Get Goodness Mike Hickey,2011-06-16 This book looks at virtue as the power to do good from the theological, philosophical, and poetic perspective. None of us should be seeking virtuous perfection in orienting ourselves to the good in this life; we should only be seeking change. The journey is the goal.

Human Rights in Postcolonial India Om Prakash Dwivedi,V. G. Julie Rajan,2016-02-26 This volume looks at human rights in independent India through frameworks comparable to those in other postcolonial nations in the Global South. It examines wide-ranging issues that require immediate attention such as those related to disability, violence, torture, education, LGBT, neoliberalism, and social justice. The essays presented here explore the discourse surrounding human rights, and engage

with aspects linked to the functioning of democracy, security and strategic matters, and terrorism, especially post 9/11. They also discuss cases connected with human rights violations in India and underline the need for a transparent approach and a more comprehensive perspective of India's human rights record. Part of the series Ethics, Human Rights and Global Political Thought, the volume will be an important resource for academics, policy makers, civil society organisations, lawyers and those concerned with human rights. It will also be useful to scholars and researchers of Indian politics, law and sociology.

Transnationalism, Gender and the History of Education Deirdre Raftery, Marie Clarke, 2018-10-03 In the past decade, historians have begun to make use of the optic of 'transnationalism', a perspective used traditionally by social anthropologists and sociologists in their study of the movement and flow of ideas between continents and countries. Historical scholarship has adopted this tool, and in this book historians of education use it to add nuance and depth to research on gender and education, and particularly to the education experiences of women and girls. The book brings together a group of

internationally-regarded scholars, who are doing important research on transnationalism and the social construction of gender, with particular reference to education environments such as schools and colleges. The book is therefore very much at the cutting-edge of theoretical and methodological advances in the history of education. This book was originally published as a special issue of the History of Education.

The Pollination Biology of North American Orchids: Volume 1 Charles L. Argue, 2011-09-30 Recent studies have revealed remarkable complexity and diversity in orchid-pollinator relationships. These studies comprise a vast literature currently scattered in numerous, often obscure, journals and books. The Pollination Biology of North American Orchids brings together, for the first time, a comprehensive treatment of this information for all native and introduced North American orchids found north of Mexico and Florida. It provides detailed information on genetic compatibility, breeding systems, pollinators, pollination mechanisms, fruiting success, and limiting factors for each species. Distribution, habitat, and floral morphology are also summarized. In addition, detailed line drawings emphasize

orchid reproductive organs and their adaptation to known pollinators. This, the first of two volumes, furnishes a brief introduction to the general morphology of the orchid flower and the terminology used to describe orchid breeding systems and reproductive strategies. It treats the lady's-slippers of genus *Cypripedium*, subfamily Cypripedioideae, and nine genera of the subfamily Orchidoideae, including the diverse rein orchids of genus *Platanthera*. The *Pollination Biology of North American Orchids* will be of interest to both regional and international audiences including: Researchers and students in this field of study who are currently required to search through the scattered literature to obtain the information gathered here. Researchers and students in related fields with an interest in the co-evolution of plants and insects. Conservation specialists who need to understand both the details of orchid reproduction and the identity of primary pollinators in order to properly manage the land for both. Orchid breeders who require accurate and current information on orchid breeding systems. General readers with an interest in orchid biology. Charles Argue, Ph.D., is a plant biologist at the University of Minnesota specializing in the study of pollen grains. His articles have appeared in numerous journals including the

American Journal of Botany, International Journal of Plant Sciences (formerly Botanical Gazette), Botany (formerly Canadian Journal of Botany), Grana, Pollen et Spores, North American Native Orchid Journal, The Native Orchid Conference Journal, Fremontia, and as chapters in a number of books.

Identifying Security Logics in the EU Policy Discourse Maciej Stępkowski, 2022 This open access book investigates the complexity and the modalities of securitization of migration and border control at the EU level. It discusses and compares how different EU institutions and agencies have been deploying different logics of security, e.g. humanitarianism or management of risk, while framing increased migratory flows and so called migration crisis as a security problem. The book argues that the (re)development of EU migration and border control policies in response to increased migratory flows of 2015 have revealed an increasingly tangled nature of securitization of migration in the EU. This is reflected in the intertwining of security logics where migrants and human mobility tend to be securitized through different, sometimes multiple, interpretative lenses at different stages of policy framing. From a theoretical point of view, the book develops a fresh analytical perspective that further contributes to

burgeoning discussion on securitization theory. By bridging the literature on policy framing and securitization it makes a significant contribution to the debates on both securitization and migration. As such this book is of great interest to students, academics, policy makers and all those working in the fields of EU politics, migration, security, and international relations.

Leadership Peruvian Style Tim McIntosh, 2012-01-03 Leadership across cultural borders is the new frontier in leadership studies. Increased globalization means leaders are dealing with a variety of cultures in and out of their own countries. Leaders must be experts in understanding what cultural

dimensions mean for being effective outside their own comfort zone. Americans in particular are often ill-equipped to understand the cultural complexities for international leadership. In *Leadership Peruvian Style*, author Tim McIntosh addresses how Peruvians define and practice leadership, providing a model to assist the cross-cultural worker in understanding leadership in both the home and host cultures. McIntosh's findings are based in an empirical study conducted in 2008 that featured focus groups composed of Peruvian citizens. The study results described in *Leadership Peruvian Style* are not only important for those working in Peru and other parts of Latin America, but also give insight into how to analyze the leadership profile of a particular culture and, in turn, make adjustments in order to be more effective. Through this analysis, McIntosh, who has spent twenty-seven years in leadership in Peru, has contributed to the raising up of a new generation of effective leaders in Latin America.

1001 Best Websites for Kids Lynn C. Gustafson, Deidre Kelly, 2001

Mythology of the Romans Evelyn Wolfson, 2014-07-01 Readers will explore the stories of some of the most prominent Roman figures, such as Romulus and Remus, Jupiter, Venus, Mars, and Apollo.

Roman mythology is based heavily on the Greek myths, and the two cultures share many of the same gods and goddesses, under different names. However, Roman myths also include numerous references to real, historical figures. This book highlights stories from the complex culture that was ancient Rome. Each chapter is followed by a Question and Answer section which covers themes, symbols, and characters; and Expert Commentary which makes for great discussion.

Finding What Works in Health Care Institute of Medicine, Board on Health Care Services, Committee on Standards for Systematic Reviews of Comparative Effectiveness Research, 2011-07-20 Healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence. Systematic reviews identify, select, assess, and synthesize the findings of similar but separate studies, and can help clarify what is known and not known about the potential benefits and harms of drugs, devices, and other healthcare services. Systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices, for patients to make well-informed choices about their own care, for professional medical societies and other organizations that develop clinical practice guidelines. Too often systematic reviews are of uncertain or poor quality. There are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest

and biases are handled, how evidence is appraised, and the overall scientific rigor of the process. In *Finding What Works in Health Care* the Institute of Medicine (IOM) recommends 21 standards for developing high-quality systematic reviews of comparative effectiveness research. The standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain. *Finding What Works in Health Care* also proposes a framework for improving the quality of the science underpinning systematic reviews. This book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research.

Higher Education Opportunity Act United States, 2008

Insight Turkey 2018 - Winter 2018 (Vol. 20, No.1) , Today, the world system is in a transition and experiencing a deep international crisis. The U.S. has begun to oppose the basic international institutions such as the United Nations and its subsidiary organs and specialized agencies, even

though most of these were established with American motivation. The hegemon state, the U.S., has been alienating most of its partners and even allies. The U.S. governments have begun to focus on the national setting and to underestimate the international one; to favor unilateral policies over multilateral ones. The presidency of Donald Trump has expedited this process. American rejection of providing global public goods such as international security and free trade has led to a systemic crisis. The relative decline of American power coincides with the persistent rise of China. Those who claim that the days of Pax-Americana are numbered assert that the rise of China will determine the future of the world system. China has begun to expand its influence worldwide. For this purpose it has established alternative political and economic international institutions such as the Shanghai Cooperation Organization (SCO) and the Asian Infrastructure Investment Bank (AIIB). Furthermore, China leads the establishment of some other international organizations as well. BRICS is only one of these formations challenging the political hegemony of the West, led by the U.S. One of the most promising Chinese projects is the One Belt, One Road (OBOR) Project, aspiring to connect the East

(China) to the West (the world markets). It is expected that, on its completion, the OBOR Project will take China to the center of the world economy and politics. China has been the fastest growing economy in the world for the last thirty years. Its share of the world trade has increased dramatically, recording the highest share in world exports for several years. China has been enjoying economic transactions with all major international actors with more than 200 partners in exports and imports. However, in terms of per capita income China still lags behind the advanced Western countries. Furthermore, according to the calculations made by the World Bank and IMF, Chinese per capita income is still lower than the world average. China recently began to invest in the political and military sphere in the non-Western world. It has military bases in its near abroad and in the African continent. That is, Chinese economic influence and technological leadership is supported by its political and military power. In spite of the increase in Chinese military and political might, it is careful not to challenge the U.S. and the West. There are several reasons for this policy. First of all, China is aware of its vulnerabilities. It suffers some economic and political inconsistencies and weaknesses. For

instance, it has to fortify its regional dominance first in the South China Sea and achieve its longtime one-China policy as a precondition for a possible global hegemony. Second, China wants to win the global rivalry without resorting to war with the current hegemon. Therefore, Chinese leaders refrain from opposing the American hegemony politically. Even though it has introduced some international institutions, the Chinese leadership does not propose a political and diplomatic alternative to the West. It will take time for China to offer a full-scale global leadership alternative to the world, since the global hegemony requires not only economic and military power but also values and norms for cultural hegemony. Lastly, China is not ready to take the global responsibility, since it brings high costs. As long as the current American hegemony works in favor of China, there is no need for China to change the course of its development. In the light of these developments, this issue of Insight Turkey focuses on some of the most important topics related to China's persistent rise in the international system. More specifically, this issue postulates on how to read and understand China's policies towards global powers, i.e. the U.S. and Russia, and regional powers, i.e. India and Turkey. Africa has once again

returned to the attention of the global powers after being left for many years in the shadow of western politics. In recent years, Africa has become the center of China's public, economic and military diplomacy. As it may be expected, China's investments in Africa are not totally 'welcomed' by the U.S. Earl Conteh-Morgan in his commentary focuses on the strategic rivalry between China and the U.S. in Africa. Conteh-Morgan argues that their rivalry has progressed from mild to intense, with both powers increasing their activities on the continent and decreasing Africa's erstwhile marginalization. Another rivalry that shapes China's foreign policies in the region is that with India. Especially, since the Doklam Plateau incident in mid-2017, the expectation of a possible tension between the two regional powers is ever present. Taking this into consideration Bruno Maçães, in his commentary, ponders the economic and strategic rivalry between China and India along with a number of dimensions: infrastructure, border disputes, sea power, and trade.
