Citizenship Pedagogies in Asia and the Pacific Kerry J Kennedy,Wing On Lee,David L Grossman,2012-02-28 How are students in Asia and the Pacific taught to be effective citizens? Following two successful volumes previously published in this series, *Citizenship Education in Asia and the Pacific: Concepts and Issues* and *Citizenship Curriculum in Asia and the Pacific*, this volume focuses on citizenship pedagogies that are promoted by governments in the region, advocated by scholars, and adapted in the schools and classrooms where citizenship education takes place every day. Thirteen case studies from diverse societies in Asia and the Pacific highlight the ways in which teachers and students think about, experience or plan for citizenship teaching and learning. Different methods – vignettes, student surveys, case studies and literature reviews – are used to portray these experiences, from both macro- and micro-analytic perspectives. The wide array of case studies provides rich information and insights into the realities and possibilities of pedagogies for citizenship across the region.

Global Labor and Employment Law for the Practicing Lawyer Andrew P. Morriss,Samuel Estreicher,2010-01-01 In recognition of the growing importance of global labour and employment law, the Center for Labor and Employment Law at New York University School of Law dedicated its 61st Annual Conference on Labor to an in-depth examination of issues arising in this area. This volume of the proceedings of the 2008 conference contains papers presented at that meeting, all here updated to reflect recent developments, as well as additional contributions from other practitioners and academics with extensive knowledge and experience in the field. Experts from both the practicing bar and academia - twenty-seven in all - use their unique strengths to address issues worthy of concern in each juridical realm. An unusual feature of this volume in the series is its in-depth attention to comparative law in the field, with exploration of developments in China, France, and New Zealand, as well as in European Union law. As always, this annual conference captures valuable insights and syntheses of central labour and employment law issues and will be of great value to practitioners and academics in the field.

It provides details for mapping regolith landforms, as well as objective information on applications in mineral exploration and natural resource management. Regolith Science also provides a concise history of weathering through time in Australia. Written by experts in the field, Regolith Science summarises research carried out over a 13-year period within the Cooperative Research Centre for Landscape Environments and Mineral Exploration. This book will be a valuable resource for scientists and graduate/postgraduate students in geology, geography and soil science, professionals in the exploration industry and natural resources management. This paperback edition is a reprint of the original hardback published in October 2008.

Weathering and the Riverine Denudation of Continents Pedro José Depetris,Andrea Inés Pasquini,Karina Leticia Lecomte,2013-11-19 In this monograph the authors present an overview of the state-of-the-art and use examples or case histories to illustrate the combined role of rock decay and rivers on continental denudation. The Earth's surface dynamics would not be conceivable without the fundamental component of rock weathering and the subsequent transport of solid debris and dissolved components to the coastal ocean through riverine drainage pathways. In other words, continental wear away is highly dependent on the mechanisms that control mineral decay. Moreover, besides the significant role played by rivers in shaping the Earth's outer skin, there is the important function that rivers perform in all geochemical cycles, mediating between the lithosphere, the hydrosphere, the biosphere and the hydrosphere. Drainage basins and the weathering of rocks that occur therein may be significant sources (or sinks) of carbon dioxide and, hence, play a significant role in affecting the Earth's climate.

Handbook on Human Rights in China Sarah Biddulph,Joshua Rosenzweig,2019 This Handbook gives a wide-ranging account of the theory and practice of human rights in China, viewed against international standards, and China's international engagements around human rights. Law and Policy for China's Market Socialism John Garrick,2012 Examines China's 'going out' policy by addressing the ways in which the underpinning legal reforms enable China to pursue its core interests and broad international responsibilities as a rising power. The contributors consider China's civil and commercial law reforms against the economic backdrop of an outflow of Chinese capital into strategic assets outside her own borders. This movement of capital has become an intriguing phenomenon for both ongoing economic reform and its largely unheralded underpinning law reforms.

International Engagement in China's Human Rights Titus Chen,Dingding Chen,2015-07-03 Since the Tiananmen Square incident in 1989 there has been increasing international pressure on China to improve its approach to human rights, whilst at the same time the Chinese government has itself realised that it needs to improve its approach, and has indeed done much to implement improvements. This book explores systematically the international engagement in human rights in China and assesses the impact of such foreign involvement. It looks at particular areas including criminal justice, labour, and religious freedom, considers the processes by which international pressure is brought to bear and the processes by which improvements are implemented in China, and concludes that, whilst China's human rights record has improved more than many people realise, further improvements are still needed.

This evaluative book provides an insight into tackling this important question for competition law, with contrasting critical perspectives, including theoretical, empirical, and doctrinal – the latter frequently from a comparative perspective. Echelon Defense Ryan D. Martinson,2018 This monograph examines China's approach to using sea power to defend and advance its maritime claims in the East China Sea and South China Sea. This approach, which Chinese strategists sometimes called echelon defense, involves the use of non-military instruments of sea power--especially maritime law enforcement forces--to vie with other states for control over disputed maritime space. These non-military forces operate on the first line (or echelon) of China's expanding frontier. Behind them, on the second line, China employs naval forces to deter foreign leaders from using force, thereby compelling them to compete on China's own terms. The echelon defense approach allows China to gradually achieve its objectives without risking a conflict or giving other great powers such as the United States sufficient grounds to intervene. Since 2006, when this approach was pioneered, it has enabled China to expand its influence and control in maritime East Asia. But it has also harmed China's relations with its neighbors and other great powers. Chinese Legal Reform and the Global Legal Order Yun Zhao,Michael Ng,2017-11-09 This volume critically evaluates the latest legal reform of China, covering major areas such as trade and securities law, online privacy law, criminal law, human rights and international law. It represents a bold departure from the most recent works on Chinese legal reform by engaging the ideas of experts in contemporary Chinese law with the archival scholarship of Chinese legal historians. This unique interdisciplinary feature affords readers a more nuanced view of the complexities and specificities of how China has problematised legal reforms in various historical contexts when building a progressive yet sustainable legal system.

This volume appraises the most current reform in Chinese law by considering China's engagement with globalisation, increasingly complicated domestic situation and historical legal transplantation experiences. It will be of huge interest to students, researchers and practitioners interested in Chinese law and policy, China and Asian studies and Chinese legal history.

Competition Law in the BRICS Countries Adrian Emch,Jose Regazzini,2012-09-01 Companies around the world and their advisors have realized, over the past few years, that they must be very aware of merger control and antitrust enforcement developments in Brasilia, Moscow, New Delhi, Beijing, and Pretoria. When one appreciates the extent of enforcement by the competition authorities of the powerful emerging economies of Brazil, Russia, India, China, and South Africa, it becomes clear that a fundamental change in the focus of international antitrust enforcement has occurred. Under the auspices of the International Bar Association, this timely, invaluable book examines in detail the fast-moving antitrust developments in the BRICS countries. Twenty-nine outstanding experts – practitioners, officials, and academics, each of them working in one of the five countries – present in-depth descriptions of the structure, powers, and procedures of their country’s respective enforcement agencies. Disclosure, transparency, benchmarking, portfolio of policymaking tools, and the speed, phasing, and priorities of implementation are all fully analysed. The authors provide summaries with implications of relevant cases in their jurisdictions. The issues and topics covered include the following: politics, resources, priorities; cooperation with criminal prosecutors and police; extraterritoriality; availability of administrative sanctions, criminal enforcement, and private actions; assessment of dominance; investigation: procedure, powers, burden of proof, appeal; procompetitive development of particular sectors of the economy; leniency programs; calculation of market share thresholds; triggering events/thresholds; notification thresholds and documents; employee and trade union involvement; and government participation and intervention. At a time when the BRICS antitrust agencies are increasingly asserting their roles in a multipolar antitrust world and cooperating with each other more and more, this thorough and up-to-date comparative analysis on what the BRICS countries are doing in the antitrust sector will be extremely valuable to corporate counsel worldwide. For academics and policymakers it will provide a highly revealing perspective on the current state of international competition law enforcement.

China's Socialist Rule of Law Reforms Under Xi Jinping John Garrick,Yan Chang Bennett,2016-01-29 Under the direction of the Communist Party of China (CPC), key legal challenges have been identified which will shape the modernization of China’s legal and administrative institutions. An increasingly complex set of legal actors now seek to influence this development, including securities regulators, bankers, accountants, lawyers, local-level mediators and some of China’s newly rich. Whilst the rising middle class wants to voice its interests and concerns, the CPC strives to maintain its leading role. This book provides a critical appraisal of China’s deepening socialist rule of law and looks ahead to the implications of the domestic reforms for the international legal domain. With contributions from leading Chinese law specialists, it draws on specific illustrations from judicial reform, constitutional law, procedural law, anti-corruption, property law and urban development, socio-economic dispute resolution and Chinese macro-economics. The book questions how China’s domestic law reforms will impact international legal systems, and how international law can be used in managing key regional and bilateral relationships and in dispute resolution, such as in the South China Sea and international trade. Assessing the state and direction of domestic law reform and including debates around the legal implications of some of China’s most pressing foreign policy challenges today, this volume will be of huge interest to students, scholars and practitioners with an interest in Asia law, Chinese law, international law, comparative law and law reform.
