*Electronic and Mobile Commerce Law* Charles Wild,Stuart Weinstein,Neil Macewan,2011-04 This text is unique in bringing together the many disparate aspects of what is variously called internet law, cyber law or electronic commerce ('e-commerce') law. Included is the law relating to online contracts and payment systems, electronic marketing and various forms of cybercrime as well as the regulation of electronic communications networks and services. Insights are also given into emerging areas such as internet libel, online gambling, virtual property, cloud computing, smart cards and electronic cash, as well as the growing use of mobile phones to perform tasks previously carried out.

New paths to thick descriptions: innovativeness in data collection and interpretation ,2005 Annotation The papers in this e-book focus on data collection and whilst none can claim to be completely new, all challenge our usual reliance on focus groups or depth interviews and challenge us to think more creatively of how we might get closer to the actual lived experience of consumers and consumption.

**Creative Mobile Media** Sylvie Prasad,2017-04-24 Creative Mobile Media provides a guide to the creation, production and display of media with mobile technology at its heart. Split into two parts, the first gives a practical how-to guide on producing and exhibiting different forms of mobile art including photographs and films. From taking the perfect selfie to creating a short film, there is advice on how to produce, sell and market the products created on your phone. Also included are exercises designed to build technical skills and improve creative thinking, meaning you are able to practice the creation of media and engage with a global community through new digital technologies. The second part uses case studies to look at the effect of these new digital technologies within areas such as journalism, advocacy, ethics and social participation. Mobile and cellular phones are now ingrained within all aspects of life, and investigated here is how 21st Century society is adapting to these changes. With both theoretical and practical guidance, this book is perfect for media students and mobile users interested in how creative mobile technology can be used professionally and commercially, and why it matters in our digitised world. **Multilingual Information Retrieval** Carol Peters,Martin Braschler,Paul Clough,2012-01-05 We are living in a multilingual world and the diversity in languages which are used to interact with information access systems has generated a wide variety of challenges to be addressed by computer and information scientists. The growing amount of non-English information accessible globally and the increased worldwide exposure of enterprises also necessitates the adaptation of Information Retrieval (IR) methods to new, multilingual settings. Peters, Braschler and Clough present a comprehensive description of the technologies involved in designing and developing systems for Multilingual Information Retrieval (MLIR). They provide readers with broad coverage of the various issues involved in creating systems to make accessible digitally stored materials regardless of the language(s) they are written in. Details on Cross-Language Information Retrieval (CLIR) are also covered that help readers to understand how to develop retrieval systems that cross language boundaries. Their work is divided into six chapters and accompanies the reader step-by-step through the various stages involved in building, using and evaluating MLIR systems. The book concludes with some examples of recent applications that utilise MLIR technologies. Some of the techniques described have recently started to appear in commercial search systems, while others have the potential to be part of future incarnations. The book is intended for graduate students, scholars, and practitioners with a basic understanding of classical text retrieval methods. It offers guidelines and information on all aspects that need to be taken into consideration when building MLIR systems, while avoiding too many 'hands-on details' that could rapidly become obsolete. Thus it bridges the gap between the material covered by most of the classical IR textbooks and the novel requirements related to the acquisition and dissemination of information in whatever language it is stored.

Concise Manual of Hematology and Oncology Michael Andreeff,Dietmar P. Berger,Benjamín Koziner,Monika Engelhardt,Hans A. Messner,Hartmut Henß,Roland Mertelsmann,N. Thatcher,2008-05-16 A real boon for medical practitioners from a number of disciplines, this is a practice-oriented manual of medical oncology and hematology for day-to-day use in caring for patients' hematologic and neoplastic diseases. It is founded on the longstanding experience of a large specialized university department accustomed to having to provide reliable advice in a broad range of circumstances. The authors have chosen not to give a comprehensive review of the various subjects but have instead focused on practical methods which have proven to be useful in their experience, with special emphasis on standardizing chemotherapy protocols.

**Pollinators and Pesticides** Great Britain: Parliament: House of Commons: Environmental Audit Committee,2013-04-05 If farmers had to pollinate fruit and vegetables without the help of insects it would cost hundreds of millions of pounds and we would all be stung by rising food prices. Defra Ministers, however, have refused to back EU efforts to protect pollinators. Disease, habitat loss and climate change can all affect insect populations,

but a growing body of research suggests that neonicotinoids are having an especially damaging impact on pollinators. The weight of scientific evidence now warrants precautionary action, so the Committee is calling for a moratorium on pesticides linked to bee decline to be introduced by 1 January next year. An EU-wide moratorium on the use of imidacloprid, clothianidin and TMX on crops attractive to bees, following a recent risk warning from the European Food Safety Authority, has also been proposed. Many of the UK's largest garden retailers have voluntarily withdrawn non-professional plant protection products that contain neonicotinoids. A full ban on the sale of neonicotinoids for public domestic use, which could create an urban safe haven for pollinators is recommended. The pesticide industry must open itself to greater academic scrutiny if it wants to justify its continued opposition to the precautionary protection of pollinators. The Government's National Action Plan for the Sustainable Use of Pesticides published earlier this year was a missed opportunity, according to the Committee. Clearer targets are needed to reduce reliance on pesticides as far as possible. And Integrated Pest Management - which emphasises alternatives to pesticides, but does not preclude their use - should be made the central principle of the plan.

*Sécurité alimentaire : Nouveau enjeux et perspectives* Stéphanie Mahieu,Katia Merten-Lentz,2013-07-05 Le droit alimentaire européen s'est progressivement construit au regard des crises alimentaires de ces dernières décennies, de la nécessité de gérer au mieux les risques dans le secteur agroalimentaire et de l'émergence de nouveaux marchés. La réforme majeure du cadre juridique en la matière qui est intervenue en 2002 a-t-elle atteint ses objectifs ? Aujourd'hui, alors que dix ans se sont écoulés depuis cette importante réforme du droit alimentaire européen, cette question se pose avec d'autant plus d'acuité que le secteur fait face à de nombreux défis, que ce soit en termes d'apparition de nouvelles technologies appliquées au secteur agroalimentaire, d'enjeux économiques, de cohérence institutionnelle ou de gestion efficace des risques. Au regard de ces nombreux défis, le droit alimentaire européen s'affirme comme une politique publique dynamique, incontournable et ambitieuse, dont le présent ouvrage effectue le bilan à un moment clé de son évolution.

### **A Corrupt Tree: An Encyclopaedia of Crimes committed by the Church of Rome against Humanity and the Human Spirit**

A.S.,2014-01-13 'A Corrupt Tree' is a unique, extensively researched, four volume exposé of the dark side of the Church of Rome. It reveals that for nearly two thousand years the Church's fundamental characteristic has been its self-serving abuse of religio-corporate power. A large proportion of this first volume provides a detailed catalogue of the multitude of unholy popes. Included, are those who were immature, capricious, corrupt, lascivious, fanatical, senile, truly mad, megalomaniac, tyrannical, murderous, and wholesale killers. It confirms that for many, many centuries the popes were corrupt, cruel, inhumane, and despotic. In an age of savagery they were the leaders in barbarity; in the subsequent age of enlightenment they have persistently resisted the march of progress. Additionally, the popes were wholesale killers who 'made the principle of assassination a law of the Christian Church.' Accordingly, the Church 'has shed more innocent blood than any other institution that has ever existed among mankind.' Here also are presented the cupidity, corruption, and sexual misdeeds of lesser ecclesiastics, including cardinals, bishops, priests, monks and nuns. Pope Honorius III, for example, described his priests as 'worse than beasts wallowing in their dung.' The Church's ruthless stranglehold on knowledge and learning is catalogued in detail. Mathematics, philosophy and science were repressed. Selected, applied theology ruled the world. 'Everything was explained, but nothing was understood.' The chapters on censorship reveal that even works of considerable literary or philosophical merit did not

escape. A large number of writings which eventually became classics of European culture were condemned and prohibited. The Church also exhibited a vitriolic hatred of those who translated the Bible into the vernacular. Many of these men were annihilated. Holy books were burned in large numbers – particularly the Jewish Talmud. It is clearly demonstrated that the Church held back civilisation for over fifteen hundred years. ‘Century after century passed away, and left the peasantry but little better than the cattle in the fields.’ Finally, the unholy behaviours of the numerous popes, cardinals, and lesser ecclesiastics are shown to establish, unequivocally, that the Church of Rome is neither holy nor apostolic. The ultimate message of these volumes is that to become an exemplary institution, and to play a truly humane role in the world’s future, the Catholic Church must change.
