International Monetary Fund Annual Report 2016 International Monetary Fund, 2016-09-26 The year was marked by difficult challenges and milestone achievements. To reinvigorate modest growth at a time of uncertainty about a complicated global economy, the IMF membership endorsed a three-pronged approach of monetary, fiscal, and structural policies to get the world economy back on a stronger and safer growth track. Highlights of the IMF's work during the year included entry into effect of its quota and governance reforms approved in 2010, which increase the Fund's core resources and make it more representative of the membership; commitments for increased financial support, policy advice, expertise, and training to help low-income developing countries achieve the U.N. Sustainable Development Goals; analysis of the international monetary system; inclusion of the Chinese currency in the basket of currencies that make up the Special Drawing Right; and policy advice on the economic repercussions of mass migration of refugees from Syria and other conflict-afflicted states. The IMF Annual Report, which covers the period May 1, 2015 to April 30, 2016, discusses all of these issues, plus a wide range of policy matters that the Executive Board addressed during the year.

Virtual Caliphate Yaakov Lappin, 2011-01-01 In 1924 the last caliphate—an Islamic state as envisioned by the Koran—was dismantled in Turkey. With no caliphate in existence matching their ideals, al Qaeda and its hundreds of affiliate organizations have failed to achieve their goal of reestablishing radical Islamic rule. Journalist Yaakov Lappin asserts that this failure to create a homeland necessitated the formation of an unforeseen and unprecedented entity: an Islamist state on the Internet, the virtual caliphate. The virtual caliphate is an Islamist state that exists on computer servers around the world. Islamists use it to carry out functions typically reserved for a physical state, such as recruiting an army and training its soldiers, handling foreign affairs, and directing finances. In *Virtual Caliphate*, Lappin shows how Islamists employ twenty-first-century technology to achieve a seventh-century vision, hoping to soon upload the online state into the physical world. Lappin draws links between online sermons calling for violence and subsequent terror attacks like 2005's London transport bombing, a chilling glimpse of how the virtual caliphate has already moved beyond mere words and videos. Weaving together hard-to-find resources that often no longer exist online, Lappin captures a recent history of the virtual caliphate for the reader, exposing and demystifying all aspects of the jihadi online netherworld. *Virtual Caliphate* is a compelling and indispensable guide for anyone interested in understanding the technological aptitude of the global jihadi movement.

Experiencing Imprisonment Carla Reeves, 2016-01-08 The growing body of work on imprisonment, desistance and rehabilitation has mainly focused on policies and treatment programmes and how they are delivered. *Experiencing Imprisonment* reflects recent developments in research that focus on the active role of the offender in the process of justice. Bringing together experts from around the world and presenting a range of comparative critical research relating to key themes of the pains of imprisonment, stigma, power and vulnerability, this book explores the various ways in which offenders relate to the justice systems and how these relationships impact the nature and effectiveness of their efforts to reduce offending. *Experiencing Imprisonment* showcases cutting-edge international and comparative critical research on how imprisonment is experienced by those people living and working within imprisonment institutions in North America and Northern, Central and Eastern Europe, as well as Scandinavia. The research explores the subjective experience of imprisonment from the perspective of a variety of staff and prisoner groups, including juveniles, adult female and male prisoners, older prisoners, sex offenders, wrongfully convicted offenders and newly released prisoners. Offering a unique view of what it is like to be a prisoner or a prison officer, the chapters in this book argue for a prioritisation of understanding the subjective experiences of imprisonment as essential to developing effective and humane systems of punishment. This is essential reading for academics and students involved in the study of criminology, penology and the sociology of imprisonment. It will also be of interest to Criminal Justice practitioners and policymakers around the globe.

Protecting Human Security in Africa Ademola Abass, 2010-09-23 *Protecting Human Security in Africa* discusses some of the most potent threats to human security in Africa. It deals especially with those threats to the security of African people which are least understood or explored. In themes varying from corruption, the proliferation of small arms and light weapons, food security, the devastation of internal displacement in Africa, the link between natural resources and human security, to the problems of forced labour, threats to women's security, and environmental security, the book examines the legal and policy challenges of protecting human security in Africa. This work also analyses the role of NGOs and the civil society in advocating human security issues in Africa. It considers the role of

regional human rights mechanisms and judicial bodies, such as the African Commission for Human Rights and the African Court of Human and Peoples' Rights, in seeking to guarantee human security in Africa. Finally, with particular reference to the Somalia, Zimbabwe, Kenya, and Darfur crises, the book studies the role of African regional organizations, especially the African Union, in protecting the human security of Africans. Written by leading experts on its various themes, this is an indispensable book for all those seeking to learn more about the real challenges facing Africans and African organizations.

Inside the Teaching Machine Catherine Chaput, 2008-05-22 Inside the Teaching Machine argues that the U.S. public research university has always been a vital component of the capitalist political economy. Advocates of higher education have long contended that universities should operate above the crude material negotiations of economics and politics. Such arguments often ignore the historical reality that the American university system emerged through, and in service to, a capitalist political economy.

Women, Incarceration, and Human Rights Violations Alana Van Gundy, Amy Baumann-Grau, 2016-02-17 A rich examination of the neglect and abuses occurring to women in correctional facilities, *Women, Incarceration, and Human Rights Violations* draws upon a wealth of case studies from around the world and class action lawsuits to shed light on 'covert' abuse such as sexual or physical abuse, as well as 'overt' abuse such as the denial of medical treatment. Adopting a feminist framework, this book offers a comparative evaluation of abuse in domestic and international correctional facilities, demonstrating the extent to which women are at high risk of being sexually abused and re-victimized in the correctional system, where pregnancy and other specific medical and health issues are consistently ignored. Calling attention to the necessity of addressing the gender-specific needs of women who are incarcerated, *Women, Incarceration, and Human Rights Violations* offers a review of current policy, laws, and regulation bearing on the issue, while providing concrete recommendations and policy changes to address abuses. As such it will appeal to sociologists, criminologists, and policymakers concerned with questions of gender, penology, and institutional abuse.

Finding Solutions for Protecting and Sharing Archaeological Heritage Resources Anne P. Underhill, Lucy C. Salazar, 2015-10-23 This volume provides case studies about successful strategies employed in diverse world areas for the protection of archaeological heritage resources. Some chapters focus on a search for solutions arrived at by diverse groups of people working in specific areas rather than simply describing loss of cultural heritage. Other chapters provide a long-term view of intensified efforts at protection of archaeological resources. The authors describe challenges and solutions derived by concerned people in eastern Asia (China, Japan, Thailand), West Africa, Easter Island, Jordan, Honduras and more than one area of Peru. All of the authors draw upon deep, personal involvement with the protection of cultural heritage in each area. This volume is a timely addition to a growing number of conferences and publications about the management of cultural heritage—both archaeological and historical.

Transfer Pricing Developments Around the World 2018 Michael Lang, Alfred Storck, Raffaele Petruzzi, 2018-08-21 Intensive work on transfer pricing, one of the most relevant and challenging topics in the international tax environment, continues to increase worldwide at every level of government and international policy with far-reaching impact on countries' legislations, administrative guidelines, and jurisprudence. This book presents an in-depth, issue-by-issue analysis of the current state of developments along with suggestions for future solutions to the problems raised. Emerging from the research conducted by the WU Transfer Pricing Center at the Institute for Austrian and International Tax Law at WU (Vienna University of Economics and Business), this book offers seven topic-based papers prepared by international experts on transfer pricing. Greatly helping to define where the line should be drawn to distinguish genuine transfer pricing issues from other anti-avoidance measures, this book encompasses the following topics: • global transfer pricing developments; • transfer pricing developments in the European Union; • transfer pricing developments in the United States; • transfer pricing developments in developing countries and emerging economies; • recent developments on transfer pricing documentation and country-by-country reporting; • recent developments on comparability analysis in transfer pricing; and • recent developments on the profit split method. The intense work of international organizations such as the OECD, UN, EU, World Customs Organization, World Bank, International Monetary Fund, and other international organizations is thoroughly analyzed in this book. The detailed analysis will be of immeasurable value to the various players including international organizations, the business community and advisory firms, corporate CEOs and CFOs, and government officials as well as to tax lawyers, in-house counsel, and interested academics in facilitating an efficient dialogue and coordinated approach to transfer pricing in the future.

Die Effektivität transnationaler Maßnahmen gegen Menschenhandel in Europa Christoph Lindner, 2014-02-25 English summary: Human trafficking is a multipolar phenomenon in the context of migration and organized crime. Yet above all human trafficking in all its manifestations is a fundamental violation of human rights that is unacceptable for a modern society and its constitutional democracy. The European Union and the Council of Europe have acknowledged this and have in particular intensified legal action against human trafficking. But how successful has Europe been in legislating against human trafficking? What are the factors guaranteeing the effectiveness of the measures, where are the deficits and how can they be overcome? Christoph Lindner investigates these questions using a structured analysis model. German description: Menschenhandel ist ein multipolares Phänomen im Kontext von Migration und organisierter Kriminalität. Doch vor allem ist Menschenhandel in all seinen Erscheinungsformen eine fundamentale Menschenrechtsverletzung, die für eine moderne Gesellschaft und ihren Rechtsstaat nicht hinnehmbar ist. Die Europäische Union und der Europarat haben dies erkannt und insbesondere ihr rechtliches Vorgehen gegen Menschenhandel intensiviert. Aber wie gut ist Europa in seinen Rechtsakten gegen Menschenhandel? Welche Faktoren machen Massnahmen effektiv, wo liegen Defizite und wie lassen sich diese beseitigen? Christoph Lindner geht diesen Fragen mit Hilfe eines strukturierten Analysemodells nach.

No Establishment of Religion T. Jeremy Gunn, John Witte Jr., 2012-11-02 The First Amendment guarantee that Congress shall make no law respecting an establishment of religion rejected the millennium-old Western policy of supporting one form of Christianity in each nation and subjugating all other faiths. The exact meaning and application of this American innovation, however, has always proved elusive. Individual states found it difficult to remove traditional laws that controlled religious doctrine, liturgy, and church life, and that discriminated against unpopular religions. They found it even harder to decide more subtle legal questions that continue to divide Americans today: Did the constitution prohibit governmental support for religion altogether, or just preferential support for some religions over others? Did it require that government remove Sabbath, blasphemy, and oath-taking laws, or could they now be justified on other grounds? Did it mean the removal of religious texts, symbols, and ceremonies from public documents and government lands, or could a democratic government represent these in ever more inclusive ways? These twelve essays stake out strong and sometimes competing positions on what no establishment of religion meant to the American founders and to subsequent generations of Americans, and what it might mean today.

Research Handbook in Data Science and Law Vanessa Mak, Eric Tjong Tjin Tai, Anna Berlee, 2018-12-28 The use of data in society has seen an exponential growth in recent years. Data science, the field of research concerned with understanding and analyzing data, aims to find ways to operationalize data so that it can be beneficially used in society, for example in health applications, urban governance or smart household devices. The legal questions that accompany the rise of new, data-driven technologies however are underexplored. This book is the first volume that seeks to map the legal implications of the emergence of data science. It discusses the possibilities and limitations imposed by the current legal framework, considers whether regulation is needed to respond to problems raised by data science, and which ethical problems occur in relation to the use of data. It also considers the emergence of Data Science and Law as a new legal discipline.

Vanished in Hiawatha Carla Joinson, 2020-11-01 Begun as a pork-barrel project by the federal government in the early 1900s, the Canton Asylum for Insane Indians (also known as the Hiawatha Insane Asylum) quickly became a dumping ground for inconvenient Indians. The federal institution in Canton, South Dakota, deprived many Native patients of their freedom without genuine cause, often requiring only the signature of a reservation agent. Only nine Native patients in the asylum's history were committed by court order. Without interpreters, mental evaluations, or therapeutic programs, few patients recovered. But who cared about Indians in South Dakota? After three decades of complacency, both the superintendent and the city of Canton were surprised to discover that someone did care, and that a bitter fight to shut the asylum down was about to begin. In this disturbing tale, Carla Joinson unravels the question of why this institution persisted for so many years. She also investigates the people who allowed Canton Asylum's mismanagement to reach such staggering proportions and asks why its administrators and staff were so indifferent to the misery experienced by their patients. *Vanished in Hiawatha* is the harrowing tale of the mistreatment of Native American patients at a notorious asylum whose history helps us to understand the broader mistreatment of Native peoples under forced federal assimilation in the nineteenth and early twentieth centuries.
