**Handbook of Asian Education** Yong Zhao, Jing Lei, Guofang Li, Ming Fang He, Kaori Okano, Nagwa Megahed, David Gamage, Hema Ramanathan, 2010-11-30 Comprehensive and authoritative, this Handbook provides a nuanced description and analysis of educational systems, practices, and policies in Asian countries and explains and interprets these practices from cultural, social, historical, and economic perspectives. Using a culture-based framework, the volume is organized in five sections, each devoted to educational practices in one civilization in Asia: Sinic, Japanese, Islamic, Buddhist, and Hindu. Culture and culture identities essentially are civilization identities; the major differences among civilizations are rooted in their different cultures. This framework offers a novel approach to capturing the essence of the diverse educational systems and practices in Asia. Uniquely combining description and interpretation of educational practices in Asia, this Handbook is a must-have resource for education researchers and graduate students in international and comparative education, globalization and education, multicultural education, sociocultural foundations of education, and Asian studies, and for educational administrators and education policy makers.

**Handbook of Networks in Power Systems I** Alexey Sorokin, Steffen Rebennack, Panos M. Pardalos, Niko A. Iliadis, Mario V. F. Pereira, 2012-02-29 Energy has been an inevitable component of human lives for decades. Recent rapid developments in the area require analyzing energy systems not as independent components but rather as connected interdependent networks. The Handbook of Networks in Power Systems includes the state-of-the-art developments that occurred in the power systems networks, in particular gas, electricity, liquid fuels, freight networks, as well as their interactions. The book is separated into two volumes with three sections, where one scientific paper or more are included to cover most important areas of networks in power systems. The first volume covers topics arising in electricity network, in particular electricity markets, smart grid, network expansion, as well as risk management. The second volume presents problems arising in gas networks; such as scheduling and planning of natural gas systems, pricing, as well as optimal location of gas supply units. In addition, the second volume covers the topics of interactions between energy networks. Each subject is identified following the activity on the domain and the recognition of each subject as an area of research. The scientific papers are authored by world specialists on the domain and present either state-of-the-arts reviews or scientific developments.

*Manufacturing Towns in China* Yue Gong, 2018-12-29 This book offers an engaging and unique view of the governance of Chinese rural migrants in non-factory areas of manufacturing towns. By asking how authorities govern migrants as an ongoing source of cheap labor, this book demonstrates and interprets authorities' power exercised in the form of governing rationalities, regulations, programs, activities, and designated non-factory spaces—town and village centers and migrant living zones. These power exercises take place routinely in migrants' everyday lives but typically veil themselves, producing knowledge that legitimates our understanding of migrants. Based on their power exercises, authorities' governance of migrants, like multiple "invisible filters" that select and help create migrant labor in non-factory areas, leads to an inclusion of a certain number of migrants as cheap factory workers and an exclusion of the rest. Nevertheless, by exercising their unique power techniques, migrants can resist and alter authority governance; thus the authorities' power exercises are deficient and may ultimately be futile. This book details these power exercises, offers rewarding insights, and can greatly enrich our understanding of China's local governance of migrants and migrant resistance.

*The Draft UNCITRAL Digest and Beyond* Franco Ferrari, Harry Flechtner, Ronald A. Brand, 2003-01-01 "The Draft UNCITRAL Digest and Beyond" is one of the most useful single volumes available on the CISG. It includes the full text of the draft "UNCITRAL Digest" which catalogues the cases and arbitral awards to date that have interpreted and applied the CISG on an article by article basis. "The Digest and Beyond" includes also commentary by eminent CISG scholars that addresses issues not yet considered in the cases. With more than 1000 decisions applying the CISG in courts and arbitral tribunals around the world, the UNCITRAL Secretariat charged five CISG experts from a variety of regions with the task of creating a digest of CISG case law. "The Digest and Beyond" includes the draft "UNCITRAL Digest", even before it is released officially by UNCITRAL. It also goes where the authors of the Digest were not allowed to go, given the narrow mandate within which the drafters were asked to work. Its chapters build upon the work of the "UNCITRAL Digest". The Digest describes the reasoning and results of existing CISG cases; in "The Digest and Beyond", the Digest authors analyze those cases, and discuss issues that have not yet arisen in the case law. Thus, in many ways, "The Digest and Beyond" provides scholarship that can direct future cases in areas that have not yet been considered by courts and arbitrators as well as in areas in which contradictory court decisions exist.

**Under the Eagle** Samuel Holiday, Robert S. McPherson, 2013-08-13 Samuel Holiday was one of a small group of Navajo men enlisted by the Marine Corps during World War II to use their native language to transmit secret communications on the battlefield. Based on extensive interviews with Robert S. McPherson, *Under the Eagle* is Holiday's vivid account of his own story. It is the only book-length oral history of a Navajo code talker in which the narrator relates his experiences in his own voice and words. *Under the Eagle* carries the reader from Holiday's childhood years in rural Monument Valley, Utah, into the world of the United States's Pacific campaign against Japan—to such places as Kwajalein, Saipan, Tinian, and Iwo Jima. Central to Holiday's story is his Navajo worldview, which shapes how he views his upbringing in Utah, his time at an Indian boarding school, and his experiences during World War II. Holiday's story, coupled with historical and cultural commentary by McPherson, shows how traditional Navajo practices gave strength and healing to soldiers facing danger and hardship and to veterans during their difficult readjustment to life after the war. The Navajo code talkers have become famous in recent years through books and movies that have dramatized their remarkable story. Their wartime achievements are also a source of national pride for the Navajos. And yet, as McPherson explains, Holiday's own experience was "as much mental and spiritual as it was physical." This decorated marine served "under the eagle" not only as a soldier but also as a Navajo man deeply aware of his cultural obligations.

*Breaking Out of the Pink-Collar Ghetto: Policy Solutions for Non-College Women* Sharon H. Mastracci, 2016-07-22 Widely interdisciplinary in appeal, this book reports on the successes of innovative training opportunities for non-college women who end up in low-paying, low-mobility, pink-collar jobs. The author examines the relative effectiveness of various programs in helping these women gain access to high-wage, high-mobility employment opportunities. The analysis includes case studies of grant-funded projects, as well as in-depth statistical analysis using ten years of data on women throughout the United States. These types of education and training options are in tremendous demand, and the author finds that they are having a powerful impact on the job prospects of non-college women. As an integral part of her study, she spells out what kinds of programs have proven most and least effective. *Breaking Out of the Pink-Collar Ghetto* addresses vital issues concerning the effects of gender segregation in career counseling and employment and training policy. It provides much-needed guidance on employment and training services delivery. The book has wide application for students as well as professionals in the fields of public policy and public administration, educational counseling and vocational education, labor economics, and women's studies.

**Ideas with Consequences** Amanda Hollis-Brusky, 2015 Many of these questions—including the powers of the federal government, the individual right to bear arms, and the parameters of corporate political speech—had long been considered settled. But the Federalist Society was able to upend the existing conventional wisdom, promoting constitutional theories that had previously been dismissed as ludicrously radical. Hollis-Brusky argues that the Federalist Society offers several of the crucial ingredients needed to accomplish this constitutional revolution. It serves as a credentialing institution for conservative lawyers and judges, legitimizes novel interpretations of the constitution through a conservative framework, and provides a judicial audience of like-minded peers, which prevents the well-documented phenomenon of conservative judges turning moderate after years on the bench. Through these functions, it is able to

exercise enormous influence on important cases at every level.

**Who Will Bell The Cow?** Shruti Ganapatye,2022-11-28 The word 'cow' rocked India after 2014 when news related to the beef ban, mob lynching, violence poured out almost every day. The cow's status was suddenly elevated and her sacredness surpassed all limits. Self-styled vigilantes called gau rakshaks took the law into their hands creating terror in the country and threatening minorities and marginalised communities. The book "Who Will Bell The Cow?" tells every possible story about the rise of cow politics in recent times. It connects history with the present, making sense of ongoing violence in the name of the cow and beef ban. It uncovers the 'sacred' layers around the cow to show the real motive behind the movement. The data compiled from various sources about crimes related to the cow slaughter and beef ban and its socio-economic impact on various industries allied to cows offers more insight for the readers to draw their own conclusions. There is a caution against the movement that might lead to the extinction of the cattle. In the end, it has posed a question for readers if our diverse food culture is at peril under the guise of homogenisation.

**Efficient Learning for the Poor** Helen Abadzi,2006 Large-scale efforts have been made since the 1990s to ensure that all children of the world go to school. But mere enrollment is not sufficient, students must become fluent in reading and calculation by the end of grade 2. Fluency is needed to process large amounts of text quickly and use the information for decisions that may ultimately reduce poverty. State-of-the-art brain imaging and cognitive psychology research can help formulate effective policies for improving the basic skills of low-income students. This book integrates research into applications that extend from preschool brain development to the memory of adult educators. In layman's terms, it provides explanations and answers to questions such as: Why do children have to read fast before they can understand what they read? How do health, nutrition, and stimulation influence brain development? Why should students learn basic skills in their maternal language? Is there such a thing as an untrained teacher? What signs in a classroom show whether students are getting a quality education? How must information be presented in class so that students can retain it and use it? What training techniques are most likely to help staff put their learning into use? This book would be useful to policymakers, donor agency staff, teacher trainers, supervisors, and inspectors, as well as university professors and students.

**Constructing Regional Security** W. Durch,2016-04-30 In this book William Durch examines conventional weapons proliferation since World War II, the role of arms transfers in fueling regional conflict, and prospects for curbing the global arms trade. Noting that supply side arms control efforts, which seek to constrain the companies and countries that produce and distribute major conventional weapons, have a poor international track record, Durch argues for a broader approach that tries to get at the demand side of the equation. Addressing the political and regional dynamics that impel arms acquisitions, he looks at how arms control might be combined with confidence and security-building measures to contain demand, and how value-based arms trade control measures like 'codes of conduct' could be implemented in stepwise fashion consistent with US national interests in regional stability.

*Essential Emergency Trauma* Kaushal H. Shah,Daniel Egan,Joshua Quaas,2012-02-17 *Essential Emergency Trauma* is a concise, reader-friendly, and portable reference on the care of trauma patients in the emergency department. Geared to practicing emergency physicians, residents, and medical students. Major sections cover trauma of each anatomic region. Each section opens with a chapter The First 15 Minutes, Algorithm, and Decision Making. Subsequent chapters focus on specific injury patterns, emphasizing pathophysiology, diagnosis, evaluation, and management. The information is presented in bullet points with numerous tables and images. Each chapter ends with an up-to-date review of the Best Evidence.

*Spirit Possession and Communication in Religious and Cultural Contexts* Caroline Blyth,2020-11-29 *Spirit Possession and Communication in Religious and Cultural Contexts* explores the phenomenon of spirit possession, focusing on the religious and cultural functions it serves as a means of communication. Drawing on the multidisciplinary expertise of philosophers, anthropologists, historians, linguists, and scholars of religion and the Bible, the volume investigates the ways that spirit possession narratives, events, and rituals are often interwoven around communicative acts, both between spiritual and earthly realms and between members of a community. This book offers fresh insight into the enduring cultural and religious significance of spirit possession. It will be an important resource for scholars from a diverse range of disciplines, including religion, anthropology, history, linguistics, and philosophy.

The Next Government of the United States: Why Our Institutions Fail Us and How to Fix Them Donald F. Kettl,2009-09 Presents arguments for why the twentieth-century methods of the American government are inadequate for handling twenty-first-century issues, making strategic recommendations in such arenas as health care, disaster recovery, and foreign policy. 13,000 first printing.

**Pictures at a Revolution** Mark Harris,2008 Documents the cultural revolution behind the making of 1967's five Best Picture-nominated films, including *Guess Who's Coming to Dinner*, *The Graduate*, *Doctor Doolittle*, *In the Heat of the Night*, and *Bonnie and Clyde*, in an account that discusses how the movies reflected period beliefs about race, violence, and identity. 40,000 first printing.

**Collected Works of John Stuart Mill** John M. Robson,2013-10-16 The *Collected Works of John Stuart Mill* took thirty years to complete and is acknowledged as the definitive edition of J.S. Mill and as one of the finest works editions ever completed. Mill's contributions to philosophy, economics, and history, and in the roles of scholar, politician and journalist can hardly be overstated and this edition remains the only reliable version of the full range of Mill's writings. Each volume contains extensive notes, a new introduction and an index. Many of the volumes have been unavailable for some time, but the Works are now again available, both as a complete set and as individual volumes.

*Chemical Energy from Natural and Synthetic Gas* Yatish T. Shah,2017-03-16 Commercial development of energy from renewables and nuclear is critical to long-term industry and environmental goals. However, it will take time for them to economically compete with existing fossil fuel energy resources and their infrastructures. Gas fuels play an important role during and beyond this transition away from fossil fuel dominance to a balanced approach to fossil, nuclear, and renewable energies. *Chemical Energy from Natural and Synthetic Gas* illustrates this point by examining the many roles of natural and synthetic gas in the energy and fuel industry, addressing it as both a transition and end game fuel. The book describes various types of gaseous fuels and how are they are recovered, purified, and converted to liquid fuels and electricity generation and used for other static and mobile applications. It emphasizes methane, syngas, and hydrogen as fuels, although other volatile hydrocarbons are considered. It also covers storage and transportation infrastructure for natural gas and hydrogen and methods and processes for cleaning and reforming synthetic gas. The book also deals applications, such as the use of natural gas in power production in power plants, engines, turbines, and vehicle needs. Presents a unified and collective look at gas in the energy and fuel industry, addressing it as both a transition and end game fuel. Emphasizes methane, syngas, and hydrogen as fuels. Covers gas storage and transport infrastructure. Discusses thermal gasification, gas reforming, processing, purification and upgrading. Describes biogas and bio-hydrogen production. Deals with the use of natural gas in power production in power plants, engines, turbines, and vehicle needs.
