Five-Star Trails: Louisville and Southern Indiana Valerie Askren,2013-02-05 Known as the City of Parks, Louisville has long valued the natural landscape and the provisioning of outdoor recreation. In 1891 Frederick Law Olmsted, the father of American landscape architecture, was commissioned to develop an extensive park system for Louisville that eventually included 18 parks and 6 interconnecting parkways. Since that time, Louisville has continued to invest resources to build a first-class park system. Nestled within the Ohio Valley, and bordered by the knobs region to the south and the heavily forested areas of Indiana to the north, Louisville lies at the heart of an endless array of hiking opportunities. Five-Star Trails: Louisville showcases many of the hiking trails and walking paths within the city or within easy driving distance in central Kentucky and southern Indiana. Designed specifically for day trips, this book includes several of the area's most popular parks, as well as many of the lesser-known hiking trails in nature preserves, wildlife management areas, and national forests.

The Cultural Roots of Strategic Intelligence Gino LaPaglia,2019-11-20 Strategic Intelligence is a form of meaning that promises the possibility of strategic advantage, dignity, the achievement of objective, and the fulfillment of potential in hostile environments. In The Cultural Roots of Strategic Intelligence Gino LaPaglia demonstrates that the strategic aspect of reason—arising in human experience, encoded as value, and born by culture as a strategic resource—has been encoded as values that have been memorialized in culturally authoritative sources in various Eurasian cultures for thousands of years. These sources have validated a strategic orientation in the world, legitimized the strategist as a heroic identity, and transmitted a coherent world view that enables the practitioner of strategy to overcome asymmetric threat. By excavating the provenance of strategic thought

expressed in the cultural identity of the strategist in the most culturally authoritative mythological, literary, philosophical and religious sources, and excavating the underlying strategic values expressed in cultural products, LaPaglia demonstrates that the strategic aspect of human rationality is one of the most basic structural dynamics of human meaning, and that the transmission of this strategic way of being and acting in the world offers hope for life's underdogs.

Voices from the Mountains Andrew D. Mayes, 2021-10-18 In the shifting sands of today's uncertain world, where traditional paradigms are fragmenting and everything seems in a state of flux, the biblical mountains endure as unshakable and steadfast. In their caves and canyons linger ancient voices that can startle us into new insights and awaken in us new ways of seeing the world and ourselves. In this book we go on a quest to locate the ancient voices of those who actually lived in these mountains, who knew both the physical contours and spiritual secrets of the summits and who long pondered their mysteries. We will rediscover texts and fragments that have been long forgotten in the West. The pandemic has filled the world with uncertainty and fear. We will discover wisdom and insights that are strikingly relevant to this unfolding world crisis and that speak with an uncanny directness to our situation. But the wisdom here is timeless and enduring, and readers will benefit from these ancient voices in all generations and in all sorts of circumstances. This book is not so much an anthology of forgotten voices as a sourcebook of spirituality and a guidebook for the spiritual adventure.

Catholic Today Willem van Vlastuin, 2020-05-11 What is the real meaning of the church for Christian life? If we confess Christian faith, the church is one of the twelve articles, which implies that the church is rather important. In the creeds of the early church catholicity is confessed as characteristic for the church. This means that the church cannot exist without catholicity. What does this qualification mean? In this study the author listens to the understanding of the concept of catholicity in the theology of Ignatius, Cyprian, Cyril, Augustine and Vincent. In the second part of the book some representatives of the reformed tradition are analyzed, namely John Calvin, James Ussher, John Owen, Herman Bavinck and Gerrit Berkouwer. This analysis leads to a comparison between the early church and the reformed tradition. Listening to theologians from the early church and the reformed tradition, Van Vlastuin presents an up-to-date concept of the catholicity of the church which clarifies among others that the visibility of the church belongs to the essence of Christ's body, that practicing the catholicity of the church is necessary against denominationalism and party formation, that loss of

catholicity leads to spiritual and theological impoverishment, that the understanding of catholicity implies also orthodoxy with consequences for the interpretation of 'semper reformanda' and that the consciousness of catholicity is related to the citizenship of two worlds.

Strategic Partnerships in Asia Vidya Nadkarni,2010-01-21 This book examines the nature and implications of the increasing interaction among three secondary powers in the world: China, Russia and India. It provides an in-depth analysis of the complex and often contradictory goals underlying their emerging strategic partnerships along with an assessment of the role these partnerships play in the larger regional and global contexts. In particular, it focuses on the important region of Asia/Eurasia, where these countries seek to increase their influence and compete against the prominence of the United States. Breaking new ground in looking at the ways in which the triad of bilateral strategic partnerships affect the countries' individual aspirations for power, status and wealth, this book argues that their attempt to develop codified, formal bilateral partnerships and trilateral ties that seek to neither antagonise nor fully embrace each other is both a challenge to peace and security and an opportunity for cooperation. It concludes by suggesting scenarios under which competitive or cooperative economic and security orders may emerge. Clearly written and thoroughly accessible, this book will be an informative text for courses on international relations, international security, foreign policy and Asian and Russian politics.
