*Russia, the Asymmetric Threat to the United States* John Wood, 2009-06-22 Exploring themes critical to understanding the current world order, this book lays bare the reality of the new Russia that emerged under Vladimir Putin. Russia holds the world's largest natural gas reserves, the second largest coal and uranium reserves, and the eighth largest oil reserves. Europe is dependent on Russia for 25 percent of its oil and gas. Russia is also positioning itself to play a similar role with respect to China. The key to this strategy is a network of new oil and natural gas pipelines that Russia is in the process of constructing, which will by-pass the problematic Ukraine, Georgia, Poland and the Baltic States in the West, and lock-in the enormous potential of China in the East. Further, as the Western economies including the USA begin themselves to recover, their growing energy dependence will come back into the forefront, and therefore the need to ensure that Russia does not fail in its opening up of new energy resources in the Arctic and Eastern Siberia. Russia is no longer a superpower, in the Cold War sense of the word, because its military is significantly weaker, and as such is incapable of conducting a regional let alone global war against either the United States or NATO. It is precisely because of its military weakness that Putin has been forced to adopt an asymmetric approach. Thus, the pipeline spigot and the proliferation of missiles and aircraft have become Russia's weapons of choice, along with an ever growing reliance on its strategic nuclear forces to provide it with the necessary deterrent to foreign aggression. In addition, Putin and Medvedev have no interest in an arms race with the United States, it is too costly and detracts from their priority, which is economic reform. From Putin's perspective, America is in the process of imposing absolute security or as Joint Vision 2020 put it: full spectrum dominance over the world. As the sole remaining superpower, the United States enjoys a massive strategic imbalance in its favor, which it has used first to contain, but now with the intent to control the world. How? NATO expansion lays the groundwork for a U.S. global missile defense system to contain perceived adversaries, such as Russia, which in turn secures the dominance of America through its Prompt Global Strike (PGS) capability – the ability to strike anywhere on the planet with impunity within 90 minutes of the order being given by The President. Thus, PGS will be to the 21st Century, what British Gun Boat Diplomacy was to the 19th Century. In such a context, Russia is forced to respond asymmetrically.

**Stricken Field** Jerome A. Greene, 2008 The Little Bighorn Battlefield National Monument is the site of one of America's most famous armed struggles, but the events surrounding Custer's defeat there in 1876 are only the beginning of the story. As park custodians, American Indians, and others have contested how the site should be preserved and interpreted for posterity, the Little Bighorn has turned into a battlefield in more ways than one. In Stricken Field, one of America's foremost military historians offers the first comprehensive history of the site and its administration in more than half a century. Jerome A. Greene has produced a compelling account of one of the West's most hallowed and controversial attractions, beginning with the battle itself and ending with the establishment of an American Indian memorial early in the twenty-first century. Chronicling successive efforts of the War Department and the National Park Service to oversee the site, Greene describes the principal issues that have confounded its managers, from battle observances and memorials to ongoing maintenance, visitor access, and public use. Stricken Field is a cautionary tale. Greene elucidates the conflict between the Park Service's dual mission to provide public access while preserving the integrity of a historical resource. He also traces the complex events surrounding the site, including Indian protests in the 1970s and 1980s that ultimately contributed to the 2003 dedication of a monument finally recognizing the Lakotas, Northern Cheyennes, and other American Indians who fought there.

After Alfred Pauline Stafford,2020-07-02 The vernacular Anglo-Saxon Chronicles cover the centuries which saw the making of England and its conquest by Scandinavians and Normans. After Alfred traces their development from their genesis at the court of King Alfred to the last surviving chronicle produced at the Fenland monastery of Peterborough. These texts have long been part of the English national story. Pauline Stafford considers the impact of this on their study and editing since the sixteenth century, addressing all surviving manuscript chronicles, identifying key lost ones, and reconsidering these annalistic texts in the light of wider European scholarship on medieval historiography. The study stresses the plural 'chronicles', whilst also identifying a tradition of writing vernacular history which links them. It argues that that tradition was an expression of the ideology of a southern elite engaged in the conquest and assimilation of old kingdoms north of the Thames, Trent, and Humber. Vernacular chronicling is seen, not as propaganda, but as engaged history-writing closely connected to the court, whose networks and personnel were central to the production and continuation of these chronicles. In particular, After Alfred connects many chronicles to bishops and especially to the Archbishops of York and Canterbury. The disappearance of the English-speaking elite after the Norman Conquest had profound impacts on these texts. It repositioned their authors in relation to the court and royal power, and ultimately resulted in the end of this tradition of vernacular chronicling.

Resistance, Repression, and Gender Politics in Occupied Palestine and Jordan Frances S. Hasso,2020-12-22 This book focuses on the central party apparatus of the Democratic Front for the Liberation of Palestine (DFLP), the Democratic Front (DF) branches established in the Occupied Palestinian Territories and Jordan in the 1970s, and the most influential and innovative of the DF women's organizations: the Palestinian Federation of Women's Action Committees in the occupied territories. Until now, no study of a Palestinian political organization has so thoroughly engaged with internal gender histories. In addition, no other work attempts to systematically compare branches in different regional locations to explain those differences. Students of gender and Middle East studies, especially those with a specialty in Palestinian studies, will find this work to be of critical importance. This book will also be of great interest to those working on political protest movements and factional ties.

*Final Report of the Truth and Reconciliation Commission of Canada, Volume One: Summary* Truth and Reconciliation Commission of Canada, 2015-07-22 This is the Final Report of Canada's Truth and Reconciliation Commission and its six-year investigation of the residential school system for Aboriginal youth and the legacy of these schools. This report, the summary volume, includes the history of residential schools, the legacy of that school system, and the full text of the Commission's 94 recommendations for action to address that legacy. This report lays bare a part of Canada's history that until recently was little-known to most non-Aboriginal Canadians. The Commission discusses the logic of the colonization of Canada's territories, and why and how policy and practice developed to end the existence of distinct societies of Aboriginal peoples. Using brief excerpts from the powerful testimony heard from Survivors, this report documents the residential school system which forced children into institutions where they were forbidden to speak their language, required to discard their clothing in favour of institutional wear, given inadequate food, housed in inferior and fire-prone buildings, required to work when they should have been studying, and subjected to emotional, psychological and often physical abuse. In this setting, cruel punishments were all too common, as was sexual abuse. More than 30,000 Survivors have been compensated financially by the Government of Canada for their experiences in residential schools, but the legacy of this experience is ongoing today. This report explains the links to high rates of Aboriginal children being taken from their families, abuse of drugs and alcohol, and high rates of suicide. The report documents the drastic decline in the presence of Aboriginal languages, even as Survivors and others work to maintain their distinctive cultures, traditions, and governance. The report offers 94 calls to action on the part of governments, churches, public institutions and non-Aboriginal Canadians as a path to meaningful reconciliation of Canada today with Aboriginal citizens. Even though the historical experience of residential schools constituted an act of cultural genocide by Canadian government authorities, the United Nation's declaration of the rights of aboriginal peoples and the specific recommendations of the Commission offer a path to move from apology for these events to true reconciliation that can be embraced by all Canadians.

*A Knock on the Door* Truth and Reconciliation Commission of Canada, 2015-12-18 "It can start with a knock on the door one morning. It is the local Indian agent, or the parish priest, or, perhaps, a Mounted Police officer." So began the school experience of many Indigenous children in Canada for more than a hundred years, and so begins the history of residential schools prepared by the Truth & Reconciliation Commission of Canada (TRC). Between 2008 and 2015, the TRC provided opportunities for individuals, families, and communities to share their experiences of residential schools and released several reports based on 7000 survivor statements and five million documents from government, churches, and schools, as well as a solid grounding in secondary sources. *A Knock on the Door*, published in collaboration with the National Research Centre for Truth & Reconciliation, gathers material from the several reports the TRC has produced to present the essential history and legacy of residential schools in a concise and accessible package that includes new materials to help inform and contextualize the journey to reconciliation that Canadians are now embarked upon. Survivor and former National Chief of the Assembly First Nations, Phil Fontaine, provides a Foreword, and an Afterword introduces the holdings and opportunities of the National Centre for Truth & Reconciliation, home to the archive of recordings, and documents collected by the TRC.

As Aimée Craft writes in the Afterword, knowing the historical backdrop of residential schooling and its legacy is essential to the work of reconciliation. In the past, agents of the Canadian state knocked on the doors of Indigenous families to take the children to school. Now, the Survivors have shared their truths and knocked back. It is time for Canadians to open the door to mutual understanding, respect, and reconciliation.

**The Ethnic Restaurateur** Krishnendu Ray, 2016-02-11 Academic discussions of ethnic food have tended to focus on the attitudes of consumers, rather than the creators and producers. In this ground-breaking new book, Krishnendu Ray reverses this trend by exploring the culinary world from the perspective of the ethnic restaurateur. Focusing on New York City, he examines the lived experience, work, memories, and aspirations of immigrants working in the food industry. He shows how migrants become established in new places, creating a taste of home and playing a key role in influencing food cultures as a result of transactions between producers, consumers and commentators. Based on extensive interviews with immigrant restaurateurs and students, chefs and alumni at the Culinary Institute of America, ethnographic observation at immigrant eateries and haute institutional kitchens as well as historical sources such as the US census, newspaper coverage of restaurants, reviews, menus, recipes, and guidebooks, Ray reveals changing tastes in a major American city between the late 19th and through the 20th century. Written by one of the most outstanding scholars in the field, *The Ethnic Restaurateur* is an essential read for students and academics in food studies, culinary arts, sociology, urban studies and indeed anyone interested in popular culture and cooking in the United States.

**The Oxford Handbook of Empirical Legal Research** Peter Cane, Herbert Kritzer, 2012-05-17 The empirical study of law, legal systems and legal institutions is widely viewed as one of the most exciting and important intellectual developments in the modern history of legal research. Motivated by a conviction that legal phenomena can and should be understood not only in normative terms but also as social practices of political, economic and ethical significance, empirical legal researchers have used quantitative and qualitative methods to illuminate many aspects of law's meaning, operation and impact. In the 43 chapters of *The Oxford Handbook of Empirical Legal Research* leading scholars provide accessible and original discussions of the history, aims and methods of empirical

research about law, as well as its achievements and potential. The Handbook has three parts. The first deals with the development and institutional context of empirical legal research. The second - and largest - part consists of critical accounts of empirical research on many aspects of the legal world - on criminal law, civil law, public law, regulatory law and international law; on lawyers, judicial institutions, legal procedures and evidence; and on legal pluralism and the public understanding of law. The third part introduces readers to the methods of empirical research, and its place in the law school curriculum.

**Shaping Terrain** Davids, René, 2016-08-10 Shaping Terrain shows how the physical landscape and local ecology have influenced human settlement and built form in Latin America since pre-Columbian times. Most urban centers and capitals of Latin American countries are situated on or near dramatically varied terrain, and this book explores the interplay between built works and their geographies in various cities including Bogotá, Caracas, Mendoza, Mexico D. F., Rio de Janeiro, Santiago de Chile, and Valparaíso. The multi-national contributors to Shaping Terrain have a broad range of professional experience as urbanists, historians, and architects, and many are globally renowned for their design work. They examine how humans negotiate with the existing environment and how the built form expresses that relationship. The result is a wide-ranging representation of the unique legacy of Latin America's urban heritage, which is a repository of possibilities for future cities.

Oil and Gas in the Disputed Kurdish Territories Rex J. Zedalis, 2012-05-16 This book examines the historical and contextual background to the oil and gas resources in the Kurdish territories, placing particular emphasis on the reserves situated in the disputed provinces. The volume is singularly unique in focusing on an examination of the rules reflected in both the national and the regional constitutional, legislative, and contractual measures and documents relevant to the question of whether the central government in Baghdad or the Kurdish Regional Government (KRG) in Erbil has a stronger claim to legal control over the oil and gas resources in the disputed Kurdish territories. As a subsidiary focus, the author also draws attention to how the basic thrust of the volume connects to broader jurisprudential issues regarding the nature and purpose of law, the matter of claims by native peoples to natural resources on traditional lands, and the place of regional minorities operating in a federal system. Since the law examined is domestic or municipal in origin, additional reference is made to the role that such law can play in the bottom up (as opposed to more conventional top down) development of international law. The book's opening chapters provide a valuable contextual introduction, followed by a number of substantive chapters providing an analytical and critical assessment of the controlling legal rules. Written in a scholarly, yet accessible style, and covering matters of basic importance to academics, lawyers, political scientists, government representatives, and students of energy and natural resources, as well as those of developing legal structures, *Oil and Gas in the Disputed Kurdish Territories* is an essential addition to any collection.
