Ender's Game and Philosophy ,2013-07-22 A threat to humanity portending the end of our species lurks in the cold recesses of space. Our only hope is an eleven-year-old boy. Celebrating the long-awaited release of the movie adaptation of Orson Scott Card's novel about highly trained child geniuses fighting a race of invading aliens, this collection of original essays probes key philosophical questions raised in the narrative, including the ethics of child soldiers, politics on the internet, and the morality of war and genocide. Original essays dissect the diverse philosophical questions raised in Card's best-selling sci-fi classic, winner of the Nebula and Hugo Awards and which has been translated in 29 languages Publication coincides with planned release of major motion picture adaptation of Ender's Game starring Asa Butterfield and Harrison Ford Treats a wealth of core contemporary issues in morality and ethics, including child soldiers, the best kind of education and the use and misuse of global communications for political purposes A stand-out addition to the Blackwell Philosophy and Pop Culture series

**Bioethics of Nonexistence** Leonard Tumaini Chuwa,2020-08-03 The greatest violence and violation of human life is legalization of its disposability and annihilation based on its condition. Such killing, whether of self or another, depicts absolute contradiction and betrayal of the very hypothesis of humanity. It manifests absolute failure to provide due care, and that is inhuman. Human life is who we are. It is the basis of any argument for human rights. There cannot be a right to terminate the existence of the rights bearer. Such a right contradicts the possibility of its own existence. There cannot be dignity in terminating the one in whom dignity resides. There can only be indignity in killing a person. The paradox of legalization of euthanasia and assisted suicide represents humanity turned on itself. It is endorsement of existential nihilism and objectification of human life. It is the

beginning of the end of humanhood. This book is a critical ethical exploration of mind-sets around euthanasia and assisted suicide to provide clarity, sobriety, and objectivity. The book is really about ontology of human life. Dr. Leonard Tumaini Chuwa is a Catholic priest and scholar working for Ascension as director of spiritual care for the state of Florida. Dr. Chuwa is certified by the National Association of Catholic Chaplains (NACC). Chuwa has bachelor of arts degrees in philosophy and theology; master of arts degree in theology and religious studies from John Carroll Jesuit University in Cleveland, Ohio; and a doctor of philosophy degree in bioethics and health-care ethics from Duquesne University in Pittsburgh, Pennsylvania. Chuwa is a distinguished public speaker on different bioethical issues. His first book, titled African Indigenous Ethics in Global Bioethics: Interpretation of Ubuntu, was published by Springer Academic Publishing as the first book in a new global bioethics series. Father Chuwa also authored Bioethical False Truths: Egotistic and Relativistic Autonomy vs. Christian and Ubuntu Relational Autonomy.

**America and the Just War Tradition** Mark David Hall, J. Daryl Charles, 2019-03-30 America and the Just War Tradition examines and evaluates each of America's major wars from a just war perspective. Using moral analysis that is anchored in the just war tradition, the contributors provide careful historical analysis evaluating individual conflicts. Each chapter explores the causes of a particular war, the degree to which the justice of the conflict was a subject of debate at the time, and the extent to which the war measured up to traditional *ad bellum* and *in bello* criteria. Where appropriate, contributors offer post bellum considerations, insofar as justice is concerned with helping to offer a better peace and end result than what had existed prior to the conflict. This fascinating exploration offers policy guidance for the use of force in the world today, and will be of keen interest to historians, political scientists, philosophers, and theologians, as well as policy

makers and the general reading public. Contributors: J. Daryl Charles, Darrell Cole, Timothy J. Demy, Jonathan H. Ebel, Laura Jane Gifford, Mark David Hall, Jonathan Den Hartog, Daniel Walker Howe, Kerry E. Irish, James Turner Johnson, Gregory R. Jones, Mackubin Thomas Owens, John D. Roche, and Rouven Steeves

The Ethics of Death Lloyd Steffen, Dennis R. Cooley, 2014-07-01 In *The Ethics of Death*, the authors, one a philosopher and one a religious studies scholar, undertake an examination of the deaths that we experience as members of a larger moral community. Their respectful and engaging dialogue highlights the complex and challenging issues that surround many deaths in our modern world and helps readers frame thoughtful responses. Unafraid of difficult topics, Steffen and Cooley fully engage suicide, physician assisted suicide, euthanasia, capital punishment, abortion, and war as areas of life where death poses moral challenges.

Partly Cloudy David L. Perry, 2016-10-04 *Partly Cloudy: Ethics in War, Espionage, Covert Action, and Interrogation* explores a number of wrenching ethical issues and challenges faced by military and intelligence personnel. It provides a robust and practical approach to analyzing ethical issues in war and intelligence operations, and applies careful reasoning to issues of vital importance today, not only for soldiers, intelligence professionals, and policy makers, but also for the citizens they serve and protect. This new edition has been updated throughout and includes new contents, to deal with critical issues such as torturing detainees, using espionage to penetrate terrorist cells, mounting covert actions to undermine hostile regimes, practicing euthanasia on the battlefield as mercy-killing, or using targeted killings as a means to fight insurgencies. *Partly Cloudy* provides an excellent introduction to the field for students, instructors, and practitioners who are interested in the ethical challenges faced by public servants.

*Inhabiting Eden* Patricia K. Tull, 2013 In this thoughtful study, respected Old Testament scholar Patricia K. Tull explores the Scriptures for guidance on today's ecological crisis. Tull looks to the Bible for what it can tell us about our relationships, not just to the earth itself, but also to plant and animal life, to each other, to descendants who will inherit the planet from us, and to our Creator. She offers candid discussions on many current ecological problems that humans contribute to, such as the overuse of energy resources like gas and electricity, consumerism, food production systems--including land use and factory farming--and toxic waste. Each chapter concludes with discussion questions and a practical exercise, making it ideal for both group and individual study. This important book provides a biblical basis for thinking about our world differently and prompts us to consider changing our own actions. **NATO Rules of Engagement** Camilla Guldahl Cooper, 2019-12-02 In *NATO Rules of Engagement*, Camilla Guldahl Cooper provides a thorough analysis of NATO rules of engagement, and offers clarity on a concept which despite its considerable political, strategic and operational importance, is often misunderstood.

*Essential Law and Ethics in Nursing* Paul Buka, 2020-07-12 This thoroughly updated third edition lays a solid foundation for understanding the intersection of law, ethics and the rights of the patient in the context of everyday nursing and health care practice. Outlining the key legal and ethical principles relevant to nurses, *Essential Law and Ethics In Nursing: Patients, Rights and Decision-Making*, previously entitled *Patients' Rights: Law and Ethics for Nurses*, uses an easy-to-read style that conveys key principles in an accessible way. It: provides a clear understanding not only of basic legal provisions in health care but also of wider issues relating to human rights; covers topics such

as ethical decision-making, the regulation of nursing, confidentiality, laws concerning human rights, safe practice, vulnerable people, elder abuse and employment regulations; and includes thinking points, case studies and relevant case law to help link theory with practice. This is essential reading for nurses and an important reference for midwives and allied health professionals.

**Ends and Means in Policing** John Kleinig, 2019-03-01 Policing is a highly pragmatic occupation. It is designed to achieve the important social ends of peacekeeping and public safety, and is empowered to do so using means that are ordinarily seen as problematic; that is, the use of force, deception, and invasions of privacy, along with considerable discretion. It is often suggested that the ends of policing justify the use of otherwise problematic means, but do they? This book explores this question from a philosophical perspective. The relationship between ends and means has a long and contested history both in moral/practical reasoning and public policy. Looking at this history through the lens of policing, criminal justice philosopher John Kleinig explores the dialectic of ends and means (whether the ends justify the means, or whether the ends never justify the means) and offers a new, sharpened perspective on police ethics. After tracing the various ways in which ends and means may be construed, the book surveys a series of increasingly concrete issues, focusing especially on those that arise in policing contexts. The competing moral demands made by ends and means culminate in considerations of noble cause corruption, dirty hands theory, lesser degradations (such as tear gas, tasers, chokeholds, and so on), and finally, those means deemed impermissible by the majority in Western culture, such as torture.

*Patients' Rights, Law and Ethics for Nurses* Paul Buka, 2014-07-14 The second edition of this acclaimed text integrates health care law and ethics in relation to patients rights and in the context of everyday nursing and health care practice. Focusing on principles of law and including clear

outlines of the essential legal precedent, the author lays a solid foundation for understanding the intersection of law, eth

Religion, Pacifism, and Nonviolence James Kellenberger, 2018-08-27 This book is about religion, pacifism, and the nonviolence that informs pacifism in its most coherent form. Pacifism is one religious approach to war and violence. Another is embodied in just war theories, and both pacifism and just war thinking are critically examined. Although moral support for pacifism is presented, a main focus of the book is on religious support for pacifism, found in various religious traditions. A crucial distinction for pacifism is that between force and violence. Pacifism informed by nonviolence excludes violence, but, the book argues, allows forms of force. Peacekeeping is an activity that on the face of it seems compatible with pacifism, and several different forms of peacekeeping are examined. The implications of nonviolence for the treatment of nonhuman animals are also examined. Two models for attaining the conditions required for a world without war have been proposed. Both are treated and one, the model of a biological human family, is developed. The book concludes with reflections on the role of pacifism in each of five possible futurescapes.

**The Preacher's Guide to Suicide** H. C. Johnson, 2022-03-18 This book makes the startling claim that the pulpit is the appropriate place to address suicide. In *A Preacher's Guide to Suicide* Johnson chisels through the rusty prison bars of cultural pretense and the oppressive myths of suicide. Using history, the social and behavioral sciences, and biblical inquiry over the centuries of varied Christian voices, Johnson demonstrates that suicide is part of the very fabric of Christian identity. And to preach suicide awareness is to preach life into the very act of dying. While grappling with the contemporary understanding of neuroscience, psychopathology, societal values, and individualism, Johnson seeks to present suicide in a hopeful light as we all approach death in those

daily moments of confession, forgiveness, and prayer. Johnson hopes to provoke further conversation within the Christian community about the richness of suicide within the Scriptures and seeks to be a source of inspiration for preachers.

**Exile and Embrace** Anthony Santoro, 2013-07-09 With passion and precision, *Exile and Embrace* examines the key elements of the religious debates over capital punishment and shows how they reflect the values and self-understandings of contemporary Americans. Santoro demonstrates that capital punishment has relatively little to do with the perpetrators and much more to do with those who would impose the punishment. Because of this, he convincingly argues, we should focus our attention not on the perpetrators and victims, as is typically the case in debates pro and con about the death penalty, but on ourselves and on the mechanisms that we use to impose or oppose the death penalty. An important book that will appeal to those involved in the death penalty debate and to general religious studies and American studies scholars, as well.

**Murder in Renaissance Italy** Trevor Dean, K. J. P. Lowe, 2017-07-13 This invaluable collection explores the many faces of murder, and its cultural presences, across the Italian peninsula between 1350 and 1650. These shape the content in different ways: the faces of homicide range from the ordinary to the sensational, from the professional to the accidental, from the domestic to the public; while the cultural presence of homicide is revealed through new studies of sculpture, paintings, and popular literature. Dealing with a range of murders, and informed by the latest criminological research on homicide, it brings together new research by an international team of specialists on a broad range of themes: different kinds of killers (by gender, occupation, and situation); different kinds of victim (by ethnicity, gender, and status); and different kinds of evidence (legal, judicial, literary, and pictorial). It will be an indispensable resource for students of Renaissance Italy, late

medieval/early modern crime and violence, and homicide studies.

**Testicular Cancer** Kathleen Verville,2009 Testicular Cancer explores the various forms of the disease, discusses its detection, diagnosis, and treatment, and gives an overview of current clinical and laboratory research. This relatively rare form of cancer is seen most often in young men in their late teens, 20s, and 30s. The disease, which once killed most patients, now has a survival rate greater than 90 percent, making it one of the success stories in the history of cancer treatment. Important historical research breakthroughs in the fight against testicular cancer are highlighted, as well as important questions and challenges facing scientists in the future.

*Research Handbook on Human Rights and Humanitarian Law* Kolb, Robert,Gaggioli, Gloria,Kilibarda, Pavle,2022-05-03 Transport Economics is a revised and refined fourth edition of a well-established textbook which applies economic analysis to transport issues. Each chapter has been carefully reworked and includes new material dealing with the regulation of transport markets. To assist in pedagogy, twenty or so free standing 'Exhibits' now provide a variety of case studies and narratives to supplement the text. More up-to-date examples and illustrations also make the understanding of economic principles easier and assist in the assimilation of economic concepts.

Real-Time Collision Detection Christer Ericson,2004-12-22 Written by an expert in the game industry, Christer Ericson's new book is a comprehensive guide to the components of efficient real-

time collision detection systems. The book provides the tools and know-how needed to implement industrial-strength collision detection for the highly detailed dynamic environments of applications such as 3D games, virtual reality applications, and physical simulators. Of the many topics covered, a key focus is on spatial and object partitioning through a wide variety of grids, trees, and sorting methods. The author also presents a large collection of intersection and distance tests for both simple and complex geometric shapes. Sections on vector and matrix algebra provide the background for advanced topics such as Voronoi regions, Minkowski sums, and linear and quadratic programming. Of utmost importance to programmers but rarely discussed in this much detail in other books are the chapters covering numerical and geometric robustness, both essential topics for collision detection systems. Also unique are the chapters discussing how graphics hardware can assist in collision detection computations and on advanced optimization for modern computer architectures. All in all, this comprehensive book will become the industry standard for years to come.
