The Struggle over Human Rights Courtney Hercus, 2019-01-17 The Struggle over Human Rights uses empirical evidence to prove that pressures placed by the NIEO on the international system shaped the human rights doctrine of the Carter administration. Carter's strategy relegated economic rights to a "basic needs" approach and sharpened the definition of international human rights to serve the US world order.

Predatory Value Extraction William Lazonick, Jang-Sup Shin, 2019-11 Predatory Value Extraction explains how an ideology of corporate resource allocation known as maximizing shareholder value (MSV) that emerged in the 1980s came to dominate strategic thinking in business schools and corporate boardrooms in the United States. Undermining the social foundations of sustainable prosperity, it resulted in employment instability, income inequity, and slow productivity growth. In explaining what happened to sustainable prosperity, William Lazonick and Jang-Sup Shin focus on the growing imbalance between value creation and value extraction in the U.S. economy, and the corporate-governance institutions that determine this balance in the nation's major business corporations. The imbalance has become so extreme that predatory value extraction is now a central economic activity, to the point at which the U.S. economy as a whole can be aptly described as a value-extracting economy. Balancing the contributions of economic actors to value creation with their power to extract value provides the foundation for stable and equitable

economic growth. When certain economic actors are able to assert their power to extract far more value than they contribute to the value-creation process, an imbalance occurs which, when extreme, leads to dire economic, political, and social consequences. This book not only explores these consequences, but also sets out an agenda for restoring sustainable prosperity.

Examining the Market Power and Impact of Proxy Advisory Firms United States. Congress. House. Committee on Financial Services. Subcommittee on Capital Markets and Government Sponsored Enterprises, 2013

Paradoxes ,

Mutual Funds and Exchange-Traded Funds H. Kent Baker, Greg Filbeck, Halil Kiymaz, 2015-10-21 Mutual Funds and Exchange-Traded Funds: Building Blocks to Wealth offers a synthesis of the theoretical and empirical literature primarily on mutual funds but also discusses related investment vehicles, especially ETFs. In this edited volume, noted scholars and practitioners write chapters in their areas of expertise. It interweaves the contributions of multiple authors into an authoritative overview of important but selective topics. Readers will gain an in-depth understanding of mutual funds and ETFs from experts from around the world. Based on research-based evidence, this is not intended to be a how to book; instead, it is a scholarly and in-depth approach to important investment subjects. Although the book places greater attention on these different types of investments in the United States, it also examines them in a global context. In today's financial environment,

mutual funds and ETFs are dynamic areas that continue to evolve at a rapid pace. Because the flow of materials on the subject is voluminous, this book, by necessity, must be selective because it cannot cover every aspect of this field. However, readers can gain important insights about each investment vehicle including its structure and uses, performance and measurement. Beyond these core topics and issues, the book also examines the latest trends, cutting-edge developments, and real-world situations. Given its broad scope, this practical and comprehensive book should appeal to investors, investment professionals, academics, and others interested in mutual funds and ETFs. In particular, this book should help investors make key asset allocation decisions while capturing the benefits of a highly diversified, well-constructed, lower-cost portfolio of complementary strategies that enhance financial wealth.

from sales of this book will be donated to Friends of the Earth.

Designing a Sustainable Financial System Thomas Walker, Stéphanie D. Kibsey, Rohan Crichton, 2018-01-22 This edited collection brings together leading theoretical and applied research with the intent to design a sustainable global financial future. The contributors argue that our world cannot move toward sustainability, address climate change, reverse environmental degradation, and improve human well-being without aligning the financial system with sustainable development goals like those outlined by the United Nations. Such a system would: a) be environmentally and socially responsible; b) align with planetary boundaries; c) manage natural resources sustainably; d) avoid doing more harm than good; and e) be resilient and adaptable to changing conditions. The overarching theme in this collection of chapters is a response to the worldwide, supranational sustainable finance discussions about how we can transition to a new socio-ecological system where finance, human well-being, and planetary health are recognized as being highly intertwined.

Women's Rights in the Middle East and North Africa Sanja Kelly, Julia Breslin, 2010-07-16 Freedom House's innovative publication *Women's Rights in the Middle East and North Africa: Progress Amid Resistance* analyzes the status of women in the region, with a special focus on the gains and setbacks for women's rights since the first edition was released in 2005. The study presents a comparative evaluation of conditions for women in 17 countries and one territory: Algeria, Bahrain, Egypt, Iran, Iraq, Jordan, Kuwait, Lebanon, Libya, Morocco, Oman, Palestine (Palestinian Authority and Israeli-Occupied Territories), Qatar, Saudi Arabia, Syria, Tunisia, United Arab Emirates, and Yemen. The publication identifies the causes and consequences of gender inequality in the Middle East, and provides concrete recommendations for national and international policymakers and implementers. Freedom House is an independent nongovernmental organization that supports democratic change, monitors freedom, and advocates for democracy and human rights. The project has been embraced as a resource not only by international players like the United Nations and the World Bank, but also by regional women's rights organizations, individual activists, scholars, and governments worldwide. Women's rights in each country are assessed in five key areas: (1) Nondiscrimination and Access to Justice; (2) Autonomy, Security, and Freedom of the Person; (3) Economic Rights and Equal Opportunity; (4) Political Rights and Civic Voice; and (5) Social and Cultural Rights. The methodology is based on the Universal Declaration of Human Rights, and the study results

are presented through a set of numerical scores and analytical narrative reports.

Changing Modes Andre Kraak, 2000 This book examines the influence of an important body of international literature on the development of post-apartheid policies in higher education and training and in science and technology. The book also examines a related phenomenon, the so-called 'massification' and democratisation of higher education world-wide over the past two decades.
