*Kant in Brazil: apropos Kant's critique of the Cartesian ontological argument* Frederick Rauscher, Daniel Omar Perez, 2012 A selection of the best papers written by Brazilian Kant scholars. Kant in Brazil is a collected volume of essays conceived at the 2005 International Kant Congress in Sao Paulo as a way to make accessible to Anglophone Kant scholars some of the best work on Kant produced by Brazilian scholars. The availability of this material in English for the first time will promote interaction between North American and Brazilian scholars as well as enable Anglophone readers worldwide to incorporate excellent but previously neglected work into their own debates about Kant. The book contains an editor's introduction providing an overview of the institutional structure of Kant studies in Brazil. The essays that follow, translated from Portuguese, include a survey of the history of Kant studies in Brazil over the past two centuries as well as interpretive essays that span the corpus of Kant's work in theoretical philosophy, ethics, political philosophy, history, aesthetics, and teleology. Various styles of philosophy are put into practice as well: analytical, philological, reflective, comparative, displaying the broad and diverse nature of Brazilian philosophy. Frederick Rauscher is associate professor of philosophy at Michigan State University. Daniel Omar Perez is professor of philosophy at the Pontifical Catholic University of Parana, Brazil.

E-learning and Disability in Higher Education Jane K. Seale, 2013-10-08 Most people working within the higher education sector understand the importance of making e-learning accessible to students with disabilities, yet it is not always clear exactly how this should be accomplished. E-Learning and Disability in Higher Education evaluates current accessibility practice and critiques the extent to which 'best' practices can be confidently identified and disseminated. This second edition has been fully updated and includes a focus on research that seeks to give 'voice' to disabled students in a way that provides an indispensable insight into their relationship with technologies and the institutions in which they study. Examining the social, educational, and political background behind making online learning accessible in higher and further education, E-Learning and Disability in Higher Education considers the roles and perspectives of the key stake-holders involved in e-learning: lecturers, professors, instructional designers, learning technologists, student support services, staff developers, and senior managers and administrators.

Family Policy and Disability Arie Rimmerman, 2015-01-22 This book explores the status and scope of family policies related to households of children with disabilities, providing an in-depth, evidence-based review of legal, programmatic issues. It includes a discussion of the gaps between family needs and contemporary family policies in the United States and European countries, as demonstrated in these households' surveys. In addition, the volume offers a comparative analysis of cash benefits, tax credits and deductions, and in-kind provisions between the United States and select European countries (UK, France, and Sweden). Most importantly, this book identifies and continues the discussion regarding the critical role of family-centered policies, as expressed in the United Nations Convention on the Rights of Persons with Disabilities (UNCRPD), as well as the future

of family policy toward families of children with disabilities at a time of economic crisis.

**The Sustainability Revolution** Andres R. Edwards, 2005-06-01 Sustainability has become a buzzword in the last decade, but its full meaning is complex, emerging from a range of different sectors. In practice, it has become the springboard for millions of individuals throughout the world who are forging the fastest and most profound social transformation of our time—the sustainability revolution. The Sustainability Revolution paints a picture of this largely unrecognized phenomenon from the point of view of five major sectors of society: Community (government and international institutions) Commerce (business) Resource extraction (forestry, farming, fisheries etc.) Ecological design (architecture, technology) Biosphere (conservation, biodiversity etc.) The book analyzes sustainability as defined by each of these sectors in terms of the principles, declarations and intentions that have emerged from conferences and publications, and which serve as guidelines for policy decisions and future activities. Common themes are then explored, including: An emphasis on stewardship The need for economic restructuring promoting no waste and equitable distribution An understanding and respect for the principles of nature The restoration of life forms An intergenerational perspective on solutions Concluding that these themes in turn represent a new set of values that define this paradigm shift, The Sustainability Revolution describes innovative sustainable projects and policies in Colombia, Brazil, India and the Netherlands and examines future trends. Complete with a useful resources list, this is the first book of its kind and will appeal to business and government policymakers, academics and all interested in sustainability.

*Women in Higher Education* Ana M. Martinez Aleman, Kristen A. Renn, 2002-12-13 The only comprehensive encyclopedia on the subject of women in higher education. America's first wave of feminists—Susan B. Anthony, Elizabeth Cady Stanton, and others—included expanded opportunities for higher education in their Declaration of Sentiments at the first Women's Rights Convention in Seneca Falls, New York, in 1848. By then, the first American institutions to educate women had been founded, among them, Mt. Holyoke Seminary, in 1837. However, not until after the Civil War did most universities admit women—and not for egalitarian purposes. War casualties had caused a drop in enrollment and the states needed teachers. Women students paid tuition, but, as teachers, were paid salaries half that of men. By the late 20th century, there were more female than male students of higher education, but women remained underrepresented at the higher levels of educational leadership and training. This volume covers everything from historical and cultural context and gender theory to women in the curriculum and as faculty and administrators.
