Analysing Women's Imprisonment Pat Carlen, Anne Worrall, 2013-01-11 In both the UK and the rest of the world there have been rapid increases in the numbers of women in prison, which has led to an acceleration of interest in women's crimes and the social control of women, and women's experience of both prison and the criminal justice system is very different to men's. This text is concerned to address the key issues relating to women's imprisonment, contributing at the same time to an understanding of prison issues in general and the historical and contemporary politics of gender and penal justice. What are women's prisons for? What are they like? Why are lone mothers, ethnic minority and very poor women disproportionately represented in the women's prison population? Should babies be sent to prison with their mothers? These are amongst the issues with which this book is concerned. *Analysing Women's Imprisonment* is written as an introductory text to the subject, aiming to guide students of penology carefully through the main historical and contemporary discourses on women's imprisonment. Each chapter has a clear summary ('concepts to know'), essay questions and recommendations for further reading, and will help students prepare confidently for seminars, course examinations and project work.

Beyond Anger and Violence Stephanie S. Covington, 2014-05-27 The participant's essential guide to reflection and personal growth *Beyond Anger and Violence: A Program for Women Participant Workbook* is the participant's personal place for reflection, reactions, and learning, during and after management sessions. The activities inside reinforce program lessons about anger and violence, including how families, relationships, communities, and society affect one's life. In learning about the relationships between thoughts, feelings, and behaviors, participants can begin to grasp a better self-understanding that will help them manage anger in a healthier, more productive manner. They'll develop new skills for communication, conflict resolution, and decision-making, and will be introduced to a variety of calming techniques. *Beyond Anger and Violence* is a 40-hour, evidence-based program designed for women who have difficulty managing anger. Based on a social-ecological model, the program addresses the factors that put people at risk for experiencing overwhelming feelings of anger, and perpetrating assaults or destruction of property. This curriculum acknowledges anger as a normal, appropriate, and human emotion, but also recognizes the destruction it can lead to if allowed to get out of control. This workbook will help guide participants through the program, reinforcing the discussions held in session. Topics include: The effects of trauma Relationships and communication, control, and conflict The importance of safety and the power of community Self-transformation, and creating change The workbook also includes a Daily Anger Log, a Self-Reflection Tool, and list of yoga poses that can have a calming effect on both body and mind. Participants may already recognize the effects of anger on their lives, and that it may even be affecting their health. Through the *Beyond Anger and Violence* program, and the exercises in this workbook, they can join a group of women working to create a less-violent world.

Big Chicken Maryn McKenna, 2017-09-12 In this eye-opening exposé, acclaimed health journalist and National Geographic contributor Maryn McKenna documents how antibiotics transformed chicken from local delicacy to industrial commodity—and human health threat—uncovering the ways we can make America's favorite meat safer again. What you eat matters—for your health, for the environment, and for future generations. In this riveting investigative narrative, McKenna dives deep into the world of modern agriculture by way of chicken: from the farm where it's raised directly to your dinner table. Consumed more than any other meat in the United States, chicken is emblematic of today's mass food-processing practices and their profound influence on our lives and health. Tracing its meteoric rise from scarce treat to ubiquitous global commodity, McKenna reveals the astounding role of antibiotics in industrial farming, documenting how and why wonder drugs revolutionized the way the world eats—and not necessarily for the better. Rich with scientific, historical, and cultural insights, this spellbinding cautionary tale shines a light on one of America's favorite foods—and shows us the way to safer, healthier eating for ourselves and our children. In August 2019 this book will be published in paperback with the title *Plucked: Chicken, Antibiotics, and How Big Business Changed the Way the World Eats*.

Global Terrorism and New Media Philip Seib, Dana M. Janbek, 2010-09-13 *Global Terrorism and New Media* carefully examines the content of terrorist websites and extremist television programming to provide a comprehensive look at how terrorist groups use new media today. Based partly on a content analysis of discussion boards and forums, the authors share their findings on how terrorism 1.0 is migrating to 2.0 where the interactive nature of new media is used to build virtual organization and community. Although the creative use of social networking tools such as Facebook may advance the reach of terrorist groups, the impact of their use of new media remains uncertain. The book pays particular attention to terrorist media efforts directed at women and children, which are evidence of the long-term strategy that some terrorist organizations have adopted, and the relationship between terrorists' media presence and actual terrorist activity. This volume also looks at the future of terrorism online and analyzes lessons learned from counterterrorism strategies. This book will be of much interest to students of terrorism studies, media and communication studies, security studies and political science.

Governing James Bickerton, B. Guy Peters, 2013-06-01 To honour the distinguished career of Donald Savoie, *Governing* brings together an accomplished group of international scholars who have concerned themselves with the challenges of governance, accountability, public management reform, and regional policy. *Governing* delves

into the two primary fields of interest in Savoie's work - regional development and the nature of executive power in public administration. The majority of chapters deal with issues of democratic governance, particularly the changing relationship over the past thirty years between politicians and public servants. A second set of essays addresses the history of regional development, examining the politics of regional inequalities and the promises and pitfalls of approaches adopted by governments to resolve the most vexing policy problems. Contributors provide readers with a valuable primer on the key issues that have provoked debate among practitioners and students of government alike, while reflecting on government initiatives meant to address inadequacies. Showcasing the practical experience and scholarly engagement of its authors, this collection is a valuable addition to the fields of public administration, public policy, political governance, and regional policy. Contributors include Peter Aucoin (Dalhousie University), Herman Bakvis (University of Victoria), James Bickerton (St Francis Xavier University), Jacques Bourgault (École nationale d'administration publique/UQAM), Thomas Courchene (Queen's University), Ralph Heintzman (University of Ottawa), Mark D. Jarvis (University of Victoria), Lowell Murray (Senate of Canada, retired), B. The book shows readers how to develop live-action, interactive racing games with a unique three-tiered approach. Readers will start off by learning how to build a model for a racing game and then apply the physics to create a simple 2D (flat) game while learning how to create a variety of vehicles, race opponents, and terrain. In tier two, readers learn how to go from 2D to 3D with the same game concepts illustrating how to take the same basic idea for a game (and gameplay) and use modeling tips and tricks to begin customizing features. In the final tier, the author takes the concepts of 3D driving games to Mars with data modeled from real Mars terrain. Readers will create a dune buggy race on the planet of Mars and learn to create cool racing action at a bizarre and treacherous location.
