The Dazzle of the Digital Meghna Bal,Vivan Sharan,2022-10-26 The Dazzle of the Digital is written in the context of digital technology’s inextricable link with progress and modernity in India, with the COVID pandemic in the backdrop. Digital technology such as smartphones and the internet exemplify the popular ideal of a modernity where the proliferation of data and information seamlessly translates into knowledge and value. The authors attempt to wrestle with this impulsive conflation of the digital with the modern, and argue that the former can sometimes retard progress rather than foster it. They provide examples from various spheres – ranging from public service delivery to private markets – to unpack the pitfalls of a blinkered view on modernity. The book presents an objective take on the potential of digital technology, written with the hope that it will prompt greater societal reflection on technology as a lever for advancement, at a time when the march of everything digital is inexorable.

Trauma- and Stressor-Related Disorders Frederick J. Stoddard Jr.,David M. Benedek,Mohammed R. Milad,Robert J. Ursano,2018-05-04 Trauma, stress, and manmade and natural disasters are increasingly impacting individuals and communities. The clinical and scientific advances presented here strive to address the rapidly expanding individual and community burden of disease resulting from the experience of traumatic or stressful events. The authors describe the suffering which trauma- and stressor-related disorders (TSRDs) cause, and explain in 30 concise chapters the state of the science for the DSM-5 trauma- and stressor-related disorders with regard to pathogenesis, diagnostic assessment and approach to treatment. This volume presents the genetic, neurochemical, developmental, and psychological foundations and epidemiology of the trauma- and stressor-related disorders, in addition to specific guidance on screening and evaluation, diagnosis, prevention, and biological, psychological and social treatments. The chapters in this book cover a variety of TSRDs: posttraumatic stress disorder, acute stress disorder, adjustment disorders, persistent complex bereavement disorder, and reactive attachment and disinhibited social engagement disorders. Graphics, including neuroimaging are integrated for easy reference and to aid grasping of key concepts. The book draws on the current literature and provides brief case scenarios from individuals and families exposed to psychological or physical traumas, including mass trauma events. Factors contributing to susceptibility to these disorders and to resilience are also addressed. Trauma- and Stressor-Related Disorders provides an in-depth yet succinct introduction to current clinical and research knowledge for trainees and for professionals including psychotherapeutic, psychopharmacological, public health, and policy interventions. It addresses the level of evidence for different best practices to target the disabling cognitive, emotional or behavioral symptoms for a specific patient or population.

Ислам в Европе Оришев А. Б.,2017-03-29 Книга посвящена исламизации Европы – уникальному явлению, которого еще не знала мировая история. Читатель увидит, как в течение последних 70 лет Европу накрыли «три волны» исламизации, каждая из которых была мощнее предыдущих. Приводятся смелые прогнозы аналитиков, предрекающие закат Европы. Автор, занимающийся проблемами диалога между Западом и Востоком уже более 20 лет, представляет оригинальную концепцию исламизации. Он развенчивает мифы вокруг ислама, разрушает многочисленные стереотипы, показывает весь драматизм сложившейся ситуации. Не ограничиваясь констатацией фактов, автор предлагает конкретные меры по выходу Западной Европы из цивилизационного кризиса.

Medications for Opioid Use Disorder Save Lives National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Sciences Policy,Committee on Medication-Assisted Treatment for Opioid Use Disorder,2019-06-16 The opioid crisis in the United States has come about because of excessive use of these drugs for both legal and illicit purposes and unprecedented levels of consequent opioid use disorder (OUD). More than 2 million people in the United States are estimated to have OUD, which is caused by prolonged use of prescription opioids, heroin, or other illicit opioids. OUD is a life-threatening condition associated with a 20-fold greater risk of early death due to overdose, infectious diseases, trauma, and suicide. Mortality related to OUD continues to escalate as this public health crisis gathers momentum across the country, with opioid overdoses killing more than 47,000 people in 2017 in the United States. Efforts to date have made no real headway in stemming this crisis, in large part because tools that already exist—like evidence-based medications—are not being deployed to maximum impact. To support the dissemination of accurate patient-focused information about treatments for addiction, and to help provide scientific solutions to the current opioid crisis, this report studies the evidence base on medication assisted treatment (MAT) for OUD. It examines available evidence on the range of parameters and circumstances in which MAT can be effectively delivered and identifies additional research needed.

Education and Natural Disasters David Smawfield,2013-03-28 What is the relationship between education and natural disasters? Can education play a role in ameliorating and mitigating them, preparing people in how to respond, and even helping to prevent them? If so, how? Drawing on research carried out in a number of different countries, including Australia, China, India, Japan, the UK and the USA, the contributors consider the role of education in relation to natural disasters. The case studies expand conceptual and empirical understandings of the understudied relationship between education and natural disasters and uncover the potential and the limitations of education for mitigating, responding to, and potentially preventing, natural disasters. The contributors also consider the extent to which so-called natural disasters, such as mudslides caused by deforestation and flooding areas built on known flood plains, are linked to human behaviour and how education can impact on these.

Handbook of Social Work in Health and Aging Barbara Berkman,2006-02-09 The Handbook of Social Work in Health and Aging is the first reference to combine the fields of health care, aging, and social work in a single, authoritative volume. These areas are too often treated as discrete entities, while the reality is that all social workers deal with issues in health and aging on a daily basis, regardless of practice specialization. As the baby boomers age, the impact on practice in health and aging will be dramatic, and social workers need more specialized knowledge about aging, health care, and the resources available to best serve older adults and their families. The volume's 102 original chapters and 13 overviews, written by the most experienced and prominent gerontological health care scholars in the United States and across the world, provide social work practitioners and educators with up-to-date knowledge of evidence-based practice guidelines for effectively assessing and treating older adults and their families; new models for intervention in both community-based practice and institutional care; and knowledge of significant policy and research issues in health and aging. A truly monumental resource, this handbook represents the best research on health and aging available to social workers today.

Anger in the Air Joyce A. Hunter,2016-04-15 The new realities of airline travel came into full focus after the September 11 terrorist attacks. These horrific events escalated air rage incidents by 400%, but more importantly they put the entire airline industry under the spotlight. In subsequent years, the general public began to voice frustrations with the industry in very dramatic ways, a marked shift in consumer behavior from that of before 9/11. The International Transport Workers Federation responded with a call to action to bring about major changes to raise the airline industry to a level of service quality sufficient to meet the needs of 21st Century passengers. The quality of services that airline customers expect and the propensity toward air rage needs to be understood. Undoubtedly, some passengers are prone to air rage by factors in no way related to customer service. However, a better understanding of the customer's perception of service and airlines' offerings is one way of addressing the air rage crisis, combating the contributing factors long before they conspire to provoke a damaging incidence. Anger in the Air: Combating the Air Rage Phenomenon provides airlines with valuable input to help them better meet the service expectations of their customers and avoid instances of air rage on their flights. What do today's customers need and expect? What do airline customers perceive as the quality of services and how can the gap be closed between expectations and perceptions? The book addresses these key issues in five stages: 1.
