**Linked Data for Digital Humanities** Terhi Nurmikko-Fuller,2023-08-18 Linked Data for Digital Humanities provides insights into how digital technologies can enrich and diversify humanities scholarship and make it pioneering in the digital age. Written in non-specialist language, the book illustrates how information is captured, published, represented, accessed, and interpreted using computational systems and, in doing so, shows how technologies actively shape the way we understand what we encounter. Focusing as it does on underlying Web architecture and projects accessible online, the book has an inherently international focus. The interdisciplinary case study examples include bibliographic data from works published in England between 1470 and 1700; literature from ancient Iraq; jazz performances, predominantly from the USA in the 1930s; and even reach as far as an alien, fictional future. Whilst these case study examples span vast spatio-temporal distances, they all share a common thread in the use of the Linked Data information publication paradigm. Using existing computer science methods, as well as processes such as ontology development and database design, the book also includes reflections on practical considerations and offers advice about how to take institutional policies, socio-cultural sensitivities, and economic models into consideration when implementing Linked Data projects. Linked Data for Digital Humanities discusses technological issues in the context of Humanities scholarship, bridging disciplines and enabling informed conversations across disciplinary boundaries. It will be of interest to humanities scholars, computer and data scientists, and library and information scientists.

**High Acid Crudes** James G. Speight,2014-04-30 High Acid Crudes quickly gets the refinery manager and all other relative personnel up to date on this particular type of feedstock by providing an overview and relevant details of the identification of high acid crudes and their influence on the refinery's process units, especially regarding corrosion potential. Covering the types, effects on the various refining units, and proper acid stripping techniques, High Acid Crudes effectively trains refinery personnel with a quick reference guide for day-to-day use in today's refineries. Due to their discounted value but potential for higher production rates, refineries are accepting more of high acidic crude feedstocks, otherwise referred to as "opportunity or "challenging crude oils. Refining of these resources is still increasing due to high oil prices, with China dominating this market and doubling their production of high acid crudes by 2015. Processing these resources can significantly increase any refinery's productivity, but knowledge and proper training for the refinery manager and crude supplier is key to reducing the risk that is commonly associated with high acid feedstocks, while still maintaining clean production standards. Provides an overview of the identification of high acid crudes and their influence on the refinery's process units Covers the types of high acid crudes, effects on the various refining units, and proper acid stripping techniques Trains refinery personnel as a quick reference guide for day-to-day use for today's refinery

*Dependable Computing - EDCC 2005* Mario Dal Cin,2005-04-13 This book constitutes the refereed proceedings of the 5th European Dependable Computing Conference, EDCC 2005, held in Budapest, Hungary in April 2005. The 21 revised full papers, 5 revised practical experience reports, and 4 prototype description papers presented together with the abstract of a keynote and 2 fast-track papers were carefully reviewed and selected from 90 submissions. The papers are organized in topical sections on distributed algorithms, fault-tolerant design and protocols, practical experience reports and tools, assessment and analysis, measurement, hardware verification, dependable networking, and reliability engineering and testing.

*Telepresence in Training* Jean-Luc Rinaudo,2018-11-26 The different forms of telepresence in education, in distance learning, in student support, in the use of learning environments or even at the heart of robot systems, are developed in universities and higher education facilities specializing in professional training. They constitute opportunities to reform arguments and give rise to important questions: how should we think about the hierarchy of presence and absence in these techniques in order to make possible "the presence of the absent"? What is the effect on mediation processes? On the perception of the body and on identity? How does it transform collaborative work? Telepresence in Training brings together research that attempts to answer these questions by using studies and practical supports from higher education, with regards to teacher training and telepresence robots in France, Belgium, Switzerland and Quebec.

After analyzing sampling of cases in the various countries of the world, possibly generated intellectual questions about the real situation in the West and East and the need for a global joint efforts in order to achieve gender equality stop be a utopia and merely declaratory provision.

When Fracking Comes to Town Sabina E. Deitrick,Ilia Murtazashvili,2022-01-15 When Fracking Comes to Town traces the response of local communities to the shale gas revolution. Rather than cast communities as powerless to respond to oil and gas companies and their landmen, it shows that communities have adapted their local rules and regulations to meet the novel challenges accompanying unconventional gas extraction through fracking. The multidisciplinary perspectives of this volume's essays tie together insights from planners, legal scholars, political scientists, and economists. What emerges is a more nuanced perspective of shale gas development and its impacts on municipalities and residents. Unlike many political debates that cast fracking in black-and-white terms, this book's contributors embrace the complexity of local responses to fracking. States adapted legal institutions to meet the new challenges posed by this energy extraction process while under-resourced municipal officials and local planning offices found creative ways to alleviate pressure on local infrastructure and reduce harmful effects of fracking on the environment. The essays in When Fracking Comes to Town tell a story of community resilience with the rise and decline of shale gas production. Contributors: Ennio Piano, Ann M. Eisenberg, Pamela A. Mischen, Joseph T. Palka, Jr., Adelyn Hall, Carla Chifos, Teresa Córdova, Rebecca Matsco, Anna C. Osland, Carolyn G. Loh, Gavin Roberts, Sandeep Kumar Rangaraju, Frederick Tannery, Larry McCarthy, Erik R. Pages, Mark C. White, Martin Romitti, Nicholas G. McClure, Ion Simonides, Jeremy G. **Eco-efficiency, Regulation, and Sustainable Business** Raimund Bleischwitz, Peter Hennicke, 2004-01-01 This book presents important new research on applied eco-efficiency concepts throughout Europe. The aim of eco-efficiency is to achieve market-based measures of environmental protection, in order to enhance the prospects for sustainable development and achieve positive economic and ecological benefits. The distinguished authors discuss a number of themes surrounding eco-efficiency including the necessary conditions for technological dissemination and ecological modernization, and the role of government in enabling businesses and society to participate actively in this process. In particular, they highlight the application of existing European-based policies concerning material flows and energy. The authors also investigate some new concepts of sustainable development and provide a useful introduction to material flows analysis. In further chapters they study the emerging regulatory policies for eco-efficiency, and examine the issues of sustainable business and consumption strategies. Environmental and ecological economists, policymakers and political scientists will welcome this original and insightful book which aims to translate the theory of sustainable development into practical policy and business-related solutions.

**Uncharitable** Dan Pallotta, 2010 A courageous call to free charity from its ideological and economic constraints

**Powers of Two** Joshua Wolf Shenk, 2014-08-05 The power of collaboration, from Lennon and McCartney to Wozniak and Jobs: "An inspiring book that also happens to be a great read" (Daniel H. Pink, author of *Drive*). Throughout history, partners have buoyed each other to better work—though often one member is little known to the general public. (See Warren Buffett and Charlie Munger, or Vincent and Theo van Gogh.) *Powers of Two* draws on neuroscience, social psychology, and cultural history to present the social foundations of creativity, with the pair as its primary embodiment. Revealing the six essential stages through which creative intimacy unfolds, this book shows how pairs begin to talk, think, and even look like each other; how the most successful ones thrive on conflict; and why some cease to work together while others carry on. At once intuitive and deeply surprising, *Powers of Two* will reshape the way you view individuals, relationships, and society itself. "A rare glimpse into the private realms of duos . . . A natural storyteller." —The New York Times "A book about magic, about the Beatles, about the chemistry between people, about neuroscience, and about the buddy system; it examines love and hate, harmony and dissonance, and everything in between . . . Wise, funny, surprising, and completely engrossing." —Susan Orlean "We sometimes think of creativity as coming from brilliant loners. In fact, it more often happens when bright people pair up and complement each other. Shenk's fascinating book shows how to spark the power of this phenomenon." —Walter Isaacson "Surprising, compelling . . . Shenk banishes the idea of solitary genius by demonstrating that our richest art and science come from collaboration: we need one another not only for love, but also for thinking and imagining and growing and being." —Andrew Solomon

**Soil Law and Governance in India** Bharat H. Desai, 2023-12-29 This curated book addresses, in the scholarly realm, the problems of soil degradation and provides some practical solutions for them to save soil life. It comprises ten specially invited chapters that address the global soil framework, soil challenges in India, existing policy, law and institutional framework as well as other perspectives. Soil is our biological capital. The soil health is critical for survival of the humans (and other life forms) since almost 95% of our food comes from it. It also has significant potential as a sink for carbon through sequestering. Excessive and inappropriate land use leads to various forms of land degradation that becomes contributing factor for hunger, migration and even wars. There are several multilateral environmental agreements (MEAs) including UN Convention to Combat Desertification (UNCCD) that hold relevance for addressing the global soil problematique. The UNCCD Strategic Framework (2018-2030) has declared desertification/land degradation and drought (DLDD) as "challenges of a global dimension". As a result, sustainable soil management (SSM) has emerged as an important goal for attaining Sustainable Development Goals 2030 (SDGs 2030). In the backdrop of these globally ordained processes, India appears to be seriously pursuing the Land Degradation Neutrality (LDN) target within the framework of the UNCCD. As a corollary, India has set an ambitious goal of halting any further land degradation by 2030 and rehabilitate at least 30 million hectares of degraded wasteland, forest land and agricultural land. This ideational effort by eminent legal scholars, soil scientists and practitioners aim to promote concerted teaching and research in the field of soil law and governance in the University Faculties of Law, National Law Schools, Institutions of Eminence and other legal and scientific bodies. The 'seeds sown' in the soil of knowledge through this effort will, hopefully, provide an impetus for more in-depth research concerning soil law and governance in India and beyond.

**The Criminalization of Violence Against Women** Douglas, 2023-10-15 Historically states have failed to seriously confront violence against women. In response, in many countries women's rights movements have called on the government to prioritize state intervention in cases involving violence between intimate partners, sexual harassment, rape, and sexual assault by both strangers and intimate partners. Those interventions have taken various forms, including the passage of substantive civil and criminal laws governing intimate partner violence, rape and sexual assault, and sexual harassment; the development of civil orders of protection; and the introduction of procedures in the criminal legal system to ensure the effective intervention of police and prosecutors. Indeed, many countries have relied upon intervention by the criminal legal system to meet their requirements under international human rights standards that obligate states to prevent, protect from, prosecute, punish, and provide redress for violence. Although states have taken divergent approaches to the passage and implementation of criminal laws and procedures to address violence against women, two things are clear: criminalization is a primary strategy relied upon by most nations, and yet criminalization is not having the desired impact. This collection explores the extent to which nations have adopted criminal legal reforms to address violence against women, the consequences associated with the implementation of those laws and policies, and who bears those consequences most heavily. The chapters examine the need for both more and less criminalization, ask whether we should think differently about criminalization, and explore the tensions that emerge when criminal law, civil law and social policy speak or fail to speak to each other. Drawing on criminalization approaches and recent debates from across the globe, this collection provides a comparative approach to assess the scope, impact of, and alternatives to criminalization in the response to violence against women.

**The Making of Julia Gillard** Jacqueline Kent, 2010 Julia Gillard is an exceptional Australian political figure. The first woman to be deputy prime minister, and tipped by many to get the top job in the future, she is admired on both sides of politics as well as by the public. She is not loved by everybody. Her career has been marked by pitched battles with jealous rivals and powerful factions. To conservatives she is still 'red Julia'; to some on the Left she is still a politician too willing to compromise. She is widely perceived to be ambitious, and yet

does she want to be prime minister? The Making of Julia Gillard tells Gillard's remarkable story, including her Adelaide childhood, her time as a fiery student activist, her battles to get into Parliament and her relationships with the important men in her political life: Simon Crean, Kim Beazley, Mark Latham and Kevin Rudd. In this immensely readable book, acclaimed biographer Jacqueline Kent draws on interviews with Gillard's friends and foes - and with Gillard herself - to reveal just how adversarial her environment has been and how she has thrived.

*Advances in Location-Based Services* Georg Gartner, Felix Ortog, 2011-11-02 This book gives a general picture of research-driven activities related to location and map-based services. The interdisciplinary character of the topic leads to a variety of contributions with backgrounds from academia to business and from computer science to geodesy. While cartography is aiming at efficient communication of spatial information, the development and availability of technologies like mobile networking, mobile devices or short-range sensors lead to interesting new possibilities of achieving this aim. By trying to make use of the available technologies, a variety of related disciplines looks specifically at user-centered and context-aware system development, especially in wayfinding and navigation systems.

**Banking Secrecy and Offshore Financial Centers** Mary Alice Young, 2013-02-11 This book brings together the issues surrounding banking secrecy and confiscation of criminal proceeds. The book examines the existing legal agreements at the international, regional and national levels and their interaction in the substantive areas of confiscation, anti-money laundering and banking confidentiality laws. It looks at how these agreements have been applied in offshore financial centers and demonstrates that despite a number of legally binding UN Conventions as well as global anti-money laundering recommendations, the implementation of them is often lukewarm by those Parties who have ratified the Convention and adopted obligations, because of this the confiscation legislation is incompatible with strict banking confidentiality laws. The work draws on the experience of criminologists to offer critical insight into the legislative frameworks designed to deal with banking secrecy and confiscation in offshore financial centers. It goes on to offer suggestions for measures that may be taken by major economies to circumvent the lack of cooperation by offshore financial centers as intolerance towards money laundering grows in light of recent political and economic events. This book will be of particular interest to students and scholars of Law, Finance and Criminology.
