Computer Architecture Joseph D. Dumas II, 2018-10-03 Future computing professionals must become familiar with historical computer architectures because many of the same or similar techniques are still being used and may persist well into the future. *Computer Architecture: Fundamentals and Principles of Computer Design* discusses the fundamental principles of computer design and performance enhancement that have proven effective and demonstrates how current trends in architecture and implementation rely on these principles while expanding upon them or applying them in new ways. Rather than focusing on a particular type of machine, this textbook explains concepts and techniques via examples drawn from various architectures and implementations. When necessary, the author creates simplified examples that clearly explain architectural and implementation features used across many computing platforms. Following an introduction that discusses the difference between architecture and implementation and how they relate, the next four chapters cover the architecture of traditional, single-processor systems that are still, after 60 years, the most widely used computing machines. The final two chapters explore approaches to adopt when single-processor systems do not reach desired levels of performance or are not suited for intended applications. Topics include parallel systems, major classifications of architectures, and characteristics of unconventional systems of the past, present, and future. This textbook provides students with a thorough grounding in what constitutes high performance and how to measure it, as well as a full familiarity in the fundamentals needed to make systems perform better. This knowledge enables them to understand and evaluate the many new systems they will encounter throughout their professional

careers.

E-Learning and Disability in Higher Education Jane

Seale, 2006-08-21 Most practitioners know that they should make e-learning accessible to students with disabilities, yet it is not always clear exactly how this should be done. *E-Learning and Disability in Higher Education* evaluates current practice and provision and explores the tools, methods and approaches available for improving accessible practice. Examining the social, educational and political background behind making e-learning accessible in higher and further education, this book considers the role of and provides advice for, the key stake-holders involved in e-learning provision: lec.

Towards the Learning Grid Pierluigi Ritrovato, 2005 Annotation

Towards the Learning Grid Advances in Human Learning Services Volume 127 Frontiers in Artificial Intelligence and Applications Edited by: P. Ritrovato, C. Allison, S.A. Cerri, T. Dimitrakos, M. Gaeta and S. Salerno November 2005, approx. 248 pp., hardcover There is a paradigm shift in informatics in general and in technologies enhancing human learning in particular. The debate between the evolutionaries those that wish to optimize and refine current approaches and the revolutionaries those that support a fundamental change of approach is quite actual. Within the Internet communities, the debate is hidden behind the words semantic WEB versus semantic Grid ; within educational technologists between content/resource centered and conversation centered e-learning, or either between teaching and pedagogy on the one side, and learning and communities of practice on the other. In general, in informatics, the shift from a product-page

oriented to a service-conversation oriented view may possibly impact most if not all the foreseen applications, in e-learning, but also in e-science, e-democracy, e-commerce, e-health, etc. Part A of the book is dedicated to Position papers: visions about what to do and why to do it in the next years. The remaining parts (B to D) offer partial answers to how to do it. Part B concerns what we called: Content-centered services, i.e.: a vision of learning systems that privileges knowledge and its structures, standards and their interoperability, storage and retrieval services. The subsequent part C has been called: Holistic services to refer to more mature and integrated solutions that address not only content but more generally the creation and management of human Virtual Communities connected on the Grid in order to offer and consume different services facilitating and enhancing human learning. Finally part D is concerned with new directions in learning services.

Approaches to Developing Accessible Learning Experiences Jane Seale, 2013-10-18 For the past five to ten years researchers have been developing tools and guidelines for developing accessible e-learning experiences for students with disabilities. Despite this, very few practitioners in higher education are confident that they know how to develop accessible e-learning experiences. This is prompting researchers to work with practitioners in order to develop meaningful approaches to addressing accessibility; ones that facilitate the development of a clear conceptualisation of why and how practice can be changed to meet the varied needs of students. This book describes these approaches and explores the extent to which they might challenge current thinking and understanding. Topics covered include: approaches to developing accessible multimedia and learning objects holistic approaches to developing accessible e-learning and

blended learning experiences institutional and programme approaches to addressing accessibility issues. Exploration and discussion of these topics will challenge practitioners to reconceptualise their understanding of 'best practice' in relation to accessibility and e-learning and offer directions for future practice and development. This book was previously published as a special issue of Alt-J.

Voting and Elections the World Over Rita J. Simon, Vassia Gueorguieva, 2008-10-23 Voting and Elections the World Over examines the electoral process across twenty-two countries. The book is a quick reference source for information about the major issues to consider when analyzing elections and their administration across nations. Thus, Voting and Elections the World Over looks at not only the type of electoral system in these countries, but also describes who administers elections; which are the offices people can vote for; who is allowed to vote with a particular emphasis on women's voting rights as well as the voting rights of felons. Furthermore, it provides information on the voting process and whether it is compulsory, the major political and financial regulations in the twenty-two countries pertaining to the conduct of elections, and information about voter turnout for national elections over at least the past ten years. The book provides useful reference information about the year when elections were first held in the countries we look at and information on when women received suffrage across these nations.

Fuzzy Logic for Embedded Systems Applications Ahmad Ibrahim, 2004 Extensive coverage of both the theory and application of fuzzy logic design.

Racism and Education in the U.K. and the U.S. Mike Cole, 2011-06-06 Extends Marxist analysis to include key concepts from the work of neo-Marxists Antonio Gramsci and Louis Althusser. It

looks in detail at racism in the U.K. and the U.S. and goes on to examine the differences between schooling and education, and their relationship to racism in those two countries and in the Bolivarian Republic of Venezuela.

Languages and the Military H. Footitt, M. Kelly, 2012-07-30

Through detailed case studies ranging from the 18th century until today, this book explores the role of foreign languages in military alliances, in occupation and in peace building. It brings together academic researchers and practitioners from the museum and interpreting worlds and the military.

Biodesign Stefanos Zenios, Josh Makower, Paul Yock, Todd J.

Brinton, Uday N. Kumar, Lyn Denend, Thomas M.

Krummel, 2009-09-25 Recognize market opportunities, master the design process, and develop business acumen with this 'how-to' guide to medical technology innovation. A three-step, proven approach to the biodesign innovation process - identify, invent, implement - provides a practical formula for innovation. The experiences of hundreds of innovators and companies, in the form of case studies, quotes and practical advice, offer a realistic, action-orientated roadmap for successful biodesign innovation. Real-world examples, end-of-chapter projects, and Getting Started sections guide the reader through each of the key stages of the process and provide a template to create their own new medical devices. Addressing common medical, engineering, and business challenges to develop well-rounded expertise, this book is the complete package for any biodesign entrepreneur. The text is supported by valuable resources, including up-to-date industry changes: found at ebiodesign.org.

Two Decades of Legislative Politics and Governance in Nigeria's National Assembly Fatai Ayinde Aremu, Adebola Rafiu

Bakare, 2021-05-20 This book unpacks two decades of Nigeria's National Assembly spanning 4th–8th legislative sessions. It focuses on the core areas of legislative functions – lawmaking, appropriation, oversight and representation – in examining the achievements,

challenges and prospects of the legislature. This is particularly important because Nigeria being the most populous country in Africa is a crucial bastion of democratic governance in the region. Therefore, conducting deep diagnostics of the federal legislature as the custodian of popular mandate and the anchor of accountability offered immense opportunity for learning that would catalyze further institutional reforms and democratic consolidation.

Seeking Viable Grassroots Representation Mechanisms in African Constitutions Charles Mwalimu, 2009 In this book Charles Mwalimu explores viable grassroots representation mechanisms in African constitutions in order to positively integrate indigenous and modern systems in Sub-Saharan Africa. A comparative study method is used to examine the constitutional principles of chieftaincy and local government and their impact on human rights. To establish and prove lack of positive integration Mwalimu connects this failure to poor constitutionalism, development and stultified growth and human rights violations. This book proposes remedial actions to build nondiscriminatory constitutional regimes eradicating violations of human rights.

Disaster Preparedness and Climate Change in Cuba Emily J. Kirk, Isabel Story, Anna Clayfield, 2021-08-19 Disaster Preparedness and Climate Change in Cuba discusses how, over six decades, Cuba developed a world-leading model of disaster management and climate change adaptation. Comprised of leading scholars and policy makers in the field, this volume questions what makes Cuba's effective model so distinctive and what others can learn from it.

Cardiovascular Disability Institute of Medicine, Board on the Health of Select Populations, Committee on Social Security Cardiovascular Disability Criteria, 2010-12-04 The Social Security

Administration (SSA) uses a screening tool called the Listing of Impairments to identify claimants who are so severely impaired that they cannot work at all and thus immediately qualify for benefits. In this report, the IOM makes several recommendations for improving SSA's capacity to determine disability benefits more quickly and efficiently using the Listings.

Small States and EU Governance S. Bunse, 2009-03-26 Small States and EU Governance shows that the EU's rotating Council presidency and small states' capacity to make use of it have been underestimated. It examines the political objectives the presidency serves and presents a systematic and comparative assessment of its nature and influence in internal market and foreign policy issues.
