The Vulgarization of Christ's Church Ronnie W. Rogers, 2017-04-14 This book seeks to clarify and demonstrate the incalculable and injurious influence that progressive education has had and is having upon preaching, thinking Christianly, and the local church. Progressive education began at the turn of the twentieth century, replacing classical education with what is purportedly a science-based education, which necessarily results in scientism. This seismic shift in public education has not only affected what we learn but how we think. In order to enable the church to detect progressivism's deleterious sway and protect herself by being equipped with the progressive revelation of God, and thereby counter the influence of progressive education of man, I seek to highlight some of the underlying intolerable essentials of progressive education. In the companion book to this one, *The Equipping Church: Somewhere Between Fundamentalism and Fluff*, I explain the biblical model for the local church and how to build such a church.

The HP Phenomenon Charles H. House, Raymond L. Price, 2009-10-09 The HP Phenomenon tells the story of how Hewlett-Packard innovated and transformed itself six times while most of its competitors were unable to make even one significant transformation. It describes those transformations, how they started, how they prevailed, and how the challenges along the way were overcome—reinforcing David Packard's observation that change and conflict are the only real constants. The book also details the philosophies, practices, and organizational principles that enabled this unprecedented sequence of innovations and transformations. In so doing, the authors capture the elusive

spirit of innovation required to fuel growth and transformation in all companies: innovation that is customer-centered, contribution-driven, and growth-focused. The corporate ethos described in this book—with its emphasis on bottom-up innovation and sufficient flexibility to see results brought to the marketplace and brought alive inside the company—is radically different from current management best practice. Thus, while primarily a history of Hewlett-Packard, *The HP Phenomenon* also holds profound lessons for engineers, managers, and organizational leaders hoping to transform their own organizations. At last! The 'HP Way, that most famous of all corporate philosophies, has taken on an almost mythical status. But how did it really work? How did it make Hewlett-Packard the fastest growing, most admired, large company of the last half-century? Now, two important figures in HP's history, Chuck House and Raymond Price, have finally given us the whole story. *The HP Phenomenon* is the book we've been waiting for: the definitive treatise on how Bill and Dave ran their legendary company, day to day and year to year. It should be a core text for generations of young entrepreneurs and managers, a roadmap to building a great enterprise.—Michael S. Malone, author of *Bill & Dave: How Hewlett and Packard Built the World's Greatest Company*

Nineteen Eighty-Four George Orwell, 2021-01-09 *Nineteen Eighty-Four: A Novel*, often published as 1984, is a dystopian social science fiction novel by English novelist George Orwell. It was published on 8 June 1949 by Secker & Warburg as Orwell's ninth and final book completed in his lifetime. Thematically, *Nineteen Eighty-Four* centres on the consequences of totalitarianism, mass surveillance, and repressive regimentation of persons and behaviours within society. Orwell, himself a democratic socialist, modelled the authoritarian government in the novel after Stalinist Russia. More broadly, the novel examines the role of truth and facts within politics and the ways in which they are manipulated. The story takes place in an imagined future, the year 1984, when much of the world has fallen victim to perpetual war, omnipresent government surveillance, historical negationism, and propaganda. Great Britain, known as Airstrip One, has become a province of a totalitarian superstate named Oceania that is ruled by the Party who employ the Thought Police to persecute individuality and independent thinking. Big Brother, the leader of the Party, enjoys an intense cult of personality despite the fact that he may not even exist. The protagonist, Winston Smith, is a diligent and skillful rank-and-file worker and Outer Party member who secretly hates the Party and dreams of rebellion. He enters into a forbidden relationship with a colleague, Julia, and starts to remember what life was like before the Party came to power.

Redrawing The Nation H. L'Hoeste, J. Poblete, 2009-10-26 This volume discusses the role of comics in the formation of a modern sense of nationhood in Latin America and the rise of a collective Latino identity in the USA. It is one of the first attempts - in English and from a cultural studies perspective - to cover Latin/o American comics with a fully continental scope. Specific cases include cultural powerhouses like Argentina, Brazil, and Mexico, as well as the production of lesser-known industries, like Chile, Cuba, and Peru.

NICOMACHEAN ETHICS Aristotle, 2017-04-20 ♦ EVERY art and every inquiry, and similarly every action and pursuit, is thought to aim at some good; and for this reason the good has rightly been declared to be that at which all things aim. But a certain difference is found among ends; some are activities, others are products apart from the activities that produce them. Where there are ends apart from the actions, it is the nature of the products to be better than the activities. Now, as there are many actions, arts, and sciences, their ends also are many; the end of the medical art is health, that of shipbuilding a vessel, that of strategy victory, that of economics wealth. But where such arts fall under a single

capacity- as bridle-making and the other arts concerned with the equipment of horses fall under the art of riding, and this and every military action under strategy, in the same way other arts fall under yet others- in all of these the ends of the master arts are to be preferred to all the subordinate ends; for it is for the sake of the former that the latter are pursued. It makes no difference whether the activities themselves are the ends of the actions, or something else apart from the activities, as in the case of the sciences just mentioned. ♦

Teaching English using the internet and multiple intelligences approach (2007-05-01) This book can be regarded as a resource book for teachers who would like to apply multiple entry point approaches,a framework of multiple intelligences proposed by Gardner,in their language classes.On-line sources are particularly valuable in learning situations where teachers usually expect authentic materials.Moreover,this book builds a bridge from theory to practical approach aiming to assist teachers who believe intrinsically in the use of technology,but have not been trained in its use.

Critical Literacy in A Digital Era Barbara Warnick, 2001-11-01 Critical Literacy in a Digital Era offers an examination of the persuasive approaches used in discussions on and about the Internet. Its aim is to increase awareness of what is assumed, unquestioned, and naturalized in our media experience. Using a critical literacy framework for her analysis, author Barbara Warnick argues that new media technologies become accepted not only through their use, but also through the rhetorical use of discourse on and about them. She analyzes texts that discuss new media and technology, including articles from a major technology-oriented periodical; women's magazines and Web sites; and Internet-based political parody in the 2000 presidential campaign. These case studies bring to light the persuasive strategies used by writers to influence public discourse about technology. The book includes analyses of narrative structures, speech genres, intertextuality, argument forms, writing formulae, and patterns of emphasis and neglect used in traditional and new media outlets. As a result, this distinctive work identifies the features of online speech that bring people and ideas together and enable communities to form in new media environments. As a unique study of the ways in which ideology is embedded in rhetorical texts, this volume will play a significant role in the development of critical literacy about writing and speech concerning new communication technology. It will be of interest to readers concerned about how our talk about communication affects how we think about it, in particular those interested in communication and social change, public persuasion, and rhetorical criticism of new media content.

The Bulldozer and the Big Tent Todd Gitlin, 2007-09-10 This book, by one of America's most intelligent and decent political writers, tells liberals how the conservative movement rose and fell, and how they could emulate its successes while avoiding its failures. --George Packer, author of *Blood of the Liberals* and *The Assassins' Gate* No one is better than Todd Gitlin at describing the crucial dynamic through which movements gain or lose political power. Justly celebrated for his seminal work on such dynamics during the 1960s, Gitlin now explains everything that's happened since, with passion and wisdom--and happily, because of Bushism's collapse, legitimate optimism about the future. --Michael Tomasky, Editor, *Guardian America* An impassioned yet realistic plea for Democrats and liberals to become more serious about politics. They would do well to follow his advice. --Alan Wolfe, Director, Boisi Center for Religion and American Public Life, Boston College A brilliant and indispensable book. Gitlin convincingly urges liberals to take seriously the greater difficulty the Democrats have forging cohesion among identity-based groups over

the Republicans persuading the less diverse Republican base to bury disagreements in the drive for victory. Gitlin argues that Democrats will have to bite the bullet and unite under a big tent. It's a hard lesson for ardent newcomers to the movement to swallow. Gitlin is dead right. --Thomas B. Edsall, Special Correspondent, The New Republic This is an indispensable book by one of our most gifted public intellectuals. Todd Gitlin explains--with splendid scholarship, reporting, and wit--how the Bush machine debased our political life and how progressives, in all their variety, are struggling to build a new majority. It is the best guide we have to America's recent past and its possible future. --Michael Kazin, author of A Godly Hero: The Life of William Jennings Bryan and Professor of History, Georgetown University

Understanding Violent Radicalisation Magnus Ranstorp, 2010-01-21 This is the first book to address in depth the interplay between radicalisation and political violence in Europe, as well as the effectiveness of counter-measures. As evidenced from the multitude of intercepted plots across several European cities since 2001, the threat level and the intensity of the desire to perpetrate mass-casualty attacks within Europe is not diminishing. While violent radicalization has gradually moved to the top of the EU counterterrorism agenda, it has been accompanied by a relatively embryonic understanding about the processes and interplay of factors that contribute to radicalization, which are played out differently in cities like Paris, Rome, London and Copenhagen. Undoubtedly, there are common factors at the global and regional levels that facilitate radicalization, but it is also clear that radicalization is very context dependent. This book provides crucial insights into different ways to understand violent radicalization within national contexts and the challenges addressing the many pathways into terrorism inspired by al-Qaeda and other forms of Islamic extremism. This book will be of great interest to students of terrorism studies and political violence, counter-terrorism, EU politics, security studies and IR in general. Magnus Ranstorp is Research Director of the Center for Asymmetric Threat Studies at the Swedish National Defence College and a Member of EU Expert Groups on (Violent) Radicalisation. He has twenty years of experience in research on counterterrorism issues and testified at the 9/11 Commission Hearing.

By More Than Providence Michael J. Green, 2017-03-21 Soon after the American Revolution, certain of the founders began to recognize the strategic significance of Asia and the Pacific and the vast material and cultural resources at stake there. Over the coming generations, the United States continued to ask how best to expand trade with the region and whether to partner with China, at the center of the continent, or Japan, looking toward the Pacific. Where should the United States draw its defensive line, and how should it export democratic principles? In a history that spans the eighteenth century to the present, Michael J. Green follows the development of U.S. strategic thinking toward East Asia, identifying recurring themes in American statecraft that reflect the nation's political philosophy and material realities. Drawing on archives, interviews, and his own experience in the Pentagon and White House, Green finds one overarching concern driving U.S. policy toward East Asia: a fear that a rival power might use the Pacific to isolate and threaten the United States and prevent the ocean from becoming a conduit for the westward free flow of trade, values, and forward defense. *By More Than Providence* works through these problems from the perspective of history's major strategists and statesmen, from Thomas Jefferson to Alfred Thayer Mahan and Henry Kissinger. It records the fate of their ideas as they collided with the realities of the Far East and adds clarity to America's stakes in the region, especially when compared with those of Europe and the Middle East.

Politics and Change in Singapore and Hong Kong Stephan Ortmann, 2009-12-04 In democratization theory, Singapore continues to be a remarkable country for its extremely low level of contentious politics despite rapid economic development. In contrast, many different groups in Hong Kong have taken their demands to the streets since the 1970s.

Even though there is an obvious difference in the willingness of the population to actively challenge the regime, the political developments of the two city-states show a similar pattern of political mobilization and government reaction. This book examines the changing pattern of contentious politics in the democratization process of these Asian city-states. It explores the causal connections between popular contention and democratization, using a multi-disciplinary approach with theoretical insights from the political sciences, sociology and psychology. The political process model is applied to provide further understanding of the patterns of interaction between contenders, opposition groups or social movements and the ruling elite. The book argues that differences in the strategies applied by the ruling elite explain why members of the opposition were empowered or obstructed in challenging the government.

Reinterpreting a Native American Identity Eric Hannel, 2015-10-08 This book uses the Peoplehood Model to argue for a more consistent recognition process grounded in Indigenous methodology. The text centers on four aspects of Peoplehood--language, sacred history, territory/place, and ceremonial cycle--and shows how they inform the Lumbee identity and counter arguments derived from the Western Colonial Model.

Making the Foreign Serve China Anne-Marie Brady, 2003-09-08 This book provides the first detailed analysis of a crucial and distinctive element of Chinese foreign policy. Anne-Marie Brady follows the development of the Chinese Communist Party's 'foreign affairs' system since 1921, focusing on waishi, the external policies intended to influence and control both foreigners themselves as well as Chinese citizens' contact with and perception of outsiders. The term also comprises China's external relations—both official state-to-state and so-called unofficial or 'people-to-people' diplomacy. In effect, waishi activities encompass all matters related to foreigners and foreign things, not merely diplomacy. By managing the foreign presence in China and China's contacts with the outside world and by controlling the Chinese population, the author argues that waishi has proven to be one of the most effective tools in the CCP's repertoire for building and then sustaining its hold on power. Drawing for the first time on policy documents that underpin the phenomena they describe, Brady analyzes trends and developments in waishi during each chronological period. The book elucidates how the CCP's policies evolved: In the 1930s, the need for a broad united front in international relations warred with the desire to control the foreign presence in China; in the 1940s and 1950s, the Sino-Soviet alliance and ridding China of the traces of the 'semi-colonial' past took precedence; in the 1960s, the Sino-Soviet split led to China's claim as the center of world revolution; and in the past twenty years of reform, the focus has been the ongoing quest to create a modern nation-state as China opens up to the outside world. The author considers waishi's deeper meaning as an overriding approach to the 'foreign,' which links state-to-state diplomacy with the management of the foreign presence in China. Her groundbreaking research is based on a previously unexplored genre of waishi materials (almost all classified) in Chinese, extensive interviews with waishi officials and foreign participants of the system, as well as archival research inside and outside of China. The photograph used on the cover of the book was doctored by the Chinese government. The original photograph showed Edgar Snow standing on the Tiananmen podium with (reading from left to right) Snow, translator Ji Chaozhu, Mao Zedong, and Edgar Snow's wife, Lois Wheeler Snow. In the book's cover photograph, which was released internationally, Lois Wheeler Snow has been replaced by Lin Biao—at the time Mao's number two—shown prominently clutching Quotations from Mao Zedong, otherwise known as the Little Red Book. Lin Biao was no doubt inserted not only to show his ranking in the leadership but also to demonstrate that the shift towards rapprochement with the West which the Snow's visit to China in 1970 represented, was supported by the CCP's radical left as symbolized by Lin Biao.
