A Million Pictures Sarah Dellmann, Frank Kessler, 2020-08-18 Slides for the magic or optical lantern were a major tool for knowledge transfer in the second half of the 19th and early 20th centuries. Schools, universities, the church and many public and private institutions all over the world relied on the lantern for illustrated lectures and demonstrations. This volume brings together scholarly research on the educational uses of the optical lantern in different disciplines by international specialists, representing the state of the art of magic lantern research today. In addition, it contains a lab section with contributions by archivists and curators and performers reflecting on ways to preserve, present and re-use this immensely rich cultural heritage today. Authors of this collection of essays will include Richard Crangle, Sarah Dellmann, Ine van Dooren, Claire Dupré La Tour, Jenny Durrant, Francisco Javier Frutos Esteban, Anna Katharina Graskamp, Emily Hayes, Erkki Huhtamo, Martyn Jolly, Joe Kember, Frank Kessler, Machiko Kusahara, Sabine Lenk, Vanessa Otero, Carmen López San Segundo, Ariadna Lorenzo Sunyer, Daniel Pitarch, Jordi Pons, Montse Puigdeval, Angélique Quillay, Angel Quintana Morraja, Nadezhda Stanulevich, Jennifer Tucker, Kurt Vanhoutte, Márcia Vilarigues, Joseph Wachelder, Artemis Willis, Lee Wing Ki, Irene Suk Mei Wong, and Nele Wynants.

The European Union and Interregionalism Mr Mathew Doidge, 2013-03-28 'The European Union and Interregionalism' is the most comprehensive study of interregionalism to date, providing a vigorous analysis of its role and functions in the architecture of global governance, and of the place of qualitative differences between regional actors in shaping interregional relationships. Regionalism itself is an established phenomenon, with regional politics becoming increasingly institutionalised. As a result, with the EU as forerunner, regions have begun to exert themselves in the external policy space, developing networks of relations including, prominently, interregional relations. We have thus seen the emergence of a new governance space at the interregional level, banded on one side by sites of global governance, and on the other by governance at the regional level. Important questions challenging the current literature of these interregional structures include, do interregional relationships conform to theoretical expectations?, and what patterns of engagement and interaction are emerging within the EU's core interregional partnerships, and are these replicated elsewhere? Exploring interregionalism beyond the core Europe-Asia partnerships, including the network of relations centred on ASEAN, this book should be read by all those engaged in consideration of interregional structures to understand how patterns of EU-centred interregional engagement, rather than being sui generis, are increasingly evident in the broader network of interregional relationships

Mentoring Companionship Freddy Lay, 2021-03-22 Rooted in a wide range of examples of companion mentoring in scripture, *Mentoring Companionship*, by author Freddy Lay, develops a compelling vision for how close companionship can strengthen

mentoring relationships in ways that provide mutual encouragement and support. It gives a foundation for developing a mentoring companionship framework not just for church, but also for other spheres of life. The message focuses on companion mentoring, in which paired individuals or groups support each another in their ministry roles. Primarily directed at church leaders, Mentoring Companionship encourages them away from depictions of themselves as powerful solo figures toward a more cooperative and supportive model of ministry, oriented around the greater goal of faithfulness to Christ. Throughout twelve chapters, Lay's biblically focused study highlights the importance of ensuring church leaders engage in companionship mentoring to benefit from mutual support and accountability and to counter the loneliness and isolation so many leaders in ministry often experience. Based on his many years of experience in ministry leadership in Indonesia, Lay provides a wealth of suggestions and personal experiences to underlie his analysis of the importance of companion mentoring.

E-learning and Disability in Higher Education Jane K. Seale, 2013-10-08 Most people working within the higher education sector understand the importance of making e-learning accessible to students with disabilities, yet it is not always clear exactly how this should be accomplished. E-Learning and Disability in Higher Education evaluates current accessibility practice and critiques the extent to which 'best' practices can be confidently identified and disseminated. This second edition has been fully updated and includes a focus on research that seeks to give 'voice' to disabled students in a way that provides an indispensable insight into their relationship with technologies and the institutions in which they study. Examining the social, educational, and political background behind making online learning accessible in higher and further education, E-Learning and Disability in Higher Education considers the roles and perspectives of the key stake-holders involved in e-learning: lecturers, professors, instructional designers, learning technologists, student support services, staff developers, and senior managers and administrators.

Queer Inclusion in the United Methodist Church Amanda Udis-Kessler, 2012-02-27 The United Methodist Church has been in conflict over lesbian/gay/bisexual/transgender inclusion issues since 1972. That year, in response to the gay liberation and gay rights movements, wording was added to the UMC Book of Discipline (the compilation of denominational policies and doctrines) characterizing homosexuality as incompatible with Christian teaching. Since then, United Methodist ministers have been forbidden to perform same-sex commitment ceremonies (and United Methodist churches forbidden to host them), a rule has been passed that non-heterosexual United Methodist ministers must be celibate, and the UMC has forbidden the funding of any program or organization supporting homosexuality. These policies have been met with significant resistance by those fighting for GLBT inclusion. In this groundbreaking book, Udis-Kessler examines this struggle, analyzing both sides of this divisive debate among one of the most prominent religious organizations in the United States.

How Ethical Systems Change: Abortion and Neonatal Care Sheldon Ekland-Olson, Elyshia Aseltine, 2012-04-23 Roe v. Wade came like a bolt from the blue, but support had been building for years. For many, the idea that life in the womb was not fully protected under the Constitution was simply not acceptable. Political campaigns were organized and protests launched, including the bombing of clinics and the killing of abortion providers. Questions about the protection and support of life continued after birth. This book is based on a hugely popular undergraduate course taught at the University of Texas, and is ideal for those interested in the social construction of social worth, social problems, and social movements. The Leader's Way HRH the Dalai Lama, Laurens Muyzenberg, 2011-03-04 A timely and powerful book focusing on the importance of combining an economic system with moral values. Born out of a decade of discussion and collaboration between an international management consultant and the head of state and spiritual leader of Tibet, The Leader's Way is an inspiring manifesto for leading change which can have an impact at every level. To deal with the world's economic and environmental problems requires a different kind of leadership which see things as they really are and understands the interconnectedness between companies and countries and the world as a whole. The Leader's Way contains not only fascinating anecdotes from His Holiness the Dalai Lama, including his meetings with Mao, but also a timely and powerful focus on the importance of combining an economic system with moral values. As a study of Buddhism and its relevance to globalisation, it has a lot to say. It applies the concepts of Buddhism to business: decision-making using concepts such as 'the Right Way', interdependence and impermanence. To simplify, it's a Hippocratic, do-no-harm creed: companies should have integrity, leaders mindfulness, to act for the greatest good. Many readers will value it. There's much to learn. - Director Examines capitalism and Buddhism in a fascinating way; and adds a valuable dimension to the values and ethical standards that form the basis for responsible leadership in business. -- Professor C.O. Herkströter, former CEO of Shell and Chairman of the Board of ING

Judicial Independence in China Randall Peerenboom, 2009-11-23 This volume challenges the conventional wisdom about judicial independence in China and its relationship to economic growth, rule of law, human rights protection, and democracy. The volume adopts an interdisciplinary approach that places China's judicial reforms and the struggle to enhance the professionalism, authority, and independence of the judiciary within a broader comparative and developmental framework. Contributors debate the

merits of international best practices and their applicability to China; provide new theoretical perspectives and empirical studies; and discuss civil, criminal, and administrative cases in urban and rural courts. This volume contributes to several fields, including law and development and the promotion of rule of law and good governance, globalization studies, neo-institutionalism and studies of the judiciary, the emerging literature on judicial reforms in authoritarian regimes, Asian legal studies, and comparative law more generally.

The Urban Refugee Bülent Batuman, Kıvanç Kılınç, 2023-11-24 The presence of the refugee in the contemporary metropolis is marked by precarity, a quality that has become a characteristic feature of the neoliberal urban milieu. Bringing together essays from diverse disciplines, from architectural history to cultural anthropology and urban planning, this collection sheds light on both the specificities of the contemporary urban condition that affects the refugees and the multi-dimensional impact that the refugees have on the city. The authors propose investigating this connection through three interlinked themes: identity (informality, imagination and belonging); place (transnational homemaking practices); and site (the navigation of urban space). In recent years, there has been a significant growth in scholarship on forced migration, particularly on the relationship between displacement and the built environment. Scholars have focused on spatial practices and forms that arise under conditions of displacement, with much attention given to refugee camps and the social and political aspects of temporariness. While these issues are important, the essays in this volume aim to contribute to a less explored aspect of displacement, namely the interaction between refugees and the cities they inhabit. In this respect, the volume underlines the specificity of the urban refugee as well as their spatial agency and investigates the irreversible effect they have on the contemporary urban condition. The authors argue that viewing urban refugees solely as dislocated individuals outside the camp-like spaces of containment fails to understand the agency of the urban refugee and the blurred boundaries of identity that result. The term refugee crisis objectifies and denies active agency to refugees, homogenizing dislocated individuals and groups. The neoliberalization of the past four decades has led to the precarization of labour and the displacement of refugees, who frequently blend into the urban environment as hidden populations. Refugees are subjected to constant surveillance and the state's attempts to control them. However, these attempts are not uncontested, and the involvement of activist interventions further politicizes the urban refugee.

Democratic Delusions Richard J. Ellis, 2002 It is becoming common in many states: the opportunity to reclaim government from politicians by simply signing a petition to put an initiative on the ballot and then voting for it. Isn't this what America ought to be about? Proposition 13 in California's 1978 election paved the way; the past decade saw more than 450 such actions; now in many states direct legislation dominates the political agenda and defines political—and public-opinion. While this may appear to be democracy in action, Richard Ellis warns us that the initiative process may be putting democracy at risk. In *Democratic Delusions* he offers a critical analysis of the statewide initiative process in the United States, challenging readers to look beyond populist rhetoric and face political reality. Through engaging prose and illuminating (and often amusing) anecdotes, Ellis shows readers the dark side of direct democracy—specifically the undemocratic consequences that result from relying too heavily on the initiative process. He provides historic context to the development of initiatives—from their Populist and Progress roots to their accelerated use in recent decades—and shows the differences between initiative processes in the states that use them. Most important, while acknowledging the positive contribution of initiatives, Ellis shows that there are reasons to use them carefully and sparingly: ill-considered initiatives can subvert normal legislative checks and balances, undermine the deliberative process, and even threaten the rights of minority groups through state-sanctioned measures. Today's initiative process, Ellis warns, is dominated not by ordinary citizens but by politicians, perennial activists, wealthy interests, and well-oiled machines. Deliberately misleading language on the ballot confuses voters and influences election results. And because many initiatives are challenged in the courts, these ostensibly democratic procedures have now put legislation in the hands of the judiciary. Throughout his book he cites examples drawn from states in which initiatives are used intensively—Oregon, California, Colorado, Washington, and Arizona—as well as others in which their use has increased in recent years. Undoing mistakes enacted by initiative can be more difficult than correcting errors of legislatures. As voters prepare to consider the host of initiatives that will be offered in the 2002 elections, this book can help put those efforts in a clearer light. *Democratic Delusions* urges moderation, attempting to teach citizens to be at least as skeptical of the initiative process as they are of the legislative process—and to appreciate the enduring value of the representative institutions they seek to circumvent.
