**Accepting Authoritarianism** Teresa Wright, 2010-03-08 Why hasn't the emergence of capitalism led China's citizenry to press for liberal democratic change? This book argues that China's combination of state-led development, late industrialization, and socialist legacies have affected popular perceptions of socioeconomic mobility, economic dependence on the state, and

political options, giving citizens incentives to perpetuate the political status quo and disincentives to embrace liberal democratic change. Wright addresses the ways in which China's political and economic development shares broader features of state-led late industrialization and post-socialist transformation with countries as diverse as Mexico, India, Tunisia, Indonesia, South Korea, Brazil, Russia, and Vietnam. With its detailed analysis of China's major socioeconomic groups (private entrepreneurs, state sector workers, private sector workers, professionals and students, and farmers), *Accepting Authoritarianism* is an up-to-date, comprehensive, and coherent text on the evolution of state-society relations in reform-era China.

**Ada 95** David A. Wheeler, 2012-12-06 Lovelace provides an introduction to Ada 95, one of the most widely used programming languages in the world. Although the reader is assumed to have a basic understanding of programming, no prior exposure to Ada is assumed and all the basics of the language are covered. The book comprises eighteen chapters each of which is composed of short sections designed to cover a small number of key concept and to provide a test question to check the reader's understanding of the concepts covered. Each chapter then concludes with a small quiz to help ensure that the reader has grasped the principles covered in the chapter. One of Ada 95's new features, its object-oriented facilities, is covered in depth, and all of the essential features of Ada

programming are covered thoroughly. In Ada 95 significant enhancements were also added to Ada's ability to interface with other programming languages (such as C, Fortran, and Cobol) and these are covered in one chapter. As a result both students and professional programmers learning Ada for the first time will welcome this new text.

**General Explanation of Tax Legislation Enacted in ...** ,2005 JCS-5-05. Joint Committee Print. Provides an explanation of tax legislation enacted in the 108th Congress. Arranged in chronological order by the date each piece of legislation was signed into law. This document, prepared by the staff of the Joint Committee on Taxation in consultation with the staffs of the House Committee on Ways and Means and the Senate Committee on Finance, provides an explanation of tax legislation enacted in the 108th Congress. The explanation follows the chronological order of the tax legislation as signed into law. For each provision, the document includes a description of present law, explanation of the provision, and effective date. Present law describes the law in effect immediately prior to enactment. It does not reflect changes to the law made by the provision or subsequent to the enactment of the provision. For many provisions, the reasons for change are also included. In some instances, provisions included in legislation enacted in the 108th Congress were not reported out of committee before enactment. For example, in some cases, the provisions enacted were included in bills that went directly to the House and Senate floors. As a result, the legislative history of such provisions does not include the reasons for change normally included in a committee report. In the case of such provisions, no reasons for change are included with the explanation of the provision in

this document. In some cases, there is no legislative history for enacted provisions. For such provisions, this document includes a description of present law, explanation of the provision, and effective date, as prepared by the staff of the Joint Committee on Taxation. In some cases, contemporaneous technical explanations of certain bills were prepared and published by the staff of the Joint Committee. In those cases, this document follows the technical explanations. Section references are to the Internal Revenue Code unless otherwise indicated.

One-Party Classroom David Horowitz,Jacob Laksin,2009-03-10 “David Horowitz has single-handedly exposed the intellectual corruption that exists within the classrooms of American colleges. Like all forms of corruption, indoctrination flourishes when kept in the dark. Here, Horowitz turns on the bright lights to expose what has become profoundly wrong with our colleges and universities. We are all in his debt.” -Ward Connerly, former regent, University of California David Horowitz and coauthor Jacob Laksin take us inside twelve major universities where radical agendas have been

institutionalized and scholarly standards abandoned. The schools they examine are not the easily avoided bottom of the barrel. Rather, they are an all-too-representative sampling of American higher education today. Horowitz and Laksin have conducted the first comprehensive, in-depth, multiyear investigation of what is being taught in colleges and universities across the country—public to private, from large state schools to elite Ivy League institutions. They have systematically scrutinized course catalogs, reading lists, professors' biographies, scholarly records, and the first-person testimonies of students, administrators, and faculty. Citing more than 150 specific courses, they reveal how academic standards have been violated and demonstrate beyond dispute that systematic indoctrination in radical politics is now an integral part of the liberal arts curriculum of America's colleges. The extreme ideological cant that today's students are being fed includes:

- Promoting Marxist approaches as keys to understanding human societies—with no mention of the bloody legacy of these doctrines and total collapse in the real world of the societies they created
- Instilling the idea that racism, brutally enforced by a "white male patriarchy" to oppress people of color and other marginalized groups, has been the organizing principle of American society throughout its history and into the present
- Requiring students to believe that gender is not a biological characteristic but a socially created aspect of human behavior designed by men to oppress women
- Persuading students that America and Israel are "imperialistic" and "racist" states and that the latter has no more right to exist than the South African regime in the days of apartheid

In page after shocking page, Horowitz and Laksin demonstrate that America's colleges and universities are platforms for a virulent orthodoxy that threatens academic ideals and academic freedom. In place of scholarship and the dispassionate pursuit of truth that have long been the hallmarks of higher learning, the new militancy embraces activist zealotry and ideological fervor. In disturbingly large segments of today's

universities, students are no longer taught how to think but are told what to think.
