministers and citizens challenge statist narratives in order to publicly relay theological views; second, the cultural processes by which local places are nationalized and theologized; and third, the ecclesiological convictions necessary to peaceably advance the work of Christ's body after disasters.

Religious Perspectives on Bioethics and Human Rights Joseph Tham,Kai Man Kwan,Alberto Garcia,2017-09-06 This book deals with the thorny issue of human rights in different cultures and religions, especially in the light of bioethical issues. In this book, experts from Christianity, Judaism, Islam, Buddhism, Daoism, Hinduism and Confucianism discuss the tension between their religious traditions and the claim of universality of human rights. The East-West contrast is particularly evident with regards to human rights. Some writers find the human rights language too individualistic and it is foreign to major religions where the self does not exist in isolation, but is normally immersed in a web of relations and duties towards family, friends, religion community, and society. Is the human rights discourse a predominantly Western liberal ideal, which in bioethics is translated to mean autonomy and free choice? In today's democratic societies, laws have been drafted to protect individuals and communities against slavery, discrimination, torture or genocide. Yet, it appears unclear at what moment universal rights supersede respect for cultural diversity and pluralism. This collection of articles demonstrates a rich spectrum of positions among different religions, as they confront the ever more pressing issues of bioethics and human rights in the modern world. This book is intended for those interested in the contemporary debates on religious ethics, human rights, bioethics, cultural diversity and multiculturalism.

**The Handbook of Economic Development and Institutions** Jean-Marie Baland,François Bourguignon,Jean-Philippe Platteau,Thierry Verdier,2020-01-21 The definitive reference on the most current economics of development and institutions The essential role that institutions play in understanding economic development has long been recognized across the social sciences, including in economics. Academic and policy interest in this subject has never been higher. The Handbook of Economic Development and Institutions is the first to bring together in one single volume the most cutting-edge work in this area by the best-known international economists. The volume's editors, themselves leading scholars in the discipline, provide a comprehensive introduction, and the stellar contributors offer up-to-date analysis into institutional change and its interactions with the dynamics of economic development. This book focuses on three critical issues: the definitions of institutions in order to argue for a causal link to development, the complex interplay between formal and informal institutions, and the evolution and coevolution of institutions and their interactions with the political economy of development. Topics examined include the relationship between institutions and growth, educational systems, the role of the media, and the intersection between traditional systems of patronage and political institutions. Each chapter—covering the frontier research in its area and pointing to new areas of research—is the product of extensive workshoping on the part of the contributors. The definitive reference work on this topic, The Handbook of Economic Development and Institutions will be essential for academics, researchers, and professionals working in the field.

**North America and Europe (NAE) Report** International Assessment of Agricultural Knowledge, Science, and Technology for Development (Project),2009 The International Assessment of Agricultural Knowledge, Science, and Technology for Development (IAASTD) looks realistically at how we could effectively use agriculture/AKST to help us meet development and sustainability goals. An unprecedented three-year collaborative effort, the IAASTD involved more than 400 authors in 110 countries and cost more than \$11 million. It reports on the advances and setbacks of the past fifty years and offers options for the next fifty years. The results of the project are contained in seven reports: a Global Report, five regional Sub-Global Assessments, and a Synthesis Report. The Global Report gives the key findings of the Assessment, and the five Sub-Global Assessments address regional challenges. The volumes present options for action. All of the reports have been extensively peer-reviewed by governments and experts and all have been approved by a panel of participating governments. The Sub-Global Assessments all utilize a similar and consistent framework: examining and reporting on the impacts of AKST on hunger, poverty, nutrition, human health, and environmental/social sustainability. The five Sub-Global Assessments cover the following regions: Central and West Asia and North Africa (CWANA) East and South Asia and the Pacific (ESAP) Latin America and the Caribbean (LAC) North America and Europe (NAE) Sub-Saharan Africa (SSA)

Marketing U. S. Organic Foods Carolyn Dimitri,2010-02 Organic foods occupy prominent shelf space in the produce and dairy aisles of most U.S. food retailers. Retail sales of organic foods increased to \$21.1 billion in 2008 from \$3.6 billion in 1997. This increase has been spearheaded by: an expanding number of retailers are selling a wider variety of foods, the development of private-label product lines by many supermarkets, and the widespread intro. of new products. Organic handlers, who purchase products from farmers and often supply them to retailers, sell more organic products to conventional retailers and club stores than ever before. But, organic farms have struggled at times to produce sufficient supply to keep up with the growth in demand, leading to periodic shortages of organic products. Illus.

*Emerging Issues in the U.S. Organic Industry* Catherine Greene,2009 Consumer demand for organic products has widened over the last decade. While new producers have emerged to help meet demand, market participants report that a supply squeeze is constraining growth for both individual firms and the organic sector overall. Partly in response to shortages in organic supply, Congress in 2008 included provisions in the 2008 Farm Act that, for the first time, provide financial support to farmers to convert to organic production. This report examines recent economic research on the adoption of organic farming systems, organic production costs and returns, and market conditions to gain a better understanding of the organic supply squeeze and other emerging issues in this rapidly changing industry. **Discourses of Endangerment** Alexandre Duchene,Monica Heller,2008-05-22 Current academic discussions and public debates about language frequently focus on the importance of defending languages against various kinds of dangers. Many of these current debates attach great importance to linguistic diversity. The debates focus on defending institutionalized languages against multilingualism, or conversely defending minority languages against the incursion of larger ones, especially the spread of English. In both cases, languages are constructed as autonomous wholes, held to need defending against attack. This book challenges such a view of language, to argue that the discussions in question are not in fact about language itself. The internationally renowned contributors claim that we are witnessing ideological struggles which are taking place on the terrain of language. Discourses of Endangerment addresses such questions as: \* What does language represent in discussions of multilingualism? \* Why is it constituted as an organic whole?\* In whose interest does it lie to construct language in this way?\* Who has an interest in taking various positions for or against official languages?\* In what way is the linguistic order tied to the social order? The book addresses these issues through a set of case studies which locate the terms of the discussion in broad discourses of language, identity and power. Covering a wide-range of languages including Catalan, Swedish, Corsican, Ukrainian and French, from different sociolinguistic perspectives, this book is essential reading for students and academics interested in language endangerment and sociolinguistics.
