*Church Talk Makes Men Walk* Woody L. Davis, 2017-07-13 The mystery of the missing men can be answered in one sentence: The church has forgotten how to speak to men. While the church's language has excluded women in its use of nouns and pronouns, it has excluded men in everything else. Its content, character, and construction say, You don't belong here. Church Talk Makes Men Walk: - Corrects the myth that men are innately non-religious or non-spiritual; - Demonstrates how the culture increasingly reflected in church talk has filtered action-oriented people out of the church in favor of relationally orientated ones; - Demonstrates that the same factors that have driven most men from the church have also driven like-minded women away; - Provides research-based and theologically informed solutions to the problem of the missing action-oriented men and women. Chapters presenting well-documented social science research alternate with chapters presenting practical steps that answer the question, So what should the church do? Written in a conversational, humorous, and sometimes confessional style, Church Talk bridges the gap between the academy and the local church. It shows how language that is inclusive of both women and men, relational and action-oriented, can create a church that is once again gender-balanced and missional.

**Home Front** Rick Anderson, 2004 Inspired by the untold story of Sgt. Joe Hooper, Vietnam's most decorated soldier and a home-front casualty, Home Front chronicles how - in the midst of his war - George Bush has cut benefits of both veterans and front line troops. It reveals how the Pentagon has ordered soldiers to take experimental medicines that sometimes prove fatal, how defense contractors sometimes knowingly deliver faulty weapons to troops, and how the true casualty measure of war is the body count - the medical failures, psychological toll and the uninvestigated suicides - that occurs on the home front. Only 148 soldiers were killed in the 1991 Gulf War, but 11,000 have died since. New figures show that one third of the 696,000 Gulf I troops have sought war-related medical treatment. A similar pattern is emerging today in Gulf II. Home Front reports the widespread effects of the government's weapons, medicines and bureaucracies of mass destruction: the use of vaccines that have led to mysterious deaths among both troops and civilians, and the likely emergence of Gulf War II illness, a cocktail of ailments similar to Gulf War I illness - the modern day version of Vietnam's Agent Orange. It details the health and medical issues facing American military personnel and veterans, and investigates the military/bureaucratic politicking behind them. It includes comprehensive documentation from the CDC, VA, and Pentagon to explain the illnesses, syndromes and symptoms, and provides insight into veterans' battles over medical services, intractable policy, and VA hospital conditions. Public and classified military experiments are detailed along with the friendly fire effects of anthrax vaccine and depleted uranium.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. *Entomology and Pest Management* Larry P. Pedigo, Marlin E. Rice, 2014-12-22 Pedigo and Rice expertly combine basic and applied entomology in this reader-friendly, pedagogically rich text. Assuming only a background in elementary biology, the authors present the major elements of general entomology before moving on to concepts in insect biology and ecology necessary for understanding insect pest management. Both theory and practice are emphasized as readers explore pertinent topics. The authors discuss pest-management issues—both preventive and curative—as aspects of applied ecology, with solutions considering environmental quality, profitability, and durability. Insect diagnostic boxes with detailed information on distribution, importance, appearance, and life cycles of particular species and groups appear throughout the text. Readers will come away with a comprehensive introduction to applied, sustainable pest management appropriate for whatever commodities they must handle.
