*Singapore, ASEAN and the Cambodian Conflict 1978-1991* Ang Cheng Guan, 2013-09-10 This important study of the shifting diplomatic efforts around the response to and resolution of the Vietnamese invasion of Cambodia is based on the records of the Ministry of Foreign Affairs of Singapore, a key player in the complex diplomacy in the region at the end of the Cold War. The study provides a detailed account of the policies and decision-making of Singapore, as well as the diplomatic maneuverings of the other major parties and powers involved in the Cambodia conflict. It details one member country's input into the process of defining and developing a collective ASEAN position, a process which was formative for future diplomatic efforts by the regional grouping. Ang makes use of a variety of sources contemporary to the period under study, as well as records which have become available post-1991. The use of detailed records from one of the Southeast Asian players is a first for the study of the region's diplomacy. The book describes Singapore's role and illustrate how Singapore's management of the Cambodian issue was shaped by the fundamentals of Singapore's foreign policy. The account also reveals the dynamics of intra-ASEAN relations, as well as ASEAN's foreign relations in the context of the Cambodia problem.

**Coercion as Cure** Frank Villafana, 2017-07-12 Understanding the history of psychiatry requires an accurate view of its function and purpose. In this provocative new study, Szasz challenges conventional beliefs about psychiatry. He asserts that, in fact, psychiatrists are not concerned with the diagnosis and treatment of bona fide illnesses. Psychiatric tradition, social expectation, and the law make it clear that coercion is the profession's determining characteristic. Psychiatrists may diagnose or treat people without their consent or even against their clearly expressed wishes, and these involuntary psychiatric interventions are as different as are sexual relations between consenting adults and the sexual violence we call rape. But the point is not merely the difference

between coerced and consensual psychiatry, but to contrast them. The term psychiatry ought to be applied to one or the other, but not both. As long as psychiatrists and society refuse to recognize this, there can be no real psychiatric historiography. The coercive character of psychiatry was more apparent in the past than it is now. Then, insanity was synonymous with unfitness for liberty. Toward the end of the nineteenth century, a new type of psychiatric relationship developed, when people experiencing so-called nervous symptoms, sought help. This led to a distinction between two kinds of mental diseases: neuroses and psychoses. Persons who complained about their own behavior were classified as neurotic, whereas persons about whose behavior others complained were classified as psychotic. The legal, medical, psychiatric, and social denial of this simple distinction and its far-reaching implications undergirds the house of cards that is modern psychiatry. Coercion as Cure is the most important book by Szasz since his landmark *The Myth of Mental Illness*.

Kim Jong Il and North Korea Andrew Scobell, 2006 In the first decade of the 21st century, few national security challenges facing the United States is as vexing as that posed by North Korea. It is a paradox because it appears to be a very powerful state possessing the world's fourth largest armed forces, a sizeable arsenal of ballistic missiles, and a worrying nuclear program-but it is also an economic basket case in terms of agricultural output, industrial production, and foreign trade exports. Virtually every aspect of the Pyongyang regime is mysterious and puzzling. In short, North Korea is difficult for Americans to understand and analyze, beginning with confusion about what kind of political system North Korea has and what kind of man leads it. The author explores Pyongyang's political dynamics and seeks to shed light on the political system of North Korea and its leader.

*Conflict Prevention and Management in Northeast Asia* Alec Forss, Sofia Ledberg, Niklas Swanström, 2010-03-08 Two of the world's most dangerous flashpoints, this edited volume with contributions by leading scholars offers a comprehensive evaluation and comparison of approaches to conflict management and prevention on the Korean Peninsula and in the Taiwan Strait. The consequences of any escalation of these two conflicts and the difficulties in resolving them necessitate a fresh look at designing new strategies to prevent and contain conflict as well as highlighting the limitations of existing measures. Presenting both a theoretical and practical examination of conflict prevention and management, the volume provides a comparative analysis of the Korean Peninsula and the Taiwan Strait-identifying lessons that could be transferred between the two cases but also the obstacles to this. The experiences of other regions and the role of third parties are also examined. This is a valuable addition to the literature for students of peace and conflict studies as well as policy-makers with an interest in Northeast Asia.

*China's Frontier Regions* Doug Smith,2016-03-08 China has traditionally viewed her frontier regions--Zxinjiang, Tibet, Inner Mongolia and Yunnan--as buffer zones. Yet their importance as commercial and cosmopolitan hubs, intimately involved in the transmission of goods, peoples and ideas between China and it west and southwest has meant they are crucial for China's ongoing development. The resurgence of China under Deng Xiaoping's policy of 'reform and opening' has therefore led to a focus on integrating these regions into the PRC (People's Republic of China). This has important implications not only for the frontier regions themselves but also for the neighbouring states, with which they have strong cultural, religious, linguistic and economic ties. *China's Frontier Regions* explores the challenges presented by this integrationist policy, both for domestic relations and for diplomatic and foreign policy relations with the countries abutting their frontier regions.

Does God Exist? , Breathing, eating, walking, etc, are very natural human functions. But most people do not think about how these basic actions take place. For example, when you eat a fruit, you do not contemplate on how it will be made useful to your body. The only thing on your mind is eating a satisfying meal; at the same time, your body is involved in extremely detailed processes unimaginable to you in order to make this meal a health-giving thing. The digestive system where these detailed processes take place starts to function as soon as a piece of food is taken into the mouth. Being involved in the system right at the outset, the saliva wets the food and helps it to be ground by the teeth and to slide down the esophagus. The esophagus transports the food to the stomach where a perfect balance is at work.

Divine Action and Natural Selection Joseph Seckbach, 2009 The debate between divine action, or faith, and natural selection, or science, is garnering tremendous interest. This book ventures well beyond the usual, contrasting American Protestant and atheistic points of view, and also includes the perspectives of Jews, Muslims, and Roman Catholics. It contains arguments from the various proponents of intelligent design, creationism, and Darwinism, and also covers the sensitive issue of how to incorporate evolution into the secondary school biology curriculum. Comprising contributions from prominent, award-winning authors, the book also contains dialogs following each chapter to provide extra stimulus to the readers and a full picture of this OC hotOCO topic, which delves into the fundamentals of science and religion.

**The Kim Jong Il Regime in North Korea** Charles W. Tarrington, 2009 Much hyperbole surrounds the political regime in the Democratic People's Republic of Korea (DPRK, or North Korea). Many analysts argue that North Korea is a unique political system. What kind of regime is the DPRK, and what kind of leader does it have? A variety of labels are given to the North Korean regime. These include likening the regime to an organised crime family and to a corporatist organism. There are certainly merits to each of these approaches, but each has its limitations. Pyongyang does share some of the attributes of organised crime and certainly engages in criminal activity in a systematic and calculating manner. This pattern of illicit behaviour includes the production and distribution of narcotics as well as the counterfeiting of foreign currencies, cigarettes, and pharmaceuticals. But the DPRK is more than a crime family -- it possesses a massive conventional military force as well as significant strategic forces. Moreover, the regime continues to brainwash, imprison, or starve North Koreans, inflicting untold misery and death on its people. Corporatism, meanwhile, may provide insights into certain aspects of the system, but its utility is limited by the confusion that surrounds understanding of this concept. An absolute dictator still rules the regime.
