Ripe Roy Jacobstein,2002 Nothing in Roy Jacobstein's large experience--a union barbershop in mid-century Detroit, the obstetrics ward in a Cambodian refugee camp, the 'befuddlement' of childhood, the wisdom of the nursing child, the lab, the boardroom, the luminous common heritage of the printed page--nothing appears to have been lost on him or, thanks to him, on us. In a world beset with loss, this exhilarating, mindful, compassionate book allows us the dream of wholeness. It is tonic for the soul. It is (of how many books can this be said?) from poem to poem and vista to vista, good company.--Linda Gregerson

**Catechism of the Catholic Church** U.S. Catholic Church,2003-03-04 Over 3 million copies sold! Essential reading for Catholics of all walks of life. Here it is - the first new Catechism of the Catholic Church in more than 400 years, a complete summary of what Catholics around the world commonly believe. The Catechism draws on the Bible, the Mass, the Sacraments, Church tradition and teaching, and the lives of saints. It comes with a complete index, footnotes and cross-references for a fuller understanding of every subject. The word catechism means instruction - this book will serve as the standard for all future catechisms. Using the tradition of explaining what the Church believes (the Creed), what she celebrates (the Sacraments), what she lives (the Commandments), and what she prays (the Lord's Prayer), the Catechism of the Catholic Church offers challenges for believers and answers for all those interested in learning about the mystery of the Catholic faith. The Catechism of the Catholic Church is a positive, coherent and contemporary map for our spiritual journey toward transformation.

**Retiree Health Plans in the Public Sector** Robert L. Clark,Melinda Sandler Morrill,2010-01-01 While retiree health plans are a dying benefit in the private sector, all US states and many local governments extend health insurance coverage to their retired employees. This book is the first to thoroughly examine public sector health insurance plans. Retiree Health Plans in the Public Sector provides a detailed description of the current plans offered and compares how they vary across states. Health insurance is an important component of compensation in the public sector as it helps governments attract and retain quality workers and encourages timely retirement for career employees. Rapidly rising medical costs, an aging labor force, and an increasing number of retirees have dramatically increased the cost of providing this benefit. A central theme of this analysis is a presentation of the actuarial accrued liabilities, the unfunded liabilities and the annual required contribution of the employers based on the actuarial statements for retiree health plans. The authors also investigate why some states face major funding problems while the costs of other states' plans are much more manageable. Extensively researched and well-suited for classroom and professional use alike, academics in the fields of economics and public policy will find this an unmatched resource. So too will policymakers, economists, legislators, public sector union leaders and those invested in public sector healthcare.

**Transnational Crime and Human Rights** Susan Kneebone,Julie Debeljak,2012-08-06 Transnational Crime and Human Rights offers an evaluation of the responses to the transnational crime of human trafficking and governance of the issue through a case study of the Greater Mekong Subregion (GMS), which comprises Cambodia, the People's Republic of China, Lao People's Democratic Republic, Myanmar, Thailand, and Viet Nam. The book analyses the international and national legal policy frameworks and the role of governments, international and national non-governmental institutions, and regional processes in responding to trafficking issues in the GMS. The book is based on the findings of a three year study conducted in the region, involving interviews with more than 60 individuals from relevant organizations and agencies, and examines the social, political and historical factors, including gender and age, labour exploitation and migration which form the background to human trafficking in the GMS. The authors consider issues of competing mandates, and gaps in strategies for protection and conclude with a discussion of broader lessons to be learned from the GMS situation and suggestions for future governance strategies in the fight against trafficking.

Queer Thriving in Catholic Education Sean Whittle,

*Closing or Widening the Gap?* Andrea Ribeiro Hoffmann,Anna van der Vleuten,2016-05-23 Combining normative analysis and theory-driven empirical research in a comparative framework, this volume clarifies and explains the connections between regional international governance, legitimacy and democracy. It focuses on the quality of democracy and the legitimacy of policy making in multilevel regional systems. The volume offers a much-needed clarification of confusing concepts such as legitimacy, democracy and 'civil society' in non-national political systems. It critically assesses the quality of democracy and legitimacy within different Regional International Organizations (RIOs); it examines how networks of non-state actors become a kind of transnational civil society and assesses their potential for solving legitimacy deficits; and it investigates the impact of democratic conditionality in different RIOs. The contributors deepen our understanding of a relatively new non-state actor on the international scene - the regional international organization - and investigate the potential contribution of transnational non-state actors to the quality of governance at the regional level.

**Serving Those Who Served** Sarah LeMire,Kristen J. Mulvihill,2017-02-06 Practical advice on how best to serve veterans, service members, and their families in your community, including effective ways to develop new outreach partnerships and collaborations. Whether you work in a public library, an academic library, a school library, or any other type of library, you are likely to encounter members of the veteran and military communities. This book is a starting point to help librarians, library administrators, and all library employees understand how veterans, service members, and their families can be different from other patrons, recognize important elements of military and veteran culture, and identify strategies for effectively serving the veteran and military communities. In this book, you find tips to help you determine the size and the needs of the veteran and military communities in your local area. You'll learn about some common information requests and information-seeking behavior of veterans and service members. You'll discover how to take the needs and also the unique strengths of the veteran and military communities into account when developing library outreach efforts, programs, services, and collections. And you'll gain insights to help you harness the knowledge, strengths, and experiences of the veteran and military communities in order to help them fulfill their potential as an asset to the library and to the community.

*Acts of Contortion* Anna Meek,2002 In poems that are by turns witty, lush, and unflinching, *Acts of Contortion* explores the gestures of both hurtfulness and compassion. Whether set in a shelter for battered women, in the midst of a political demonstration, or at the center of an orchestra, the poems pursue the place of language in an injurious world. The political conscience at work is feminist, pacifist, and at odds with itself. Anna George Meek finds that the brutal and the compassionate are sometimes indistinguishable, born of our need to make contact outside of ourselves. These gestures--of music, of touch, of poetry--appear in the poems as the violin, domestic abuse, and words to comfort a woman in pain. The poems argue: difficult yet imperative, the attempt to gesture beyond ourselves is an act of contortion.

**The International Arms Trade** Rachel Stohl,Suzette Grillot,2009-11-09 The multi-billion dollar business of the international conventional arms trade involves virtually every country in the world. Around the globe, people's lives are being irrevocably changed by the effects of guns, tanks, and missiles. These weapons have the potential to cause a deadly and current threat - one responsible for hundreds of thousands of deaths a year. This succinct and accessible new book explores the complexities and realities of the global conventional weapons trade. The first book on the subject in nearly a decade, *The International Arms Trade* provides an engaging introduction to the trade, the effects, and the consequences of these weapons. The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War. In particular, they assess the role of the largest arms exporters and importers, the business of selling conventional arms around the world, and shed new light on the illicit arms trade and the

shadowy dealers who profit from their deadly commerce. The book also looks closely at the devastating effect the business can have on countries, societies, and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities. The International Arms Trade will be invaluable for students and scholars of international relations and security studies, and for policymakers and anyone interested in understanding more about the conventional arms trade.

**Terrorists in Our Midst** Yonah Alexander,2010-04-09 This unique work analyzes for the first time how foreign-affinity terrorism works in a major democratic nation like the United States, and what this country must do to survive the terror challenge, on both conventional and unconventional levels. To date, no definitive study has dealt specifically with the role of American citizens in supporting a foreign political, ideological, and religious illegal agenda. Terrorists in Our Midst: Combating Foreign-Affinity Terrorism in America remedies that as six expert authors discuss the threats of Americans to security interests in the United States and elsewhere, exploring what can and should be done to reduce a risk that may threaten the very survival of the free world. Terrorists in Our Midst focuses not only on foreign nationals operating in the United States, but also on American citizens participating in terror networks at home and abroad. The book presents an overview of both conventional and unconventional terrorism, surveys the terrorist threat in the United States by state and nonstate actors, and analyzes the foreign-affinity links of American operatives in this country and abroad. Most important for the safety and security of the United States, it offers an assessment of what policies worked and what did not work, specifying a best practices agenda of recommendations that should be adopted by the United States and the international community.

**Sparse Distributed Memory** Pentti Kanerva,1988 Motivated by the remarkable fluidity of memory the way in which items are pulled spontaneously and effortlessly from our memory by vague similarities to what is currently occupying our attention Sparse Distributed Memory presents a mathematically elegant theory of human long term memory.The book, which is self contained, begins with background material from mathematics, computers, and neurophysiology; this is followed by a step by step development of the memory model. The concluding chapter describes an autonomous system that builds from experience an internal model of the world and bases its operation on that internal model. Close attention is paid to the engineering of the memory, including comparisons to ordinary computer memories.Sparse Distributed Memory provides an overall perspective on neural systems. The model it describes can aid in understanding human memory and learning, and a system based on it sheds light on outstanding problems in philosophy and artificial intelligence. Applications of the memory are expected to be found in the creation of adaptive systems for signal processing, speech, vision, motor control, and (in general) robots. Perhaps the most exciting aspect of the memory, in its implications for research in neural networks, is that its realization with neuronlike components resembles the cortex of the cerebellum.Pentti Kanerva is a scientist at the Research Institute for Advanced Computer Science at the NASA Ames Research Center and a visiting scholar at the Stanford Center for the Study of Language and Information. A Bradford Book.

**Software-Defined Radio for Engineers** Alexander M. Wyglinski,Robin Getz,Travis Collins,Di Pu,2018-04-30 Based on the popular Artech House classic, Digital Communication Systems Engineering with Software-Defined Radio, this book provides a practical approach to quickly learning the software-defined radio (SDR) concepts needed for work in the field. This up-to-date volume guides readers on how to quickly prototype wireless designs using SDR for real-world testing and experimentation. This book explores advanced wireless communication techniques such as OFDM, LTE, WLA, and hardware targeting. Readers will gain an understanding of the core concepts behind wireless hardware, such as the radio frequency front-end, analog-to-digital and digital-to-analog converters, as well as various processing technologies. Moreover, this volume includes chapters on timing estimation, matched filtering, frame synchronization message decoding, and source coding. The orthogonal frequency division multiplexing is explained and details about HDL code generation and deployment are provided. The book concludes with coverage of the WLAN toolbox with OFDM beacon reception and the LTE toolbox with downlink reception. Multiple case studies are provided throughout the book. Both MATLAB and Simulink source code are included to assist readers with their projects in the field.
