We Alone Will Rule Sinclair Thomson, 2002 Previous studies of the insurrection have centered on the initial stage of the movement in Cuzco and tended to misrepresent the phase in La Paz as an atavistic race war against whites. By focusing on La Paz, Thomson shows that a process of struggle at the local level, combined with transformations within Aymara indigenous communities over a period of decades, contributed to the overall breakdown of Spanish colonial order and shaped the dynamics of the insurgency. As peasant commoners increasingly challenged their traditional ethnic lords (caciques), they upset the established apparatus of colonial rule in the Andean countryside, and they brought about a democratization of power relations within their communities. These local struggles converged with more ambitious designs for Indian government and self-determination, as the insurgents envisioned the possibility of Indian-white equality, Indian hegemony over other peoples in the Andes, or outright elimination of the colonial enemy. This experience in the late colonial period continued to shape peasant community organization and influence national political life in the Andes into the present.

I'm Feeling Lucky Douglas Edwards, 2011-07-12 A marketing director's story of working at a startup called Google in the early days of the tech boom: "Vivid inside stories . . . Engrossing" (Ken Auletta). Douglas Edwards wasn't an engineer or a twentysomething fresh out of school when he received a job offer from a small but growing search engine company at the tail end of the 1990s. But founders Larry Page and Sergey Brin needed staff to develop the brand identity of their brainchild, and Edwards fit the bill with his journalistic background at the San Jose Mercury News, the newspaper of Silicon Valley. It was a change of pace for Edwards, to say the least, and put him in a unique position to interact with and observe the staff as Google began its rocket ride to the top. In entertaining, self-deprecating style, he tells his story of participating in this moment of business and technology history, giving readers a chance to fully experience the bizarre mix of camaraderie and competition at this phenomenal company. Edwards, Google's first director of marketing and brand management, describes the idiosyncratic Page and Brin, the

evolution of the famously nonhierarchical structure in which every employee finds a problem to tackle and works independently, the races to develop and implement each new feature, and the many ideas that never came to pass. *I'm Feeling Lucky* reveals what it's like to be "indeed lucky, sort of an accidental millionaire, a reluctant bystander in a sea of computer geniuses who changed the world. This is a rare look at what happened inside the building of the most important company of our time" (Seth Godin, author of *Linchpin*). "An affectionate, compulsively readable recounting of the early years (1999–2005) of Google . . . This lively, thoughtful business memoir is more entertaining than it really has any right to be, and should be required reading for startup aficionados." —Publishers Weekly, starred review "Edwards recounts Google's stumbles and rise with verve and humor and a generosity of spirit. He kept me turning the pages of this engrossing tale." —Ken Auletta, author of *Greed and Glory on Wall Street* "Funny, revealing, and instructive, with an insider's perspective I hadn't seen anywhere before. I thought I had followed the Google story closely, but I realized how much I'd missed after reading—and enjoying—this book." —James Fallows, author of *China Airborne*

Globalizing Somalia Emma Leonard, Gilbert

Ramsay, 2013-11-07 This collection of essays demonstrates how chronic state failure and the inability of the international community to provide a solution to the conflict in Somalia has had transnational repercussions. Following the failed humanitarian mission in 1992-93, most countries refrained from any direct involvement in Somalia, but this changed in the 2000s with the growth of piracy and links to international terrorist organizations. The deterritorialization of the conflict quickly became apparent as it became transnational in nature. In part because of it lacked a government and was unable to work with the international community, Somalia came to be seen as a testing-ground by many international actors. *Globalizing Somalia* demonstrates how China, Japan, and the EU, among others, have all used the conflict in Somalia to project power, test the bounds of the national constitution, and test their own military capabilities. Contributed by international scholars and experts, the work examines the impact of globalization on the internal and external dynamics of the conflict, arguing that it is no longer geographically contained. By bringing together the many actors and issues involved, the book fills a gap in the literature as one of the most complete works on the conflict in Somalia to date. It will be an essential text to any student interested in Somalia and the horn of Africa, as well as in terrorism, and conflict processes.

Security, Strategy and Military Change in the 21st Century Jo

Inge Bekkevold, Ian Bowers, Michael Raska, 2015-05-22 This edited

volume explores and analyses strategic thinking, military reform and adaptation in an era of Asian growth, European austerity and US rebalancing. A significant shift in policy, strategy and military affairs is underway in both Asia and Europe, with the former gaining increasing prominence in the domain of global security. At the same time, the world's powers are now faced with an array of diverse challenges. The resurgence of great power politics in both Europe and Asia, along with the long term threats of terrorism, piracy and sustained geopolitical instability has placed great strain on militaries and security institutions operating with constrained budgets and wary public support. The volume covers a wide range of case studies, including the transformation of China's military in the 21st century, the internal and external challenges facing India, Russia's military modernization program and the USA's reassessment of its strategic interests. In doing so, the book provides the reader with the opportunity to conceptualize how strategic thinking, military reform, operational adaptation and technological integration have interacted with the challenges outlined above. With contributions by leading scholars and practitioners from Europe and Asia, this book provides a valuable contribution to the understanding of strategic and operational thinking and adjustment across the world. This book will be of much interest to students of military and strategic studies, security studies, defence studies, Asian politics, Russian politics, US foreign policy and IR in general.

Estou com sorte Douglas Edwards, 2012-08-02 Comparar o Google a um negócio comum é como comparar um foguete a um Edsel. No seu começo, o Google abraçou extremos — dias infundáveis abastecidos com comida farta e de graça, debates infundáveis baseados em dados, e jogos de hóquei de tirar sangue. Os líderes recém-formados da empresa procuravam mais do que velhos caminhos para o sucesso; eles queriam disponibilizar toda a informação do mundo para todos instantaneamente. O Google,

como o Big Bang, era algo único, uma liberação explosiva de inteligência bruta e inigualável energia criativa, e enquanto outros descreveram o que o Google conquistou ninguém jamais explicou como era se sentir fazendo parte disso. Pelo menos até agora. Douglas Edwards, o funcionário numero 59, oferece uma primeira visão por dentro do que era ser um Googler. Experimente a mistura enervante de camaradagem e competitividade enquanto Larry Page e Sergey Brin, os jovens e idiossincráticos parceiros da empresa, criavam uma estrutura famosa pela sua não hierarquia, pela luta contra a sabedoria convencional, e a corrida para implementar uma miríade de novos recursos, enquanto, tranquilamente enterravam ideias passadas e produtos danificados. Estou Com Sorte captura pela primeira vez a cultura autoinventada da mais transformadora corporação do mundo e oferece um acesso único às emoções, particularmente as tensões, experimentadas por aqueles que construíram da noite para o dia uma das marcas mais conhecidas do mundo.
