The 5 Patterns of Extraordinary Careers James M. Citrin,Richard Smith,2003-08-05 What is different about the careers of people like Lou Gerstner, the acclaimed, recently retired chairman and CEO of IBM? Or Senator Elizabeth Dole, Yahoo! COO Dan Rosensweig, and Tom Freston, chairman and CEO of MTV Networks? Why did they ascend to the top and prosper—why did they have extraordinary careers—while others equally talented never reached their potential or aspirations? Jim Citrin and Rick Smith of Spencer Stuart, the world's most influential executive search firm, set out to explore this question. The result—based on in-depth, original research—is sure to be the most important and useful book for anyone seeking to crack the code of how to build a rewarding, personally satisfying career. Like weather systems and financial markets, careers contain patterns. What Citrin and Smith found from their research and extensive experience is that people with extraordinary careers are guided by five straightforward patterns that can be harnessed and used by everyone. These individuals: • Understand the value of you by translating their knowledge and experience into action, building their personal value over each phase of their career • Practice benevolent leadership by not clawing their way to the top but by being carried there • Solve the permission paradox, the dilemma of not being able to get a job without experience and not getting the experience without the job • Differentiate using the 20/80 principle of performance by storming past their defined jobs to create breakthrough ideas and deliver unexpected impact • Do not micromanage their careers, but macromanage them by gravitating toward the things they are best at and have a passion for, and working with people they like and respect No one manages your career for you. But with Citrin and Smith as your guide, you'll be able to understand—and act on—the root causes of success. And what better source for strategic career advice than Spencer Stuart, the firm that over the past ten years has conducted more than 60 percent of the searches for Fortune 1000 CEOs?

Democracy on Rocky Ground ,2009 Police and protestors clashed in Armenia's capital, Yerevan, on March 1, 2008, bringing to a head the country's latest electoral dispute--over the results of a presidential poll in February 2008. On that day, in episodes at different city center locations, police variously set upon protestors without warning or resistance, negotiated, withdrew, returned to the offensive, and finally fought a pitched battle with a small group of protestors. At least ten people died--eight protestors and two police officers--and scores were injured ... The Armenian authorities' response to the March 1 events has been one-sided. While they have convicted dozens of opposition members, sometimes in flawed and politically motivated trials, for organizing the demonstration and participating in violent disorder, they have not prosecuted any law enforcement official for excessive use of force. The authorities have also dismissed as unfounded all allegations of ill-treatment and torture in detention--Cover, p. [4].

Costa,2020-11-04 Accounting Ethics Education: Teaching Virtues and Values gathers a diversity of contributions from invited, well-known experts. It promotes a comprehensive reflection around how ethics can and should be taught to accounting students, discussing and highlighting the most updated research on accounting ethics education, and it is an essential reference in the field. The subject of accounting ethics education is critical to foster ethical awareness that may prevent the way in which one acts or behaves, especially towards others. The point is that accounting education cannot exist without ethical education and accountants must be technically proficient and ethically sensible since ethical behavior is vital to the status and credibility of the accountancy profession. And this sensibility must be developed while the future professional is still cultivating his or her moral and intellectual structure within the school learning environment: character and practical reasoning are crucial because they include not only knowledge of rules and principles, and their correct application but also values and virtues. Examining multiple perspectives, Accounting Ethics Education: Teaching Virtues and Values advances the scholarly debate by providing cuttingedge and insightful research vital for all those interested and immersed in these matters. It begins with a historical perspective of accounting ethics education and continues by exploring challenges, opportunities and developments in the area. It will be of great value to academics, students, researchers and professionals in the fields of accounting, accounting education and ethics.

Common and Uncommon Quotes: A Theory and History of Epigraphs Jared A. Griffin,2023-03-07 'Common and Uncommon Quotes: A Theory and History of Epigraphs' is a prolegomenon to the study of epigraphic paratextuality. Building on the work of Gerard Genette's paratextual studies, this volume contextualizes and traces the practice of epigraphy in Anglophone literary history, from the fifteenth to the early twentieth century. This study explores how epigraphs are used by author-functions as a hermeneutic for their text and to establish ethos with their audience, and how that paratextual relationship changed as publishing opportunities and literacy rates grew over four centuries. The first broad-reaching study of this kind, 'Common and Uncommon Quotes' seeks to understand how epigraphs work: through their privilege on the page, their appeal to conjured ideas of the past, and their calls to citizenship.

Violence in the Media and Its Influence on Criminal Defense Cynthia A. Cooper,2007-07-02 How much are today's youth actually influenced by violence in the media? People who would never dispute the positive influence of programs like Sesame Street are reluctant to acknowledge that other programming may do harm. As early as the 1930s, however, parents were expressing concerns about the content of various media, including radio and comic books. Today, almost every violent crime perpetrated by a young person is probed for evidence of media influence, often while other contributing factors are ignored. With an in-depth look at media violence and its possible influence on young viewers, this book examines how the media made me do it defense has affected today's courtrooms. Highly publicized cases such as those of Lionel Tate and Joshua Cooke, both of whom used media influence (television wrestling and The Matrix, respectively) as part of their defense, are discussed in detail. Other topics include the creation and maintenance of rating systems, parental involvement and ultimate responsibility.

Arabic-Type Books Printed in Wallachia, Istanbul, and Beyond Radu-Andrei Dipratu,Samuel Noble,2024-01-29 This first volume of Collected Works of the ERC Project TYPARABIC focuses on the history of printing during the 18th century in the Ottoman Empire and the Romanian Principalities among diverse linguistic and confessional communities. Although most roads lead to Istanbul, the many pathways of early modern Ottoman printing also connected authors, readers and printers from Central and South-Eastern Europe, Western Europe and the Levant. The papers included in this volume are grouped in three sections. The first focuses on the first Turkish-language press in the Ottoman capital, examining the personality and background of its founder, İbrahim Müteferrika, the legal issues it faced, and its context within the multilingual Istanbul printing world. The second section brings together studies of printing and readership in Central and South-East Europe in Romanian, Greek and Arabic. The final section is made up of studies of the Arabic liturgical and biblical texts that were the main focus of Patriarch Athanasios III Dabbās' efforts in the Romanian Principalities and Aleppo. This volume will be of interest to scholars of the history of printing, Ottoman social history, Christian Arabic literature and Eastern Orthodox liturgy.
