**Beast** S. R. Schwalb, Gustavo Sánchez Romero, 2016-02-16 Using modern biology and history to investigate a series of grisly deaths in the countryside of 18th-century France. Something unimaginable occurred from 1764 to 1767 in the remote highlands of south-central France. For three years, a real-life monster, or monsters, ravaged the region, slaughtering by some accounts more than 100 people, mostly women and children, and inflicting severe injuries upon many others. Alarmed rural communities—and their economies—were virtually held hostage by the marauder, and local officials and Louis XV deployed dragoons and crack wolf hunters from far-off Normandy and the King's own court to destroy the menace. And with the creature's reign of terror occurring at the advent of the modern newspaper, it can be said the ferocious attacks in the Gévaudan region were one of the world's first media sensations. Despite extensive historical documentation about this awesome predator, no one seemed to know exactly what it was. Theories abounded: Was it an exotic animal, such as a hyena, that had escaped from a menagerie? A werewolf? A wolf-dog hybrid? A new species? Some kind of conspiracy? Or, as was proposed by the local bishop, was it a scourge of God? To this day, debates on the true nature of La Bête, "The Beast," continue. With historical illustrations, composite sketches by the author, on-the-scene modern-day photographs, autopsy analysis, and fictionalized accounts, *Beast* takes a fascinating look at all the evidence, using a mix of history and modern biology to advance a theory that could solve one of the most bizarre and unexplained killing sprees of all time: France's infamous Beast of the Gévaudan.

**A Nation at War in an Era of Strategic Change** Williamson Murray, 2004 The President, Secretary of Defense, and the Army's Chief of Staff have all stated that the United States is a Nation at War. The U.S. military faces significant strategic challenges as it continues to transform the force

and improve interagency integration into joint operations, all the while engaging in active combat operations associated with the Global War on Terrorism. This collection of outstanding essays--three of which won prestigious writing awards--by the students enrolled in the Army War College's Advanced Strategic Art Program (ASAP) highlight some of these strategic challenges and offer thoughtful solutions. They provide insights that will undoubtedly prove useful to decisionmakers at the highest levels of our national security establishment. ASAP graduates continue to make their mark as outstanding theater strategists in the Office of the Secretary of Defense, the Joint Staff and Army Staff, and in the Combatant Commands

*Cancer* Michelangelo Delfino, Mary E. Day, 2006 This is a book about radiation oncology, a study of cancer and the role radiation plays in its development, diagnosis, and treatment. This book explores radiation as both a killer and a healer by introducing the reader to the effect of radiant energy on the body and the way radiation is harnessed to both diagnose and eradicate cancer. After introducing the tools used for diagnosis and treatment, a brief explanation is given on how cancer is measured using staging and statistics. Who gets cancer and the risk factors for each particular cancer are briefly described with comparisons made between the United States, Canada, Japan, and the U.K. Cancers are then individually described and grouped somewhat arbitrarily by body site and function. The discussions of each cancer include summaries of key trials and recent studies of modern treatment options by stage focusing on the efficacy of radiotherapy and its associated risks with comparisons to alternative therapies such as surgery and chemotherapy. Each chapter concludes with practical evaluations of the "best treatment" with an emphasis on quality of life. The

use of radiation for palliation and treating other diseases is also described. This work is written with the patient, the family, the friends, and the caregivers in mind for the purpose of providing a quick reference for making informed choices. Knowledge of science is not necessary as concepts are defined in simple terms and easy access is provided for important information such as cancer staging, cancer statistics, radiography and radiotherapy tools, radiotherapy techniques, and radionuclides used in brachytherapy. For those interested in further research, original works are referenced and an index and glossary are included.

Making Cancer History James S. Olson, 2009-04-13 The history of the M. D. Anderson Cancer Center vividly reveals how cancer treatment in America -- and our attitudes toward the disease -- has changed since the middle of the twentieth century. One of the preeminent cancer centers in the world, M. D. Anderson is also one of the first medical institutions devoted exclusively to caring for people with cancer and researching treatments and cures for the disease. Historian James S. Olson's narrative relates the story of the center's founding and of the surgeons, radiologists, radiotherapists, nurses, medical oncologists, scientists, administrators, and patients who built M. D. Anderson into the world-class institution it is today. Through interviews with M. D. Anderson's leaders and patients, Olson brings to life the struggle to understand and treat cancer in America. A cancer survivor who has himself been treated at the center, Olson imbues this history with humor, passion, and humanity. -- Helen Valier

*Healthy People 2010, Midcourse Review* Health and Human Services Department, 2007-05-22 Presents an assessment of the Nation's progress toward increasing the quality and years of health life and eliminating health disparities for all Americans. Identifies a set of 10-year health objectives to achieve during the first decade of the 21st century. Founded on data that enable progress and

trends to be tracked, Healthy People 2010 provides a set of 10-year evidence-based objectives for improving the health of all Americans. Its two overarching goals are to increase the quality and years of healthy life and to eliminate health disparities. Healthy People 2010 covers 28 focus areas with 467 specific objectives. Midway through the decade, the U.S. Department of Health and Human Services conducts a midcourse review to assess the status of the national objectives. Through the Midcourse Review the U.S. Department of Health and Human Services, Federal agencies, and other experts assess the data trends during the first half of the decade, consider new science and available data, and if appropriate, revise the objectives to ensure that Healthy People 2010 remains current, accurate, and relevant to public health priorities.

**Four Hundred Rabbits** Anne Fox, Mike MacAvoy, 2011-01-07 The goal of this book is to contribute to the ongoing scholarly discussion on the very serious topic of drunkenness. The phrase “four hundred rabbits” is one of many illustrations of the deep cultural, religious, and social influences on how individuals and communities view alcohol intoxication: The Aztecs believed alcohol to have a divine origin, with a god and goddess giving birth to 400 (meaning “innumerable” in ancient Aztec) divine children or “rabbit gods,” each representing a varying degree and expression of alcohol intoxication and drunkenness. Hence the book’s subtitle, which at first glance might seem light-hearted but in fact represents an in-depth look at a weighty topic. With such rooted sociocultural factors in mind, the International Center for Alcohol Policies (ICAP) and DrinkWise Australia collaborated to prepare a publication that advances current understanding of the individual and collective meanings, purposes, and functions of drunkenness. As the authors explain, interpretations by different disciplines of the terms intoxication and drunkenness are often inconsistent. The chapters of this book discuss intoxication and drunkenness from three

perspectives: biological, cultural, and social. By placing intoxication and drunkenness into these contexts, the book is able to offer language and conceptual tools to help advance the ongoing discussion on how best to reduce alcohol-related harm and encourage responsible enjoyment of beverage alcohol. Readers in need of an in-depth understanding of the varied dimensions of extreme drunkenness will add this excellent resource to their personal library.

*The Future of Children: Spring 2005* Cecilia Rouse, Jeanne Brooks-Gunn, Sara S. McLanahan, 2010-12-01 The Future of Children is a new semiannual publication that provides research and analysis to promote effective policies and programs for children. This first issue focuses on School Readiness: Closing Racial and Ethnic Gaps. For more than 30 years, researchers have seen white children outperform black and other minority children in tests of reading and math skills. Though there is evidence that the gap has narrowed somewhat, the very persistence of this racial and ethnic gap remains a source of considerable concern for academics, policy professionals and parents. The ethnic and racial gaps appear to reach back to the preschool years. When children reach the school door, minority children exhibit lower school readiness skills, at least those measured by standardized tests, than their white counterparts. From that point forward, the achievement gap only widens. If policy professionals are to address this disparity in academic achievement (and the consequent disparity in later opportunity), the racial and ethnic gap must be examined in the very earliest years, before students begin school with embedded inequalities. This volume critically summarizes the research on the origin and trajectory of the racial and ethnic gap in the early years from several theoretical perspectives. In particular, research is analyzed to determine when these differences start to emerge, in what areas they appear, what factors contribute to their development by the time children enter grade school and what are the long term

effects. Contents: Introducing the Issue of Test Score Ethnic and Racial Disparities, Jeanne Brooks-Gunn, Sara McLanahan, and Cecilia Elena Rouse Identifying Racial and Ethnic Differences in School Readiness, Donald Rock and Jack Stenner Test Score Gaps: The Contribution of Family and Neighborhood Characteristics, Greg Duncan and Katherine Magnuson Genetic Differences and School Readiness, William T. **Performance Measurement** Institute of Medicine, Board on Health Care Services, Committee on Redesigning Health Insurance Performance Measures, Payment, and Performance Improvement Programs, 2006-07-09 Performance Measurement is the first in a new series of an ongoing effort by the Institute of Medicine (IOM) to improve health care quality. Performance Measurement offers a comprehensive review of available measures and introduces a new framework to examine these measures against the six aims of the health care system: health care should be safe, effective, patient-centered, timely, efficient, and equitable. This new book also addresses the gaps in performance measurement and introduces the need for measures that are longitudinal, comprehensive, population-based, and patient-centered. This book is directed toward all concerned with improving the quality and performance of the nation's health care system in its multiple dimensions and in both the public and private sectors.

*Living Well with Chronic Illness* Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Living Well with Chronic Disease: Public Health Action to Reduce Disability and Improve Functioning and Quality of Life, 2011-06-30 In the United States, chronic

diseases currently account for 70 percent of all deaths, and close to 48 million Americans report a disability related to a chronic condition. Today, about one in four Americans have multiple diseases and the prevalence and burden of chronic disease in the elderly and racial/ethnic minorities are notably disproportionate. Chronic disease has now emerged as a major public health problem and it threatens not only population health, but our social and economic welfare. Living Well with Chronic Disease identifies the population-based public health actions that can help reduce disability and improve functioning and quality of life among individuals who are at risk of developing a chronic disease and those with one or more diseases. The book recommends that all major federally funded programmatic and research initiatives in health include an evaluation on health-related quality of life and functional status. Also, the book recommends increasing support for implementation research on how to disseminate effective longterm lifestyle interventions in community-based settings that improve living well with chronic disease. Living Well with Chronic Disease uses three frameworks and considers diseases such as heart disease and stroke, diabetes, depression, and respiratory problems. The book's recommendations will inform policy makers concerned with health reform in public- and private-sectors and also managers of communitybased and public-health intervention programs, private and public research funders, and patients living with one or more chronic conditions.

**Regulating Land and Pollution in China** Benjamin van Rooij, 2006 Annotation. Many of China's rivers and lakes are strongly polluted, the air in cities is amongst the worst in the world, while some have warned that if the country is not careful it may soon have insufficient arable land to feed its population. This book looks at why the protection of natural resources through stricter legislation and more stringent law enforcement has been so difficult. It does so through a

combination of a local case with comparative and theoretical insights about lawmaking, compliance and enforcement. It offers a unique view on how law functions in the world's largest legal system, and how such law interacts with the social, economic and political circumstances at hand. This book offers an incomparable body of empirical and theoretical knowledge for those interested in how law functions in China, as well as those interested in the workings of regulatory lawmaking, compliance, and enforcement in a comparative perspective. **Handbook of Posttraumatic Growth** Lawrence G. Calhoun, Richard G. Tedeschi, 2014-07-10  
Posttraumatic growth is an area in which investigations are now being undertaken in many different parts of the world. The view that individuals can be changed--sometimes in radically good ways--by their struggle with trauma is ancient and widespread. However, the systematic focus by scholars and clinicians on the possibilities for growth from the struggle with crisis is relatively recent. There are now a growing number of studies and scholarly papers on the antecedents, correlates, and consequences of posttraumatic growth, and there are also theoretical models that can help guide the research further. It is clear, however, that this phenomenon is not yet well understood. The *Handbook of Posttraumatic Growth: Research and Practice* provides both clinicians and researchers with a comprehensive and up-to-date view of what has been done so far. In addition, it uses the foundations of what has been done to provide suggestions for the next useful steps to take in understanding posttraumatic growth. The book offers contributions of important and influential scholars representing a wide array of perspectives of posttraumatic growth. This volume serves as an impetus for additional work, both in the academic aspects and in the possibilities for clinical applications of posttraumatic growth. This Handbook will appeal to students, practitioners, and

researchers working in a broad array of disciplines and human services.

**Hypnerotomachia Poliphili** Francesco Colonna, 2019-01-09 Francesco Colonna's weird, erotic, allegorical antiquarian tale, *Hypnerotomachia Poliphili*, together with all of its 174 original woodcut illustrations, has been called the first stream of consciousness novel and was one of the most important documents of Renaissance imagination and fantasy. The author -- presumed to be a friar of dubious reputation -- was obsessed by architecture, landscape and costume (it is not going too far to say sexually obsessed) and its woodcuts are a primary source for Renaissance ideas.

**Power and Resistance** Wayne Antony, 2020-05-06T00:00:00Z How do we make sense of the social problems that continue to plague Canadian society? Our understanding of issues such as poverty, racism, violence, homophobia, crime and pollution stems from our view of how society is structured. From the dominant neoliberal perspective, social problems arise from individuals making poor choices. From a critical perspective, however, these social troubles are caused by structural social inequalities. Disparities in economic, social and political power — that is, relations of power based on class, race, gender and sexual orientation — are the central structural element of capitalist, patriarchal, colonialist societies. The contributors to *Power and Resistance* use this critical perspective to explore Canadian social issues such as poverty, colonialism, homophobia,

violence against women, climate change and so on. This sixth edition adds chapters on the corporatization of higher education, the lethal impacts of colonialism, democracy, the social determinants of health, drug policy and sexual violence on campus.
