The 1958 Baltimore Colts George Bozeka,2018-06-12 The 1958 Baltimore Colts were one of the greatest teams ever in professional football. Owned by the controversial Carroll Rosenbloom and led by head coach Weeb Ewbank and six future Hall of Fame players--Johnny Unitas, Raymond Berry, Lenny Moore, Jim Parker, Art Donovan and Gino Marchetti--they won the NFL title that season, defeating the New York Giants in the first sudden death championship game in NFL history. The Colts laid the foundation for the ultra-popular spectacle football would become with the American public. They were a talented group of players. Many had been rejected or underappreciated at various points in their careers though they were loved and respected by the blue collar fans of Baltimore. This book tells the complete story of the '58 Colts and the city's love affair with the team.

The Gospel of J. Edgar Hoover Lerone A. Martin, 2023-02-07 This book examines one powerful but largely neglected ally of this rising white conservative coalition: J. Edgar Hoover and the FBI he led for almost a half-century. Revered by the evangelical faithful, Hoover was a powerful ally of and partner to the mainstream evangelical movement, working alongside Billy Graham, the mass circulation magazine *Christianity Today*, the National Association of Evangelicals, and other evangelical institutions and leaders to advance a Christian nationalist vision of America. In some ways it was an odd partnership. Hoover, for one thing, was not himself a born-again evangelical. And he maintained a domestic partnership with a male senior FBI agent that did not cohere with Christian conservative family values. Yet white Christian conservatives readily looked to Hoover and his FBI for their civic and political salvation. *The Gospel of J. Edgar Hoover* explains why white evangelicals from the pulpit to the pew honored Hoover as their anointed Christian champion. Part one of the book illustrates how Hoover made white Christian nationalism the bedrock of the modern national security state by shaping the FBI in his own image as soldiers advancing toward a white, Christian America. The second part explains how Hoover materially supported the white Christian nationalist project of fusing conservative Christianity with American civic life. Along the way, Martin considers broader questions about the relationship between religion and national security in American history, and what Hoover's bureau might reveal about the nature of white evangelicalism--

Lebanon Tobias Schwerna, 2010 As sectarian and political tensions rose after March of 2005, scholars and journalists began to speculate that Lebanon was heading back into civil war. Much academic literature, in fact showed that the probability of regressing into such a state was very high. Although tensions did escalate and violence broke out on a number of occasions (culminating in several days of fighting in May 2008) the Doha agreement provided a peaceful political solution to the country's crisis. This book offers an answer to the question of why no renewed civil war occurred in Lebanon as well as to the larger question of why civil wars do - or do not - break out. The author accomplishes this by developing and presenting a model of informal elite agreement, which he terms «consociational conflict».

Peripheralization Matthias Naumann, Andrea Fischer-Tahir, 2013-01-12 Peripheries emerge as a result of shifts in economic and political decision-making at various scales. Therefore peripheral spaces are not a “natural” phenomenon but an outcome of the intrinsic logic of uneven geographical development in capitalist societies. Discussing examples from Germany, Eastern Europe, Turkey, Iraqi Kurdistan, Pakistan, India and Brazil, the volume describes the social production of peripheries from different theoretical and methodological perspectives. In so doing, it argues in favour of a re-politicization of the recent debate on peripheralization.

Constitutional Review in Western Europe Kálmán Pócza, 2024-04-16 Recent confrontations between constitutional courts and parliamentary majorities in several European countries have attracted international interest in the relationship between the judiciary and the legislature. Some political actors have argued that courts have assumed too much power and politics has been extremely judicialized. Yet the extent to which this aggregation of power may have constrained the dominant political actors' room for manoeuvre has never been examined accurately and systematically. This volume fills this gap in the literature. To explore the diversity and measure the strength of

judicial decisions, the authors have elaborated a new methodology that is intended to give a more nuanced picture of the practice of constitutional adjudication in Europe. The work opens with an assessment of the existing literature on empirical analysis of judicial decisions with a special focus on Western Europe and a short summary of the methodology of the project. This is followed by 11 country studies and a concluding chapter providing a comprehensive comparative analysis of the results. A further ten countries are explored in the counterpart volume to this book: *Constitutional Review in Central and Eastern Europe: Judicial-Legislative Relations in Comparative Perspective*. The collection will be an invaluable resource for those working in the areas of empirical legal research and comparative constitutional law, as well as political scientists interested in judicial politics.

Digital Politics and Culture in Contemporary India Biswarup Sen, 2016-01-08 The relationship between information and the nation-state is typically portrayed as a face-off involving repressive state power and democratic flows: Twitter and the Arab Spring, Google in China, WikiLeaks and the U.S. State Department. Less attention has been paid to those scenarios where states have regarded information and its diffusion as productive of modernity and globalization. It is the central argument of this book that the contemporary nation-state, especially in the global South, is far from hostile to the current informational milieu and in fact makes crucial use of it in order to develop adequate modes of governance, communication and sociality in a networked world. This book focuses on India – an emerging country that has recently witnessed a software miracle – to highlight the critical role informatics has historically played in the national imagination and to demonstrate how the state, private capital and civic society have drawn upon and engaged the precepts and protocols of the information age to fashion an info-nation.

Indian Immigrant Women and Work Ramya M. Vijaya, Bidisha Biswas, 2016-11-03 In recent years, interest in the large group of skilled immigrants coming from India to the United States has soared. However, this immigration is seen

as being overwhelmingly male. Female migrants are depicted either as family migrants following in the path chosen by men, or as victims of desperation, forced into the migrant path due to economic exigencies. This book investigates the work trajectories and related assimilation experiences of independent Indian women who have chosen their own migratory pathways in the United States. The links between individual experiences and the macro trends of women, work, immigration and feminism are explored. The authors use historical records, previously unpublished gender disaggregate immigration data, and interviews with Indian women who have migrated to the US in every decade since the 1960s to demonstrate that independent migration among Indian women has a long and substantial history. Their status as skilled independent migrants can represent a relatively privileged and empowered choice. However, their working lives intersect with the gender constraints of labor markets in both India and the US. Vijaya and Biswas argue that their experiences of being relatively empowered, yet pushing against gender constraints in two different environments, can provide a unique perspective to the immigrant assimilation narrative and comparative gender dynamics in the global political economy. Casting light on a hidden, but steady, stream within the large group of skilled immigrants to the United States from India, this book will be of interest to researchers in the fields of political economy, anthropology, and sociology, including migration, race, class, ethnic and gender studies, as well as Asian studies.

America, War and Power Lawrence Sondhaus, A. James Fuller, 2007-06-11 Written by leading historians and political scientists, this collection of essays offers a broad and comprehensive coverage of the role of war in American history. Addressing the role of the armed force, and attitudes towards it, in shaping and defining the United States, the first four chapters reflect the perspectives of historians on this central question, from the time of the American Revolution to the US wars in Vietnam and Iraq. Chapters five and six offer the views of political scientists on the topic, one in light of the global systems theory, the other from the perspective of domestic opinion and governance. The concluding essay is written by historians Fred Anderson and Andrew Cayton, whose co-authored book *The Dominion of War: Empire and Liberty in North America, 1500-2000* provided the common reading for the symposium which produced these essays. *America, War and Power* will be of much interest to students and scholars of US military history, US politics and military history and strategy in general.

Human Heredity in the Twentieth Century Bernd Gausemeier, 2015-10-06 The essays in this collection examine how human heredity was understood between the end of the First World War and the early 1970s. The contributors explore the interaction of science, medicine and society in determining how heredity was viewed across the world during the politically turbulent years of the twentieth century.
