**Social Innovation for Business Success** Julia Schmitt, 2014-03-18 Shared value not only offers a new concept to face the current business environmental dynamics but it also responds to macro-economic challenges. The creation of more value than mere profits can lead to a sustainable competitive advantage. Thus, it offers huge economic potential and presents a

new challenge to corporate optimisation endeavours. Julia Schmitt draws on current sustainability and innovation research approaches in order to provide a deeper understanding of the shared value concept as a differentiation strategy for small and medium sized enterprises. Her empirical study on the German fair trade and organic fashion industry provides insights into possible configurations of a shared value business strategy. The awareness of these findings is essential to make a shared value strategy lead to business success.

Contemporary Ukraine on the Cultural Map of Europe Larissa M. L. Zaleska Onyshkevych, Maria G. Rewakowicz, 2014-12-18 The concept of a 'return to Europe' has been integral to the movement for Ukrainian national rebirth since the nineteenth century. While the goal of a more fully reformed politics remains elusive, numerous expressions of Ukrainian culture continue to develop in the European spirit. This wide-ranging book explores Ukraine's European cultural connection, especially as it has been reestablished since the country achieved independence in 1991. The contributors discuss many aspects of Ukraine's contemporary culture - history, politics, and religion in Part I; literary culture in Part II; and language, popular culture, and the arts in Part III. What emerges is a fascinating picture of a young country grappling with its divided past and its colonial heritage, yet asserting its voice and preferences amid the diverse and at times conflicting realities of the contemporary political scene. Europe becomes a powerful

point of reference, a measure against which the situation in post-independence Ukraine is gauged and debated. This framework allows for a better understanding of the complexities deeply ingrained in the social fabric of Ukrainian society.

Taxation and Tax Policy Issues Brian L. Yoshov, 2007 In 2005, Americans paid about \$2.1 trillion in combined federal taxes, including income, payroll, and excise taxes, or about 16.8 percent of the Gross Domestic Product (GDP). These taxes fund the services provided by government. As taxpayers, we balance the costs of taxes with the benefits of government. The goal of tax policy is to design a tax system that produces the desired amount of revenue and balances the minimisation of compliance and efficiency costs with other objectives, such as equity, transparency, and administrability. This book examines the detail which is where vested interests do their damage.

**Education and the Risk Society** Steven Bialostok, Robert Whitman, William Bradley, 2012-12-23 Sociological and anthropological literature has examined how contemporary western society has become a "risk society." Education and the Risk Society is the first volume to explore this seminal concept through the lens of education. Drawing on a theoretical literature that has great potential as a lens to view changes in neoliberal discourses of global capitalism from both critical and generative perspectives, Education and the Risk Society presents situated, empirical studies investigating an uncertain world as people practice it on the ground, through language and activity,

within educational settings.

**Transnational Companies and Security Governance** Jana Hönke, 2013-08-21 This book investigates governance practiced by non-state actors. It analyses how multinational mining companies protect their sites in fragile contexts and what that tells us about political ordering 'beyond' the state. Based on extensive primary research in the Democratic Republic of Congo, South Africa, Europe and North America, the book compares companies' political role in the 19th and 21st centuries. It demonstrates that despite a number of disturbing parallels, many contemporary practices are not a reversion to the past but unique to the present. The book discloses hybrid security practices with highly ambiguous effects around the sites of contemporary companies that have committed to norms of corporate social and security responsibility. Companies invest in local communities, and offer human rights training to security forces alongside coercive techniques of fortress protection, and stability-oriented clientele practice and arrangements of indirect rule. The book traces this hybridity back to contradictory collective meaning systems that cross borders and structure the perceptions and choices of company managers, private security officers, NGO collaborators and others practitioners. The book argues that hybrid security practices are not the result of an encounter between a supposed 'local' with the liberal 'global'. Instead, this hybridity

is inherent in the transnational and part and parcel of liberal transnational governance. Therefore, more critical reflection of global governance in practice is required. These issues are sharply pertinent to liberal peacebuilding as well as global governance more broadly. The book will be of interest to anyone interested in business, politics and human rights; critical security studies; peacebuilding and statebuilding; African politics; and ethnographic and sociological approaches to global governance and international relations more generally.

**Geo Year Book** ,2005 This is the second in the series of annual reports linked to the UNEP Global Environment Outlook (GEO) which seeks to bridge the gap between science and policy by reviewing major global and regional environmental issues and policy developments during the year 2004. It also considers emerging issues from scientific research, focusing on the role of good environmental management in minimising the emergence of infectious diseases, and the impact of changes in ocean salinity. It then goes on to present the most recent available data on changes in the global environment, including new indicators on air quality, marine protected areas and ozone protection. The report also includes a feature focusing on the cross-cutting issues of gender, poverty and the environment; as well giving an overview of the Indian Ocean tsunami and its initial impact.

**Cobra Pilote** Robert D. Walker,2017-03 This book primarily takes a close look at the Hugus-Shelby Cobra connection. In the early 1960s James Edward (Ed) Hugus personally financed the first seven production Cobras built since Carroll Shelby did not have the money or facilities for the project. Hugus ordered the first modified but unfinished Aces the A.C. Cars factory in England, and had his service department mechanics at European Cars in Pittsburgh, Pennsylvania install the Ford 260 engines and Galaxie transmissions, completing the cars for sale. Once Ford signed a contract for Shelby American Cobra production in Venice, California, Hugus still completed Cobras for distribution and sales to all points east of the Mississippi River. -- In his capacity as a driver, Hugus piloted the first racing Cobra (CSX 2001) in competition, and in 1963, the first Cobra (CSX 2142) to appear at Le Mans. -- Carroll Shelby may have had the Cobra dream but it was Hugus who stepped forward and made Shelby's venture a reality.
