The Futures of Legal Education and the Legal Profession Hilary Sommerlad, Sonia Harris-Short, Steven Vaughan, Richard Young, 2015-03-26 We are currently witnessing an unprecedented transformation in the legal profession and legal education. The Legal Services Act 2007 and the Legal Aid, Sentencing and Punishment of Offenders Act 2012 have both enabled and necessitated dramatic structural changes to the profession, as well as impacting on its ethos and ethicality. The recent Legal Education and Training Review (LETR) promises similarly dramatic change to the provision of legal education, reflecting the shifting landscape of both the legal professional market and Higher Education in general. These transformative changes bring both exciting opportunities and challenges with which everyone involved in the law – from University lecturers, to Senior Partners in leading law firms, to the judiciary – must grapple. This edited collection comprises a selection of papers presented at the 2nd conference of CEPLER, Birmingham Law School's Centre for Professional Legal Education and Research. The aim of the Conference, and thus this collection, was to bring together leading academic scholars, senior figures from professional practice, policy-makers, and representatives of the regulatory authorities, to reflect on the key issues arising from this transformative moment. As such, this volume of essays covers diverse ground, from curriculum development to professional theory, enriched and enhanced by the range of backgrounds and perspectives of its contributors.

**Mapping Digital Game Culture in China** Marcella Szablewicz, 2020-02-18 In this book, Marcella Szablewicz traces what she calls the topography of digital game culture in urban China, drawing our attention to discourse and affect as they shape the popular imaginary surrounding digital games. Szablewicz argues that games are not mere sites of escape from Real Life, but rather locations around which dominant notions about failure, success, and socioeconomic mobility are actively processed and challenged. Covering a range of issues including nostalgia for Internet cafés as sites of youth sociality, the media-driven Internet addiction moral panic, the professionalization of e-sports, and the rise of the self-proclaimed loser (diaosi), Mapping Digital Game Culture in China uses games as a lens onto youth culture and the politics of everyday life in contemporary China. Based on ethnographic fieldwork conducted between 2009 and 2015 and first-hand observations spanning over two decades, the book is also a social history of urban China's shifting technological landscape.

**Information, pesticide safety behaviors, and toxicity risk perceptions: Evidence from Zambia and Mozambique** Goeb, Joseph, Smart, Jenny, Snyder, Jason, Tschirley, David, 2022-04-27 Purpose: Pesticide safety is a growing global concern particularly in developing countries as farmers increase their use of toxic pesticides that can negatively affect farmer and environmental health. Previous literature recommends improving farmer access to information to boost productivity, sustainability, and safety behaviors but has little to say on which information sources have the greatest impacts. This paper explores the relationships between information from different sources and toxicity knowledge and safety behaviors using an innovative metric of exposure. Data: This study uses regression analysis of data from 877 horticultural producers serving markets in Maputo, Mozambique and Lusaka, Zambia. Findings: Formal extension advice is limited, and farmers rely heavily on their social networks for information. High-level messages of pesticide health risks and safety practices are effectively being communicated through formal methods of government extension, NGOs and even private agro-dealer networks. However, information through social networks appears to do a better job of communicating more nuanced messages of pesticide toxicities and varied health risks by toxicity class. Practical implications: Farmers need reliable pesticide information to increase crop production while minimizing risks. This study shows that efforts should be taken to increase farmer trust in formal extension channels, and that social networks should be leveraged improve dissemination of pesticide information. Originality: Despite a consensus that more information needs to reach farmers to improve their pesticide safety practices, this paper is one of the few studies that explores the relationships between different information sources and behaviors and perceptions. We construct novel metrics of toxicity knowledge and safety behavior.

**Social Accounting and Public Management** Stephen P. Osborne, Amanda Ball, 2010-10-18 Social accounting as a discipline has challenged the methodology and focus of the larger field of accounting over the last 50 years. More recently it has taken on greater significance for other subjects as well, addressing issues for public policy and management more broadly. These include the issues of the nature of accountability in the contemporary plural state, environmental and societal sustainability, the ethical management and governance of public services and resources, and the creation and sustenance of social capital as an essential element of the modern plural state. Social Accounting and Public Management brings together for the first time researchers from a range of disciplines including accounting, political science, management, sociology and policy studies to discuss and develop our knowledge and theory of the nature of 'accountability' in contemporary global society and the challenges it may pose for public policy and management. This book addresses this nexus of all of these issues and disciplines, and through this, makes a contribution to the development of the disciplines of both social accounting and public policy and management.

Internal Migration in the United States Raven S. Molloy,Christopher L. Smith,Abigail K. Wozniak,2011-08 This report reviews patterns in migration within the U.S. over the past thirty years. Internal migration has fallen noticeably since the 1980s, reversing increases from earlier in the century. The decline in migration has been widespread across demographic and socioeconomic groups, as well as for moves of all distances. Although a convincing explanation for the secular decline in migration remains elusive and requires further research, the authors find only limited roles for the housing market contraction and the economic recession in reducing migration recently. Despite its downward trend, migration within the U.S. remains higher than that within most other developed countries. Charts and tables. This is a print on demand report.

Keeping Faith with the Constitution Goodwin Liu,Pamela S. Karlan,Christopher H. Schroeder,2010-08-05 Chief Justice John Marshall argued that a constitution requires that only its great outlines should be marked [and] its important objects designated. Ours is intended to endure for ages to come, and consequently, to be adapted to the various crises of human affairs. In recent years, Marshall's great truths have been challenged by proponents of originalism and strict construction. Such legal thinkers as Supreme Court Justice Antonin Scalia argue that the Constitution must be construed and applied as it was when the Framers wrote it. In *Keeping Faith with the Constitution*, three legal authorities make the case for Marshall's vision. They describe their approach as constitutional fidelity--not to how the Framers would have applied the Constitution, but to the text and principles of the Constitution itself. The original understanding of the text is one source of interpretation, but not the only one; to preserve the meaning and authority of the document, to keep it vital, applications of the Constitution must be shaped by precedent, historical experience, practical consequence, and societal change. The authors range across the history of constitutional interpretation to show how this approach has been the source of our greatest advances, from *Brown v. Board of Education* to the New Deal, from the *Miranda* decision to the expansion of women's rights. They delve into the complexities of voting rights, the malapportionment of legislative districts, speech freedoms, civil liberties and the War on Terror, and the evolution of checks and balances. The Constitution's framers could never have imagined DNA, global warming, or even women's equality. Yet these and many more realities shape our lives and outlook. Our Constitution will remain vital into our changing future, the authors write, if judges remain true to this rich tradition of adaptation and fidelity.

Confederate Artillery Organizations F. Ray Sibley, Jr.,2014-09-08 Confederate Artillery Organizations: An Alphabetical Listing of the Officers and Batteries of the Confederacy, 1861-1865 is a remarkable, immensely useful, and exceedingly rare book containing the names of the officers and every Confederate artillery unit. It is so rare that most scholars in the field don't even know of its existence. It was originally published as simply Confederate Artillery Organizations by the U.S. War Department in 1898, one of Marcus J.Wright's compilation aids to help assemble and organize the massive publication that would appear as the 128-volume *The War of the Rebellion: A Compilation of the Official Records of the Union and Confederate Armies (1880-1901)*, known to researchers and students alike as simply *Official Records*. Editor Ray Sibley spent more than a decade researching the thousands of entries, correcting mistakes, and adding many artillery units and additional officers unknown to the original compilers more than a century ago. Sibley utilized archival records, manuscripts, letters, diaries, and other sources to verify the original work, correct mistakes, and add further useful information in the form of hundreds of valuable footnotes. This new updated and easy-to-use reference work sets forth the lineage of the Confederate artillery. It lists, in alphabetical order, individual batteries to artillery regiments, the names and alternate names for the batteries and the names of the men who led them. Also included are the dates of acceptance into Confederate service for each unit. Most companies have an annotation that includes an alternate name (if there was one), and the date if a unit disbanded or was merged into another organization. The annotations for officers include date of appointment, date of promotion to a higher grade (if any), date of transfers (if any), date dropped from rolls (if any), and date relieved of command (if any). Confederate Artillery Organizations also contains four rare and hard-to-find lists of Confederate artillery officers: "Memorandum of Artillery Officers, C. S. A.," "List of Officers Corps of Artillery, C. S. Army, on U.S. Register of 1861," "Superintendents of Armories," and "Military Store-Keeper of Ordnance." These lists illustrate the ranking of each officer in his respective grade. The extensive bibliography prepared by Mr. Sibley is an invaluable guide to Civil War historiography. Scholars, researchers, and students of the Civil War will be thankful Ray Sibley turned his considerable talents to this project. His tireless efforts made sure this rare book got back into print (including all digital formats), and turned what was once a valuable rare work into a reference book that is now both widely available and absolutely indispensable.

*America's Half-blood Prince* Steve Sailer,2009-01-22 Steve Sailer gives us the real Barack Obama, who turns out to be very, very different - and much more interesting - than the bland healer/uniter image stitched together out of whole cloth this past six years by Obama's packager, David Axelrod. Making heavy use of Obama's own writings, which he admires for their literary artistry, Sailer gives the deepest insights I have yet seen into Obama's lifelong obsession with 'race and inheritance,' and rounds off his brilliant character portrait with speculations on how Obama's personality might play out in the Presidency. - John Derbyshire Author, Prime Obsession: Bernhard

*Indian Naval Strategy in the Twenty-first Century* James R. Holmes,Andrew C. Winner,Toshi Yoshihara,2009-04-02 This is the first academic study of India's emerging maritime strategy, and offers a systematic analysis of the interplay between Western military thought and Indian maritime traditions. By a quirk of historical fate, Europe embarked on its Age of Discovery just as the main Asian powers were renouncing the sea, ushering in centuries of Western dominance. In the 21st century, however, Asian states are once again resuming a naval focus, with both China and India dedicating some of their new-found wealth to building powerful navies and coast guards, and drawing up maritime strategies to govern the use of these forces. The United States, like the British Empire before it, is attempting to manage these rising sea powers while preserving its maritime primacy. This book probes how India looks at the sea, what kind of strategy and seagoing forces New Delhi may craft in the coming years, and how Indian leaders may use these forces. It examines the material dimension, but its major premise is that navies represent a physical expression of a society's history, philosophical traditions, and culture. This book, then, ventures a comprehensive appraisal of Indian maritime strategy. This book will be of interest to students of sea power, strategic studies, Indian politics and Asian Studies in general. James R. Holmes is an Associate Professor of Strategy at the U.S. Naval War College and a former U.S. Navy surface warfare officer. Toshi Yoshihara is an Associate Professor in the Strategy and Policy Department at the Naval War College. Andrew C. Winner is Professor in the Strategic Research Department at the U.S. Naval War College.
