Integration of the Armed Forces, 1940-1965 Morris J. MacGregor,2020-06-18 In the quarter century that followed American entry into World War II, the nation's armed forces moved from the reluctant inclusion of a few segregated Negroes to their routine acceptance in a racially integrated military establishment. Nor was this change confined to military installations. By the time it was over, the armed forces had redefined their traditional obligation for the welfare of their members to include a promise of equal treatment for black servicemen wherever they might be. In the name of equality of treatment and opportunity, the Department of Defense began to challenge racial injustices deeply rooted in American society. For all its sweeping implications, equality in the armed forces obviously had its pragmatic aspects. In one sense it was a practical answer to pressing political problems that had plagued several national administrations. In another, it was the services' expression of those liberalizing tendencies that were permeating American society during the era of civil rights activism. But to a considerable extent the policy of racial equality that evolved in this quarter century was also a response to the need for military efficiency. So easy did it become to demonstrate the connection between inefficiency and discrimination that, even when other reasons existed, military efficiency was the one most often evoked by defense officials to justify a change in racial policy. Morris J. MacGregor, Jr., received the A.B. and M.A. degrees in history from the Catholic University of America. He continued his graduate studies at the Johns Hopkins University and the University of Paris on a Fulbright grant. Before joining the staff of the U.S. Army Center of Military History in 1968 he served for ten years in the Historical Division of the Joint Chiefs of Staff.

Managers are constantly faced with HRM issues, problems, and decision making and the text's primary goal is to show how each manager must be a human resource problem solver and diagnostician. Global Human Resource Management Carol Nixon, 2019-06-02 Global Human Resource Management therefore is a very challenging front in Human Resource Management. If one is able to strike the right chord in designing structures and controls, the job is half done. Subsidiaries are held together by Global Human Resource Management, different subsidiaries can function operate coherently only when it is enabled by efficient structures and controls. Globally, the corporate experts are putting in their best efforts to research, renovate and redefine the tools, techniques and concepts of business management to provide customized services and improve the efficiency level of employees. Apart from these tolls, techniques and concepts of business management, there is a need to understand other things that can strengthen professional acumen and can improve competencies. The new millennium prompts us to take a hard look at what all has gone by, what is the scenario today and what needs to be changed to meet the new demands of the future. Therefore, the human resource function will be to survive, cope and adapt in the turbulent environment along with their primary aim of working for an all-round development of our most important resource 'The Human Being'. This book is an aims in bringing the field closer together by illustrating and analysing some of the analytic and practical links between the two. We do not seek to submerge the distinctive and different contributions from industry and marketing management makes to our understanding of management of human resource and organisation.

HRM's Contribution to Hard Work Ivan Svetlik, Branko Ilić, 2006 The book seeks answers to the question: how has Human Resource Management contributed and how could it have contributed to the development of organisations and economy? Based on theories and literature review each contribution compares HRM practices of several thousand European middle and large organisations, with a special focus on Slovenia, one of the new EU member states, which has successfully managed its transition to market economy. The analyses reveal how strategic the role of HRM in organisations is, how it balances between hard and smart work and between more or less friendly forms of work and employment flexibility. Critical observations of traditional managerial practices, including autocratic and non-participative leadership, which have impacts not only on the organisations but also

on wider society, are made. The position of youth is particularly accentuated. Clear differences in these respects have been observed in the wider European area. Recommendations for managers on how their organisations and HRM should be shaped on the way to the knowledge economy are elaborated.
