*Global School Feeding Sourcebook* Lesley Drake, Alice Woolnough, Carmen Burbano, Donald Bundy, 2016-04-08 Compiled by the Partnership for Child Development at Imperial College London, the World Food Programme, the World Bank and the African Union's New Partnership for Africa's Development, this is the first sourcebook of its kind to document government-led school feeding programmes in low and middle income countries. It includes a compilation of concise but comprehensive chapters about national programmes in 14 countries from sub-Saharan Africa, Asia and Latin America. The sourcebook highlights the trade-offs associated with alternative school feeding models and analyses the overarching themes, trends and challenges which run across these programmes. This sourcebook supports learning and knowledge exchange among countries looking to strengthen and scale-up national school feeding programmes. The evidence presented here sheds light on identified global good practices which can be employed to improve the quality and effectiveness of programmes that positively impact on millions of children and communities worldwide. *The Environmental Dimension of Asian Security* In-t'aek Hyön, Miranda Alice Schreurs, 2007 Northeast Asia is a region with highly disparate levels of industrialization and political systems. It also contains some very troubling security flashpoints the Taiwan Strait, the Korean Peninsula, and the East China Sea. China's rapacious quest for energy and rapid industrial expansion have led to intense international competition with Japan and the United States and internal instability as well. North Korea poses two distinct environmental security threats: famine refugees and the regime's use of nuclear blackmail for subsidized energy. Yet there is very little regional cooperation, despite the need to manage disputes over energy, natural resources, and pervasive pollution. The Environmental Dimension of Asian Security examines these issues through a regional environmental security complex that explores the potential for greater intersubjective understandings of regional environmental and natural resource problems and greater institutional collaboration and management.

*The Oneida Indian Journey* Laurence M. Hauptman, L. Gordon McLester, 1999 For the first time, the traumatic removal of the Oneida Indians from New York to Wisconsin is examined in a groundbreaking collection of essays, *The Oneida Indian Journey from New York to Wisconsin, 1784-1860*. To shed light on this vital period of Oneida history, editors Laurence Hauptman and L. Gordon McLester, III, present a unique collaboration between an American Indian nation and the academic community. Two professional historians, a geographer, anthropologist, archivist and attorney join in with eighteen voices from the Oneida community--local historians, folklorists, genealogists, linguists, and tribal elders--discuss tribal dispossession and community; Oneida community perspectives of Oneida history; and the means of studying Oneida history. **Mapping Media in China** Wanning Sun, Jenny Chio, 2012-07-26 Mapping Media in China is the first book-length study that goes below the 'national' scale to focus on the rich diversity of media in China from local, provincial and regional angles. China's media has played a crucial role in shaping and directing the country's social and cultural changes, and whilst these shifts have often been discussed as a single and coherent phenomenon, this ignores the vast array of local and regional variations within the country's borders. This book explores media as both a reflection of the diversity within China and as an active agent behind these growing differences. It examines the role of media in shaping regional, provincial and local identities through the prism of media economics and technology, media practices, audiences, as well as media discourses. The book covers a wide range of themes, including civil society, political resistance, state power and the production and consumption of place-specific memory and imagination. With contributions from around the world, including original ethnographic material from scholars based in China, Mapping Media in China is an original book which spans a broad range of disciplines. It will be invaluable to both students and scholars of Chinese and Asian studies, media and communication studies, geography, anthropology and cultural studies.

The Content and Context of Hate Speech Michael Herz, Peter Molnar, 2012-04-09 The contributors to this volume consider whether it is possible to establish carefully tailored hate speech policies that are cognizant of the varying traditions, histories and values of different countries. Throughout, there is a strong comparative emphasis, with examples (and authors) drawn from around the world. All the authors explore whether or when different cultural and historical settings justify different substantive rules given that such cultural relativism can be used to justify content-based restrictions and so endanger freedom of expression. Essays address the following questions, among others: is hate speech in fact so dangerous or harmful to vulnerable minorities or communities as to justify a lower standard of constitutional protection? What harms and benefits accrue from laws that criminalize hate speech in particular contexts? Are there circumstances in which everyone would agree that hate speech should be criminally punished? What lessons can be learned from international case law?

PCM-Enhanced Building Components Jan Kośny, 2015-05-07 Presenting an overview of the use of Phase Change Materials (PCMs) within buildings, this book discusses the performance of PCM-enhanced building envelopes. It reviews the most common PCMs suitable for building applications, and discusses PCM encapsulation and packaging methods. In addition to this, it examines a range of PCM-enhanced building products in the process of development as well as examples of whole-building-scale field demonstrations. Further chapters discuss experimental and theoretical analyses (including available software) to determine dynamic thermal and energy performance characteristics of building enclosure components containing PCMs, and present different laboratory and field testing methods. Finally, a wide range of PCM building products are presented which are commercially available worldwide. This book is intended for students and researchers of mechanical, architectural and civil engineering and postgraduate students of energy analysis, dynamic design of building structures, and dynamic testing procedures. It also provides a useful resource for professionals involved in architectural and mechanical-civil engineering design, thermal testing and PCM manufacturing.

The Brussels Effect Anu Bradford, 2020-01-27 For many observers, the European Union is mired in a deep crisis. Between sluggish growth; political turmoil following a decade of austerity politics; Brexit; and the rise of Asian influence, the EU is seen as a declining power on the world stage. Columbia Law professor Anu Bradford argues the opposite in her important new book The Brussels Effect: the EU remains an influential superpower that shapes the world in its image. By promulgating regulations that shape the international business environment, elevating standards

worldwide, and leading to a notable Europeanization of many important aspects of global commerce, the EU has managed to shape policy in areas such as data privacy, consumer health and safety, environmental protection, antitrust, and online hate speech. And in contrast to how superpowers wield their global influence, the Brussels Effect - a phrase first coined by Bradford in 2012- absolves the EU from playing a direct role in imposing standards, as market forces alone are often sufficient as multinational companies voluntarily extend the EU rule to govern their global operations. The Brussels Effect shows how the EU has acquired such power, why multinational companies use EU standards as global standards, and why the EU's role as the world's regulator is likely to outlive its gradual economic decline, extending the EU's influence long into the future.

*An Introduction to Online Platforms and Their Role in the Digital Transformation* OECD,2019-05-13 This report contains detailed profiles of twelve of the world's leading platform companies and derives insights from those profiles about what platforms actually do, how they do it, and why they succeed financially.

**Internet Service Provider Liability for Copyright and Trade Mark Infringement** Zoi Krokida,2022-06-16 This book critically evaluates the EU regulatory framework for the liability of host Internet Service Providers (ISPs) for copyright and trade mark infringements and provides a cluster of novel recommendations for its improvement. The book recommends the imposition of a duty of care to host ISPs to curb the dissemination of unauthorised works and counterfeit goods, the ascription of a transparency obligation to host ISPs towards their users, and the establishment of a supervisory authority for host ISPs. Host ISPs have facilitated the dissemination of content amongst users and the purchase of goods online, enabling copyright holders and brand owners to attract a greater audience for their works and goods. However, their services have attracted a high number of copyright and trade mark violations, too. Neither Article 14 of the e-Commerce Directive nor Article 17 of the Copyright in the Digital Single Market Directive provide a solid response to the issue of host ISPs' liability. This book is a valuable resource for researchers in IT and IP law and offers a new perspective for resolving online IP disputes.

**Handbook on the EU and International Trade** Sangeeta Khorana,María García,2018-08-31 The Handbook on the EU and International Trade presents a multidisciplinary overview of the major perspectives, actors and issues in contemporary EU trade relations. Changes in institutional dynamics, Brexit, the politicisation of trade, competing foreign policy agendas, and adaptation to trade patterns of value chains and the digital and knowledge economy are reshaping the European Union's trade policy. The authors tackle how these challenges frame the aims, processes and effectiveness of trade policy making in the context of the EU's trade relations with developed, developing and emerging states in the global economy.

*Atlas of Slavery and Civil Rights* Nicholas J Santoro,2006 Slavery came to North America via Virginia in the early 1600s. It would be two hundred and sixty-five years before the practice would finally come to an end. It would take another one hundred years before the basic civil rights of those former slaves and their descendants were fully established in law. During that time and thereafter, it would be a matter of attitude and acceptance by the white race. Of the years, there were a number of pivotal events that shaped the issues and the responses to slavery and civil rights. The Atlas presents a number of these events in an attempt to tell part of the history of the march for equality in America. It also includes brief biographical sketches of the lives of many of the leading figures that led the fight. This work deals with black Americans or blacks, a term that has become synonymous with the Negro race itself; their struggle out of slavery; and their quest for acceptance and equal rights under the law. The effects of slavery were all pervasive. Without an understanding of and an appreciation for slavery, segregation, and the struggle for equal rights, it is difficult if not impossible to understand the America of our history and to reach beyond where we are today to arrive at where we need to be.

**The Metaphysics of Market Power** George Raitt,2019-05-02 Australian competition law has just emerged from a significant period of reform

which has seen controversial changes to the legal test to distinguish between normal competitive conduct and conduct that should be condemned. The controversy continues, arguably because the traditional legal conception of market power does not provide a useful standard in real world markets. This important new book offers a radical interpretation of market power, based on the power to manipulate. Seeing it in this way allows for positive and normative standards within which to frame a legal theory of liability for misuse of that power. The book provides suggestions to improve the forensic assessment of conduct that should be condemned as misuse of market power.

**The Law of Electronic Commerce** Jane K. Winn, Benjamin Wright, 2000-01-01 Annotation New edition of a study of the law of electronic commerce, which requires the simultaneous management of business, technology and legal issues. Winn (law, Southern Methodist U.) and Wright (a business lawyer in Dallas) present 21 chapters that discuss introductory material such as business and technologies of e-commerce, getting online, jurisdiction and choice of law issues, and electronic commerce and law practice; contracting; electronic payments and lending; intellectual property rights and rights in data; regulation of e-business markets; and business administration. Presented in a three-ring binder. Annotation c. Book News, Inc., Portland, OR (booknews.com)

**Antitrust Settlements** Giovanna Massarotto, 2019-10-17 Competition enforcement authorities use settlements as a tool to ensure compliance with antitrust law. Companies can make commitments to remedy breaches, ensuring that they avoid litigation and potential fines and reputational damage. The author of this highly original and innovative book shows that, rather than fines or arguing principles of competition law in litigation, antitrust settlements (namely U.S. consent decrees and EU commitment decisions) hold the key to globally effective enforcement, particularly in the digital and blockchain era. Antitrust law does not necessarily need to be abolished, but rather should be fully exploited as an economic regulation led by antitrust settlements. In supporting her thesis, the author examines such elements of competition enforcement as the following: drawbacks of allowing the courts to regulate markets; whether antitrust settlements sacrifice antitrust deterrence; how settlements rapidly and surgically regulate markets; comparative analysis between U.S. consent decrees and EU commitment decisions; economic analysis on the adoption of antitrust settlements in both the U.S. and EU markets from 2013 to 2018; fundamental role of antitrust settlements in regulating the current digital markets; and comprehensive description on how to use antitrust settlements to regulate the data industry. With its thorough guidance on U.S. consent decrees and EU commitment decisions from their functioning to their characteristics and procedure—and its extensive treatment of the main antitrust remedies available and used in enforcing of antitrust law in both the U.S. and EU—the book provides both an economic and a legal analysis of the functioning and the scope of antitrust settlements. It assesses the influence of decisions on companies' behavior and agencies' practice, using economic analysis to show the procompetitive or anticompetitive effects of remedies, with special attention to digital markets. Because markets have become so dynamic and unpredictable that it is difficult to preserve efficiency, the author says, there is a little room for law—economic regulation is a better fit. This book is a springboard to further investigate how a simple antitrust enforcement tool, having turned competition law into an economic regulation policy, can drive our economy, leading both the antitrust and regulatory interventions in tackling today's market challenges.

**Legal Pluralism in European Contract Law** Vanessa Mak, 2020-09-11 The relevance of contracting and self-regulation in consumer markets has increased rapidly in recent years, in particular in the platform economy. Online platforms provide opportunities for businesses and consumers to connect with strangers, often across borders, trading products, and services. In this new economy, platform operators create, apply and enforce their own rules in their contractual relationships with users. This book examines the substance of these rules and the space for private governance beyond the reach of state regulation. Vanessa Mak explores recent developments in lawmaking 'beyond the state' with case studies focusing on companies such as Airbnb and Amazon. The book asks how common values and objectives of EU law, such as consumer protection and contractual fairness, can

be safeguarded when lawmaking shifts to a space outside the reach of state law.

Rethinking the Jurisprudence of Cyberspace Chris Reed, Andrew Murray, 2018 Cyberspace is a difficult area for lawyers and lawmakers. With no physical constraining borders, the question of who is the legitimate lawmaker for cyberspace is complex. Rethinking the Jurisprudence of Cyberspace examines how laws can gain legitimacy in cyberspace and identifies the limits of the law's authority in this space.

**Progress or Freedom** Jean-Hervé Lorenzi, Mickaël Berrebi, 2019-08-14 Technological dominance is shifting the balance of global economic stability. This is the central premise behind the latest book from Lorenzi and Berrebi who view the rise of artificial intelligence, robotics, use of private data, and genetic transformation, among other developments, culminating in new economic conditions that require a fresh sense of governance in order for society to sustain order. Whilst progress in technology provides numerous opportunities and hope, is the desire to pursue these ambitions in innovation putting our society at risk of being undermined and, ultimately, governed by technology firms? How will these changes affect economic outlooks in an age of growing inequality and aging populations? What role do politicians serve in facilitating these changes? The decline of a labour force, the use of Big Data and increased speeds of communication are but three examples that the authors address in their quest to understand where the limits should lie between progress and disruption for the future of society.

*Regulating Data Monopolies* Jingyuan Ma, 2022-01-24 This book analyzes the business model of enterprises in the digital economy by taking an economic and comparative perspective. The aim of this book is to conduct an in-depth analysis of the anti-competitive behavior of companies who monopolize data, and put forward the necessity of regulating data monopoly by exploring the causes and characteristics of their anti-competitive behavior. It studies four aspects of the differences between data monopoly and traditional monopolistic behavior, namely defining the relevant market for data monopolies, the entry barrier, the problem of determining the dominant position of data monopoly, and the influence on consumer welfare. It points out the limitations of traditional regulatory tools and discusses how new regulatory methods could be developed within the competition legal framework to restrict data monopolies. It proposes how economic analytical tools used in traditional anti-monopoly law are facing challenges and how competition enforcement agencies could adjust regulatory methods to deal with new anti-competitive behavior by data monopolies.
