**Meeting God in the Other** Alina Patru,2020-03-04 The present volume unites 44 studies to honor Prof. Dr. Dorin Oancea, Romanian-Orthodox theologian and religious studies scholar, well known as a bridge-builder between Eastern and Western Christian Traditions. The manifold studies reflect upon the fundamentals of interfaith and inter-confessional openness, offer insightful examples from past and present, or point to the loci where this openness can and should be achieved today. A meaningful collection for all those interested in present day ecumenical theology, in inter-confessional studies or theology of religions.

**The Sentences: The mystery of the Trinity** Peter Lombard (Bishop of Paris),2007 Peter Lombard's major work, the four books of the sentences, was written in the mid twelfth century, and as early as the 1160s the text was glossed and commented on in the schools. There is hardly a theologian of note throughout the rest of the Middle Ages who did not write a commentary on the sentences.

**Intersex, Theology, and the Bible** Susannah Cornwall, 2016-01-26 Intersex bodies have been figured as troubling by doctors, parents, religious institutions and society at large. In this book, scholars draw on constructive and pastoral theologies, biblical studies, and sociology, suggesting intersex's capacity to 'trouble' is positive, challenging unquestioned norms and assumptions in religion and beyond.

*Fate and Free Will* Heath White, 2019-11-30 In *Fate and Free Will*, Heath White explores and defends a traditional view of God's relationship to creation that has in recent years fallen out of favor. White argues that theological determinism—the idea that God is directly responsible for every detail of history and existence—is relevant to concepts such as human responsibility, freedom, and justice; the meaning of life; and theodicy. Defending theological determinism from the perspective of traditional orthodox Christianity, White clarifies this view, positions it within scripture, and argues positively for it through considerations about divine attributes and via the idea of an *ex nihilo* creation. White addresses objections to theological determinism by presenting nuanced and insightful counterarguments. He asserts that theological determinism does not undermine practices of criminal punishment, destroy human responsibility, render life meaningless, or hinder freedom. While the book does not attempt to answer every dilemma concerning evil or hell, it effectively grapples with them. To make his case for theological determinism, White relies on theories of free will, moral responsibility, and a meaningful life. He uses clear commonsense language and vivid illustrations to bring to light the conditions of meaning and purpose in our lives and the metaphysics of God's relationship to the world. This original book will appeal to the philosophical community as well as students and scholars of theology.

**The Irreducibility of the Human Person** Mark K. Spencer, 2022-03-25 This book presents a philosophical portrait of human persons that depicts each way in which we are irreducible, with the goal of guiding the reader to perceive, wonder at, and love all the unique features of human persons. It builds this portrait by showing how claims from many strands of the Catholic tradition can be synthesized. These strands include Thomism, Scotism, phenomenology, personalism, *nouvelle théologie*, analytic philosophy, and Greek and Russian thought. The book focuses on how these traditions' claims are grounded in experience and on how they help us to perceive irreducible features of persons. This book also explores irreducible features of our subjectivity, senses, intellect, freedom, and affections, and of our souls, bodies, and activities--

**Echoes of Coinherence** W. Ross Hastings, 2017-07-28 This book re-imagines the universe (and the scientific study of it) through the lens of a triune

Creator, three persons of irreducible identity in a perichoretic or coinherent communion. It modestly proposes that Trinitarian theology, and especially the coinherent natures of the Son in the incarnation, provides the metaphysic or “theory of everything” that manifests itself in the subject matter of science. The presence of the image of the triune God in humanity and of traces of this God in the non-human creation are discussed, highlighting ontological resonances between God and creation (resonances between the being of God and his creation), such as goodness, immensity-yet-particularity, intelligibility, agency, relationality, and beauty. This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science (critical realism), something reflected in the history of ideas in each. These resonances lead to the conclusion that the disciplines of theology and science are, in fact, coinherent, not conflicted. This involves recognition of both the mutuality of these vocations and also, importantly, their particularity. Science, its own distinct guild, yet finds its place ensconced within an encyclopedic theology, and subject to first-order, credal theology.

*Jesus, Paul and Matthew, Volume Two* Andries Van Aarde, 2020-04-16 This book is the second of two volumes which reflect on the trend in biblical scholarship that contrasts the vision of the historical Jesus with that of the apostle Paul, on the one hand, and the vision of Paul with that of the evangelist Matthew, on the other. It argues that Jesus replaced the concept of ‘politics of holiness’ with that of ‘politics of compassion’. This means that the church as a community of Jesus-followers forms a fictive family, replacing a soteriology grounded in the biological family. God’s adoption of people as ‘God’s children’ is based on the potential of people to absorb the divine into their humanity. This truism is to be found in the visions shared by the peasant Jesus, the apostle Paul and the rabbi Matthew, as well as in creedal Christianity. The book concludes with autobiographical reflective notes, analogous to the parabolic story of the travellers to Emmaus from Jerusalem (Luke 24) and that of the African eunuch (Acts 8) on his way back from Jerusalem to Africa. The notes serve to consolidate the two volumes on Jesus, Paul and Matthew and their messages of God’s wisdom, justice and mercy.

**A Shift in Time** Lena Einhorn, 2016-03-15 Did the Christian Church rewrite history? In the midst of her research on the historical Jesus, scholar Lena Einhorn stumbled upon a surprising find. While reading through narratives of the Jewish revolt by first-century historian Flavius Josephus, Einhorn encountered a number of similarities to the Bible. These parallels—all limited to a short period of time—include an unnamed and mysterious messianic leader strikingly similar to the Jesus described in the Gospels—only he’s not the peaceful miracle worker we know so well. Significantly, Einhorn found

that historical records consistently place these events (which allude to the conspicuous figure in Josephus's writings) twenty years later than in the New Testament. Twenty years, with precision, every time. *A Shift in Time* explores the possibility that there may have been a conscious effort by those writing and compiling the New Testament to place Jesus's ministry in an earlier, less violent time period than when it actually happened. In this groundbreaking book, Einhorn argues that when the bible and the accounts of first-century historians are compared side by side, it is clear that the events that shaped the Christian world were not exactly as they seem. Elements of this emerging hypothesis were included in Einhorn's previous book, *The Jesus Mystery*, originally published in Swedish in 2006 and later published in the United States. Much has happened since then and Einhorn has presented her findings in various academic forums. The publication of *A Shift in Time* marks the first complete presentation of the full details of the hypothesis and a discussion of its conclusions and inevitable implications. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. Heaven's Splendor Fatula, Sr. Mary Ann, 2019-03-27 Heaven's Splendor According to the Saints Heaven: it's everything we're made for, the answer to our inmost longings, our true Home whose depths of joy we can only imagine. And who can tell us more about this blessed realm than the saints? — the souls closest to God while here on earth who now dwell beside His royal throne. What they say about Heaven has the fragrant anointing of the Holy Spirit who authored the Scriptures and from whom they draw their wisdom. Open these pages, then, and enter the Celestial Kingdom. Ponder all the rapturous beauty that the saints describe. Bask in the consoling warmth of their tender love for us, and grow ever stronger in the desire to share in their heavenly delight. Here you'll come to know the very heart of Heaven: our sharing in the ecstatic love and life of the Trinity. You'll taste the joy of the saints triumphant, ponder the mysteries of our glorious resurrection, and come to understand death as the beautiful gateway to Heaven that it is. Best of all, you'll learn how to begin to live in Heaven even now—by adoring the Blessed Trinity dwelling in your soul, by receiving the precious Body and Blood of the Lord in the Eucharist, and by growing in the heavenly virtue of charity. The wisdom of the saints in these sublimely beautiful pages will quench

your fear of death and awaken in you a blessed hunger to join your departed loved ones and to delight with them in the Three Divine Persons who are the very heart of Heaven's splendor.

Automotive Mechatronics: Operational and Practical Issues B. T. Fijalkowski, 2011-03-14 This book presents operational and practical issues of automotive mechatronics with special emphasis on the heterogeneous automotive vehicle systems approach, and is intended as a graduate text as well as a reference for scientists and engineers involved in the design of automotive mechatronic control systems. As the complexity of automotive vehicles increases, so does the dearth of high competence, multi-disciplined automotive scientists and engineers. This book provides a discussion into the type of mechatronic control systems found in modern vehicles and the skills required by automotive scientists and engineers working in this environment. Divided into two volumes and five parts, Automotive Mechatronics aims at improving automotive mechatronics education and emphasises the training of students' experimental hands-on abilities, stimulating and promoting experience among high education institutes and produce more automotive mechatronics and automation engineers. The main subject that are treated are: VOLUME I: RBW or XBW unibody or chassis-motion mechatronic control hypersystems; DBW AWD propulsion mechatronic control systems; BBW AWB dispulsion mechatronic control systems; VOLUME II: SBW AWS conversion mechatronic control systems; ABW AWA suspension mechatronic control systems. This volume was developed for undergraduate and postgraduate students as well as for professionals involved in all disciplines related to the design or research and development of automotive vehicle dynamics, powertrains, brakes, steering, and shock absorbers (dampers). Basic knowledge of college mathematics, college physics, and knowledge of the functionality of automotive vehicle basic propulsion, dispulsion, conversion and suspension systems is required.

Commentary on Thomas Aquinas's Virtue Ethics J. Budziszewski, 2017-05-04 This guide to St Thomas Aquinas' virtue ethics provides commentary on essential texts, rendering them accessible to all readers.

The Metaphysics and Theology of the Eucharist Gyula Klima, 2024-01-01 This volume is about the most mind-boggling sacrament of the Christian faith, also referred to as the Sacrament of the Altar, the Eucharist: in its Roman Catholic interpretation, the conversion of the substance of the bread and wine into the body and blood of Christ for Holy Communion. The challenge of providing a rational interpretation of this doctrine of faith proved to be one of the most contentious issues in the Western history of ideas, apparently going against self-evident metaphysical principles (requiring accidents existing

without a substance, and a body in several places at the same time, etc.), and dividing schools of thought, indeed, eventually, warring religious factions. The volume addresses both the metaphysical, theoretical issues involved in this challenge and the historical, theological developments of how meeting this challenge played out first in the schools and even later in religious schisms, leading to the paradigmatic shift from medieval to modern forms of thought. The essays of the volume derive from the lectures of an eponymous international conference held in Budapest, Hungary, which was also the occasion of founding the Society for the History of European Ideas (SEHI); accordingly, the book is the first volume of the annual Proceedings of the SEHI. This book is aimed just as much at laymen and religious scholars seeking a better understanding of their faith as at anyone seeking this understanding with a non-religious attitude.
