### **The Nurse Educator's Guide to Assessing Learning Outcomes**

Mary McDonald, 2014 The Nurse Educator's Guide to Assessing Learning Outcomes, Third Edition is a widely-used resource for both faculty and nursing education students that covers the assessment of critical thinking, the development of learning objectives, and the creation of tests, including detailed tips for writing many kinds of individual test items. The book also covers the analysis of test reliability. Examples of effective and ineffective test items are included throughout to help faculty and nurse educators deepen their understanding of how to create effective tests and assess student learning. This new edition addresses the increased pressure that NCLEX and other certification exams are placing on nursing students and faculty, and reflects the most recent updates to the NCLEX Detailed Test Plan. Each chapter has been updated with timely information and examples.

**Reconciliation after War** Rachel Kerr, Henry Redwood, James Gow, 2021-01-06 This edited volume examines a range of historical and contemporary episodes of reconciliation and anti-reconciliation in the aftermath of war. Reconciliation is a concept that resists easy definition. At the same time, it is almost invariably invoked as

a goal of post-conflict reconstruction, peacebuilding and transitional justice. This book examines the considerable ambiguity and controversy surrounding the term and, crucially, asks what has reconciliation entailed historically? What can we learn from past episodes of reconciliation and anti-reconciliation? Taken together, the chapters in this volume adopt an interdisciplinary approach, focused on the question of how reconciliation has been enacted, performed and understood in particular historical episodes, and how that might contribute to our understanding of the concept and its practice. Rather than seek a universal definition, the book focuses on what makes each case of reconciliation unique, and highlights the specificity of reconciliation in individual contexts. This book will be of much interest to students of transitional justice, conflict resolution, human rights, history and International Relations.

Rescue Justin Camp, 2021-11-02 This generation is struggling—mostly alone. Fear and pain are everywhere. And yet most of us, especially men, forget or forgot what's available and intended to help us survive and even thrive in these evil days: authentic Christian community. In *Rescue*, Justin Camp reminds guys that God put his Spirit into their hearts so they would come

out of isolation to support and sacrifice for one another. This third book in the life-changing WiRE series explores: Why the myth persists that “real” men don’t need each other How vulnerability is the only path to becoming hearty, rugged, good men Practical wisdom for starting worthwhile spiritual communities Scattered, men are assailable. United with brothers and God, though, they’re protected—ready for anything this world might threaten.

A Man's Guide to a Nursing Career Chad O'Lynn, RN, PhD, 2012-10-23 Named a 2013 PROSE Award Honorable Mention in Nursing and Allied Health Sciences Winner of the Dr. Gene Tranbarger Writing Award from the American Assembly for Men in Nursing Though O'Lynn emphasizes a male perspective on becoming a nurse, this book should be required reading for anyone thinking about entering the nursing profession....The section on nursing education from the perspective of both students and instructors is worth the price of the book....Highly recommended.--Choice: Current Reviews for Academic Libraries “I love this book. It has inspired and motivated me to continue to do something for men in nursing at the college where I teach as well as for men in our delivery rooms and postpartum units. *Rise of Islamic Political Movements and Parties* Esen

Kirdis,2019-05-09 Although regarded as a single community of Islamists, Islamic political movements utilise vastly different means to pursue their goals. This book examines why some Islamic movements facing the same socio-political structures pursue different political paths, while their counterparts in diverse contexts make similar political choices. Based on qualitative fieldwork involving personal interviews with Islamic politicians, journalists, and ideologues - conducted both before and after the Arab Spring - author Esen KirdiAY draws close comparisons between six Islamic movements in Jordan, Morocco and Turkey. She analyses how some Islamic movements decide to form a political party to run in elections, while their counterparts in the same country reject doing so and instead engage in political activism as a social movement through informal channels. More broadly, the study demonstrates the role of internal factors, ideological priorities and organisational needs in explaining differentiation within Islamic political movements, and discusses its effects on democratisation.

### *Political Change in the Middle East and North Africa*

Inmaculada Szmolka, 2017-06-29 Taking a comparative approach, this book considers the ways in which political regimes have changed since the Arab Spring. It addresses a series of questions about political change in the context of the revolutions, upheavals and protests that have taken place in North Africa and the Arab Middle East since December 2010, and looks at the various processes have been underway in the region: democratisation (Tunisia), failed democratic transitions (Egypt, Libya and Yemen), political liberalisation (Morocco) and increased authoritarianism (Bahrain, Kuwait, Syria). In other countries, in contrast to these changes, the authoritarian regimes remain intact (Saudi Arabia, Qatar, Arab United Emirates).

**Regional Trade Agreements** David A. Gantz, 2009 The proliferation of regional trade agreements (RTAs) is one of the most economically significant, politically important and, for some, troubling developments within the world trading system since the WTO Agreements entered into force in 1995. The WTO Secretariat has predicted that by 2010 nearly 400 such preferential trade agreements could be in force, with many WTO Member States being party to multiple RTAs. This movement toward increased regionalism may accelerate if the Doha Development Round of WTO negotiations remains stalemated, but will likely continue regardless of whether Doha is ultimately concluded. This volume is designed to introduce the reader to the world of RTAs, for general understanding of the place of RTAs in the global trading system, appreciation of the context and legal content of particular RTAs, and as a basis for further study and analysis. (An extensive bibliography and list of Internet links are included.) Part I discusses the economic, policy and developmental issues arising from regionalism, and then considers the WTO legal regime as it affects and is affected by RTAs. The focus there is on free trade

agreements (FTAs) and customs unions (CUs) regulated by Article XXIV of GATT 1994 or Article V of the General Agreement on Trade in Services, and on efforts within the WTO regime to minimize the negative effects of such departures from the core GATT/WTO principle of non-discrimination (most-favored nation treatment). Part II discusses the multiple FTAs concluded by the United States with various trading partners since 1985, beginning with an analysis of the political, legal and policy considerations that affect the United States' ability to conclude international trade agreements. Extensive coverage is given to the North American Free Trade Agreement (NAFTA) and to the Central American -- Dominican Republic -- United States FTA (CAFTA-DR). NAFTA is important because it represents by far the largest trade volume generated under any U.S. FTA, and because it has become the model for most subsequent U.S. FTAs, as well as many concluded by other nations. CAFTA-DR embodies legal changes reflecting ten years' experience under NAFTA. It also exemplifies the increasing use of FTAs by the United States as a mechanism for encouraging economic development, democratic institutions and the rule of law. Analysis at varying levels of detail is provided for all other U.S. FTAs, including those with Colombia, Panama and Korea, for

which Congressional approval is pending, and for the unique bilateral trade agreement with Vietnam. Part III analyzes five other important RTAs: The European Union (EU), Central American Common Market, MERCOSUR, South African Customs Union, and ASEAN FTA. These diverse accords each play an important role in the intra-regional political and economic relations of the parties, and exemplify a broad range of ambitious approaches to expanding intra-regional trade and commerce on four continents. The EU is likely the most successful RTA in history, and serves as a model for other CUs, including those discussed in Part III. Like globalization, the RTA phenomenon is here to stay. WTO member government officials, international practitioners and law students aspiring to careers in international trade law must learn to deal effectively with the challenges and opportunities presented by such agreements. *Regional Trade Agreements: Law, Policy and Practice* makes a useful contribution to existing literature and will be particularly helpful to governmental officials, academics, practitioners, and postgraduate students wishing to learn more about the how and what of RTAs. Readers searching for information about a particular agreement can gain knowledge and understanding by reading a single chapter dealing with a particular

agreement, but reading the entire book will allow the reader to more fully benefit from both the insight and experience of the author as well as to fully understand the interplay between politics, economics, and law in the RTA negotiating and implementation process. -- World Trade Review By presenting a comprehensive introduction both to RTAs in general, and by providing comprehensive introductions to many RTAs that are in force throughout the world today, Professor Gantz has written a text that should be used by both practitioners and students who wish to gain an understanding of RTAs and their relationship with international trade and foreign relations. -- Trade, Law and Development Gantz expertly weaves economic and political considerations into his legal analysis.... Regional Trade Agreements: Law, Policy and Practice makes a useful contribution to existing literature and will be particularly helpful to governmental officials, academics, practitioners, and postgraduate students wishing to learn more about the how and what of RTAs. -- The Journal of World Trade Review

### **100 Questions about Women and Politics Manon**

Tremblay, 2018-09-30 Both yesterday's suffragists and today's feminists have battled for women to vote and hold office, and their successes have made it possible for countries such as Argentina, Brazil, Germany, Iceland, Liberia, and the United Kingdom to have female heads of state. Despite these notable advances, women are still largely underrepresented in parliaments and governments around the world. Why, after so many years of feminist struggle, are women still obstructed from full political citizenship by a glass ceiling? Manon Tremblay's 100 Questions about Women and Politics discusses electoral politics in Canada and abroad, focusing on women's rights to vote and run for office in legislative elections, political parties, voting systems, electoral quotas for women, and participation in parliaments and governments. Against a background of observations taken from academic research, Tremblay uses an innovative approach by dividing her book into 100 questions and answers to address a range of important issues. Are electorates sexist or lesbophobic? Are family responsibilities a real obstacle to women's engagement in politics? What strategies are available to increase the number of female politicians? Are

gender quotas democratic? Once elected to office, do women represent women? How does women's political citizenship in Canada compare to that in other countries? A timely book on the unfinished work of representative democracy, 100 Questions about Women and Politics takes a comprehensive yet concise approach to demystifying the major issues dominating the study of gender and government.

### **Presidentialism in Turkey Serap Gur,2016-12-08**

Parliamentarism has been a presiding characteristic of the Turkish political tradition since the 1876 Ottoman constitution. In 1923, with the founding of the Turkish Republic, modern parliamentarism was implemented in Turkey. Since that time, Turkish politics has been turbulent, with four military coups, a number of short-lived multiparty coalitions, and several ineffective governments. Many scholars have argued that the main reason for this instability is the parliamentary system of government, so Turkey must therefore adopt a presidential system. Presidentialism in Turkey uses both quantitative analysis and country-based comparisons to explore whether such a change might solve Turkey's main political problems or if it might in fact create more problems for the nation. The relationship between government systems and political, economic, and social development is explored in a time-series analysis covering the period 1975–2014 for Turkey. It is argued that during this time period, the parliamentary system was better than the presidential system at boosting economic and political development, whereas the presidential system provides better

social development. Furthermore, a country-based analysis in which Turkey is compared with other states that have used a presidential system at some point since 1975 highlights that each country has its own specific characteristics that affect its economic and political success. Thus, a regime transformation to a presidential system will not necessarily improve Turkey's economic, political, and social development. By including a comparison of all presidential, parliamentary, and semi-presidential systems, this book helps to shed new light on what is a very controversial topic in Turkey. It will therefore be a key resource for students and scholars of Turkish studies and comparative politics.
