**The Medieval Roots of Antisemitism** Jonathan Adams,Cordelia Heß,2018-01-31 This book presents a fresh approach to the question of the historical continuities and discontinuities of Jew-hatred, juxtaposing chapters dealing with the same phenomenon - one in the pre-modern, one in the modern period. How do the circumstances of interreligious violence differ in pre-Reformation Europe, the modern Muslim world, and the modern Western world? In addition to the diachronic comparison, most chapters deal with the significance of religion for the formation of anti-Jewish stereotypes. The direct dialogue of small-scale studies bridging the chronological gap brings out important nuances: anti-Zionist texts appropriating medieval ritual murder accusations; modern-day pogroms triggered by contemporary events but fuelled by medieval prejudices; and contemporary stickers drawing upon long-inherited knowledge about what a Jew looks like. These interconnections, however, differ from the often-assumed straightforward continuities between medieval and modern anti-Jewish hatred. The book brings together many of the most distinguished scholars of this field, creating a unique dialogue between historical periods and academic disciplines.

Aimed at undergraduates studying administrative law, it provides comprehensive coverage of the subject and brings together in one volume the bestfeatures of a textbook and a casebook.Rather than simply presenting administrative law as a straightforward body of legal rules, this engaging, critical text considers the subject as an expression of underlying constitutional and other policy concerns, which fundamentally shape the relationship between the citizen and the state. Theresult is a fascinating account of a subject of crucial importance.Online Resource Centre:The book is supported by online an Online Resource Centre, offering the following useful resources:<sup>\*</sup> Updates which cover all the legal developments since publication<sup>\*</sup> Oxford NewsNow RSS feeds provide constantly refreshed links to the latest relevant new stories<sup>\*</sup> Interactive timeline of key dates in British political history<sup>\*</sup> Annotated web links

**Same-Sex Marriage in the Americas** Jason Pierceson,Adriana Piatti-Crocker,Shawn Schulenberg,2010-04-13 This book explores policy innovation for same-sex couples throughout the Americas and includes same-sex marriage legislation, civil unions, and other new developments for same-sex couples throughout the Americas at both national and sub-national levels. This scholarship is innovative because though much has been written regarding developments in North America, there is very little work dealing with recent developments in the rest of the Americas.

**The revised draft national policy statements on energy** Great Britain: Parliament: House of Commons: Energy and Climate Change Committee,2011-01-26 £200 billion of new investment in energy infrastructure is needed by 2020 to cope with rising demand and meet targets on renewable energy and climate change. The six draft National Policy Statements (NPSs) are designed to speed up the planning process for major energy projects to help facilitate this investment, but the new drafts do not prioritise low-carbon generation and renewables over conventional capacity. New Government rules on energy policy could lead to a second 'dash for gas', delaying critical investment in renewables and other low carbon technologies and making the UK's climate change targets impossible to achieve. And development of too much gas capacity could crowd out opportunities for renewables to form a substantial component of the UK's energy mix. The Committee is also sceptical about the ability of the Government to deliver its aims on nuclear power. Ministers told the Committee that the NPSs should enable the development of 16 GW of new nuclear plant by 2025. That is two new nuclear plants each year. The MPs call for more clarity in coordinating developments, and stress that political certainty is essential for investors having to make decisions with planning horizons sometimes over several decades. It raises concerns about the level of investment uncertainty created by giving Ministers the ultimate power to decide on planning decisions and the Government should publish criteria against which the Secretary of State should exercise their discretion.

**How the Russians Read the French** Priscilla Meyer,2010-05-27 Russian writers of the nineteenth century were quite consciously creating a new national literary tradition. They saw themselves self-consciously through Western European eyes, at once admiring Europe and feeling inferior to it. This ambivalence was perhaps most keenly felt in relation to France, whose language and culture had shaped the world of the Russian aristocracy from the time of Catherine the Great. In How the Russians Read the French, Priscilla Meyer shows how Mikhail Lermontov, Fyodor Dostoevsky, and Lev Tolstoy engaged with French literature and culture to define their own positions as Russian writers with specifically Russian aesthetic and moral values. Rejecting French sensationalism and what they perceived as a lack of spirituality among Westerners, these three writers attempted to create moral and philosophical works of art that drew on sources deemed more acceptable to a Russian worldview, particularly Pushkin and the Gospels. Through close readings of A Hero of Our Time, Crime and Punishment, and Anna Karenina, Meyer argues that each of these great Russian authors takes the French tradition as a thesis, proposes his own antithesis, and creates in his novel a synthesis meant to foster a genuinely Russian national tradition, free from imitation of Western models. Winner, University of Southern California Book Prize in Literary and Cultural Studies, American Association for the Advancement of Slavic Studies

**The Syndicate** Nicholas Hagger,2004 This highly topical and controversial work provides an alternative view of 20th century history. It describes the activities of a small group of men whose wealth and influence have been grossly underestimated. It gives the background to the war on terror, and points out the dangers in the increasing trend towards world government.

**Handbook on the Politics of Higher Education** Brendan Cantwell,Hamish Coate,Roger King,2018-06-29 Understanding the politics of Higher Education is becoming more important as the sector is increasingly recognised as a vital source of innovation, skills, economic prosperity, and personal wellbeing. Yet key political differences remain over such issues as who should pay for higher education, how should it be accountable, and how we measure its quality and productivity. Particularly, are states or markets the key in helping to address such matters. The Handbook provides framing perspectives and perspectives, chapters on funding, governance and regulation, and pieces on the political economy of higher education and on the increased role of external stakeholders and indicators.

**Boycotting Israel is Wrong** Philip Mendes,Nick Dyrenfurth,2015-05-01 This is the first progressive book to argue that the BDS movement (boycott, divestment and sanctions) against Israel is the wrong way to broker peace in the Israeli-Palestinian conflict;

rather, it argues that peace will come only when both Israelis' and Palestinians' legitimate claims to statehood are recognised – by both sides. The BDS movement (boycott, divestment, sanctions) against Israel has gained traction and publicity worldwide for a decade. Yet here, Philip Mendes and Nick Dyrenfurth – two politically progressive commentators – argue that BDS is far too blunt an instrument to use in such a complex political situation. Instead, they critically analyse the key arguments for and against BDS, and propose a solution that supports Israel's existence and Palestinian rights to a homeland, urging mutual compromise and concessions from both sides.

**Anna Karenina and Others** Liza Knapp, 2016-07-31 Knapp reads Anna Karenina with other texts, including ones that strongly influenced Tolstoy, to illuminate his understanding of the interconnectedness of human lives.

**The Debate on NATO's Evolution** Margarita Asenova, 2003

**Food and Nutrition** Danielle Gallegos, Mark L Wahlqvist, 2020-07-27 Food--how we produce, prepare, share and consume it--is fundamental to our wellbeing. It also connects the human body to the complex and dynamic systems of our environment. This is more significant than ever before in human history, as climate change and increasing population impact on global ecosystems. This fourth edition of Food and Nutrition has been completely rewritten to reflect an ecosystems approach to human health. It is shaped around four dimensions of human nutrition: biology, society, environment and economy. Food and Nutrition provides a comprehensive overview of food components and the biochemistry of foods and digestion. It outlines nutrition needs at different life stages, dietary disorders, and social and cultural influences on food selection and consumption. It also explores the increasing influence of technology on agriculture and food preparation, and recent research into intergenerational nutrition and nutrigenomics. At every stage it points to how you can impact your own health and the health of others as a global citizen and as a health or other food-system-related professional. Extensively illustrated with informative graphs, diagrams and data, and with examples, glossaries and reflective exercises, Food and Nutrition is the ideal introduction to the field of nutrition and dietetics for the 21st century, and a valuable professional reference for early career dietitians.

*Climat, mensonges et propagande* Hacène Arezki, 2011-11-03 Un livre à lire absolument pour sortir de l'hystérie autour du réchauffement climatique. D'un côté des climatologues alarmistes qui affirment que la Terre se réchauffe par la faute des activités humaines. De l'autre, les climatosceptiques pour qui ce réchauffement a des causes naturelles. Qui croire ? Parce qu'elle dissimule des enjeux idéologiques et économiques colossaux, une banale controverse scientifique a pris une ampleur considérable, tuant ainsi le débat scientifique. Loin de tout lobby et de toute passion, le géographe Hacène Arezki propose une remise à plat radicale, en répondant aux questions essentielles : - Comment mesure-t-on la température de la Terre ? - Quelle est l'ampleur réelle du réchauffement climatique ? - Ce réchauffement est-il sans précédent ? - Faut-il s'en alarmer ? - Hormis les activités humaines, quelles autres hypothèses sérieuses peuvent l'expliquer ? Au-delà des aspects historiques et scientifiques, ce livre lève le voile sur les véritables enjeux politiques, économiques et médiatiques du débat sur le réchauffement climatique. L'enquête sur l'épopée d'Al Gore et sur le Climategate, entre autres, est éloquente. Ce livre possède une qualité rare : rendre le débat sur le climat accessible à tous sans sacrifier un instant la rigueur scientifique. Géographe de formation, Hacène Arezki s'est spécialisé en géographie physique, notamment en biogéographie et climatologie. Chargé de cours durant deux ans à l'université Paris 7-Denis Diderot, Climat, Mensonges et propagande est son premier livre, le fruit de cinq années de recherches et d'enquête.
