*De Valera and Roosevelt* Bernadette Whelan,2020-12-10 How did Irish and American diplomacy operate in Washington DC and Dublin during the 1930s era of economic depression, rising fascism and Nazism? How did the Anglo-American relationship affect American-Irish diplomatic relations? Why and how did Éamon de Valera and Franklin D. Roosevelt move their countries towards neutrality in 1939? This first comprehensive history of American and Irish diplomacy during the 1930s focuses on formal and informal diplomacy, examining all aspects of diplomatic life to explain the relationship between the two administrations from 1932 to 1939. Bernadette Whelan reveals how diplomats worked on behalf of their governments to implement Franklin D. Roosevelt and Éamon de Valera's foreign policies – particularly when Éamon de Valera believed in the existence of a 'special' transatlantic relationship but Franklin D. Roosevelt increasingly favoured a strong relationship with Britain. Drawing on a wide range of under-used sources, this is a major new contribution to the history of American and Irish diplomacy and revises our understanding of the importance of Ireland to a US administration.

It also covers interrelated topics such as pesticide toxicity, legislation and regulation, handling, storage and safety aspects, IPM techniques, resistance management, interaction of pesticides with soil and the environment. An important reference for policy makers, advisers and students and researchers of crop science, this book also includes useful notes on commonly known plant diseases and pests.

**Aviation and International Cooperation** Ruwantissa Abeyratne,2015-05-22 This book addresses an essential gap in the regulatory regime, which provides legislation, statements and guidelines on airlines, airports, air navigation services providers and States in the field of aviation, but is notably lacking when it comes to the rights of the airline passenger, and the average citizen who is threatened by military air strikes. It addresses subjects such as international resolutions on human rights and other human rights conventions related to aviation that impact both air transport consumers and people on the ground who are threatened by air strikes through drone attacks; disabled and obese airline passengers; compensation for delayed carriage and the denial of carriage; noise and air pollution caused by aviation and their effects on human health and wellbeing; prevention of death or injury to passengers and attendant compensatory rights; risk management; relief flights; and racial profiling. These subjects are addressed against the backdrop of real case studies that include but are not limited to instances of drone attacks, and contentious flights in the year 2014 such as MH 370, MH 17 and QZ 8501.

**China, India and the United States** The Emirates Center for Strategic Studies and Research,2008-03-04 Global energy needs are rising inexorably despite soaring prices while petroleum production is struggling to keep pace, as many existing oilfields go into decline and new reserves become rarer and increasingly difficult to exploit. In this tightening supply situation, the world is witnessing a triangular race between United States, China and India to secure their future energy supplies. The United States, already the world's largest energy consumer and oil importer may be overtaken by China in the coming decades as the latter aggressively seeks new supplies to fuel its phenomenal growth. India, with its burgeoning population is also poised for dramatic economic development and remains heavily dependent on energy imports to bridge the widening gap between modest domestic production and surging demand. Even as the global economic gravity shifts towards Asia, much of the continent's oil imports will continue to be sourced from the Arabian Gulf, binding major Asian powers ever closer to the region. What are the international implications of this triangular race for energy supplies? Will it lead to strategic cooperation, competition or even conflict between the three countries? How will oil geopolitics and energy security considerations shape the foreign policies of China and India and the United States? How can the Gulf countries meet and capitalize on the energy needs of these three global players? What strategic partnerships will emerge as the Gulf countries perform a delicate balancing act in this critical supply scenario? These and related issues were discussed by energy experts who assembled at the ECSSR Twelfth Annual Energy Conference on China, India and the United States: Competition for Energy Resources held from November 19-21, 2006 in Abu Dhabi. This volume of compiled conference presentations offers global, regional and country-wise perspectives on the international race for energy resources and its wider economic and political ramifications.

*Democracy and Reform in the Middle East and Asia* Amin Saikal,Amitav Acharya,2013-12-23 The protests that swept across the Middle East and North Africa in late 2010 and 2011 confounded long-time observers of the region, in both the media and academia. After addressing the conditions in the Middle East and North Africa that produced these attempts at revolution, Amin Saikal and Amitav Acharya explore the global impact of the protests, both in terms of their ideological influence on opposition groups and the prospects for democratic transition in a variety of authoritarian and semi-authoritarian governments. Democracy and Reform in the Middle East and Asia commences with a comprehensive attempt to understand the cultural, economic and political background out of which the uprisings in Egypt, Tunisia and Libya emerged. It then expands outwards investigating the impact of the Arab uprisings on a regional level in other Middle Eastern and north African states such as Iran, Morocco and Algeria, and on a

more global level in the Asian states of China, Malaysia, Singapore, Indonesia and the former Soviet Muslim republics. Saikal and Acharya bring a global perspective to the still-unfolding wave of calls for more meaningful political participation, which continues to make itself felt in the Middle East, to shed light upon the ideal role of both regional and international actors in promoting sustainable transitions from authoritarianism to democracy. This book not only offers explanations for why certain countries were more susceptible to the spread of the uprisings in the Middle East and North Africa, but also contrasts the organic and grassroots vehicles for democratization characteristic of the most recent Arab uprisings with the Western model of externally imposed regime change to illustrate the conditions necessary for a successful democratic transition. Touching on perennial issues in politics - for example, democracy, authoritarian rule and social protest - this book is vital for researchers of politics and international relations.
