Flexibility and European Unification Alkuin Kölliker,2006 Based on a theory of differentiated integration, this book investigates the dynamics of flexible European integration across EU policies and member states. By doing so, it provides a theory-based, comprehensive, and an empirical account of European integration from the perspective of legal differentiation.

Innovation Markets and Competition Analysis Marcus Glader,2006-01-01 The book is warmly recommended to practitioners and academics from both the legal and the economic field. Guido Westkamp, Journal of Intellectual Property Law and Practice . . . Glader offers strong commentary and case explanation, coupled with insightful analysis, in this complex area. . . This book is strong on both the relevant law, and the economics arena in which the law must be applied, and deals equally well with the US and EC principles and practice. Mark Furse, European Competition Law Review The pace and scope of technological change is increasing, but some innovative technologies take years before they give rise to saleable products. Before they do, there is competition in ideas and research, but the ideas cannot be market tested, because there are no products or services to offer to consumers. Competition law, in Europe and the USA, cannot be applied to competition in research for innovation as if it was competition between products. Completely different problems arise and a completely different approach is needed. This book, the first on innovation markets, shows how this new approach has been used by competition authorities on both sides of the Atlantic in a wide variety of cases. It analyses in depth and detail the comparative law and economics of the problems arising from the different stages of these markets . It considers how far conclusions can be drawn about the future and comes to interesting, practical and sensible conclusions. And it avoids both unjustified scepticism and exaggerated enthusiasm about the theories of innovation markets. John Temple Lang, Cleary Gottlieb Steen & Hamilton LLP, Brussels and London; Trinity College Dublin, Ireland and Oxford University, UK This book examines the legal standards and their underlying economic rationale for the protection of competition in the innovation process, in both European competition law and American antitrust law. Apart from relevant regulatory frameworks, the author also reviews a range of case laws, which assess whether a transaction or unilateral conduct would limit market participants incentives and abilities for continued innovation and future competition. At the centre of this study is the innovation market concept. This concept entails the delineation, for purposes of antitrust analysis, of an upstream market for competing R&D. Questions of market definition, the assessment of innovation competition in defined markets, the role of efficiencies in the appraisal of transactions and possible remedies to alleviate anti-competitive effects are also explored. Updating the field of research in light of new developments and broadening and deepening the categorization and analysis of the innovation market area, this book will be of great interest to academics, practitioners and consultants, and also public policymakers.

Negotiating Inseparability in China Timothy Grose,2019-09-16 WINNER – 2020 Central Eurasian Studies Society's CESS Book Award This is the first book-length study of graduates from the Xinjiang Class, a program that funds senior high school-aged students from Xinjiang, mostly ethnic Uyghur, to attend a four-year course in predominately Han-populated cities in eastern and coastal China. Based on longitudinal field research, *Negotiating Inseparability in China: The Xinjiang Class and the Dynamics of Uyghur Identity* offers a detailed picture of the multilayered identities of contemporary Uyghur youth and an assessment of the effectiveness of this program in meeting its political goals. The experiences of Xinjiang Class graduates reveal how young, educated Uyghurs strategically and selectively embrace elements of the corporate Chinese Zhonghua minzu identity in order to stretch the boundaries of a nonstate-defined Uyghur identity. Timothy Grose also argues that the impositions of Chinese Mandarin and secular Chinese Communist Party (CCP) values over ethnic minority languages and religion, and physically displacing young Uyghurs from their neighborhood and cultural environment do not lead to ethnic assimilation, as the CCP apparently expects. Despite pressure from state authorities to urge Xinjiang Class graduates to return after their formal education, the majority of the graduates choose to remain in inner China or to use their Xinjiang Class education as a springboard to seek global citizenship based upon membership in a transnational Islamic community. For those who return to Xinjiang, contrary to the political goal of the program, few intend to serve the CCP, their country, or even their hometown. Instead, their homecomings are marred by disappointment, frustration, and discontent. “This study demonstrates persuasively that the Chinese state’s attempts to produce—via delivery of a monolingual ‘Xinjiang Class’ education in inner China—a cohort of Chinese-speaking, Sinicized, secularized, and politically reliable Uyghurs, who will then return to Xinjiang to persuade other Uyghurs to support the Chinese Communist Party line, have had mixed results at best, and at worst constitute a failure.” —Joanne Smith Finley, Newcastle University “This book provides a window into the agency of the Uyghur subjects of the Chinese state-building project. The author’s sustained fieldwork in Xinjiang and efforts to reconnect with Uyghur interlocutors multiple times offer an unprecedented glimpse into how members of the Xinjiang class attempt to negotiate between the state’s objective of producing an educated and loyal Uyghur cohort and their own political, social, and cultural identities and imperatives.” —Michael Clarke, Australian National University

The European Waste Industry and Crime Vulnerabilities Tom Beken,2007 The influence of organised crime on business activities, enterprises and economic sectors is a matter of concern for many policy makers across the world. As a profit driven criminal activity, organised crime operates in an environment which is not limited to the underworld economy alone. Assessments of the threat posed by organised crime and strategic (preventive) actions to tackle this phenomenon require an understanding of the vulnerable spots in the legal economy that are or might be exploited by crime. This book is the outcome of a study known under the acronym MAVUS II (Method for and Assessment of Vulnerability of Sectors II) which addresses this issue. The study provides a vulnerability profile of the European waste industry based on a new methodology to scan economic sectors for their vulnerability to (organised) crime. Both vulnerability study and methodological tool are intended as a guide for actions and initiatives to be taken by governments, law enforcement bodies and economic players.

Movements for Human Rights David L. Brunσμα, Keri Iyall Smith, Brian Gran,2016-09-07 How do people work together to advance human rights? Do people form groups to prevent human rights from being enforced? Why? In what ways do circumstances matter to the work of individuals collectively working to shape human rights practices? Human society is made of individuals within contexts—tectonic plates not of the earth’s crust but of groups and individuals who scrape and shift as we bump along, competing for scarce resources and getting along. These movements, large and small, are the products of actions individuals take in communities, within families and legal structures. These individuals are able to live longer, yet continue to remain vulnerable to dangers arising from the environment, substances, struggles for power, and a failure to understand that in most ways we are the same as our neighbors. Yet it is because we live together in layers of diverse communities that we want our ability to speak to be unhindered by others, use spirituality to help us understand ourselves and others, possess a space and objects that are ours alone, and join with groups that share our values and interests, including circumstances where we do not know who our fellow neighbor is. For this reason sociologists have identified the importance of movements and change in human societies. When we collaborate in groups, individuals can change the contours of their daily lives. Within this book you will find the building blocks for human rights in our communities. To understand why sometimes we enjoy human rights and other times we experience vulnerability and risk, sociologists seek to understand the individual within her context. Bringing together prominent sociologists to grapple with these questions, *Movements for Human Rights: Locally and Globally*, offers insights into the ways that people move for (and against) human rights.

Sociology for Human Rights David L. Brunσμα, Keri E. Iyall Smith, Brian K. Gran,2019-07-19 As sociologists deepen their examinations of human rights in their teaching, research, and thinking, it is essential that such work is conducted in a manner that is both mindful and critical of the knowledge we are building upon in sociology and human rights. As the authors of this volume reveal, creating sociological knowledge that examines human rights for the expansion of human rights is something that sociologists are well equipped to undertake, whether through the use of mathematics,

comparative-historical analysis, the study of emotions, conversations, or social psychology. In these chapters you will find the roots of the study of human rights deep within sociological research and thinking as well as emerging techniques that will push the discipline as it seeks to expand understanding of human rights together with so many other aspects of the social condition.

Institutions Unbound David L. Brunσμα,Keri E. Iyall Smith,Brian K. Gran,2016-03-02 Institutions--like education, family, medicine, culture, and law--, are powerful social structures shaping how we live together. As members of society we daily express our adherence to norms and values of institutions as we consciously and unconsciously reject and challenge them. Our everyday experiences with institutions not only shape our connections with one another, they can reinforce our binding to the status quo as we struggle to produce social change. Institutions can help us do human rights. Institutions that bridge nation-states can offer resources, including norms, to advance human rights. These institutions can serve as touch stones to changing minds and confronting human rights violations. Institutions can also prevent us from doing human rights. We create institutions, but institutions can be difficult to change. Institutions can weaken, if not outright prevent, human rights establishment and implementation. To release human rights from their institutional bindings, sociologists must solve riddles of how institutions work and determine social life. This book is a step forward in identifying means by which we can loosen human rights from institutional constraints.

European Competition Law and Economics Roger van den Bergh,Peter D. Camesasca,2001 The aim of this book is to explore the economic fundamentals of European competition law.

Handbook of Sociology and Human Rights David L. Brunσμα,Keri E. Iyall Smith,Brian K Gran,2015-10-23 Long the province of international law, human rights now enjoys a renaissance of studies and new perspectives from the social sciences. This landmark book is the first to synthesize and comprehensively evaluate this body of work. It fosters an interdisciplinary, international, and critical engagement both in the social study of human rights and the establishment of a human rights approach throughout the field of sociology. Sociological perspectives bring new questions to the interdisciplinary study of human rights, as amply illustrated in this book. The Handbook is indispensable to any interdisciplinary collection on human rights or on sociology. This text: Brings new perspectives to the study of human rights in an interdisciplinary fashion. Offers state-of-the-art summaries, critical discussions of established human rights paradigms, and a host of new insights and further research directions. Fosters a comprehensive human rights approach to sociology, topically representing all 45 sections of the American Sociological Association.

The Suppression of the African Slave-Trade to the United States of America 1638-1870 W. E. B. Du Bois,2020-06-15 This book is the PhD dissertation of W. E. B Du Bois, the famous African-American author of 20th century. Based upon the study of various sources like, national, State, and colonial statutes, Congressional documents, reports of societies, personal narratives, etc. he has done a meticulous study of the African-American Slave Trade to USA from 1638-1870. In his view, the question of the suppression of the slave-trade is so intimately connected with the questions as to its rise, the system of American slavery, and the whole colonial policy of the eighteenth century, that it is difficult to isolate it. Yet, Du Bois has done an excellent research into the background of America's most turbulent and often neglected past. Read on!
