Implementing Campus Greening Initiatives Walter Leal Filho, Nandhivarman Muthu, Golda Edwin, Mihaela Sima, 2015-01-21 Firmly rooted in the theory and practice of sustainable development, this book offers a comprehensive resource on sustainability, focusing on both industrialized and developing nations. *Implementing Campus Greening Initiatives: Approaches, Methods and Perspectives* is an attempt to promote and disseminate the work being done in this field by universities around the world. The need to integrate the principles and concepts of green campuses and sustainability into the core of students' educational experiences, from high school to college or university, has now been broadly recognized. By doing so, we can ensure that the students of today and tomorrow will acquire the knowledge, skills, attitudes and values needed to create a more sustainable economy and social environment.

Entrepreneurial Ecosystems Allan O'Connor, Erik Stam, Fiona Sussan, David B. Audretsch, 2017-12-30 This book features latest research insights into the study of the entrepreneurial ecosystem. The focus is on understanding its influence on the development of socially and physically defined 'places', and how these factors are related with each other. The book argues that regardless of how the concept of a 'place' is defined, be it cities, regions, nations or otherwise, the impact of new technologies will influence much of our business, social, and economic landscapes. Evidently, there is an increasing pressure on 'places' to embrace new opportunities for strategic development and confront complacency. The solution may very well be in creating and sustaining entrepreneurial ecosystems where entrepreneurial action thrives and innovation drives the new economy.

The Truth In Black & White Harry R, Jr. Jackson, 2012-10-30 DIVAs we are bombarded almost daily with the latest news on the presidential candidates or the newest political scandal, we lose focus on the important, far-reaching platforms that we as Christians should be whole-heartedly a part of. Pastor Jackson believes/div

Tar Sands Andrew Nikiforuk, 2010 A scathing critique. Green Inc. The New York Times An astonishingly entertaining read that raises your hackles while raising your awareness. Sustainabilityblog Required reading for every citizen. The Georgia Straight The Alberta tar sands could make Canada the world's second greatest oil exporter by 2050. Although growth has been tempered by the global financial crisis, U.S., Asian, and European investors are still pouring billions of dollars into the megaproject. To extract the world's ugliest, most expensive hydrocarbon, we are polluting our air, poisoning our water, destroying vast areas of boreal forest, and undermining democracy itself. In this new edition of his provocative bestseller, Andrew Nikiforuk assesses recent developments, refutes industry's claim that steam plants are a greener way to extract bitumen, and argues more convincingly than ever that it is folly to stake our future on dirty oil. Nikiforuk has a point, and he has guts...Buy this book. Routledge Handbook of Sexuality Studies in East Asia Mark McLelland,Vera Mackie,2014-09-15 This collection brings together cutting-edge work by established and emerging scholars focusing on key societies in the East Asian region: China, Taiwan, Hong Kong, Japan, North and South Korea, Mongolia and Vietnam. This scope enables the collection to reflect on the nature of the transformations in constructions of sexuality in highly developed, developing and emerging societies and economies. Both Japan and China have established traditions of 'sexuality' studies reflecting longstanding indigenous understandings of sex as well as more recent developments which interface with Euro-American medical and psychological understandings. Authors reflect upon the complex colonial and economic interactions and cultural flows which have affected the East Asian region over the last two centuries. They trace local flows of ideas instead of defaulting to Euro-American paradigms for sexuality studies. Through looking at regional and global exchanges of ideas about sexuality, this volume adds considerably to our understanding of the East Asian region and contributes to wider discussions of social transformation, modernisation and globalisation. It will be essential reading in undergraduate and graduate programs in sexuality studies, gender studies, women's studies and masculinity studies, as well as in anthropology, sociology, history, cultural studies, area studies and health sciences.

International Law and the Use of Force against Terrorism Shadi Adnan Alshdaifat,2017-01-06 As shown in the case of Attila the Hun, and his thirst for power, property, and personal prestige, nation states throughout the world, particularly in Asia and Europe, have, since ancient times, been vulnerable to invasion by other nation states and bands of looters from outside their borders. Terrorism's progress into the modern day has caused extreme concern among members of the international community, who now accept that it is like a cancer that refuses to localize itself within any single organ of the body, but seeks to spread its lethality throughout, even if that means destroying itself along with the host. The fight against terrorism is long and complex, but the end is known in advance. Terrorists are defending a lost cause, and their defeat is inevitable, and democracy, freedom, and diplomacy will triumph.

Melasma - Is This the Clear Solution? Vanessa Wild,2002-09 Do you have melasma or any other form of stubborn hyperpigmentation on your face or elsewhere on your body? Have you tried all available conventional treatments and spent a small fortune, only for the dark patches to remain steadfast if not worsen? Are you lacking in confidence socially? Are you afraid to go outdoors to bask in the sunshine? Are you embarrassed, depressed or frustrated about having this disease? Then why not try out a new method of treatment that has so far yielded exciting and promising results? This therapy is safe, inexpensive and rewarding, and has been proven to work for many sufferers via an ongoing experiment that I initiated in January 2002. Just 7 months later, approximately 100 women were reaping the benefits of supplementing their diets with a remarkable nutrient called MSM Sulphur...could this be the clear solution for you too?

Adaptation to Climate Change through Water Resources Management Dominic Stucker,Elena Lopez-Gunn,2014-08-27 The impacts of human-

induced climate change are largely mediated by water, such as alterations in precipitation and glacial melt patterns, variations in river flow, increased occurrence of droughts and floods, and sea level rise in densely populated coastal areas. Such phenomena impact both urban and rural communities in developed, emerging, and developing countries. Taking a systems approach, this book analyzes evidence from 26 countries and identifies common barriers and bridges for local adaptation to climate change through water resources management. It includes a global set of case studies from places experiencing increased environmental and social pressure due to population growth, development and migration, including in Africa, Asia, Australia, Europe, North and South America. All chapters consider the crosscutting themes of adaptive capacity, equity, and sustainability. These point to resilient water allocation policies and practices that are capable of protecting social and environmental interests, whilst ensuring the efficient use of an often-scarce resource.

Sugarcane Biofuels Muhammad Tahir Khan,Imtiaz Ahmed Khan,2019-06-29 Sugarcane exhibits all the major characteristics of a promising bioenergy crop including high biomass yield, C4 photosynthetic system, perennial nature, and ratooning ability. Being the largest agricultural commodity of the world with respect to total production, sugarcane biomass is abundantly available. Brazil has already become a sugarcane biofuels centered economy while Thailand, Colombia, and South Africa are also significantly exploiting this energy source. Other major cane producers include India, China, Pakistan, Mexico, Australia, Indonesia, and the United States. It has been projected that sugarcane biofuels will be playing extremely important role in world's energy matrix in recent future. This book analyzes the significance, applications, achievements, and future avenues of biofuels and bioenergy production from sugarcane, in top cane growing countries around the globe. Moreover, we also evaluate the barriers and areas of improvement for targeting efficient, sustainable, and cost-effective biofuels from sugarcane to meet the world's energy needs and combat the climate change.
